Cryptanite Marketplace is Live!

VANCOUVER, British Columbia and ST. JULIAN'S, Malta (January 28, 2019) — Cryptanite Blockchain Technologies Corp. (CSE: NITE, OTCQB: CRBTF, FRA: 98AA) announced that on January 28, 2019 Cryptanite Ltd re-launched its updated Cryptanite application as a token marketplace where people can buy and sell digital assets peer-to-peer.

This revolutionary app moves closer to decentralized exchanges by creating a secure place for users to be in control of their cryptocurrencies with proof of keys on their mobile device. Cryptanite is available now on Google Play Markets and the Apple App Store.

With the Cryptanite app, users can purchase a variety of cryptocurrencies including Bitcoin and Ethereum and deposit them easily into locally-generated wallets. Expert-curated cryptocurrency bundles are also available within the application, allowing investors to easily diversify their cryptocurrency holdings.

One example of a themed bundle available on the app is the SIZE bundle, which dynamically updates to include the top 5 cryptocurrencies by market capitalization. Similarly, the HODL bundle features five of the industry's longest standing tokens and changes periodically based on an assessment of user demand.

The app currently includes Bitcoin (BTC), Ethereum (ETH), Stellar (XLM), Ripple (XRP), Dashcoin (DASH), Ethereum Classic (ETC), and LItecoin (LTC), and will continue to add more digital assets and bundles to choose from over the next months, with scheduled releases every week.

Users can also exchange cryptocurrency within the application through a peer-to-peer, local wallet to local wallet exchange function.

Moreover, the application is not susceptible to malicious cryptocurrency wallet hacks. While users can purchase and exchange cryptocurrencies within the app, Cryptanite never acts as a custodian of funds. Only users have access to their private key, and information is never stored by Cryptanite. Vigilant investors can also print and save their private key for safe keeping.

Cryptanite transforms the way people can own, invest, and spend cryptocurrency. It creates an easy sign-on process and user-friendly way to buy, sell, and store cryptocurrency among users and exchanges. This app can change the way people exchange tokens in a social marketplace.

About Cryptanite Blockchain Technologies Corp.
