**KWG RESOURCES INC ANNOUNCES  
PROPOSED PRIVATE PLACEMENT OF UNITS**

Toronto, Canada, March 20, 2025 – **KWG Resources Inc. (CSE: CACR and CACR.A)**, which carries on business as **The Canadian Chrome Company** (“**CCC**”, “**KWG**” or the “**Company**”) is pleased to announce a proposed private placement of up to 4,032,258 units (each a “**Unit**”) at a price of \$1.24 per Unit for aggregate proceeds of up to \$5,000,000 (the “**Offering**”). Each Unit will be comprised of one (1) CACR.A multiple-voting share and one (1) share purchase warrant enabling its holder to acquire one further CACR.A multiple-voting share from treasury upon payment of an exercise price of \$1.55 at any time within five (5) years after the date of the first closing of the Offering.

Each subscriber for Units must be an “accredited investor” within the meaning of applicable securities laws or otherwise qualify to purchase Units on a prospectus-exempt basis in accordance with applicable securities laws. The proceeds from the Offering will be used to fund the Company’s business focused on the acquisition of interests in, and the exploration, evaluation and development of, large-scale mineral deposits of chromite and other base metals and minerals including, without limitation, funding the Company’s overhead and operating expenses and the costs of this private placement.

The Company will pay finder’s fees of up to 5% of the aggregate amount subscribed for by subscribers referred to the Company by finders entitled to receive such fees in accordance with applicable securities laws, which fees will be payable in Units at deemed price of \$1.24 per Unit. All of the securities to be issued pursuant to this private placement will be subject to a four (4) month hold period.

This news release shall not constitute an offer to sell nor the solicitation of an offer to buy securities.

**About The Canadian Chrome Company:**

KWG, which carries on business as The Canadian Chrome Company, is an exploration stage company that is focused on identification, acquisition, consolidation, exploration, development and evaluation of large-scale deposits of minerals including chromite, base metals and strategic minerals and, where applicable, in the development of transportation and electrification links to access remote areas where these deposits may be located. The Canadian Chrome Company is a registered business style of KWG Resources Inc.

In respect of chromite, KWG is the owner of 100% of the Black Horse chromite project (formerly part of Fancamp's "Koper Lake-McFaulds" properties) in which Bold Ventures Inc. is carried through exploration of the former Fancamp claims for 10% of the chromite project. KWG also holds other area interests including a 100% interest in the Hornby claims, a 15% vested interest in the McFaulds copper/zinc project and a vested 30% interest in the Big Daddy chromite project.

KWG also owns 100% of Canada Chrome Corporation (the "Subsidiary") which staked mining claims between Aroland, Ontario (near Nakina) and the Ring of Fire. The Subsidiary has conducted a surveying and mineral and soil testing program to explore for minerals and to assess the prospects for the engineering and construction of a railroad or other transportation facility along that route between the

Ring of Fire and Aroland, Ontario covering the claims staked by the Subsidiary. The Subsidiary identified deposits of aggregate along the route and made application for 32 aggregate extraction permits. The Subsidiary engaged Cormorant Utilities and Rail-Veyor Technologies for Engineering Proposals for the construction of a transportation and utility corridor within the route to connect the Ring of Fire area to transportation and electrification systems which run through Nakina, Ontario (near Aroland) connecting to southern Ontario and the rest of Canada and has received those proposals. Those proposals include electrification systems connecting to several First Nations communities in the James Bay Lowlands including in the Ring of Fire area.

KWG has also acquired intellectual property interests, including a lower cost and reduced carbon method for the direct reduction of chromite to metalized iron and chrome using natural gas. KWG subsidiary Muketi Metallurgical LP has acquired two chromite-refining patents in Canada and one in each of the USA, South Africa and Kazakhstan, and is prosecuting an application in Turkey.
