NOTES TO FINANCIAL STATEMENTS

FOR THE THREE MONTHS ENDED MARCH 31, 2013
(Stated in Canadian dollars)
(Prepared by Management)

1. NATURE OF OPERATIONS

The Company is a publicly listed company incorporated in Ontario and its shares are listed on the CNSX. It was formed on February 1, 1988 following the amalgamation of two predecessor companies. The Company is primarily engaged in the acquisition and exploration of mineral properties in Canada.

The head office and principal address of the Company are located at 130 King Street West, Suite 3680, Toronto Ontario M5X 1B1.

2. BASIS OF PRESENTATION

(a) Statement of Compliance

These interim financial statements are unaudited and have been prepared in accordance with IAS 34 “*Interim Financial Reporting*” (“IAS 34”) using accounting policies consistent with the International Reporting Standards (“IFRS”) issued by the International Accounting Standards Board (“IASB”) and Interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”).

These financial statements have been approved by the Board of Directors of the Company on May 30, 2013.

(b) Basis of Presentation

The financial statements have been prepared on the historical cost basis. Current assets are recorded at fair value.

These financial statements have been prepared on the basis that the Company is a going concern, which contemplates the realization of its assets and the settlement of its liabilities in the normal course of operations. The ability of the Company to continue operations is dependent upon obtaining the necessary financing to complete the development of its properties. These financial statements do not include any adjustments related to the carrying values and classifications of assets and liabilities should the Company be unable to continue as a going concern.

The Company incurred a loss of \$70,462 for the three months ended March 31, 2013 (2012 – \$99,582) and has working capital deficiency of \$95,673 as at March 31, 2013 (December 31, 2012 – working capital \$637,196). The ability of the Company to carry out its business plan rests with its ability to secure additional equity and other financing.

3. SIGNIFICANT ACCOUNTING POLICIES

There have no changes to significant accounting policies during the period ended March 31, 2013.

Reference should be made to the audited financial statements for the year ended December 31, 2012 for significant accounting policies under IFRS.

5. INTEREST IN MINING PROPERTIES (Continued)

Elliot Lake

Prior to 2000, the Company had written down its interest in its mineral property in Elliot Lake, Ontario. The Company has not abandoned the property and it incurred deferred costs during the three months ended March 31, 2013 of \$1,356 (2012 - \$106) in order to maintain the property interest in good standing.

Larder Lake Group

In 2010, the Company signed three Mining Option Agreements (the "Agreements") whereby the Company can earn up to a 100% interest in certain mining claims in McVittie, Ossian and Katrine Townships, Ontario over a four year period. These agreements were amended in 2011 and 2012. In order to acquire up to a 100% interest in these claims, the Company must fulfil the following commitments:

	Cash	Share units	Shares	Work commitment
2010	\$ 70,000 (fulfilled)	466,668 (fulfilled)	-	\$ 83,333 (fulfilled)
2011	90,000 (fulfilled)	333,334 (fulfilled)	66,667 (fulfilled)	416,667 (fulfilled)
2012	133,333	466,666	166,667 (fulfilled)	700,000
2013	66,667	466,666	-	866,667
2014	13,334	466,666	-	1,100,000
2015	-	133,334	-	333,333
Total consideration	\$ 373,334	2,333,334	233,334	\$ 3,500,000

Each share unit consists of one common share and one common share purchase warrant. Two of the agreements allow that each warrant gives the holder the right to purchase one common share of the Company at the higher of \$0.15 or the volume weighted average trading price for the 30 days previous to the issuance. The third agreement allows that each warrant gives the holder the right to purchase one common share of the Company at the higher of \$0.30 or the volume weighted average trading price for the 30 days previous to the issuance.

The above properties are subject to a 2% NSR.

In February 2011, the Company acquired 110 staked claim units on approximately 1,760 hectares (4,000 acres). This property is contiguous to its Larder Lake Group. The company is required to spend \$nil on this property for the year ended the anniversary date of the agreement, February 7, 2012 and \$44,000 per year thereafter.

Measurement Uncertainty

The carrying values of the Company's mining properties at March 31, 2013 was \$2,665,916 (December 31, 2011 - \$1,989,006). Management's review of these carrying values indicated that at March 31, 2012, the properties were not impaired. Management's conclusion is dependent on assumptions about several factors including future operating costs, mineral production levels, future mineral prices and capital equipment needs and costs. Management will continue to monitor the critical factors impacting its impairment analysis and will re-evaluate the carrying value of its long-lived assets as necessary.

6. RELATED PARTY INFORMATION

A company controlled by a director charged fees in the three months ended March 31, 2013 in the amount of \$36,000 (2012 - \$36,000), for administrative and bookkeeping services, which are included in office, general and investor relations expense. The contract between Ateba and this company allows for a monthly fee of \$12,000 and expires in June 2014.

During the three months ended March 31, 2013, consulting fees of \$15,000 (2011 - \$15,000) were charged by the Chief Financial Officer for financial management services.

These transactions are in the normal course of operations and are measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties. All related parties payables are due on demand, non-interest bearing and are unsecured.

7. CAPITAL STOCK

(a) Authorized and Issued

Unlimited number of special shares issuable in series
Unlimited number of common shares

(b) Stock Option Plan

In April 2011, the Company changed its share option plan. The new plan sets out that options to purchase common shares may be granted by the Board of Directors to directors, officers, employees and service providers of the Company for terms up to five years at a price equal to the market price prevailing on the date of the grant. The maximum number of common shares available for issuance under the plan is 10% (5,686,591) of the issued and outstanding common shares, with no more than 5% (2,843,295) being granted to any one person.

When options are issued to employees and consultants for services rendered, a charge is recognized against income or against interest in mining properties for individuals directly related to mining projects, consistent with the recommendation of the CICA Handbook Section adopted by the Company. The Company uses the Black-Scholes option valuation model to value stock options.

The fair value of each option was estimated on the date of grant. There were no options issued in the three months ended March 31, 2012 nor in the year ended December 31, 2012.

Expected volatility has been based on historical volatility of the Company's public shares on a monthly basis.

12. SEGMENTED INFORMATION

The Company conducts its business in a single operating segment being the acquisition, exploration and development of mineral properties. All mineral properties are located in Canada. In addition, all revenues, expenses and other assets are located in Canada.

13. CAPITAL MANAGEMENT

The Company considers its capital to include components of shareholders' equity.

The Company's objectives in managing its capital are: to maintain adequate levels of funding to support its expenditures arising from the Company's investments; to safeguard the Company's ability to continue as a going concern in order to pursue the exploration of its properties; to maintain a flexible capital structure for its projects for the benefit of its stakeholders; to maintain corporate and administrative functions necessary to support the Company's operations and corporate functions; and to seek out and acquire new projects of merit.

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition, exploration and development of mineral property. The capability of the Company to carry out planned exploration and pay for administrative costs is dependent on its ability to secure additional equity or other financings. The Company will assess properties and seek to acquire properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so.

The Company's investment policy is to invest excess cash in low risk, highly liquid, short-term interest bearing investments, selected with regards to the expected timing of upcoming expenditures.

The Company expects its current capital resources will be sufficient to carry out its exploration plans, operation plans and operations through its current operating period.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

There were no changes in the Company's approach to capital management during the three months ended March 31, 2013 or year ended December 31, 2012. The Company is not subject to externally imposed capital requirements.

15. FINANCIAL INSTRUMENTS AND FINANCIAL RISK FACTORS

Fair value

The Company has determined the estimated fair value of its financial instruments based on estimates and assumptions. The actual results may differ from those estimates and the use of different assumptions or methodologies may have a material effect on the estimated fair value amounts.

The fair value of cash and cash equivalents, lawyer's trust account, accounts receivable, accounts payable and accrued liabilities, and loan payable are comparable to their carrying value due to the relatively short period to maturity of these instruments.

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit risk

The Company's credit risk is primarily attributable to short-term investments and receivables included in current assets. The Company has no material concentration of credit risk arising from operations. Cash and term deposit consist of bank deposits and a guaranteed investment certificate, which have been invested with a Canadian Chartered Bank, from which management believes the risk of loss to be remote. Other credit risk primarily consists of HST receivable. Management believes that credit risk with respect to receivables is minimal.

Liquidity risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at March 31, 2013, the Company had cash and cash equivalents of \$76,017 (December 31, 2012 - \$249,455) to settle accounts payable and accrued liabilities of \$233,285 (December 31, 2012 - \$221,574). The ability of the Company to continue to pursue its exploration activities is dependent on its ability to secure additional equity or other financing. All of the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates and equity prices.

(a) Interest rate risk - The Company has cash and cash equivalents bearing fixed interest rates and no interest bearing debt. The Company's current policy is to invest excess cash in investment-grade term deposit certificates issued by its banking institution. The Company periodically monitors the investments it makes and is satisfied with the credit of its bank.

(b) Price risk - the Company is exposed to price risk with respect to equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market. The Company closely monitors individual equity movements, and the stock market to determine the appropriate course of action to be taken by the Company.

(c) Commodity price risk - the Company is exposed to price risk with respect to commodity prices. Changes in commodity prices will impact the economics of development of the Company's mineral properties. The Company closely monitors commodity prices to determine the appropriate course of action to be taken by the Company.

Sensitivity analysis

As at March 31, 2013, the carrying value amounts of the Company's financial instruments approximates their fair value.
