"Sale of IC Bentonite property"

Senator Minerals Inc ("Senator" or "the Company") announces that it has completed the sale of its 50% interest in the IC Bentonite property, Nevada, while retaining a 3% Production Royalty on all bentonite output from the property and surrounding area of interest. Senator's interest in IC Bentonite has been acquired by Kent Exploration, which already owns the other 50% of the property.

Tony Simon, CEO, comments, "To date, we have had a positive experience with royalties, and we are hoping that our 3% Production Royalty on bentonite will be profitable for us. It makes sense for Kent to invest the resources and time to put this property into production, while we are better off concentrating on our main property, the Taurus copper-moly-gold deposit in the Tintina Gold Belt in southeast Alaska."

This News Release was prepared on behalf of the Senator Board of Directors, which accepts full responsibility for its contents.

ON BEHALF OF THE BOARD

"D A Simon"

Donald A (Tony) Simon, BComm,CA President
