The accompanying notes to the unaudited condensed interim consolidated financial statements are an integral part of these statements.

1. Nature of operations and going concern

Nature of business

Class 1 Nickel and Technologies Limited ("Class 1" or the "Company") was incorporated on December 12, 1989 as "871900 Ontario Limited" under the laws of the Province of Ontario. The principal business of the Company is mining exploration and development of minerals and base metals in Canada. The corporate head office of the Company is located at 82 Richmond Street East, Toronto, Ontario M5C 1P1. On August 20, 2020, the Company commenced trading on the Canadian Securities Exchange under the stock symbol "NICO".

Going concern uncertainty

These unaudited condensed interim consolidated financial statements have been prepared on a going concern basis in accordance with International Financial Reporting Standards ("IFRS"). The going concern basis of presentation assumes that the Company will continue its operations for the foreseeable future and be able to realize its assets and discharge its liabilities and commitments in the normal course of business. These financial statements do not include any adjustments to amounts and classifications of assets and liabilities that would be necessary should the Company be unable to continue as a going concern. Such adjustments could be material.

For the three and six months ended June 30, 2021, the Company incurred a net loss of $4,073,299 and $5,177,373, respectively (three and six months ended June 30, 2020 - $289,842 and $458,076, respectively) and had negative operating cash flows of $2,421,675 (June 30, 2020 - $415,912). The Company has an accumulated deficit of $8,477,753 since inception (December 31, 2020 - $3,300,380) and does not have sufficient cash as at June 30, 2021 to meet its expected ongoing obligations over the next twelve months after deducting the $7,366,500 committed to be spent on capital exploration expenditures ("CEE") under terms of the flow through financings. As at June 30, 2021, the Company has spent on CEE $1,734,267 (see note 9). These factors raise significant doubt about the Company's ability to continue as a going concern.

The Company's ability to continue its operations and to realize assets at their carrying values is dependent upon its ability to generate cash flows from operations and to complete negotiations to obtain and successfully close additional funding from debt financing, equity financings or through other arrangements. These conditions indicate the existence of a material uncertainty that may cast significant doubt regarding the Company's ability to continue as a going concern. These unaudited condensed interim consolidated financial statements do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and balance sheet classifications that would be necessary were the going concern assumption deemed to be inappropriate. These adjustments could be material.

The outbreak of the novel strain of coronavirus, specifically identified as "COVID-19", has resulted in governments worldwide enacting emergency measures to combat the spread of the virus. These measures, which include the implementation of travel bans, self-imposed quarantine periods and social distancing, have caused material disruption to businesses globally resulting in an economic slowdown. Global equity markets have experienced significant volatility. Governments and central banks have reacted with significant monetary and fiscal interventions designed to stabilize economic conditions. The duration and impact of the COVID-19 outbreak is unknown at this time, as is the efficacy of the government and central bank interventions. It is not possible to reliably estimate the length and severity of these developments and the impact on the financial results and condition of the Company in future periods. The Company is monitoring the business environment as a result to ensure minimal disruption to business operations. The Company continues to be in operations as of the current date.

2. Significant accounting policies

Statement of compliance

The Company applies International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board (“IASB”) and interpretations issued by the International Financial Reporting Interpretations Committee(“IFRIC”). These unaudited condensed interim financial statements have been prepared in accordance with International Accounting Standard 34, Interim Financial Reporting. Accordingly, they do not include all of the information required for full annual financial statements required by IFRS as issued by IASB and interpretations issued by IFRIC.

The policies applied in these unaudited condensed interim financial statements are based on IFRS issued and outstanding as of August 23, 2021. The same accounting policies and methods of computation are followed in these unaudited condensed interim financial statements as compared with the most recent annual financial statements as at and for the year ended December 31, 2020. Any subsequent changes to IFRS that are given effect in the Company's annual financial statements for the year ending December 31, 2021 could result in restatement of these unaudited condensed interim financial statements.

These unaudited condensed interim consolidated financial statements were authorized for issuance by the Board of Director of the Company on August 23, 2021.

New standards not yet adopted

Certain pronouncements were issued by the IASB or the IFRIC that are mandatory for annual periods beginning on or after January 1, 2021 or later periods:

Classification of Liabilities as Current or Non-Current (Amendments to IAS 1)

The IASB has published Classification of Liabilities as Current or Non-Current (Amendments to IAS 1) which clarifies the guidance on whether a liability should be classified as either current or non-current. The amendments:

- clarify that the classification of liabilities as current or non-current should only be based on rights that are in place "at the end of the reporting period"
- clarify that classification is unaffected by expectations about whether an entity will exercise its right to defer settlement of a liability
- make clear that settlement includes transfers to the counterparty of cash, equity instruments, other assets or services that result in extinguishments of the liability.

This amendment is effective for annual periods beginning on or after January 1, 2022. There is currently a proposal in place to extend effective date for annual periods beginning on or after January 1, 2023. Earlier application is permitted. The extent of the impact of adoption of this amendment has not yet been determined.

4. Mining interests

Alexo-Dundonald Project

The "Alexo-Dundonald Project" is an exploration stage, past-producing nickel-copper-cobalt sulphide project, located approximately 45 kilometers northeast of the city of Timmins, Ontario, Canada. Ontario. The Alexo-Dundonald Project combines the Alexo-Kelex and Dundonald properties and consists of 29 patented claims (19 with both mining and surface rights, nine with mining rights only and one with surface rights only), 40 leased claims (31 with both mining and surface rights and nine with mining rights only), 21 single cell mining claims and five boundary cell mining claims. The Company owns all the outstanding equity of Legendary Ore Mining Corporation, which holds a 100% interest in the mining claims, leases and properties comprising the Alexo-Dundonald Project, subject to certain tenure agreements and any rights or claims asserted in connection with historic royalty agreements granted in respect of the Alexo-Kelex and Dundonald properties.

The Alexo deposit was discovered in 1907, and between the years 1913 to 1919, 51,851 tonnes grading 4.5% nickel and 0.7% copper was extracted and sent to Sudbury, Ontario, for processing. Canadian Arrow Mines Ltd shipped 6,000 tonnes grading 2.46% nickel, 0.31% copper, and 0.07% cobalt as part of a 10,000 tonne bulk sample permit held at the time, and started the reclamation of the project as part of a Closure Plan approved in 2004 and amended in 2011.

Under the purchase agreements for the Alexo-Kelex and Dundonald properties, the Company must incur an aggregate of $1,500,000 on the Alexo-Dundonald Project by November 9, 2021, of which the Company must incur at least $750,000 on the Alexo-Kelex property by October 18, 2021, otherwise the properties may be re-acquired by the vendors thereof.

4. Mining interests (continued)

Somanike Project

The Company has an option (the “Somanike Option”) to acquire a 100% interest in the rights held by Vanicom Resources Limited, in an option to acquire the Somanike property, an exploration stage nickel-copper mine project, including the past-producing Marbridge Nickel Sulphide Mine located near Val d’Or, Quebec. The Company is concentrated on advancing the Alexo-Dundonald Project for the current time being and will continue to evaluate this option on an on-going basis. Prior to exercising the Somanike Option, the Company must complete 750m of drilling on certain mining claims held by Globex Mining Enterprises Inc. which comprise a portion of the Somanike property.

In August 2020, the Company issued an aggregate of 234,935 common shares (valued at $160,000) to satisfy all outstanding share issuances required by the Company. In order to earn its 100% undivided interest in the Somanike Property the Company must make cash payments of $25,000 due on or before June 15, 2022 and $50,000 in cash due on or before June 15, 2023. In February 2021, the Company paid $75,000 and $327,800 to earned 100% of interest and for reimbursement expenditures made on Somanike Property as part of the acquisition cost.

10. Financial instruments and risks management

The Company provides information about its financial instruments measured at fair value at one of three levels according to the relative reliability of the inputs used to estimate the fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The three levels of the fair value hierarchy are as follows:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: inputs other than quotes prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The fair value of the Company's assets and liabilities approximate their carrying values because of the short-term nature of these instruments. The Company's financial instruments are exposed to certain financial risks, including credit risk, liquidity risk, and market risk.

Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The Company has exposure to credit risk through its cash and cash equivalents, accounts receivable and amounts due from related parties. The Company manages credit risk in respect of cash and cash equivalents by maintaining cash at highly rated financial institutions.

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting its financial obligations as they become due. The Company manages its liquidity risk by forecasting cash flows required by operations and anticipated investing and financing activities. The Company's liquidity and operating results may be adversely affected if the Company's access to the capital market is hindered, whether as a result of a downturn in stock market conditions generally or as a result of conditions specific to the Company. As at June 30, 2021, the Company has sufficient cash and cash equivalent, and accounts receivables to settle accounts payable and accrued liabilities of $851,893 (December 31, 2020 - $196,836).

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices. Market risk comprises three types of risk: interest rate risk, foreign currency risk and price risk.

Interest rate risk

The Company's cash consists of cash held in bank accounts that earn interest at variable interest rates. Future cash flows from interest income on cash will be affected by interest rate fluctuations. Due to the short-term nature of these financial instruments fluctuations in market rates do not have a significant impact on estimated fair values. The Company manages interest rate risk by maintaining an investment policy that focuses primarily on preservation of capital and liquidity. The interest income earned on cash is minimal; therefore, the Company is not subject to material interest rate risk.

10. Financial instruments and risks management (Continued)

Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in foreign exchange rates. The Company is exposed to foreign currency risk to the extent that its monetary assets and liabilities are denominated in currencies other than the Canadian Dollar. The Company's has no monetary assets and liabilities in currencies other than the Canadian Dollar, therefore the Company is not exposed to foreign currency risk.

Price risk

The Company is exposed to price risk with respect to commodity prices. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company closely monitors commodity prices as they relate to the base metals industry to determine the appropriate course of action to be taken by the Company.
