

Mistango River Resources Announces Receipt of its Omega Exploration Permit and the Engagement of Consulting Geologists and Drilling Supervisor.

KIRKLAND LAKE, ONTARIO, August 20, 2019: Mistango River Resources Inc. (CSE: MIS, “Mistango” or the “Company”) is very pleased to announce that it has received its Omega Project exploration permit. As such the Company is to commence its Phase V drilling program on the Omega Project. Mistango is also pleased to announce that it has retained the services of Aduivare Geology and Engineering Ltd. (“Aduivare”) as consulting geologists for this drill program.

Aduivare’s geologist, Ms. Catherine Pitman, will be representing them as consulting geologist on the Company’s Omega Phase V drill program. Ms. Pitman has prior knowledge of the Omega property as she was the principal geologist who worked for AMC Consulting Ltd. (“AMC”) on the Omega Project when AMC issued Mistango’s previous National Instrument 43-101 compliant mineral resource estimate on the Omega Project in 2013. Mistango is confident in Aduivare’s and Ms. Pitman’s professional integrity and expertise that they will provide in updating the Omega’s resource and exploration potential.

Mistango is also pleased to welcome Ms. Tammy Huard, BSc, to the Mistango team. Ms. Huard’s expertise includes supervision and co-supervision of drilling campaigns focusing on VMS deposits and Au deposits in stockwork granite and quartz along with Uranium targets in Northern Saskatchewan. Ms. Huard has also worked on the Quesnel trough area of central B.C, exploration and development of Howell’s magnetic taconite deposit in Quebec, exploration and mine development in Northern Alberta as well as regional geology of Northern Labrador.

Mistango is excited to be implementing its new program and expects the Omega to be the central focus of activity in the Larder camp.

Donald R. Kasner C.O.O, commented:

“We are exceptionally pleased to have someone of Catherine and Tammy’s expertise join our team. Their expertise will effectively assist the company in planning and executing it’s exploration program on the flagstone Omega Project.”
