#### 1. Nature of business

ThreeD Capital Inc. ("ThreeD" or the "Company") is a publicly-traded Canadian-based venture capital firm focused on opportunistic investments in companies in the junior resources and disruptive technologies sectors. ThreeD's investment strategy is to invest in multiple private and public companies across a variety of sectors globally. ThreeD seeks to invest in early stage, promising companies where it may be the lead investor and can additionally provide investees with advisory services and access to the Company's ecosystem. The Company was continued under the *Canada Business Corporations Act* on December 1, 2011 and its common shares are publicly-traded on the Canadian Securities Exchange ("CSE") under the symbol "IDK" and on the OTCQX Best Market under the symbol "IDKFF". The Company is domiciled in the Province of Ontario and its head office is located at 130 Spadina Ave., Suite 401, Toronto, Ontario, Canada.

These interim condensed consolidated financial statements ("interim consolidated statements") were approved for issuance by the Company's board of directors on May 26, 2022.

#### 2. Basis of preparation

(a) Statement of compliance:

These interim consolidated statements are unaudited and have been prepared on a condensed basis in accordance with International Accounting Standard 34, *Interim Financial Reporting*, issued by the International Accounting Standards Board ("IASB") and interpretations of International Financial Reporting Interpretations Committee using accounting policies consistent with International Financial Reporting Standards ("IFRS").

These interim consolidated statements should be read together with the annual audited consolidated financial statements as at and for the year ended June 30, 2021. The same accounting policies and methods of computation were followed in the preparation of these interim consolidated statements as were followed in the preparation of and as described in Note 3 of the annual consolidated financial statements as at and for the year ended June 30, 2021.

#### (b) Basis of presentation:

These interim consolidated statements have been prepared using the historical cost convention except for certain financial instruments which have been measured at fair value.

All monetary values referenced in these notes are expressed in Canadian dollar amounts (``\$"), unless otherwise stated.

(c) Basis of consolidation:

These interim consolidated statements include the financial statements of ThreeD and its wholly-owned inactive subsidiaries: Blockamoto.io Corp., Brownstone Ventures (Barbados) Inc. and 2121197 Ontario Ltd. Subsidiaries are fully consolidated from the date of acquisition, being the date on which the Company obtains control, and continue to be consolidated until the date that such control ceases.

Subsidiaries are fully consolidated from the date of acquisition, being the date on which the Company obtains control, and continue to be consolidated until the date that such control ceases. The financial statements of the subsidiaries are prepared for the same reporting period as the Company, using consistent accounting policies. All inter-company account balances and transactions have been eliminated upon consolidation.

(d) Critical accounting judgments, estimates and assumptions:

The preparation of the financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the interim consolidated statements and the reported amounts of revenue and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Uncertainty about these judgments, estimates and assumptions could result in outcomes that could require a material adjustment to the carrying amount of the asset or liability affected in future periods.

The information about significant areas of estimation uncertainty and judgment considered by management in preparing the interim consolidated statements were the same as those in the preparation of the annual financial statements as at and for the year ended June 30, 2021.

#### 3. Investments at fair value and financial instruments hierarchy

(a) Determination of fair value:

The determination of fair value requires judgment and is based on market information, where available and appropriate. At the end of each financial reporting period, the Company's management estimates the fair value of investments based on the criteria below and reflects such valuations in the interim consolidated statements.

The Company is also required to disclose details of its investments (and other financial assets and liabilities reported at fair value) within three hierarchy levels (Level 1, 2, or 3) based on the transparency of inputs used in measuring the fair value, and to provide additional disclosure in connection therewith.

- 1. Publicly-traded investments:
  - a. Securities, including shares, options, and warrants that are traded in an active market (such as on a recognized securities exchange) and for which no sales restrictions apply are presented at fair value based on quoted closing trade prices at the consolidated statements of financial position date or the closing trade price on the last day the security traded if there were no trades at the consolidated statements of financial position date. These investments are included in Level 1.
  - b. Securities that are traded on a recognized securities exchange, but which are escrowed or otherwise restricted as to sale or transfer are recorded at amounts discounted from market value to a maximum of 25%, using Finnerty's put option model. In determining the discount for such investments, the Company considers the nature and length of the restriction. These investments are included in Level 2.
  - c. For options and warrants that are not traded on a recognized securities exchange, no market value is readily available. When there are sufficient and reliable observable market inputs, an option pricing model is used; if no such market inputs are available, the warrants and options are valued using alternative methods representing fair value. These investments are included in Level 2.
  - d. Convertible debentures and loans of public companies are initially recorded at the transaction price, being the fair value at the time of acquisition. Thereafter, at the end of each financial reporting period, the combined instrument is adjusted to fair value based on alternative methods. These investments are included in Level 2.
- 2. Private company investments:

All privately-held investments (other than options and warrants) are initially recorded at the transaction price, being the fair value at the time of acquisition. Thereafter, at each reporting period, the fair value of an investment may, depending upon the circumstances, be adjusted using one or more of the valuation indicators described below. These investments are included in Level 3.

(b) The fair value and cost of investments are as follows:

	Fair Value	Cost
March 31, 2022	\$ 50,769,032	\$ 32,601,454
June 30, 2021	54,910,872	31,436,028

(c) Financial instruments hierarchy:

The fair value measurements use a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The level in the hierarchy within which the fair value measurement is categorized is determined on the basis of the lowest level input that is

significant to the fair value measurement in its entirety. The fair value hierarchy has the following levels:

- (i) Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1).
- (ii) Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2).
- (iii) Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (Level 3).

For financial instruments that are recognized at fair value on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period. The following table presents the Company's financial instruments, measured at fair value and categorized into levels of the fair value hierarchy on the consolidated statements of financial position as at March 31, 2022 and June 30, 2021:

Investments,	Que	Level 1 oted market		Level 2 tion technique - rvable market		Level 3 tion technique - n-observable		
at fair value		price		inputs market inputs		inputs		Total
March 31, 2022	\$	6,735,154	\$	6,748,036	\$	37,285,842	\$ 50,769,032	
June 30, 2021	\$	18,917,811	\$	19,038,624	\$	16,954,437	\$ 54,910,872	

Level 2 includes warrants of public issuers and common stock of public issuers, whose resale is currently restricted. These securities typically have up to a maximum of 120-day hold period and are valued by applying a discount against the price of the unrestricted public stock price. Once the restriction has elapsed, these securities will become Level 1 securities.

In addition, investments which are in Level 3 and become public issuers during the period are transferred to Level 1 or 2. During the nine months ended March 31, 2022, level 2 investment amounting to \$3,664,691 (June 30, 2021 - \$2,578,586) was transferred to level 1 investment.

The following table presents the changes in fair value measurements of financial instruments classified as Level 3 for the nine months ended March 31, 2022, and year ended June 30, 2021. These financial instruments are measured at fair value utilizing non-observable market inputs based on specific company information and general market conditions. The net change in unrealized gains (losses) are recognized in the consolidated statements of income and comprehensive income.

Balance as at June 30, 2020	\$ 5,983,529
Additions	6,864,936

Net unrealized gains	11,644,629
Balance as at March 31, 2022	\$ 37,285,842

Significant unobservable inputs used in the fair value measurement of Level 3 investments were:

Description	air value at rch 31, 2022	Valuation technique / Unobservable inputs	% of investments	Volatility
Unlisted private equities	\$ 30,689,305	Recent transaction Calibration	60.4	Recent transaction price Market trends

Unlisted warrants	74,420	Black Scholes Market prices, volatility, discount rate	0.1	110% volatility
	\$ 16,954,437		30.9	

For investments valued based on trends in comparable publicly traded companies, general market conditions and specific company information, the inputs used can be highly judgmental. A +/- 25% change on the fair value (i.e. recent transaction price) of this investment will result in a corresponding +/- \$9,321,461 (June 30, 2021 - \$4,238,609) change in the total fair value of the investments. While this illustrates the overall effect of changing the values of the unobservable inputs by a set percentage, the significance of the impact and the range of reasonably possible alternative assumptions may differ significantly between investments, given their different terms and circumstances.

The sensitivity analysis is intended to reflect the uncertainty inherent in the valuation of these investments under current market conditions, and its results cannot be extrapolated due to non-linear effects that changes in valuation assumptions may have on the fair value of the investments.

Furthermore, the analysis does not indicate a probability of such changes occurring and it does not necessarily represent the Company's view of expected future changes in the fair value of this investment. Any management actions that may be taken to mitigate the inherent risks are not reflected in this analysis.

(d) Advances made on Investments:

During the nine months ended March 31, 2022, the Company had advanced funds towards investments for private placement financings which had not yet closed by March 31, 2022. As a result, the Company had not received its share certificates by March 31, 2022, and thus has presented the advances made on the interim consolidated statements as "Advances made on investments". As at March 31, 2022, the Company had a balance of \$253,160 (June 30, 2021 - \$857,199) in advances made on investments.

#### 4. Digital assets at fair value less cost to sell

(a) Determination of digital assets' fair values:

Digital assets consist of the following:

- (i) Electronic currency, coins, or alternative cryptocurrency coins (altcoins) a type of currency only available in digital form;
- (ii) Digital tokens a representation of a particular asset or utility which are created and distributed to the public through an Initial Coin Offering ("ICO"). ICO is a means of crowdfunding, through the release of a new token to fund project development similar to an initial public offering for stocks; and
- (iii) Simple Agreement for Future Tokens ("SAFT") an agreement with a promise to distribute tokens to investors in the future (a token presale and not an ICO).

Digital coins and digital tokens held by the Company are carried at fair value less cost to sell for the purposes of consolidated financial statements. The Company determines the fair value of such digital coins and digital tokens using the closing price on the valuation date price provided by the crypto exchange that the Company considers the principal market. These are included in Level 2.

Digital Coins and tokens which are not actively traded and purchases under SAFTs are initially recorded at the transaction price, being the fair value at the time of acquisition. Thereafter, at each reporting period, the fair value (depending upon the circumstances) may be adjusted using one or more valuation indicators (refer to the accounting policy for the fair value of privately-held investments). These are included in Level 3.

(b) The fair value and cost of digital assets are as follows as at March 31, 2022:

	Cost			
Digital coins	\$ 87	\$	1,768	
Digital tokens	1,129,228		482,514

SAFTs	1,191,609	-
	\$ 2,013,725	\$ 216,635

The fair value and cost of digital assets are as follows as at June 30, 2021:

Digital currency prices are affected by various forces including global supply and demand, interest rates, exchange rates, inflation or deflation and the global political and economic conditions. Digital assets have a limited history and the fair value historically has been very volatile. The Company may not be able to liquidate its inventory of digital currency at its desired price if required. The Company invests in SAFTs which is an agreement with a promise by the company to distribute tokens to investors in the future (i.e.: a token presale and not an ICO). There may be no resale of the SAFT and a considerable period of time may elapse between the payment of the SAFT and the receipt of the tokens, if at all. SAFTs are subject to high risks.

(c) The following table presents the Company's digital assets, measured at fair value less cost to sell and categorized into levels of the fair value hierarchy on the consolidated statement of financial position as at March 31, 2022:

Digital assets, at fair value less cost to sell	Qı	evel 1 Joted Ket price	Level 2 Level 3 Valuation technique Valuation technique - observable - unobservable market inputs market inputs			Total

The following table presents the Company's digital assets, measured at fair value less cost to sell and categorized into levels of the fair value hierarchy on the consolidated statement of financial position as at June 30, 2021:

	Le	evel 1	Va	Level 2 Iuation technique -	Va	Level 3 Iuation technique -

Transfers between Levels are deemed to have occurred at the date of event. The transfer out of Level 3 consists of digital assets (primarily SAFTs) that become actively traded on a digital exchange during the year or when tokens are received from SAFTs.

The following table presents the changes in fair value measurements of digital assets classified as Level 3 for the nine months ended March 31, 2022, and year ended June 30, 2021.

Balance as at June 30, 2020	\$ -
Purchases	-
Transfer to Level 1 or Level 2	-
Net unrealized gains	-
Balance as at June 30, 2021	\$ -
Purchases	379,800
Transfer to Level 1 or Level 2	-
Net unrealized gains	(4,920)
Balance as at March 31, 2022	\$ 374,880

All purchases in Level 3 were from SAFTs and once tokens are received these amounts will be transferred to Level 1 or 2. Significant unobservable inputs used in the fair value measurement of Level 3 digital assets include foreign exchange rate changes and the change in other digital currency rate equivalents. A +/- 25% change on the fair value (i.e. recent transaction price) of Level 3 digital assets will result in a corresponding +/- \$93,720 (June 30, 2021 - \$nil) change in the total fair value of the Level 3 digital assets. While this illustrates the overall effect of changing the values of the unobservable inputs by a set percentage, the significance of the impact and the range of reasonably possible alternative assumptions may differ significantly between digital assets.

#### 5. Financial assets and liabilities other than investments at fair value:

Financial assets and liabilities other than investments at fair value are as follows:

	March 31, 20	22	June 30, 2021
Cash	\$ 781,40	<b>4</b> \$	205,425
Due from brokers	381,73	5	21,679
Receivables (excluding sales tax receivables)	-		14,955
Accounts payable and accrued liabilities	(179,51	2)	(1,406,226)
Due to brokers	-		(324,042)
Lease liabilities	(204,24	7)	(294,325)
Advances from officer	-		(652,365)
	\$ 779,38	<b>D</b> \$	(2,434,899)

The carrying values of cash, due from brokers, receivables, accounts payable and accrued liabilities, due to brokers, and advances from officer approximate their fair values due to the short term to maturity for these instruments. Lease liabilities carrying amount is a reasonable approximation of its fair value as it is present valued at the discount rate implicit in the lease or using the Company's incremental borrowing rate. As at March 31, 2022 and June 30, 2021, there were no expected credit losses on the outstanding receivables.

#### 6. Related party transactions

All transactions with related parties have occurred in the normal course of operations and are recorded at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

(a) Compensation to key management personnel and directors during the three month and nine months ended March 31 were as follows:

(b) Stock options:

The Company grants stock options to eligible directors, officers, key employees and consultants under its 2006 stock option plan to enable them to purchase common shares of the Company. Under the terms of the plan, the number of common shares that may be issued pursuant to the exercise of options granted under the plan may not exceed 20% of the number of common shares outstanding at the time of grant.

The exercise price of an option granted under the plan cannot be less than the closing price of the common shares on the last day on which the common shares trade prior to the grant date of the option. An individual can receive grants of no more than 10% of the outstanding shares of the Company on a yearly basis and options are exercisable over a period not exceeding five years. Stock options granted generally vest at the rate of 1/6 of the grant every three months over an 18-month period. Options granted are accounted for using the fair value method of accounting for stock-based compensation. The Company records compensation expense and credits contributed surplus for all options granted.

During the nine months ended March 31, 2022, the Company granted 1,375,000 stock options to directors, officers and consultants of the Company exercisable at prices of \$1.13, \$1.30, \$0.80, and \$0.90 per share expiring between August 11, 2023 and February 16, 2027.

#### 9. Segmented information

Reportable segments are defined as components of an enterprise about which separate financial information is available, that are evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance.

The Company's operations primarily relate to investing. The Company's management is responsible for the Company's entire investment portfolio and considers the business to have a single operating segment. Management's investment decisions are based on a single, integrated investment strategy and the performance is evaluated on an overall basis.

All of the Company's revenues are earned in Canada and all of the Company's property, equipment and right-of-use assets are located in Canada and no segmented information has been disclosed as at and for the three and nine months ended March 31, 2022.

#### 10. Operating, general, and administrative expenses

Included in operating, general, and administrative expenses for the three and nine months ended March 31 are the following expenses:

#### 13. Management of capital

The Company considers its capital to include equity which amounts to \$53,030,561 on March 31, 2022 (June 30, 2021 - \$53,865,921). The Company's objectives when managing capital are:

- (a) to ensure that the Company maintains the level of capital necessary to meet the requirements of its brokers;
- (b) to allow the Company to respond to changes in economic and/or marketplace conditions by maintaining the Company's ability to purchase new investments and digital assets;
- (c) to give shareholders sustained growth in shareholder value by increasing shareholders' equity; and
- (d) to maintain a flexible capital structure that optimizes the cost of capital at acceptable levels of risk.

The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of its underlying assets. The Company maintains or adjusts its capital level to enable it to meet its objectives by:

- (a) realizing proceeds from the disposition of its investments and digital assets; and
- (b) raising capital through equity or debt financings.

The Company is not subject to any capital requirements imposed by any regulator other than to maintain its margin requirements by the brokers.

There were no changes in the Company's approach to capital management for the nine months ended March 31, 2022. To date, the Company has not declared any cash dividends to its shareholders as part of its capital management program. The Company's current capital resources are sufficient to discharge its liabilities as at March 31, 2022.

#### 14. Management of financial risk

The investment operations of ThreeD's business involve the purchase and sale of securities and digital assets, and, accordingly, a portion of the Company's assets are currently comprised of financial instruments. The use of financial instruments can expose the Company to several risks, including market, credit, and liquidity risks. Although digital assets are not considered financial instruments, they inherently have the similar risks as traditional investments. A discussion of the Company's use of financial instruments and their associated risks is provided below.

#### (a) Market risk:

Market risk is the risk that the fair value of or future cash flows from the Company's financial instruments will significantly fluctuate because of changes in the market prices. The value of the financial instruments can be affected by changes in interest rates, foreign exchange rates, and equity and commodity prices. The Company is exposed to market risk in trading its investments/digital assets and unfavorable market conditions could result in dispositions of investments/digital assets at less than favorable prices.

Additionally, the Company adjusts its investments/digital assets to fair value at the end of each reporting period. This process could result in significant write-downs of the Company's investments/digital currencies over one or more reporting periods, particularly during periods of overall market instability, which would have a significant unfavorable effect on ThreeD's financial position.

As at March 31, 2022, the Company held a total of \$11,106,781 (June 30, 2021 - \$8,060,198) in U.S. denominated investments. Additionally, the majority of the Company's digital assets are denominated in U.S. dollars. The Company also held \$70,230 (June 30, 2021 - \$69,713) in Australian-dollar denominated investments and \$237,940 (June 30, 2021 - \$nil) in British pound sterling denominated investments. Given the foreign denominated investments, market risk for the Company includes currency risk.

There were no changes in the way the Company manages market risk during the nine months ended March 31, 2022. The Company manages its market risk by having a portfolio that is not singularly exposed to any one issuer or class/sector of issuers.

The following table shows the estimated sensitivity of the Company's after-tax net income for the nine months ended March 31, 2022, from a change in the closing trade price (or recent transaction price) of the Company's investments and digital assets with all other variables held constant as at March 31, 2022:

Percentage of change in closing trade price (recent transaction price)	Change in after-tax net income from % change in closing trade price			
2%	\$	895,749		
4%		1,791,498		
6%		2,687,247		
8%		3,582,997		
10%		4,478,746		

The following table shows the estimated sensitivity of the Company's after-tax net income for the year ended June 30, 2021, from a change in the closing trade price (or recent transaction price) of the Company's investments and digital assets with all other variables held constant as at June 30, 2021:

Percentage of change in closing trade price (recent transaction price)	Change in after-tax net income from % change in closing trade price

4%		1,912,925
6%		2,869,387
8%		3,825,849
10%		4,782,311

#### (b) Currency risk:

The Company presently holds funds in Canadian dollars but some of its liabilities are denominated in U.S. dollars. The Company does not engage in any hedging activities to mitigate its foreign exchange risk. A change in the foreign exchange rate of the Canadian dollar versus another currency may increase or decrease the value of the Company's financial instruments. The Company does not hedge its foreign currency exposure.

The following assets and liabilities (excluding investments and digital assets) were denominated in foreign currencies:

	Mar	ch 31, 2022	June 30, 2021
Denominated in U.S. dollars:			
Cash	\$	3,852	\$ 36,934
Due from (to) brokers, net		(205,610)	(37,168)
Accounts payable and accrued liabilities		(17,008)	 (20,967)
Net assets (liabilities) denominated in U.S. dollars		(218,766)	 (21,201)

The following table shows the estimated sensitivity of the Company's after-tax net income for the nine months ended March 31, 2022, from a change in the U.S. dollar exchange rate in which the Company has significant exposure with all other variables held constant as at March 31, 2022:

Percentage of change in U.S. dollar exchange rate	Change in after-tax net income from % change in the U.S. dollar exchange rate		
2%	\$	3,216

2%	\$	312	
4%		623	
6%		935	
8%		1,247	
10%		1,558	

(c) Digital assets regulatory risk:

Uncertainties exist with respect to the legality of SAFT investments in certain jurisdictions, as some SAFT investments might not be registered under the local securities law.

(d) Novel corona virus ("COVID-19"):

In March 2020, the global outbreak of COVID-19 was declared a pandemic by the World Health Organization. COVID-19 continues to evolve and has had a significant impact on businesses through the restrictions put in place by the Canadian, provincial and municipal governments regarding travel, business operations and isolation/guarantine orders. To date, the Company's operations have not been significantly affected by COVID-19 or the restrictions put in place to fight the virus. Since COVID-19 was declared a pandemic, the Company has kept in close contact with its investees to evaluate the impacts of COVID-19 on ThreeD's investments. While measures, such as vaccines, are being used to combat COVID-19, it is still unknown the true extent of the impact the COVID-19 outbreak may have on the Company as this will depend on future developments that are highly uncertain and that cannot be predicted with confidence. These uncertainties arise from the inability to predict the ultimate geographic spread of the disease, and the duration of the outbreak, including the duration of travel restrictions, the effect on investees and business closures or disruptions, and guarantine/isolation measures that are currently, or may be put in place by Canada and other countries. The Company continues to monitor its investment and digital assets portfolio and assess the impact COVID-19 will have on its business activities.

#### **15. Commitments**

In September 2018, the Company signed a lease for office premises which started on December 1, 2018 until November 30, 2023, for annual payments of approximately \$190,974 (plus applicable taxes), increasing approximately 3.4% per year.

As at March 31, 2022, future minimum annual lease payments under operating leases for premises and equipment are as follows:

2022	\$ 25,384
