INDEPENDENT AUDITORS' REPORT

To: the Shareholders of Neodym Technologies Inc.

We have audited the accompanying consolidated financial statements of Neodym Technologies Inc., which comprise the consolidated statements of financial position as at February 29, 2012, February 28, 2011 and March 1, 2010 and the consolidated statements of operations and comprehensive loss, changes in shareholders' equity and cash flows for the years ended February 29, 2012 and February 28, 2011 and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, these consolidated financial statements present fairly, in all material respects, the financial position of Neodym Technologies Inc. as at February 29, 2012, February 28, 2011 and March 1, 2010 and its financial performance and cash flows for the years ended February 29, 2012 and February 28, 2011 in accordance with International Financial Reporting Standards.

Emphasis of Matters

Without qualifying our opinion, we draw attention to Note 1 in the consolidated financial statements which indicates that the Company has incurred losses to date. This condition, along with other matters as set forth in Note 1, indicates the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern.

1. GOING CONCERN AND NATURE OF OPERATIONS

Neodym Technologies Inc. (the "Company") was incorporated under the laws of British Columbia, and its principal business activity is the development and sales of gas safety and loss control systems. The Company's registered office is located at 711 – 675 West Hastings Street, Vancouver BC, V6B 1N2

These consolidated financial statements have been prepared on the assumption that the Company is a going concern, meaning that it will continue in operation for the foreseeable future and will be able to realize assets and discharge liabilities in the normal course of operations. The Company reported comprehensive loss for the years ended February 29, 2012 and February 29, 2011 of \$18,176 and \$134,538 had working capital deficiencies of \$1,034,358 and \$1,019,894 at these dates. These factors create doubt as to the ability of the Company to continue as a going concern. The Company is critically dependent on investor financing and increasing levels of sales in order to carry out its short term plans for development, production and marketing. The consolidated financial statements do not reflect adjustments to the carrying values of assets should the Company be unable to generate sufficient sales or otherwise raise additional funds to continue operations.

2. SIGNIFICANT ACCOUNTING POLICIES

a) Statement of compliance

The consolidated financial statements of the Company for the year-ending February 29, 2012 have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"), having previously prepared its financial statements in accordance with pre-changeover Canadian Generally Accepted Accounting Principles ("pre-changeover Canadian GAAP").

The explanation of how the transition to IFRS has affected the reported financial position, financial performance and cash flows of the Company is provided in Note 16.

b) Basis of consolidation

These consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary, Neodym Systems Inc. which was incorporated in Canada. All significant intercompany transactions and balances have been eliminated upon consolidation. The functional currency of the Company and its' wholly-owned subsidiary is the Canadian dollar.

c) Use of estimates

The preparation of consolidated financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent liabilities at the date of the consolidated financial statements, and the reported amounts of revenues and expenditures during the reporting period. Significant areas requiring the use of management estimates relate to the determination of impairment of assets, and determination of fair value for stock based compensation and transactions. Due to the inherent uncertainty involved with making such estimates, actual results reported in future years could differ from these estimates.

2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

d) Financial instruments

Financial instruments are defined as any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. The Company recognizes financial assets and financial liabilities when it becomes a party to the contractual provisions of the instrument.

Financial assets are classified into the following categories at their initial recognition:

- Financial assets at fair value through profit or loss;
- Held-to-maturity investments;
- Loans and receivables; and
- Available-for-sale investments

Financial liabilities are classified into the following categories at their initial recognition:

- Financial liabilities at fair value through profit or loss; and
- Financial liabilities measured at amortized cost.

Financial assets and liabilities are initially measured at fair value, plus, in the case of a financial asset or liability not at fair value through profit or loss, transactions costs directly attributable to the acquisition or issuance of the financial asset or liability. In a purchase or sale of financial assets recognition and de-recognition occurs using trade date accounting.

Financial assets are subsequently measured after initial recognition at fair value, except for financial assets classified as held-to-maturity investments or loans and receivables, which are subsequently measured at amortized cost using the effective interest method.

Financial liabilities at fair value through profit or loss are subsequently measured after recognition at fair value. All other financial liabilities are subsequently measured at amortized cost using the effective interest method.

Financial assets are derecognized when:

- The contractual rights to cash flows from the financial asset expire;
- The contractual rights to the cash flows from the financial asset are retained, but a contractual obligation to pay the cash flows to another party without material delay is assumed by the Company.
- Or when the Company transfers substantially all the risk and rewards of ownership of the financial asset.

Financial liabilities are derecognized when the obligations are discharged, cancelled or expire.

The carrying amount of financial assets is reduced by impairment loss directly for all financial assets with the exception of financial assets classified as loans and receivables, where the carrying amount is reduced through the use of an allowance account. When these assets are considered uncollectible, they are written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognized in profit or loss.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortized cost would have been had the impairment loss been recognized.

2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

c) Financial instruments (continued)

Financial instruments recorded at fair value on the statement of financial position are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels: Level 1 – valuation based on quoted prices (unadjusted) in active markets for identical assets or liabilities; Level 2 – valuation techniques based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and Level 3 – valuation techniques using inputs for the asset or liability that are not based on observable market data (unobservable inputs).

At the end of each reporting period, the Company reviews the carrying amounts of its non-financial assets to determine whether there is any indication that those assets have suffered an impairment loss. Where such an indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. The recoverable amount is the higher of an asset's fair value less cost to sell and its value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount of an asset is estimated to be less than its carrying amount of the asset is reduced to its recoverable amount. An impairment loss is recognized immediately in the statement of loss and comprehensive loss.

The Company designates its financial instruments as follows:

- Cash and short-term investments are classified as fair value through profit or loss.
- Accounts receivable, interest receivable, HST recoverable are classified as loans and receivables.
- Accounts payable and accrued liabilities are classified as liabilities measured at amortized cost.

d) Cash and cash equivalents

For purposes of reporting cash flows, the Company considers cash and short-term investments to include amounts held in banks and highly liquid investments with remaining maturities at point of purchase of 90 days or less. The Company places its cash and cash investments with institutions of high-credit worthiness. As at February 29, 2012, there is \$Nil (2011 - \$Nil) included as cash equivalents.

f) Foreign currency translation

Transactions in foreign currencies are translated at the exchange rate in effect at the date of the transaction. Foreign denominated monetary assets and liabilities are translated to their Canadian dollar equivalents using foreign exchange rates prevailing at the statement of financial position date. Non-monetary items are translated into Canadian dollars at the exchange rate in effect on the respective transaction dates. Revenues and expenses are translated at average rates for the period, except for amortization, which is translated on the same basis as the related asset. Exchange gains or losses arising on foreign currency translation are reflected in profit or loss for the period.

2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

g) Share capital

- i) Non-monetary consideration Shares, agent's warrants, stock options and other equity instruments issued as purchase consideration in non-monetary transactions are recorded at fair value determined by management using the Black-Scholes option pricing model. The fair value of the shares issued is based on the trading price of those shares on the NEX on the date of the agreement to issue shares as determined by the Board of Directors.
- ii) Stock based compensation The Company measures the cost of the service received for all stock options made to consultants, employees and directors based on an estimate of fair value at the date of grant. The Company uses the Black-Scholes option pricing model to estimate the fair value of each stock option at the date of grant. Stock options which vest immediately are recorded at the date of grant. Stock options that vest over time are recorded over the vesting period using the straight line method. Stock options issued to outside consultants that vest over time are valued at the grant date and subsequently re-valued on each vesting date. Stock based compensation is recognized as expense or, if applicable, capitalized to mineral property costs with a corresponding increase in contributed surplus. On exercise of the stock option, consideration received and the estimated fair value previously recorded in contributed surplus is recorded as share capital.
- iii) Share issuance costs Costs directly identifiable with the raising of share capital financing are charged against share capital. Share issuance costs incurred in advance of share subscriptions are recorded as non-current deferred assets. Share issuance costs related to uncompleted share subscriptions are charged to operations.

h) Equipment

Equipment is stated at cost less accumulated depreciation and accumulated impairment losses. The cost of an item of equipment consists of the purchase price, any costs directly attributable to bringing the asset to the location and condition necessary for its intended use and an initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located. Depreciation is recorded at the following rates:

Communication equipment 20% Computers 30% Machinery and equipment 20%

In the year of acquisition, depreciation is provided at one-half the normal rate. An item of equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on disposal of the asset, determined as the difference between the net disposal proceeds and the carrying amount of the asset, is recognized in profit or loss.

2. **SIGNIFICANT ACCOUNTING POLICIES** (Continued)

i) Inventory

Inventory is recorded at the lower of cost and net realizable value, and is comprised of materials required for the production of the Company's gas leak detection products.

An assessment is made of net realizable value from the inventory in each period. When inventories are sold, the carrying amount of those inventories is recognized as an expense in the period in which the related revenue is recognized. The amount of any write-down of inventories to net realizable value and all losses of inventories is recognized as part of the cost of goods and services expense in the period the write-down or loss occurs. When the circumstances that previously caused inventories to be written down below cost no longer exist or when there is clear evidence of an increase in net realizable value because of changed economic circumstances, the amount of the write-down is reversed, limited to the amount of the original write-down, so that the new carrying amount is the lower of the cost and the revised net realizable value. The amount of any reversal of any write-down of inventories arising from an increase in net realizable value is recognized as a reduction in the amount of inventories recognized as part of the cost of goods and services expense in the period in which the reversal occurs.

j) Intangible assets

Intangible assets acquired separately - Patents are reported at cost less accumulated amortization and impairment losses. Patent costs represent amounts paid to third parties for the registration of patents. Amortization is charged on a straight line basis over a twenty year period. The estimated useful life and amortization method are reviewed each year end, with the effect of any changes in estimate being accounted for on a prospective basis.

Internally-generated intangible assets – Deferred Product Development Costs are recognized only if all of the following conditions are met: an asset is created that can be identified; it is probable that the asset created will generate future economic benefits; the development cost of the asset can be measured reliably; and the product from which the asset arises meets the IFRS criteria for technical and commercial feasibility. Internally-generated intangible assets are amortized on a straight-line basis over their useful lives. Costs meeting the capitalization criteria are recorded as Deferred Product Development Costs. Amortization is provided on a straight-line basis over the estimated three year commercial lives of the products. Where no internally generated intangible asset can be recognized, development expenditure is recognized as an expense in the period in which it is incurred. Capitalized expenses include the cost of material, direct labor, direct overhead and outsourcing costs.

k) Revenue recognition

Revenue from the sale of products is recognized upon shipment, which is when: ownership is transferred, the fee is fixed and determinable, the collection of resulting receivables is probable and any uncertainties with regard to customer acceptance are insignificant.

Revenue from the provision of engineering services is recognized upon project/service completion.

2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

I) Research and development

An internally-generated intangible asset arising from product development is recognized only if all of the following conditions are met: an asset is created that can be identified; it is probable that the asset created will generate future economic benefits; the development cost of the asset can be measured reliably; and the product from which the asset arises meets the IFRS criteria for technical and commercial feasibility. Internally-generated intangible assets are amortized on a straight-line basis over their useful lives. Costs meeting the capitalization criteria are recorded as Deferred Product Development Costs. Amortization is provided on a straight-line basis over the estimated three year commercial lives of the products. Where no internally generated intangible asset can be recognized, development expenditure is recognized as an expense in the period in which it is incurred. Capitalized expenses include the cost of material, direct labor, direct overhead and outsourcing costs.

m) Asset impairment

On an annual basis, or when impairment indicators arise, the Company evaluates the future recoverability of its patent and deferred product development costs. Capitalized costs are written off to the extent that the accumulated costs exceed the undiscounted cash flows expected to be generated from those assets. When an asset is not recoverable, the impairment loss recognized is measured as the amount by which the carrying amount of the asset exceeds its fair value.

Where practicable, deferred product development costs are allocated to products or product groups on a specific identification basis. When costs are not specifically identified, costs are allocated on the basis of relative specifically identified costs.

n) Income taxes

Current income tax:

Current income tax assets and liabilities for the current period are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Deferred income tax:

Deferred income tax is provided using the balance sheet method on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. Deferred income tax assets and deferred income tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current income tax liabilities and the deferred income taxes relate to the same taxable entity and the same taxation authority. Valuation allowances are provided where net deferred income tax assets are not more likely than not to be realized.

o) Earnings per share

Basic earnings per share are calculated by dividing net income (loss) by the weighted average number of shares issued and fully paid. The calculations of earnings per share on a diluted basis are calculated using the treasury stock method, which considers the potential exercise of outstanding financial instruments with equity purchase or conversion features.

2. SIGNIFICANT ACCOUNTING POLICIES (Continued)

p) Future accounting pronouncements

The Company has reviewed new and revised accounting pronouncements that have been issued but are not yet effective and determined that the following may have an impact on the Company:

IFRS 9, "Financial Instruments":

As of January 1, 2013, the Company will be required to adopt IFRS 9, "Financial Instruments", which is the result of the first phase of the IASB's project to replace IAS 39, "Financial Instruments: Recognition and Measurement". The new standard replaces the current multiple classification and measurement models for financial assets and liabilities with a single model that has only two classification categories: amortized cost and fair value. The adoption of this standard should not have a material impact on the Company's Consolidated Financial Statements.

IFRS 10, "Consolidated Financial Statements":

IFRS 10 is a new standard which identifies the concept of control as the determining factor in assessing whether an entity should be included in the consolidated financial statements of the parent company. Control is comprised of three elements: power over an investee; exposure to variable returns from an investee; and the ability to use power to affect the reporting entity's returns. IFRS 10 is effective for annual period beginning on or after January 1, 2013. Earlier adoption is permitted.

IFRS 11, "Joint Arrangements":

IFRS 11 is a new standard which focuses on classifying joint arrangements by their rights and obligations rather than their legal form. Entities are classified into two groups: parties having rights to the assets and obligations for the liabilities of an arrangement, and rights to the net assets of an arrangement. Entities in the former case account for assets, liabilities, revenues and expenses in accordance with the arrangement, whereas entities in the later case account for the arrangement using the equity method. IFRS 11 is effective for annual periods beginning on or after January 1, 2013. Earlier application is permitted.

Balance February 29, 2012	6,991	1,213	8,204

The Company has registered a patent in the United States relating to its gas detection method and apparatus. The patent expires in 2019.

6. ACCOUNTS PAYABLE AND ACCRUED LIABILITIES

	February 29, 2012	February 28, 2011	March 1, 2010
Trade payables	\$ 56,233	\$ 56,456	\$ 56,675

7. LOANS PAYABLE

	February 29, 2012	February 28, 2011	March 1, 2010
Repayable on demand, bearing interest at 5% per annum	\$ 10,000	\$ 10,000	\$ 10,000
Repayable on demand, bearing interest at 5% per annum	10,000	10,000	10,000
Accrued interest	1,000	3,000	4,003
	\$ 21,000	\$ 23,000	\$ 24,003

8. SHARE CAPITAL

- a) Authorized Unlimited common shares without par value
- b) Share purchase warrants No share purchase warrants were outstanding as at February 29, 2012.

8. SHARE CAPITAL (continued)

c) Share purchase option - No stock options were outstanding as at February 29, 2012.

d) Performance shares

2,000,000 common shares are restricted. The Company's shareholders have approved the change of release provisions on the escrow shares from a performance based formula to a time release formula. This change is subject to regulatory approval.

As at February 29, 2012, no performance shares had been released. Performance shares are excluded from the calculation of weighted average number of shares outstanding in determining basic and diluted loss per share.

9. RELATED PARTY TRANSACTIONS

- a) Pursuant to a management agreement, the Company was charged \$30,000 (2011: \$30,000) for office, accounting and administrative support by Hastings Management Corp., a private company controlled by a former director. The contract is on a monthly basis and is scheduled to terminate on June 30, 2012. Pursuant to an employment services agreement, the Company was charged \$63,445 (2011: \$124,297) for management and product development services, provided by Stellar J Enterprises Corp., a private company controlled by a director. The same company also charged \$13,836 (2011: \$15,274) for assembly and manufacturing services, and \$3,000 (2011: \$3,000) for office rent. The Company was charged \$36,000 (2011: \$54,000) for marketing and product development services, by William McDonald, a director. These costs were allocated to cost of sales, deferred product development costs, research and developments costs, and marketing on the financial statements. The Company reimbursed business expenses as follows: Juraj Krajci Director \$6,802, Alica Krajci Wife of Director \$1,870 and William McDonald Director \$2,220
- b) Related party payables of \$987,259 (February 28, 2011: \$930,966; March 1, 2010: \$801,144)) are owed to companies which have certain current or former directors in common, of which \$967,932 (2011: \$911,161) relates to the agreements disclosed in Note 9(a). They are non-interest bearing and have no fixed terms of repayment.

Related party transactions are conducted in the normal course of business and are measured at the exchange amount, which is the amount of consideration established and agreed to by the parties.

10. SEGMENTED INFORMATION

The Company operates in one business segment, which is the development, manufacture and sale of gas detection devices and systems. Substantially all of the Company's identifiable assets are located in Canada.

11. ECONOMIC DEPENDENCE

The Company derives a sizable percent of its revenue from its largest customers. The cancellation of purchase orders from one or more of these customers may have a material adverse impact on the Company.

12. CAPITAL RISK MANAGEMENT

The Company's objective when managing capital is to maintain its ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders. The Company includes equity, comprised of issued capital stock, warrant capital, contributed surplus and deficit, in the definition of capital. The Company's primary objective with respect to its capital management is to ensure that it has sufficient cash resources to further develop and market its gas leak detection products, and to maintain its ongoing operations. To secure the additional capital necessary to pursue these plans, the Company may attempt to raise additional funds through the issuance of equity and warrants or by securing strategic partners. The Company is not subject to externally imposed capital requirements and there has been no change with respect to the overall capital risk management strategy during the current period.

13. FINANCIAL INSTRUMENTS

The Company has classified fair value measurements of its financial instruments using a fair value hierarchy that reflects the significance of inputs used in making the measurements as follows:

Level 1 – Valuation based on quoted prices (unadjusted) in active markets for identical assets of liabilities;

Level 2 – Valuations based on directly or indirectly observable inputs in active markets for similar assets or liabilities, other than Level 1 prices, such as quoted interest of currency exchange rates; and

Level 3 – Valuations based on significant inputs that are not derived from observable market data, such as discounted cash flow methodologies based on internal cash flow forecasts.

As at February 29, 2012, the Company's financial instruments consists of cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities, amounts due to related parties, and loans payable. Cash and cash equivalents are carried at fair value using a level 1 fair value measurement. The carrying value of accounts receivable, amounts due to related parties, accounts payable and accrued liabilities, sales prepayment and loans payable approximate their fair value because of their nature and respective maturity dates or durations.

Unless otherwise noted, it is management's option that the Company is not exposed to significant credit, liquidity or market risks arising from these financial instruments. The fair value of these financial instruments approximates their carrying value, unless otherwise noted.

- a) Credit risk The Company's largest customer accounts receivable balances represent a sizable percentage of total receivables.
- b) Foreign currency risk The Company's activities that result in exposure to fluctuations in foreign currency exchange rates consist of the sale of products to customers invoiced in foreign currencies and the purchase of services, materials, and property and equipment from suppliers invoiced in foreign currencies. The Company does not use derivative instruments to hedge its currency risk. A majority of the Company's accounts receivable are denominated in U.S. dollars.
- d) Market risk Market risk is the risk that changes in market conditions, such as input parts prices, interest rates, and foreign exchange rates, will affect the Company's cash flows or the value of its financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable limits, while maximizing returns. The Company does not utilize financial derivatives or other contracts to manage market risks.

13. FINANCIAL INSTRUMENTS (continued)

e) Liquidity risk - Liquidity risk is the risk that the Company will encounter difficulty in paying obligations as they come due. The Company's financial liabilities consist of accounts payable, related party payables, sales prepayment and loans payable. Accounts payable consists of invoices payable to trade suppliers for capital and operating expenditures and for general corporate expenses. The Company processes invoices within a normal payment period. Loans payable are renegotiated to extend terms and conditions as required. Sales prepayment represents funds advanced as a deposit to secure a special order that has subsequently been cancelled. These funds will be used to defray the development and certification costs related to the project. Related party payables do not bear any interest and are provided on a non-secured basis. The Company prepares funds from operations and capital expenditure budgets, which are regularly monitored and updated.

14. INCOME TAXES

A reconciliation of the expected income tax expense (benefit) to the actual income tax expense (benefit) for the years ended February 2012 and 2011 is as follows:

	February 29, February 2012 2011			February 28, 2011
Statutory rates Income tax expense (recovery) at statutory rate Net adjustments for deductible and non-deductible items Effect of change in tax rate Change in valuation allowance	\$	27.25 % (2,500) 2,500 (26,000) 26,000	\$	28.75 % (40,000) - (45,000) 85,000
Income tax provision	-\$	20,000	\$	- 35,000

The components of future income taxes are:

	February 29, 2012		February 28, 2011	
Non-capital losses carryforwards	\$	339,000	\$	336,000
Scientific research and experimental development		16,000		16,000
Resource deductions		733,000		733,000
Equipment		129,000		129,000
Total future income tax assets		1,217,000		1,214,000
Valuation allowance		(1,217,000)		(1,214,000)
Net future income tax asset	\$		\$	-

The Company has available tax losses as follows which may be offset against future Canadian taxable income:

228,000
274,000
237,000
115,000
141,000
115,000
96,000
139,000
9,000
\$ 1,354,000

15. Subsequent Events

Neodym Technologies Inc. announced that, in order to facilitate a re-organization of the Company, it intends to sell its current gas detection equipment business on terms to be agreed. This transaction will be subject to regulatory and other approvals. The Company wishes to assure customers, suppliers, and service providers that the gas detection equipment business will continue to operate as before under the same name and the existing management team.

In addition, the Company announces that it intends to seek approval for a consolidation of its common shares on a one (new) for two (old) shares basis and a consequent change of name of the Company. Post-consolidation, the Company will have approximately 6,075,960 shares issued and outstanding. These transactions remain subject to regulatory approval.

Finally, the Company also wishes to announce a non-brokered private placement of up to 25,000,000 units at a price of \$0.06 per unit, each unit consisting of one post-consolidated share of the Company and one warrant to buy one additional post-consolidated share of the Company for \$0.10 for a period of one year from the closing of the placement. Proceeds of the private placement will be used to pay off existing debt and to provide the Company with working capital to enable it to move forward and find a new business. The private placement is subject to regulatory approval. Finder's fees will be paid in accordance with the policies of the Exchange.

16. FIRST TIME ADOPTION OF IFRS

The Company's financial statements for the year-ending February 29, 2012 are the first annual financial statements that will be prepared in accordance with IFRS. IFRS 1, First Time Adoption of International Financial Reporting Standards, requires that comparative financial information be provided. As a result, the first date at which the Company has applied IFRS was March 1, 2010 (the "Transition Date"). IFRS 1 requires first-time adopters to retrospectively apply all effective IFRS standards as of the reporting date, which for the Company is February 29, 2012

a) First-time adoption of IFRS - exemptions applied

IFRS 1, which governs the first-time adoption of IFRS, generally required accounting policies to be applied retrospectively to determine the opening statement of financial position on the Company's transition date. However, IFRS 1 also dictates certain mandatory exemptions and allows certain optional exemptions from full retrospective application on the transition to IFRS.

Share based payments

IFRS 1 encourages, but does not require, first-time adopters to apply IFRS 2 Share-based Payment to equity instruments that were granted on or before November 7, 2002, or equity instruments that were granted subsequent to November 7, 2002 and vested before the later of the date of transition to IFRS and January 1, 2005. The Company has elected not to apply IFRS to awards that vested prior to December 1, 2010.

Financial instruments

In preparing its transition date financial statements the Company has elected to apply an exemption to designate its investments classified as held-for-trading under the previous GAAP to fair value through profit or loss under IFRS.

16. FIRST TIME ADOPTION OF IFRS (continued)

Business combinations

The Company elected under IFRS 1 to not to apply IFRS 3, Business Combinations retrospectively to any business combinations that may have occurred prior to its Transition Date and such business combinations have not been restated.

b) Reconciling items

In preparing the Company's IFRS Transition Date statements management noted that adjustments related to accumulated other comprehensive income were necessary to be made by the Company in its financial statements prepared in accordance with previous Canadian GAAP.

Other comprehensive income: Under previous Canadian GAAP, the unrealized foreign exchange gains and losses were recognized as other comprehensive income and the balance was reported on the balance sheet as accumulated other comprehensive income until realized. Under IFRS, foreign exchange gains and losses resulting from dealing with currency other than the Company's functional currency are reported on the income statement.

The IFRS transition adjustment noted above did not have a material impact on the cash flows statements.

16. FIRST TIME ADOPTION OF IFRS (continued)

b) Reconciling items (continued)

The Canadian GAAP consolidated statement of financial position at March 1, 2010 has been reconciled to IFRS as follows:
