

MISTANGO RIVER'S OMEGA GOLD PROPERTY 3D MODELING/COMPLETES DEEP IP SURVEY

Kirkland Lake, Ontario May 18, 2011: Mistango River Resources Inc. (MIS) is pleased to provide an exploration update on the Company's Omega Gold Property.

MIS has received the final report on 11.3 kilometers of deep penetrating Induced Polarization geophysical survey (IP) conducted by Larder Geophysics Ltd on its 100% owned Omega Property located on the Larder Lake / Cadillac Break approximately two kilometers east of the town of Larder Lake, Ontario. The survey has generated as many as six new targets to a depth of approximately 500 meters.

The Company also continues with 3D compilation of the past producing Omega Mine using Surpac Software. The underground workings, mineralized zones and historic diamond drilling completed by the Company is being intergrated with the new deep IP survey.

The upcoming proposed drilling program will further test the known mineralized zones within the mine as well as investigating the newly identified targets. Drilling is expected to commence near months end.
