JH Strategic Solutions also consulted for green technology businesses to bring debt and equity funding. These businesses are in renewable energy, efficient energy technologies, energy from biofuels and biomass, as well as clean technologies.

Initially, OWL is interested in J & L skills in mergers and acquisitions, and a variety of industry fundings given the growing demand to access either lithium separation technologies or exploring for lithium carbonate prospects and deposits. If these financings are successful, OWL’s future offerings may take a different direction. In other words, the lithium consumers are buying a current position for future supply.
