The Company intends to have its shares posted for trading on the OTCQB Venture Market (“**OTCQB**”) operated by the OTC Markets Inc. and is working with a market maker to have a Form 211 filed with the Financial Industry Regulatory Authority to allow a broker-dealer to post a bid for the Company’s common shares on the OTC Link ATS system. Concurrently with the Form 211 filing, the Company will be completing an OTCQB Application and submitting such to OTC Markets Inc. The Company is planning a winter expedition overland from Schefferville, Quebec to various points within its 500 square kilometer exploration claim package. Expected items include frozen lakes, complex traverses, riverbeds and rolling hills. Next month snowmobiles will sally from Schefferville toward the Cancun zone, Willbob Lake, Retty Lake camp, and Pogo deposit. Using ground penetrating radar this expedition will measure ice thickness which allows calculation of supported tonnage by an ice road. If feasible the expedition will overnight at Retty Lake camp. Figure one shows possible route(s).
