

Zeus North America Mining Corp. Delineates over 741 Acre Copper and Molybdenum Soil Anomaly at Cuddy Mountain, Idaho

Zeus North America Mining Corp.

Strongest soil anomaly over the mapped volcanic rocks near the valley floor interpreted to be sub-cropping exposure of the Seven Devils Volcanics, host rock of the Leviathan discovery

ZEUS NORTH AMERICA MINING CORP. (CSE:ZEUS)(OTCQB:ZUUZF)(FRANKFURT:O92) (THE "COMPANY" OR "ZEUS") is pleased to announce the discovery of a large Copper and Molybdenum soil anomaly from its recent soil sampling program at its Cuddy Mountain Project (the "Project" of "Cuddy Mountain") in Idaho. Cuddy Mountain is located approximately 3 kilometres ("km") to the north of Hercules Metals Corp.'s high-grade "Hercules" copper-moly-silver porphyry discovery announced in October 2023.

Highlights of the Soil Sampling Program at Cuddy Mountain:

Collected 799 property wide soil samples at approximately 75 m spacing.

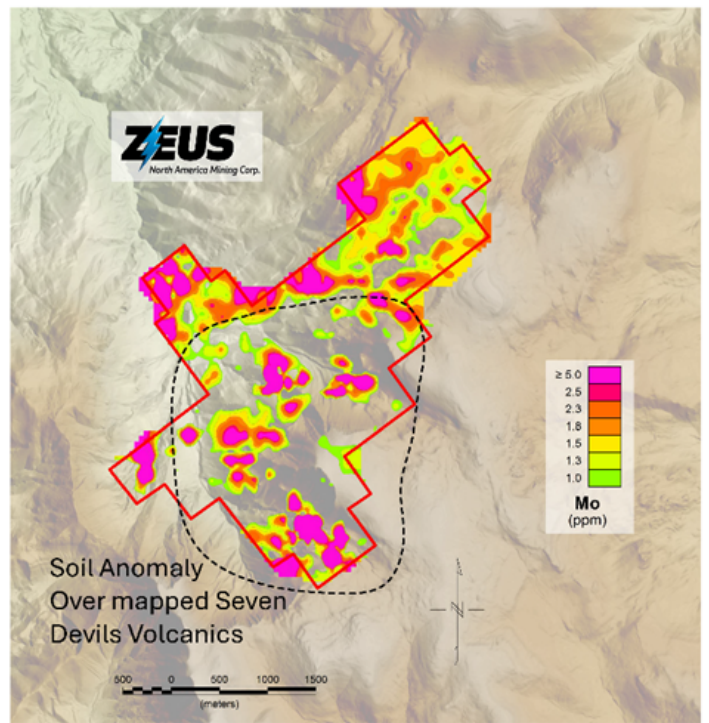

Soils delineate a broad 3 km by 3 km copper ("Cu") and molybdenum ("Mo") in soil circular anomaly underlain by the Seven Devils Volcanics (~741 acres).

Cu-Mo anomaly is strongest over the mapped volcanic rocks (andesites and rhyodacites) near the valley floor - interpreted to be sub-cropping exposure of the Seven Devils Volcanics, which host the neighbouring Leviathan Porphyry Copper discovery.

The newly identified copper-molybdenum soil anomaly contains individual soil samples up to 0.38 percent ("%") copper and 28.5 parts per million ("ppm") molybdenum (31 samples contain 212 ppm Cu or more; 5 samples contain percent level copper up to and including 0.38% Cu; 116 samples contain 2 ppm Mo or more; 6 samples contain more than 10 ppm Mo, with values up to and including 28.5 ppm Mo).

Cuddy Mountain continues to show strong similarities to the Hercules discovery, with a comparable soil geochemical footprint.

Dean Besserer, President and CEO, stated, "We are greatly encouraged with the discovery of this large-scale anomaly at Cuddy Mountain with significant copper and molybdenum values. This large-scale anomaly covers the mapped Seven Devils Volcanics and is ideally located, reinforcing our confidence in this highly prospective region. We look forward to releasing the remainder of our fieldwork results as we move the Project towards a planned upcoming drill program. With the nearby Hercules Project gearing up for an aggressive 2025 drill season, the geological team at Zeus is eager to follow suit in the near future."

About the Cuddy Mountain Copper Property (Idaho, USA)

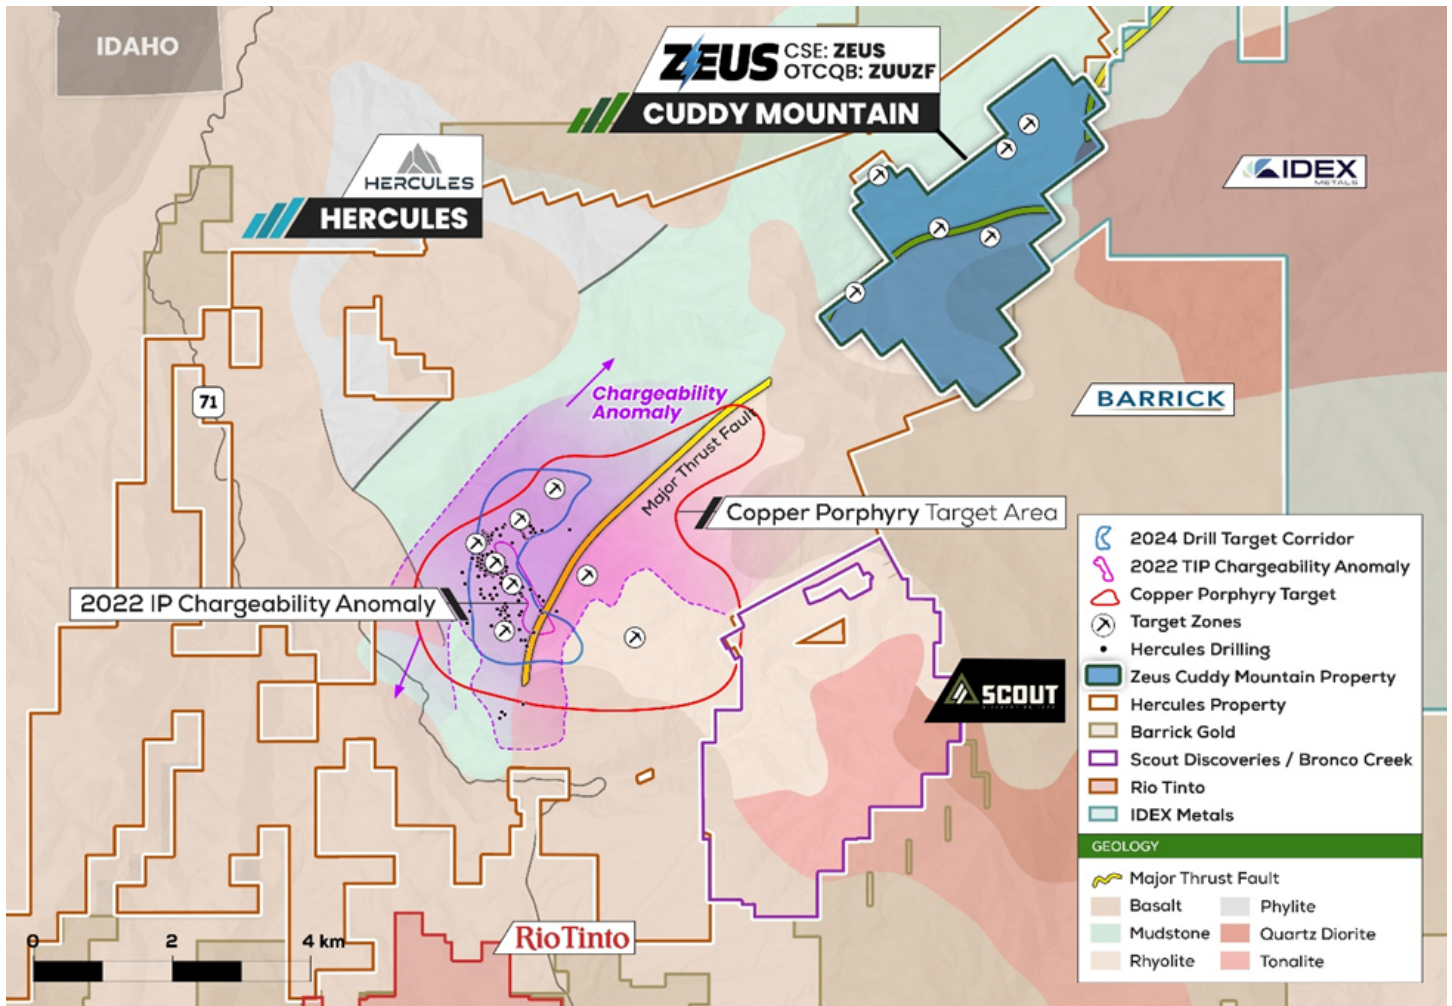

The Cuddy Mountain Property is adjacent to Hercules Metals Corp.'s recently discovered Leviathan Copper Porphyry (\$167M MC). * The discovery resulted in Barrick injecting \$23M in equity while staking a substantial land position in the district along with Rio Tinto. The Cuddy Mountain Property consists of 101 lode mining claims respectively and cover a cumulative area of approximately 2020 acres.

Historical Drilling at Cuddy Mountain consisted of 7 shallow drill holes in 1977 intersecting anomalous lead and silver. Drill hole Mun 8 contained 90 feet of 2.02 oz/t Ag (Taylor, 1977). Further historical exploration on Zeus's Cuddy Mountain Project occurred at the Edna May Mine: Mineralized vein with chip samples containing 750 ppm ppm Pb, 7.7% Zn and 252 grams per tonne Silver over 4 feet. Underground drilling in 1979 intersected 1.38 oz/t Ag over 7 feet in a breccia zone (Burmeister, 1980). Additional exploration (By Taylor, 1977) at the Rockslide area encountered Malachite-stained outcrops with a grab sample containing 760 ppm Pb, 0.67 % Zn and 36 grams per tonne Silver (Taylor, 1977).

About Zeus North America Mining Corp.

The Company is in the business of mineral exploration. The Company is focused on its exploration properties in the state of Idaho known as the: Cuddy Mountain; Selway; and Great Western properties, respectively. The Idaho properties consist of 101 (Cuddy Mountain), 57 (Selway) and 38 (Great Western) lode mining claims respectively and cover a cumulative area of approximately 4,200 acres. The Company's

flagship Cuddy Mountain Property is adjacent to Hercules Metal Corp's Leviathan Copper Porphyry discovery.

Forward Looking Statements

When used in this news release, the words "estimate", "project", "belief", "anticipate", "intend", "expect", "plan", "predict", "may" or "should" and the negative of these words or such variations thereon or comparable terminology are intended to identify forward-looking statements and information. Although the Company believes, in light of the experience of their respective officers and directors, current conditions and expected future developments and other factors that have been considered appropriate, that the expectations reflected in the forward-looking statements and information in this news release are reasonable, undue reliance should not be placed on them because the parties can give no assurance that such statements will prove to be correct. The forward-looking statements and information in this news release include, amongst others, the Company's exploration plans. Such statements and information reflect the current view of the Company. There are risks and uncertainties that may cause actual results to differ materially from those contemplated in those forward-looking statements and information.

By their nature, forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause our actual results, performance or achievements, or other future events, to be materially different from any future results, performance or achievements or implied by such forward-looking statements. There are a number of important factors that could cause the Company's actual results to differ materially from those indicated or implied by forward-looking statements and information. Such factors include, among others: currency fluctuations; limited business history of the parties; disruptions or changes in the credit or security markets; results of operation activities and development of projects; project cost overruns or unanticipated costs and expenses; and general development, market and industry conditions.

The Company undertakes no obligation to comment on analyses, expectations or statements made by third parties in respect of its securities or its financial or operating results (as applicable). The Company cautions that the foregoing list of material factors is not exhaustive. When relying on the Company's forward-looking statements and information to make decisions, investors and others should carefully consider the foregoing factors and other uncertainties and potential events. The Company has assumed that the material factors referred to in the previous paragraph will not cause such forward-looking statements and information to differ materially from actual results or events. However, the list of these factors is not exhaustive and is subject to change and there can be no assurance that such assumptions will reflect the actual outcome of such items or factors.

The forward-looking information contained in this news release represents the expectations of the Company as of the date of this news release and, accordingly, are subject to change after such date. The Company does not undertake to update this information at any particular time except as required in accordance with applicable laws.

The Canadian Securities Exchange does not accept responsibility for the adequacy or accuracy of this news

release.
