1. Nature of the Company and Going concern assumption

Cerro Grande Mining Corporation (the Company or CEG) and its subsidiaries is a mining, exploration and development company which produces gold, silver and copper, with operations mainly in Chile. The Company was incorporated under the Canada Business Corporations Act, and its Common Shares are listed on the Canadian Securities Exchange ("CSE") trading under the symbol "CEG" and on the OTCQB trading under the symbol CEGMF. The Company is domiciled in Canada and the address of its records office is 1 King Street West, Suite 4009 Toronto Ontario M5H 1A1, Canada. The registered office is Royal Bank Plaza, South Tower, 200 Bay Street Suite 3800, Toronto, ON M5J 2Z4, Canada.

The company's significant subsidiary, Companía Minera Pimentón (Pimentón) was placed into bankruptcy. See also Note 12. The other subsidiaries of CEG, including Compañia Minera Til Til, Compañia Minera Catedral, Compañia Minera Tordillo, Compañia Minera Bandurrias and Compañia Minera Cal Norte are not affected by the bankruptcy of Compañia Minera Pimenton.

These consolidated financial statements have been prepared on a "going concern" basis which contemplates that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business. As at June 30, 2017, the Company has a negative working capital of \$3,094 (September 30, 2016 – negative \$10,252).

While the Company had operations generating revenue it continues to be reliant on financing from related parties to finance its operations and working capital. The availability of sources of additional financing if required in the future cannot be assured at this time and accordingly, these material uncertainties cast significant doubt about the Company's ability to continue as a going concern. The consolidated financial statements do not include adjustments to the carrying values and classifications of recorded assets and liabilities and related revenues and expenses that would be necessary should the Company be unable to continue as a going concern and those adjustments may be material. See also Note 12.

2. Basis of presentation

a. Statements of compliance

These unaudited condensed interim consolidated financial statements are expressed in thousands of US dollars and have been prepared in compliance with International Financial Reporting Standards ("IFRS") as issued by the International Standards Board ("IASB") including IAS34 Interim Financial Reporting. The condensed interim consolidated financial statements should be read in conjunction with the Company's annual consolidated financial statements for the year ended September 30, 2016 which have been prepared in accordance with IFRS as issued by the IASB.

The accounting policies and the application adopted are consistent with those disclosed in Note 3 to the Company's consolidated financial statements for the year ended September 30, 2016 except as described below.

For the Nine Months Ended June 30, 2017

(Expressed in thousands of U.S. dollars, except share and per share amounts)

The preparation of condensed interim consolidated financial statements requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities and expenses.

All financial information presented in USD has been rounded to the nearest thousand unless otherwise stated.

These condensed interim consolidated financial statements were approved by the Board of Director on August 30, 2017.

b. Use of estimates and judgments

The preparation of the condensed interim consolidated financial statements in conformity with IFRS requires the Company to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the condensed interim consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. The Company also makes estimates and assumptions concerning the future. The determination of estimates requires the exercise of judgment based on various assumptions and other factors such as historical experience and current and expected economic conditions. Actual results could differ from those estimates.

The more significant areas requiring the use of management estimates and assumptions relate to future cash flow estimates for asset impairments/reversals, any asset retirement obligation, estimation of useful lives of mining properties, plant and equipment, stock—based compensation and the provision for income taxes and composition of future income tax assets and liabilities. These estimates and judgments have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the financial period.

Estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Mineral resources and reserves estimates are used in the calculation of impairment estimation, amortization and forecasting the timing and payment of close down, restoration costs and clean-up costs.

Non-current assets are tested for impairment when events or changes in circumstance suggest that the carrying amount may not be recoverable. During the year ended September 30, 2015 the Company recorded an impairment charge of \$6,556 related to the Pimenton project, primarily as a result of the decrease in the grade and future gold and copper prices. The recoverable amount was calculated using the value-in-use method, which is the expected present value of future cash flows from the asset, using a pre-tax discounted rate of 7.9%. The remaining \$181 impairment charge relates to the Til Til project and represents a full write down of the mining properties. At June 30, 2017 all mining assets were written off due to the bankruptcy of the mining subsidiary. See Note 12.
