

AVANTI GOLD CORP.

MANAGEMENT DISCUSSION AND ANALYSIS

For The Three and Nine Months Ended January 31, 2025

OVERVIEW

This management's discussion and analysis ("MD&A") provides an analysis of our financial situation which will enable the reader to evaluate important variations in our financial situation for the three and nine months ended January 31, 2025, compared to the three and nine months ended January 31, 2024. This report prepared as at March 28, 2025 intends to complement and supplement our unaudited condensed interim consolidated financial statements (the "financial statements") as at January 31, 2025 which have been prepared in accordance with International Financial Reporting Standards, and in accordance with International Accounting Standards ("IAS") 34, Interim Financial Reporting, as issued by the International Accounting Standards Board ("IASB") and should be read in conjunction with the unaudited condensed interim consolidated financial statements and the accompanying notes. Readers are also advised to read the Company's audited financial statements (the "financial statements") and accompanying notes for the year ended April 30, 2024, (the "financial statements"), which have been prepared in accordance with International Financial Reporting Standards "IFRS".

Our financial statements and the management's discussion and analysis are intended to provide a reasonable base for the investor to evaluate our financial situation.

Our financial statements have been prepared using accounting policies consistent with IFRS. All dollar amounts contained in this MD&A are expressed in Canadian dollars, unless otherwise specified.

Where we say "we", "us", "our", the "Company", "ACG" we mean Avanti Gold Corp, as it may apply.

FORWARD LOOKING STATEMENTS

Certain statements in this report may be forward-looking statements, which reflect management's expectations regarding our future growth, results of operations, performance and business prospects and opportunities including statements related to the development of existing and future property interests, availability of financing and projected costs and expenses. Forward-looking statements consist of statements that are not purely historical, including any statements regarding beliefs, plans, expectations or intentions regarding the future. Such statements are subject to risks and uncertainties that may cause actual results, performance or developments to differ materially from those contained in the statements. No assurance can be given that any of the events anticipated by the forward-looking statements will occur or, if they do occur, what benefits we will obtain from them. These forward-looking statements reflect management's current views and are based on certain assumptions and speak only as of the date of this report. These assumptions, which include management's current expectations, estimates and assumptions about our current mineral property interests, the global economic environment, the market price and demand for commodities and our ability to manage our property interests and operating costs, may prove to be incorrect. A number of risks and uncertainties could cause our actual results to differ materially from those expressed or implied by the forward-looking statements, including: (1) a downturn in general economic conditions, (2) a decreased demand or price of minerals, (3) delays in the start of projects with respect to our property interests, (4) inability to locate and acquire additional property interests, (5) the uncertainty of government regulation and politics in North America regarding mining and mineral exploration, (6) potential negative financial impact from regulatory investigations, claims, lawsuits and other legal proceedings and challenges, and (7) other factors beyond our control.

Additional information relating to Avanti Gold Corp, is available by accessing the SEDAR PLUS website at <https://www.sedarplus.ca/>.

DESCRIPTION OF BUSINESS

Avanti Gold Corp. is a mineral exploration company working on a gold opportunity in the Democratic Republic of the Congo, located in the Fizi territory of South Kivu Province. The Company was incorporated on May 9, 2014, and on September 14, 2020, the Company changed its name from JDF Explorations Inc. to Valorem Resources Inc. and on April 21, 2023, the Company changed its name to Avanti Gold Corp.

The Company is a publicly listed company on the Canadian Stock Exchange (“CSE”), trading under the symbol “AGC” and on the Frankfurt Stock Exchange under the symbol “X37”. The Company is currently working the Misisi Gold Project which has an inferred mineral resource of 3 million ounces.

The head office and principal address is 2380 – 1055 West Hasting Street, Vancouver, British Columbia, V6E 2E9. The registered and records office of the Company is located at 800 – 885 West Georgia Street, Vancouver, British Columbia, V6C 3H1.

SUMMARY OF BUSINESS ACTIVITIES –ACQUISITION OF MTM LTD.

Acquisition of MTM Ltd.

Background:

On June 21, 2024, the Company entered into a share exchange agreement with MTM Ltd. (“MTM”) to acquire 100% of MTM, a privately held arms-length company established under the laws of the Republic of Seychelles. MTM, with a local partner, holds rights to gold prospecting licenses in the Magisterial District of Molopo, South Africa along with cash on hand. The license rights cover an area of approximately 90 hectares (“ha”), located in the highly prospective Kraaipan Granite-Greenstone Belt terrain, which extends 400 kilometers (“km”) from southern Botswana into the Northwest Province of South Africa. As consideration, the Company has issued 29,000,000 common shares at \$0.13 per share for a total consideration of \$3,770,000.

Accounting treatment:

In accordance with IFRS 3 Business Combinations, a business combination is a transaction in which an acquirer obtains control of a business which is defined as an integrated set of activities and assets that is capable of being conducted and managed to provide a return to investors. For an integrated set of activities and assets to be considered a business, the set needs to contain inputs and processes. This acquisition does not meet the definition of a business combination as the primary assets are mineral claims. Consequently, the transaction has been recorded as an acquisition of an asset. The transaction price was negotiated and entered into at arm’s length. As the transaction was entered into at arm’s length, the consideration is presumed to be equal to the fair value of the net assets acquired unless there is evidence to the contrary. On the date of acquisition, there was no evidence to suggest that the fair value of the net assets acquired did not equal the consideration paid. The consideration's fair value was determined using a level 1 (valuations based on quoted prices, unadjusted, in active markets for identical assets or liabilities) input.

The Company’s significant accounting policy is to expense all exploration and evaluation acquisition cost and expenditures, unless commercial feasibility has been met. On the date of acquisition, commercial feasibility was not met and based on the Company’s historically significant accounting policy, rather, the Company expensed the difference between the consideration paid and the net assets acquired to the Consolidated Statement of Loss and Comprehensive Loss to exploration and evaluation expense.

The following table summarizes the consideration paid and the allocation to the assets and liabilities acquired as at the date of acquisition:

Avanti Gold Corp.
Management discussion and analysis
For the period ended January 31, 2025

Purchase price	\$
29,000,000 common shares	3,770,000
Total consideration paid	3,770,000
Amounts receivable	865,000
Advances from related parties	(63,250)
Assets acquired	801,750
Net exploration and evaluation expenditures	2,968,250

SUMMARY OF BUSINESS ACTIVITIES –ACQUISITION OF REGENCY MINING LTD.

Acquisition of Regency Mining Ltd.

Background:

On December 22, 2022, the Company entered into a share exchange agreement with Regency Mining Ltd. (“Regency”) to acquire 100% of Regency, a private corporation existing under the laws of Seychelles. Regency owns a 99.43% interest in Casa Mining Ltd. (“Casa”), and indirectly through its ownership of Casa, owns a 73.84% interest in Leda Mining Congo S.A. (“Leda”). Leda owns an interest in and to the Misisi Gold Project (“Gold Project”) located in the Fizi territory of South Kivu province, in the DRC. The Gold Project covers 133 square kilometres on three contiguous mining licenses, valid until 2045.

Business rationale and judgements:

The Gold Project represents a significant opportunity for the Company. From the Amended and Restated Technical Report NI 43-101 filed on June 30, 2023, the Company has noted the following highlights:

- Large contiguous licensed land position extending 133 square kilometers valid through to 2045.
- Host to an Inferred Resource of 40.8 million tonnes at an average grade of 2.37 g/t Au (representing 3.11 million ounces of gold) at Akyanga.
- Significant upside exploration potential on a 50 km prospective gold belt, of which numerous targets have been identified from prior exploration activity (geophysics, sampling and prospecting) including the directly adjacent Akyanga East prospect.
- Extensive past exploration work with technical reports generated including three historical resource estimates using the JORC Code and a Scoping Study (SRK, 2014)

The amended and restated technical report NI 43-101 filed June 30, 2023 on SEDAR PLUS at www.sedarplus.ca were provided by John Arthur (Ph.D, CGeol FGS); Ephraim Masibhera (B.Sc. (Geol.), MSc (Cd), MGSSA, Pr. Sci Nat) and Dian Heinrich Page (B.Sc, MEng, Pr. Sci Nat). Dr. John Arthur is the principal Qualified Person (or “QP”) as defined in National Instrument 43- 101 – Standards of Disclosure for Mineral Projects (“NI 43-101”).

Subject to accessing sufficient funding, the Company is looking to explore this opportunity and conduct further work to identify and commercialize potential gold deposits. There are no further commitments to acquire these claims.

Accounting treatment:

In accordance with IFRS 3 Business Combinations, a business combination is a transaction in which an acquirer obtains control of a business which is defined as an integrated set of activities and assets that is capable of being conducted and managed to provide a return to investors. For an integrated set of activities and assets to be considered a business, the set needs to contain inputs and processes. This acquisition does not meet the definition of a business combination as the primary assets are mineral claims. Consequently, the transaction has been recorded as an acquisition of an asset. The transaction price was negotiated and entered into at arm’s length. As the transaction was entered into at arm’s length, the consideration is presumed to be equal to the fair value of the net assets acquired unless there is evidence to the contrary. On the date of acquisition, there was no evidence to suggest that the fair value of the net assets acquired did not equal the consideration paid. The consideration's fair value was determined using a level 1 (valuations based on quoted prices, unadjusted, in active markets for identical assets or liabilities) input.

The Company's significant accounting policy is to expense all exploration and evaluation acquisition cost and expenditures, unless commercial feasibility has been met. On the date of acquisition, commercial feasibility was not met and based on the Company's historically significant accounting policy, rather, the Company expensed the difference between the consideration paid and the net assets acquired to the Consolidated Statement of Loss and Comprehensive Loss to exploration and evaluation expense.

The following table summarizes the consideration paid and the allocation to the assets and liabilities acquired as at the date of acquisition:

Purchase price	\$
16,000,000 common shares	5,680,000
2,000,000 finder common shares	710,000
Cash payments	656,567
Transaction costs	3,600
Total consideration paid	7,050,167
Cash	815
Prepays	4,165
Accounts payable	(2,301,944)
Loans payable	(1,091,749)
Deferred consideration payable	(2,731,200)
Advances from related parties	(1,025,515)
Net liabilities acquired	(7,145,428)
Non-controlling interest	1,901,902
Liabilities acquired	(5,243,526)
Net exploration and evaluation expenditures	12,293,693

Business Acquisition Report filing:

The Company filed the business acquisition report on SEDAR PLUS website at <https://www.sedarplus.ca/on> February 23, 2023.

Corporate Highlights - Appointments

On May 7, 2024, Ian MacLean was appointed as the Company's Chief Executive Officer. Ian MacLean has over 25 years of experience in the mining industry, where he has played key roles in the formation and success of several mining ventures, demonstrating an aptitude for driving transformative growth and cultivating sustainable shareholder value. Mr. MacLean replaces Dr. Colin Porter, the Company's former CEO. Dr. Porter will continue to serve as a member of the Board and Technical Consultant of the Company.

On May 3, 2024, Sir Samuel Jonah was appointed as a Director and Chairman of the Board. Sir Samuel Jonah, former President of AngloGold Ashanti and a distinguished leader renowned for his groundbreaking contributions to the mining sector in Africa, brings a wealth of experience that will help propel the growth of the Company.

On February 15, 2024, Martino De Ciccio was appointed senior advisor to the Company. Martino De Ciccio has over 15 years of experience in mining industry with a strong value creation track record and significant knowledge across strategy, capital markets, corporate finance, and ESG, coupled with a profound understanding of the African mining landscape. Martino De Ciccio currently serves as Deputy CFO and Head of Investor Relations at Endeavour Mining (EDV-TSX), a position he assumed in January 2023. He joined Endeavour Mining in 2015 as Vice President, Strategy and Investor relations and played a pivotal role in Endeavour's transformation from a \$250 million market cap to a FTSE100 company and one of the largest gold producers in the world, garnering over 25 investor relations achievement nominations, including repeatedly winning best across all sectors.

On November 3, 2023, Ms. Natalie Davies has been appointed as Chief Financial Officer and Corporate Secretary of the Company. Ms. Davies has over 14 years' experience in the corporate finance sector across three continents.

She has spent the last six years working within mining organizations operating both domestically and internationally. She has also worked with a variety of companies in the resources, technology, and healthcare sectors, from start ups to publicly listed companies on the TSX, CSE and Nasdaq. Ms. Davies is a Chartered Professional Accountant (CPA, CA) and is a member of the Association of Chartered Certified Accountants (ACCA, London, UK).

On May 1, 2023, Dr. Colin Porter has been appointed as Chief Executive Officer of the Company. Dr. Porter is a geologist with over 25 years' experience in exploration, project management and applied structural geology across Africa. Dr. Porter holds a BSc (Hons) in geology from Queen's University Belfast, a PhD in geology from University of Southampton and is a member of the Australian Institute of Mining and Metallurgy. Dr. Porter replaces Mr. Tony Louie, the Company's former interim chief executive officer. Mr. Louie will continue to serve as a member of the Company's board of directors.

On April 13, 2023, Sir Samuel Jonah (KBE, OSG) has been appointed as a senior advisor to the Company. Sir Jonah was elected in 2018 as a foreign member of the United States National Academy of Engineering in recognition of his distinguished leadership and technical contributions to engineering and for advancing the mineral industry in Africa. Sir Jonah has an honorary Doctor of Science (D.Sc.) degree awarded jointly by the Camborne School of Mines and the University of Exeter (UK) in 1996. In 2022, Sir Jonah was awarded an honorary Doctor of Science (D.Sc.) by the Imperial College of Science and Technology, London.

On April 3, 2023, the Company appointed Mr. Mata Botima to the board of Directors, and Mr. Young Yuen resigned. Mr. Mata Botima is BHP Billiton's former Country President (DRC). Mr. Botima is a Metallurgical Engineer and he has more than 25 years' experience in the natural resources industries, with a specific focus in developed and emerging markets across Sub-Saharan Africa.

On March 28, 2023, the Company appointed Jonathan Victor Hill to the board of directors. Mr. Hill is an economic geologist with over 35 years of experience globally, in exploration, project development and mining operations, and has been directly involved in the discovery of several worldclass projects within both greenfield and brownfield areas.

On March 22, 2023, the Company announced the formation of an Advisory Board to assist in the further development of the Company. The Company announced the appointment of mining industry veterans, Mr. Robert Cross and Mr. Paul Matysek, as inaugural members of the Advisory Board.

Robert Cross has more than 30 years of experience as a founder, financier and advisor in the mining and oil & gas sectors. Mr. Cross currently is a Co-founder and Chairman of B2Gold Corporation (since 2007) which now produces over one million ounces of gold annually from three mines in Asia and Africa.

Paul Matysek is a geologist and geochemist by training, with over 40 years of experience in the mining industry. Since 2004, as either Chief Executive Officer ("CEO") or Executive Chairman, Mr. Matysek has sold six publicly listed mineral exploration and development companies, in aggregate worth over \$2.5 billion.

EXPLORATION AND EVALUATION EXPENDITURES

All technical aspects of the Company for this MD&A report, have been reviewed and approved by Dr. Stewart A Jackson, P.Geo., a Qualified Person under NI 43-101 and independent of the Company.

Acquisition and exploration expenditures for the three and nine months ended January 31, 2025, and January 31, 2024, were as follows:

	Three months ended			Nine months ended		
	Misisi Gold	Kraaipan Project	Total Costs	Misisi Gold	Kraaipan Project	Total Costs
	\$	\$	\$	\$	\$	\$
Exploration expenditures	4,260	-	4,260	12,466	-	12,466
Acquisition	-	-	-	-	2,968,250	2,968,250
Balance, January 31, 2025	4,260	-	4,260	12,466	2,968,250	2,980,716
Exploration expenditures	4,070	-	4,070	20,348	-	20,348
Balance, January 31, 2024	4,070	-	4,070	20,348	-	20,348

Exploration expenditures for the three and nine months ended January 31, 2025 were as follows:

	Three months ended		Nine month ended	
	January 31, 2025	January 31, 2024	January 31, 2025	January 31, 2024
	\$	\$	\$	\$
Geochemistry	-	-	-	532
Geological	-	14	-	8,358
Roads	4,260	4,056	12,466	11,458
	4,260	4,070	12,466	20,348

Management has determined that due to uncertainty on future recoverability of its mineral exploration and evaluation assets, acquisition and exploration costs are expensed as incurred.

Kaaipan Project

On June 21, 2024, the Company entered into a share exchange agreement with MTM Ltd. ("MTM") to acquire 100% of MTM, a privately held arms-length company established under the laws of the Republic of Seychelles. MTM, with a local partner, holds rights to gold prospecting licenses in the Magisterial District of Molopo, South Africa along with cash on hand. The license rights cover an area of approximately 90 hectares ("ha"), located in the highly prospective Kraaipan Granite-Greenstone Belt terrain, which extends 400 kilometers ("km") from southern Botswana into the Northwest Province of South Africa.

Misisi Gold Project

The Misisi Gold Project (or the "Project") has a contained Inferred Mineral Resource of 3 million ounces of gold as reported in the Company's National Instrument 43-101 technical report on the Misisi Gold Project (the "Technical Report").

Near term upside potential around the existing Akyanga deposit with additional drilling on strike and at depth. Additional near-term potential to increase resources with further drilling at the Akyanga East prospect. Scope to significantly increase the resource from multiple drill targets identified over a 50km strike length with positive indications and intersections from geophysical and soil anomalies, as well as historical drilling data.

Phase 1 drill planning on the Misisi Gold project.

In a news release dated August 9, 2023 filed on the Company's website at <https://www.avantigoldcorp.com> the Company announced an update after visiting the Company's Misisi Gold project, by the CEO and a board member.

Several constructive meetings took place with senior community representatives, local and district chiefs, and leaders of the local artisanal miners' cooperative (Sycomines).

The airstrip at Lulimba was found to be in excellent condition and roads to Misisi town and the field camp were all passable. The camp itself is in good condition with all accommodation and catering facilities fully functional as well as the electricity supply. Some minor remedial work will be required. Access roads to the Akyanga project area are good.

Samples from a 2,200m drilling by the previous operator remain on site and have not been assayed. The integrity of the samples was assessed and overall condition is considered to be good. These samples will be dispatched for assay as a priority. Results will assist in further definition and updated classification of the Akyanga Hill resource.

Phase 1 drill planning has been completed with a view to further upgrading of the Akyanga inferred resource by infill drilling and exploration drilling on the Akyanga East target which lies 800m to the east of the main resource. An initial 14,000m of drilling has been planned and contractors identified.

About the Misisi Gold Project:

Find the technical report NI 43-101 filed August 4, 2023 on SEDAR PLUS website at www.sedarplus.ca

- Large contiguous licensed land position extending 133 square kilometers valid through to 2045.
- Host to an Inferred Resource of 40.8 million tonnes at an average grade of 2.37 g/t Au (representing 3.11 million ounces of gold) at Akyanga.
- Significant upside exploration potential on a 50 km prospective gold belt, of which numerous targets have been identified from prior exploration activity (geophysics, sampling and prospecting) including the directly adjacent Akyanga East prospect.
- Extensive past exploration work with technical reports generated including three historical resource estimates using the JORC Code and a Scoping Study (SRK, 2014).

The independent technical report NI 43-101 filed August 4, 2023 on SEDAR PLUS website at www.sedarplus.ca were provided by John Arthur (Ph.D, CGeol FGS); Ephraim Masibhera (B.Sc. (Geol.), MSc (Cd), MGSSA, Pr. Sci Nat) and Dian Heinrich Page (B.Sc, MEng, Pr. Sci Nat). Dr. John Arthur is the principal Qualified Person (or “QP”) as defined in National Instrument 43- 101 – Standards of Disclosure for Mineral Projects (“NI 43-101”).

The initial Mineral Resource Estimate is supported by data from 105 diamond drill holes and 6 RC drill holes totalling over 22,000m of drilling. All sample data was composited to the dominant sample length of 1 m prior to analysis and estimation. The sample database and the topographic survey were reviewed and validated by Arc Minerals Ltd. (former owner of Casa) and African Mining Consultants prior to being supplied to Ivor Jones Pty Ltd, a specialised Australian based Resource Consultancy. Such review and validation help to support the reliability of the estimate. Geological and Mineral Resource domain modelling, grade interpolation, Mineral Resource classification and reporting of the Mineral Resource statement, was performed by Mr. Ivor Jones. Mr. Jones is a “Qualified Person” within the meaning of National Instrument 43 - 101 – Standards of Disclosure for Mineral Projects (“NI 43-101”). Block modelling was carried out using cell dimensions of 25mE by 25mN by 25 mRL and was coded to reflect the surface topography and mineralised zones. Density values were estimated into blocks and had an average density of 2.63t/m³. The Mineral Resource Estimate has been classified based on data density, data quality, confidence in the geological interpretation and confidence in the robustness of the grade interpolation.

The Misisi Gold Project contains the Akyanga deposit, which is the subject of the NI 43-101 Inferred Resource of 44.3 million tonnes at an average grade of 2.16 grams per tonne gold containing 3.1 million ounces. Mineralization at Akyanga is comprised of several sub-parallel mineralized zones, which have been delineated by historical exploration including diamond and reverse-circulation (RC) drilling. The deposit has been defined over a 1,200-metre strike length, and comprises six sub-parallel quartz veins ranging from one to eight metres thick that dip shallowly to the southeast, extending to a depth of 300 metres with mineralization remaining open at depth.

On September 26, 2024 Avanti announced the commencement of the 2024 exploration program at the Misisi Gold Project in the Democratic Republic of Congo (DRC). Avanti geologists are currently overseeing the preparation of diamond drill samples for transportation to Advanced Laboratory Solutions (ALS) assay lab located in Johannesburg, South Africa. These samples are from 2,100 meters (m) of diamond drilling that was completed by the previous owner but were not assayed and are not included in the current 3.1 million ounce Inferred Mineral Resource estimate for the Misisi Project.

Over \$30 million has been invested in exploration at the Misisi Project to date, including 20,000 m of diamond drilling and 500 m of trenching. Comprehensive geochemical and geophysical surveys have been conducted over the entire 55 km belt, identifying a parallel structure and several drill-ready exploration targets. The 2,100 m of diamond drilling targeted the northwest and high-grade southern sections of the Akyanga mineralized zone. The infill samples being processed have the potential to convert a portion of the Inferred Mineral Resource into the Indicated category. The samples are housed in two storage facilities, one in Bukavu located approximately 1,392 km from Lubumbashi and at the Misisi exploration camp. The Avanti team is currently in Bukavu, preparing 499 samples for shipment by air to the ALS prep lab in Lubumbashi by the end of the week. The team will then travel to Misisi to oversee the next phase of transportation, which will move approximately 1,545 samples from Misisi to the ALS lab over the course of approximately three weeks. Both sets of samples will then be sent to the ALS assay lab in Johannesburg. Strict QA/QC protocols will be applied to all samples to ensure compliance with NI 43-101 standards. Assay results will be announced in stages as they become available.

Subject to financing, the Company is planning a \$2.5 million diamond drill program of 5,000 m in 2025. The program will focus on several key targets. Approximately 2,400 m will test the southern extension of the 3.1 million ounce Akyanga deposit and a deeper intercept of 25 m at 8.14 g/t gold, located approximately 30 m below the pit shell and approximately 220 m from the surface. The Company will also drill 1,400 m on a parallel structure located 500 m east of Akyanga (Akyanga East) to follow up on 1,200 m of diamond drilling, which includes assay results of 7.9 m at 5.3 g/t gold and 5.0 m at 8.5 g/t gold. Approximately 1,200 m will test additional drill-ready targets that have had extensive geochemical and geophysical work as well as good-grade shallow drill results. These targets range between 5 and 20 kilometers south of the main ore body along the 55 km Kibara Gold Belt.

RESULTS OF OPERATIONS

Nine months ended January 31, 2025

During the nine months ended January 31, 2025, the Company recorded a net loss and comprehensive loss of \$7,803,710 (January 31, 2024 - \$2,509,339) which is mainly attributed to:

- i) Share-based compensation of \$986,581 (January 31, 2024 - \$1,094,702) was recognized during the period ended January 31, 2025. On February 15, 2024, the Company issued 1,735,000 stock options. Pursuant to these stock options, the Company recognized share-based compensation of \$282,149 (2024 - \$929,701). A further \$704,432 (2024 - \$165,000) share-based compensation were recognized on the vesting of restricted stock-options issued to consultants.
- ii) Acquisition and exploration expenditures were \$2,980,716 (2024 - \$20,348) due to the acquisition of MTM and road development to the Company's properties.
- iii) Corporate development expenses increased to \$450,552 from \$232,335 in 2024 as the Company has allocated promotional expenses to raise investor awareness about the Company.
- iv) Professional fees decreased to \$208,652 in 2025 from \$267,122 in the comparative period in 2024. The professional fees consist of \$21,830 (2024 - \$74,898) for legal services, \$nil (2024 - \$18,000) for previous CFO fees, \$110,399 (2024 - \$89,500) for accounting services, \$4,565 (2024 - \$5,017) for corporate services and \$71,858 (2024 - \$79,707) for audit fees.

- v) Consulting fees increased to \$2,202,379 (2024 - \$459,885) as the Company continued to engage advisors and consultants to assist with various facets of operations.

As at January 31, 2025, the Company had no continuing source of operating revenues. The Company has not paid any dividends on its common shares and has no present intention of paying dividends, as it anticipates that all available funds for the foreseeable future will be used to finance its business and exploration activities.

SUMMARY OF QUARTERLY FINANCIAL RESULTS

The following is a summary of selected financial information compiled from the audited consolidated financial statements:

	Three months ended January 31, 2025 -\$-	Three months ended October 31, 2024 -\$-	Three months ended July 31, 2024 -\$-	Three months ended April 30, 2024 -\$-
Total assets	81,864	116,064	62,202	300,789

Net loss and comprehensive loss	(293,792)	(1,171,796)	(1,043,751)	(2,397,710)
Loss per share	(0.02)	(0.02)	(0.02)	(0.08)

There are no general trends regarding the Company's quarterly results and the Company's business is not seasonal, as it can develop and progress on a year-round basis, funding permitting. Quarterly results may vary significantly depending mainly on whether the Company has engaged in new activities or abandoned any projects and these factors which may account for material variations in the Company's quarterly losses are not predictable. See also the results of operations discussion above.

Net loss and comprehensive loss of \$819,936 was recorded during the three months ended January 31, 2025 compared to \$293,792 for the same quarter during the prior year. The higher loss in the current quarter was primarily driven by a foreign currency translation loss (OCI) of \$304,211, compared to a foreign currency translation gain (OCI) of \$488,678 in the prior year. However, this was partially offset by a reduction in operating expenses, including consulting fees and office expenses, which decreased by \$174,750 in the current quarter.

The most significant portion of liabilities as at January 31, 2025, include accounts payable and accrued liabilities of \$6,686,997 and \$2,896,800 for deferred consideration payable, in which relates to the liabilities assumed on acquisition of Regency Mining Ltd.

LIQUIDITY AND CAPITAL RESOURCES

The following table summarizes the Company's cash on hand, working capital and cash flow activities:

As at	January 31, 2025		April 30, 2024	
Cash	\$	19,630	\$	242,141
Working capital deficiency		(9,517,344)		(6,973,884)
Period ended	January 31, 2025		January 31, 2024	
Cash used in operating activities	\$	(501,772)	\$	(1,160,645)
Cash provided by financing activities		643,669		705,374
Effect of foreign exchange on cash		(364,408)		203,225
Change in cash	\$	141,897	\$	(252,046)

The Company is dependent on the sale of treasury shares to finance its exploration activities, property acquisition payments and general and administrative costs. The Company will have to raise additional funds in the future to continue its operations. There can be no assurance, however, that the Company will be successful in its efforts. If such funds are not available or other sources of financing cannot be obtained, then the Company will be forced to curtail its activities.

The condensed interim consolidated financial statements have been prepared on a going-concern basis, which assumes the realization of assets and liquidation of liabilities in the normal course of business. Continuing operations, as intended, are dependent on management's ability to raise required funding through future equity issuances, its ability to acquire resource property or business interests and develop profitable operations or a combination thereof, which is not assured, given today's volatile and uncertain financial markets. The Company may revise programs depending on its working capital position.

The Company has financed its operations to date through the issuance of common shares. The Company may continue to seek capital through various means including the issuance of equity and/or debt.

Net cash used in operating activities was \$501,772 during the nine months ended January 31, 2025, compared to \$1,160,645 in the comparative period. Cash used in operating activities was mainly attributed to items discussed in results of operations.

The Company had no investing activities during the nine months ended January 31, 2025 (January 31, 2024 - \$0).

Net cash provided by financing activities during the nine months ended January 31, 2025, was \$643,669 (January 31, 2024 - \$705,374). During the period ended January 31, 2025, the Company received a non interest bearing loan of \$140,000 and received net proceeds of \$503,669 from the issuance of units in a private placement. During the nine-month period ended January 31, 2024, the Company received \$705,374 from the exercise of warrants.

Although the Company has successfully completed equity financings in the past, historical transactions are not necessarily indicative of future performance. The resulting increase in the Company's overall deficit may impact the Company's ability to finance in the future.

RELATED PARTY TRANSACTIONS

Key management personnel are the Directors and Officers of the Company. Certain key management personnel provide services through companies that they control. The following transactions are in the normal course of operations and are measured at their exchange amount, which is the amount agreed upon by the transacting parties.

The following are the transactions with related parties during the three and nine months ended January 31, 2025, and 2024:

	Three months ended		Nine months ended	
	January 31, 2025	January 31, 2024	January 31, 2025	January 31, 2024
	\$	\$	\$	\$
Consulting fees to CEO	62,500	-	196,333	-
Consulting fees to previous CEO	-	138,539	-	204,650
Professional fees to previous CFO	-	6,000	-	18,000
	62,500	144,539	196,333	222,650

The following amounts, which are unsecured and non-interest bearing, are reported in accounts payable and accrued liabilities, and related party liabilities:

	January 31, 2025	April 30, 2024
	\$	\$
Due to previous CEO and director	15,411	15,411
Due to CEO	119,497	-
	134,908	15,411

*Amounts are included in accounts payable and accrued liabilities.

CRITICAL ACCOUNTING ESTIMATES

The preparation of the Company's condensed interim consolidated financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the condensed interim consolidated financial statements and reported amounts of revenues and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances; however, actual outcomes can differ from these estimates.

Information about critical judgments and estimates in applying accounting policies that have the most significant risk of causing material adjustment to the carrying amounts of assets and liabilities included in the preparation of these condensed interim consolidated financial statements are discussed below:

Usage of the going concern assumption - The assessment of whether the going concern assumption is appropriate requires management to take into account all available information about the future, which is at least, but not limited to, twelve months from the end of the reporting period. The Company is aware that material uncertainties related to events or conditions may cast significant doubt upon the Company's ability to continue as a going concern.

FINANCIAL RISK MANAGEMENT

The Company is exposed to minimal financial instrument related risks. The Board of Directors approves and monitors the risk management processes, inclusive of documented investment policies, counterparty limits, and controlling and reporting structures. The type of risk exposure and the way in which such exposure is managed is provided as follows:

Commodity price risk

The Company is subject to price risk from fluctuations in the market prices of commodities as it relates to the possible underlying values of its commodity based mineral properties and the corresponding ability to raise funds for future operations. Management closely monitors commodity prices to determine the appropriate course of actions to be taken in its investing and financing activities. As the Company has not yet developed commercial mineral interests, it is not exposed to significant commodity price risk.

Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company's primary exposure to credit risk is on its cash held in bank accounts and other receivables. The Company's cash is deposited in a bank account held with a major bank in Canada. As most of the Company's cash is held by a bank there is a concentration of credit risk. This risk is managed by using major banks that are high-quality financial institutions as determined by rating agencies. Management believes that its credit risk is not significant.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations as they become due. The Company's ability to continue as a going concern is dependent on management's ability to raise required funding through future equity issuances. The Company manages its liquidity risk by forecasting cash flows from operations and anticipating any investing and financing activities. Management and the Board of Directors are actively involved in the review, planning and approval of significant expenditures and commitments. On January 31, 2025, the Company had a cash balance of \$19,630 (April 30, 2024 - \$242,141) to settle current liabilities of \$9,599,208 (April 30, 2024 - \$7,274,673). All the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms.

Currency risk

As at January 31, 2025, a portion of the Company's financial assets and liabilities held in Canadian dollars and United States dollar consist of cash and cash equivalents, accounts payable and accrued liabilities and deferred consideration. The Company's objective in managing its foreign currency risk is to minimize its net exposure to foreign currency cash flows by transacting, to the greatest extent possible, with third parties in the functional currency. The Company is exposed to currency rate risk in other comprehensive loss, relating to foreign subsidiaries which operate in a foreign currency.

Commodity Price Risk

The Company is subject to price risk from fluctuations in the market prices of commodities as it relates to the possible underlying values of its commodity based mineral properties and the corresponding ability to raise funds for future operations. Management closely monitors commodity prices to determine the appropriate course of action to be taken in its investing and financing activities. As the Company has not yet developed commercial mineral interests, it is not exposed to significant commodity price risk.

Interest rate risk

The Company has a short term non- interest bearing loan. The Company is not currently exposed to significant interest rate risk.

Capital Management

The Company manages its capital structure and adjusts it, based on the funds available to the Company, in order to support the acquisition, exploration, and development of resource properties. The aforementioned exploration and evaluation work will require additional financial resources. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

The Company is not subject to externally imposed capital requirements. There were no changes in the Company's approach to capital management during the nine months ended January 31, 2025 or during the year ended April 30, 2024.

ADDITIONAL INFORMATION

Off-Balance Sheet Arrangements

As at the current date, the Company had no off-balance sheet arrangements.

Legal proceedings

As at the current date, management was not aware of any legal proceedings involving the Company.

Outstanding Share Data

As at the date of this report, the Company has 80,861,644 common shares and no preferred shares outstanding. There are 8,204,167 restricted stock options outstanding as of the date of this report. There are 6,017,857 stock options and 4,099,000 warrants outstanding as of the date of this report.

Contingent liabilities

As at the current date, management was not aware of any outstanding contingent liabilities relating to the Company's activities.

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL INFORMATION

The Company's financial statements and the other financial information included in this management report are the responsibility of the Company's management and have been examined and approved by the Board of Directors. The condensed interim consolidated financial statements were prepared by management in accordance with IFRS and include certain amounts based on management's best estimates using careful judgment. The selection of accounting principles and methods is management's responsibility.

Management recognizes its responsibility for conducting the Company's affairs in a manner to comply with the requirements of applicable laws and established financial standards and principles, and for maintaining proper standards of conduct in its activities. The Board of Directors supervises the financial statements and other financial information through its audit committee.

This committee's role is to examine the condensed interim consolidated financial statements and recommend that the Board of Directors approve them, to examine the internal control and information protection systems and all other matters relating to the Company's accounting and finances. In order to do so, the audit committee meets annually with the external auditors, with or without the Company's management, to review their respective audit plans and discuss the results of their examination. This committee is responsible for recommending the appointment of the external auditors or the renewal of their engagement.

RISKS AND UNCERTAINTIES

Risk is inherent in all business activities and cannot be entirely eliminated. Our goal is to enable the Company's business processes and opportunities by ensuring that the risks arising from our business activities, the markets and political environments in which we operate are mitigated. The risks and uncertainties described in the Annual MD&A are considered by management to be the most important in the context of the Company's business and are substantially unchanged as of the effective date of this MD&A. Those risks and uncertainties are not inclusive of all the risks and uncertainties the Company may be subject to and other risks may apply.

Early Stage – Need for Additional Funds

The Company has no history of profitable operations and its present business is at an early stage. As such, the Company is subject to many risks common to such enterprises, including undercapitalization, cash shortages and limitations with respect to personnel, financial and other resources and the lack of revenues. There is no assurance that the Company will be successful in achieving a return on shareholders' investments and the likelihood of success must be considered in light of its early stage of operations.

The Company has no source of operating cash flow and no assurance that additional funding will be available to it for further exploration and development of its projects when required. Although the Company has been successful in the past in obtaining financing through the sale of equity securities, there can be no assurance that the Company will be able to obtain adequate financing in the future or that the terms of such financing will be favorable, especially in today's volatile and uncertain financial markets. Failure to obtain such additional financing could result in the delay or indefinite postponement of further exploration and development of its properties.

Exploration and Development

Exploration for minerals is a speculative venture involving substantial risk. There is no certainty that the expenditures made by the Company and/or its subsidiaries will result in discoveries of commercial metal reserves.

Mining and development risks always accompany anticipated rewards, and uncertainties always exist where mineral properties are concerned. Uncertainties include the size, grade and recovery of naturally occurring mineral deposits. Although exploration and development efforts can outline a mineral deposit with a degree of certainty, ultimate grade and tonnages are never fully known until mining has been completed. Metal prices are also a significant factor in the development decision for a mineral property, as a mine may not be economically feasible in a period of depressed prices. Factors beyond the control of the Company may affect the marketability of any minerals discovered. Pricing is affected by numerous factors such as international economic and political trends, global or regional consumption and demand patterns, and increased production by current producers.

Operating Hazards and Risks

Mining operations involve many risks, which even a combination of experience, knowledge and careful evaluation may not be able to overcome. In the course of exploration, development and production of mineral properties, certain risks, and in particular, unexpected or unusual geological operating conditions including rock bursts, cave-ins, fires, flooding and earthquakes may occur. Operations in which the Company has a direct or indirect interest will be subject to all the hazards and risks normally incidental to exploration, development and production of metals, any of which could result in damage to or destruction of mines and other producing facilities, damage to life and property, environmental damage and possible legal liability for any or all damage.

Title Risks

Title to exploration and evaluation assets involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral properties. The Company has investigated title to all of its mineral properties and, to the best of its knowledge, title to all of its properties are in good standing.

Competition and Agreements with Other Parties

The mining industry is intensely competitive in all its phases. The Company competes with other companies that have greater financial resources and technical capacity. Competition could adversely affect the Company's ability to acquire suitable properties or prospects in the future.

The Company may, in the future, be unable to meet its share of costs incurred under agreements to which it is a party, and it may have its interest in the properties subject to such agreements reduced as a result. Also, if other parties to such agreements do not meet their share of such costs, the Company may not be able to finance the expenditures required to complete recommended programs.

Price Volatility of Public Stock

In recent years, securities markets have experienced extremes in price and volume volatility. The market price of securities of many early-stage companies, among others, have experienced fluctuations in price which may not necessarily be related to the operating performance, underlying asset values or prospects of such companies. It may be anticipated that any market for the Company's shares will be subject to market trends generally and the value of the Company's shares on a stock exchange may be affected by such volatility.

Environmental Regulations, Permits and Licenses

The Company's operations are subject to various laws and regulations governing the protection of the environment, exploration, development, production, taxes, labour standards, occupational health and safety, waste disposal, and other matters.

Environmental legislation provides for restrictions and prohibitions on spills, releases or emissions of various substances produced in association with certain mining industry operations, such as seepage from tailings disposal areas, which would result in environmental pollution. A breach of such legislation may result in impositions of fines and penalties. In addition, certain types of operations require the submission and approval of environmental impact assessments. Environmental legislation is evolving in a direction of stricter standards, and enforcement, and higher fines and penalties for non-responsibility for companies including its directors, officers and employees. The cost of compliance with changes in governmental regulations has the potential to reduce the profitability for the Company and its directors, officers and employees. The Company intends to fully comply with all environmental regulations.

Failure to comply with applicable laws, regulations, and permitting requirements may result in enforcement actions thereunder, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment, or remedial actions. Parties engaged in mining operations may be required to compensate those suffering loss or damage by reason of mining activities and may have civil or criminal fines or penalties imposed for violations of applicable laws or regulations and, in particular, environmental laws.

Amendments to current laws, regulations and permits governing operations and activities of mining companies, or more stringent implementation thereof, could have a material adverse impact on the Company and cause increases in capital expenditures or production costs or reduction in levels of production at producing properties, or requires abandonment, or delays in development of new mining properties.

Economic Conditions

Unfavorable economic conditions may negatively impact the Company's financial viability as a result of increased financing costs and limited access to capital markets.

Dependence on Management

The Company is very dependent upon the personal efforts and commitment of its existing management. To the extent that management's services would be unavailable for any reason, a disruption to the operations of the Company could result, and other persons would be required to manage and operate the Company.

Directors

Certain directors of the Company are also directors, officers and/or shareholders of other companies. Such associations may give rise to conflicts of interest from time to time. The directors of the Company are required to act in good faith with a view to the best interests of the Company and to disclose any interest which they may have in any project opportunity of the Company. If a conflict of interest arises at a meeting of the board of directors, any directors in a conflict will disclose their interests and abstain from voting in such matters. In determining whether or not the Company will participate in any project or opportunity, the directors will primarily consider the degree of risk to which the Company may be exposed and its financial position at the time.
