## **Newlox Gold Ventures Corp Provides an Operational Update and Defines Its Near-Term Strategy**

Vancouver, British Columbia – April 16<sup>th</sup>, 2025 – NEWLOX GOLD VENTURES CORP. (“**Newlox**” or the “**Company**”) is pleased to provide an update on gold recovery operations in Costa Rica and clarify the Company’s near-term strategy.

Newlox’s operations team reports that the processing plant has delivered good operational metrics in recent cycles, but throughput has been limited due to a working capital deficiency resulting from the recently revoked cease trade order, which has limited the Company’s ability to finance.

Management was advised that during the most recent operational cycle, which was completed at the end of March, the Company’s operations processed mineralized material over a 24-day operating cycle and produced 943.04 grams (30.319 troy ounces) of pure gold for sale. Operational management reported that the recovery rate was stable at approximately 90% while plant availability was 86%, with 24 effective workdays out of the total 28-day period.

With sufficient working capital, the Company believes that the Costa Rica processing plants should be able to process more material immediately and increase productivity. Given the strong gold price, management has determined that focusing on improving Costa Rica's production is the optimal near-term strategy.

### **About Newlox**

Newlox Gold operates precious metals recovery operations in Costa Rica. The Company’s operations provide environmental services to local stakeholders while simultaneously recovering gold and silver. Newlox Gold’s is focused on providing modern and efficient processing options to local miners which displace damaging artisanal processing methods while providing economic benefits to all stakeholders.

The Company has established agreements with local mining cooperatives and individuals in Costa Rica to supply mineralized materials, which are the feedstock for Newlox’s reclamation and processing operations. Because the Costa Rican Government has legalized local miners in the area of Newlox’s operations, the Company is able to partner with these local formalized mining groups to implement its unique coexistence model for socially and environmentally positive gold production.

The longer-term objective of Newlox Gold Ventures Corp is to significantly expand its business model in Latin America while contributing to an environmental clean-up effort and setting a high standard of social responsibility. Management believes that the expansion of Newlox Gold’s environmentally and socially positive business model will deliver economic benefits to shareholders and other stakeholders while contributing to a healthier planet.
