The Company does not pay out dividends. FINANCIAL INSTRUMENTS

Fair value

The Company classifies its cash and investments as fair value through profit or loss; accounts receivable as loans and receivables; and accounts payable and accrued liabilities as other financial liabilities.

The carrying values of accounts receivable, accounts payable and accrued liabilities approximate their fair values due to the short-term maturity of these financial instruments.

The Company's measurement of fair value of financial instruments as at June 30, 2017 and December 31, 2016 in accordance with the fair value hierarchy is as follows:

	Total	Level 1	Level 2	Level 3
June 30, 2017				
Cash	\$ 11,864	\$ 11,864	\$ -	\$ -
Investments	\$ 13,779	\$ 13,779	\$ -	\$ -

Cash	\$ 79,712	\$ 79,712	\$ -	\$ -
Investments	\$ 11,537	\$ 11,537	\$ -	\$ -

The Company's risk exposure and the impact on the Company's financial instruments are summarized below.

Credit risk

Credit risk is the risk of financial loss to the Company if a counter party to a financial instrument fails to meet its payment obligations. The Company is exposed to credit risk with respect to its cash, investments, and accounts receivable.

The Company's credit risk is primarily attributable to cash and investments. Management believes that the credit risk concentration with respect to cash and investments is remote as it maintains accounts with highly-rated financial institutions.

Credit risk with respect to other receivables is considered to be moderate due to the balance being outstanding from related parties. Credit risk with respect to trade accounts receivable has been assessed as low from management, as the Company has strong working relationships with the parties involved.

The credit risk associated with cash is minimized substantially by ensuring that these financial assets are placed with a major financial institution with strong investment-grade ratings by a primary ratings agency.

WATERFRONT CAPITAL CORPORATION

Investments	13,779	11,537
Accounts receivable	3,819	3,265
	\$ 29,462	\$ 94,514

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in satisfying financial obligations as they become due. At June 30, 2017, the Company had accounts payable and accrued liabilities of \$252,987 (December 31, 2016 - \$217,651) and loans payable of \$40,000 (December 31, 2016 - \$11,000). Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, foreign currency risk and other price risk.

(i) Interest rate risk

Interest rate risk consists of two components:

- (a) To the extent that payments made or received on the Company's monetary assets and liabilities are affected by changes in the prevailing market interest rates, the Company is exposed to interest rate cash flow risk.

The Company is exposed to other price risk with respect to its marketable securities, as they are carried at fair values based on quoted market prices, and investments, as they are carried at fair values based on quoted market prices.

CRITICAL ACCOUNTING ESTIMATES

The preparation of the consolidated financial statements in conformity with IFRS requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results ultimately may differ from those estimates.

The most significant accounts that require estimates as the basis for determining the stated amounts include the impairment of assets, valuation of share-based payments and recognition of deferred tax amounts.

Critical accounting estimates:

a) Recoverability of asset carrying values

The Company assesses its assets for possible impairment if there are events or changes in circumstances that indicate that carrying values of the assets may not be recoverable, at each reporting period. The assessment of any impairment assets is dependent upon estimates of recoverable amounts that take into account factors such as reserves, economic and market conditions, timing of cash flows, the useful lives of assets and their related salvage values.

b) Share-based payments

The fair value of share options granted is measured using the Black-Scholes option pricing model. Measurement inputs include share price on measurement date, exercise price of the option, expected volatility, expected life of the options, expected dividends and the risk-free rate. These estimates will impact the amount of share-based payments recognized.

c) Income taxes

Related assets and liabilities are recognized for the estimated tax consequences between amounts included in the financial statements and their tax base using substantively enacted future income tax rates. Timing of future revenue streams and future capital spending changes can affect the timing of any temporary differences and, accordingly, affect the amount of the deferred tax asset or liability calculated at a point in time.
