Vancouver, British Columbia: Hello Pal International Inc. (“Hello Pal” or the “Company”) provider of a rapidly growing international social messaging application is pleased to announce it has now surpassed 1,200,000 registered users. The Company is continuing to experience rapid user growth by building a highly diversified global user base

“The Hello Pal team is ecstatic about reaching this milestone in just over a year from launch. We are seeing a broad range of new users from countries around the world and are confident our platform has a solid foundation and offering for continued success.” commented KL Wong, the founder and CEO of Hello Pal. “Many similar applications spend substantially more money on user acquisition and fail to achieve the results we are seeing at this early stage. We feel this is validation of our strategy -- providing a solid messaging platform that helps users meet people globally, learn new languages and travel the world.”

Hans Xu, senior partner of the New Margin Group of funds and special advisor to Hello Pal stated, “As an investor I see substantial growth prospects in mobile messaging platforms, and due to the increasing globalization of the world, services and platforms that are international in nature are also in a long term upward trend. By making its offering catered to an international audience, adding a social aspect, and going beyond traditional language learning, Hello Pal is well-positioned to capitalize on this trend. I constantly travel globally in order to review potential investments in many countries. I feel a messaging platform that helps bring people together globally and solves the problem of communicating in multiple languages will become more and more in demand.”

Hello Pal is also in the final stages of preparing to launch its first companion app “Travel Pal”, a social app targeting worldwide travelers. Travel Pal will be followed by further companion apps in other sectors which are similarly international in nature, all of which will play a key role in the Company’s mission of bringing the world closer together. These apps will all be run on the same platform and users will be part of a common Hello Pal user

base. The Hello Pal brand will benefit from increased exposure having the companion apps in multiple sections of the Android and IOS stores.

On top of this, Hello Pal is continuing to ramp up its user acquisition activities to accelerate this early stage growth. Through these activities Hello Pal feels it's current rate of 3500 to 6000 registered new users daily will increase markedly. As well Hello Pal will continue to leverage the deep network of its management and advisors in pursuit of strategic partnerships and collaborations.
