\$8,712,332, including a loss for the nine months ended February 28, 2015 of \$73,911 (2014 - \$102,329). These uncertainties may cast significant doubt upon the Company's ability to continue as a going concern.

The Company entered into an Amalgamation Agreement with Wmode, which will include raising funds through equity financings. See item 1.11 Proposed Transaction. Although the Company has been successful in raising funds in the past, there can be no assurance that the Company will have sufficient financing to meet its future capital requirements or that additional financing will be available on terms acceptable to the Company in the future.

Risk and Uncertainties

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit Risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss.

The Company's primary exposure to credit risk is on its cash, which consist of bank deposits of \$868. The Company limits its exposure to credit loss by placing its cash with a Canadian Chartered bank. While there is concentration of risk by holding all funds with one institution, management assesses credit risk of cash as very low due to the high credit quality rating the institution has with rating agencies.

The Company's secondary exposure to credit risk is on its receivables, which consist of refundable government sales taxes of \$5,070.

Liquidity and funding risk

Liquidity risk arises through the excess of financial obligations over available financial assets due at any point in time. As at February 28, 2015, the Company had a working capital deficiency of \$159,366 (May 31, 2014 – \$86,147). The Company has been successful in re-negotiating its indebtedness, however, there is no assurance the success of these efforts will continue.

Funding risk is the risk that market conditions will impact the Company's ability to raise capital through equity markets under acceptable terms and conditions. Under current market conditions, both liquidity and funding risk are assessed as high.

Market Risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, foreign currency risk and other price risk.

Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in the market interest rates. The Company is exposed to interest rate risk as its bank accounts earn interest income at variable rates and are subject to the movement in interest rates. Management considers the interest rate to be minimal.

The Company has no debt and is not subject to any externally imposed capital requirements.

owned subsidiary of Afrasia, by combining its corporate existence with a wholly-owned Alberta incorporated subsidiary of the Company.

As part of and prior to closing the RTO, Afrasia anticipates a consolidation of its issued and outstanding securities on a fourteen (14) old for one (1) new basis (the "Consolidation"), continuing its jurisdiction of incorporation into Alberta (the "Continuation") under the name WMode Corp. or such other name that may be acceptable to applicable regulatory authorities. Afrasia anticipates that upon completion of the RTO the Resulting Issuer will graduate from NEX to Tier 1 of the TSX Venture Exchange as a Technology issuer.

At the annual general and special meeting (the "Meeting") of Afrasia shareholders held on March 31, 2015, the shareholders have approved certain matters relating to the RTO, including the Consolidation and the Continuation.

Completion of the Afrasia Consolidation and the RTO is conditional upon, among other things, receipt of all required regulatory and shareholder approvals, the negotiation and execution of definitive documentation and the completion of the financings.

Completion of the RTO is subject to a number of conditions, including Exchange acceptance and disinterested shareholder approval. The RTO cannot close until the required shareholder approval is obtained. There can be no assurance that the transaction will be completed as proposed or at all.

Subsequent to the Meeting, the RTO has been placed on hold on the request of WMode.
