KING ANNOUNCES MOBILIZATION FOR DRILLING AT HISTORICAL HOWARD COPPER MINE

NOT FOR DISTRIBUTION IN THE U.S. OR DISSEMINATION THROUGH U.S. NEWSWIRE SERVICES

Toronto, Ontario February 24, 2025 – King Global Ventures Inc. (CSE:KING) (OTC: KGLDF) (FSE: 5LM1) (the “Company” or “King Global”) is pleased to announce that it has directed Boart Longyear to mobilize for the start of its fully funded Maiden drill program at its Howard Copper Mine property. Boart Longyear has been contracted to complete the phase 1, drill program which will entail 6 different holes for a total of 2,500 metres of drilling.

Robert Dzisiak President & CEO of King Global Ventures Inc. states “We are very pleased to announce the mobilization of Board Longyear to commence our phase 1, drill program at our Howard Copper Mine Property. The Howard Copper Mine is a historical producing mine with copper grades between 3 to 5% copper. Our intent is to test the continuity of copper mineralization below previous workings at the 500, foot level.”

The Howard Copper Mine Property is located on 78 acres of patented land approximately 100 km (64 miles) north of Phoenix AZ. Discovered in the early 1920’s, small scale production and development focused on high-grade copper. An estimated 100,000 tonnes of copper grading between 3-5% copper was mined from the property until it was closed in 1942 due to the inability to secure fuel rations during WW2. Historical reports state that the main shaft was sunk to the 900-foot level, but that no ore was mined below the 500-foot level. King has secured permits for drilling up to 40 holes on the property for a period of 1 year.

About King Global Ventures:

Black Canyon Property in Arizona

King Global Ventures is focused on the exploration of precious and base metals in North America. The Black Canyon Project in Yavapai County Arizona is comprised of 133 contiguous concessions covering a total area of 2,437 ac, including 12 former operating mines including the past producing Howard Copper Mine. And is situated 100 km (64 miles) north of Phoenix Arizona. The Black Canyon Project represents an early-stage exploration opportunity targeting copper-gold-silver-zinc, Volcanogenic Massive Sulphide (“VMS”) mineralization. The geology of Yavapai County, Arizona is notable due to the presence of a variety of base

and precious metal deposit types. The region has a significant history of exploration, discovery and mining operations, including base metals from mining operations like Bagdad, Jerome and Cleopatra. The property is on trend and is approximately 8 km (12 miles) N.W. of Arizona Metals and 100 km (60 miles) south of the historic Jerome Copper mine.

York Property in Quebec

The York Property is comprised of 77 claims exceeding 40 sq. km. The Property is on trend between Azimut's Elmer Property and the Eleonor Gold Mine. The Eleonor Mine is hosted by rocks similar to the clastic sediments known to host the Ukaw gold showings.
