## **TRAVA 2 - NATURAL GAS DRILLING UPDATE**

**Vancouver, British Columbia** – March 17, 2017: BRS Resources Ltd. (“BRS” or the “Company”) (TSX.V: BRS) has been advised that the Trava 2D exploration well, located in the southern half of Corte dei Signori permit area in the Po Valley of northern Italy, has been successfully drilled and logged to a total depth of 3,619 ft (1,103 m).

The Trava 2D well, with multiple reservoir targets in the prolific Pliocene-age Porto Garibaldi sand, encountered numerous gas shows during the drilling process. The well is being completed and production tests are scheduled to begin later this month.

“Everything so far indicates we have a commercially viable well, but we’ll know much more after the production tests are completed,” said Byron Coulthard, president and CEO of BRS. “The successful drilling of Trava 2 wells confirms AleAnna’s technical and operational abilities in safely executing a complex drilling operation.

“Furthermore,” Coulthard continued, “during the drilling phase, AleAnna encountered all the formation tops and stratigraphic markers in the well at the depths indicated from our 3D seismic mapping, which is exciting in its own right, because it proves 3D seismic works in the Po Valley. From our large library of 3D seismic surveys, we have identified a number of other drillable prospects in the Po Valley.”

AleAnna holds thirty-one exploration applications and permits for over 2.9 mm acres (11,782 sq. km) in Italy. To date, AleAnna has also amassed the largest portfolio of newly acquired 3D geophysical data onshore in Italy and has two successful wells in final stage of production concession award.

**ON BEHALF OF THE BOARD OF DIRECTORS**

Byron Coulthard  
President/CEO

*Disclaimer for Forward-Looking Statements*

This press release includes certain "forward-looking statements." Forward-looking statements are statements or projections that involve various risks and uncertainties regarding future events related to BRS. Actual results may differ materially from those currently anticipated due to a number of factors beyond the control of BRS including any negative change in the law, regulatory or political environment which would negatively affect BRS's or AleAnna's ability to obtain permits necessary for drilling; BRS/AleAnna's lack of sufficient financing to proceed with proposed drilling; the continued price and demand for natural gas; BRS's ability to hire and retain personnel necessary to successfully operate its business; the speculative nature of natural resource exploration activities; changes in operating costs; changes in economic conditions and conditions in the resource, foreign exchange and other financial markets; changes in investments and exploration expenditure levels; litigation, legislation, environmental, judicial, regulatory, political and competitive developments in areas in which BRS operates; technological, mechanical and operational difficulties encountered in connection with the BRS' activities; and other risk factors detailed in BRS' various filings filed on SEDAR at [www.sedar.com](http://www.sedar.com). You are urged to consider these factors carefully in evaluating the forward-looking statements contained herein and are cautioned not to place undue reliance on such forward-looking statements, which are qualified in their entirety by these cautionary statements. These forward-looking statements are made as of the date hereof and BRS disclaims any intent or obligation to update publicly any forward-looking statements, whether as a result of new information, future events or results or otherwise, unless required by applicable law.
