## About Myriad Uranium Corp.

Myriad Uranium Corp. is a uranium exploration company with an earnable 75% interest in the Copper Mountain Uranium Project in Wyoming, USA. To date, Myriad has earned a 50% interest in the Project. Copper Mountain hosts several known uranium deposits and historical uranium mines, including the Arrowhead Mine which produced 500,000 lbs of eU<sub>3</sub>O<sub>8</sub>. Copper Mountain saw extensive drilling and development by Union Pacific during the late 1970s including the development of a mine plan to fuel a planned fleet of California Edison reactors. Operations ceased in 1980 before mining could commence due to falling uranium prices. Approximately 2,000 boreholes have been drilled at Copper Mountain and the Project Area has significant exploration upside. Union Pacific is estimated to have spent C\$117 million (2024 dollars) exploring and developing Copper Mountain, generating significant historical resource estimates which are detailed [here](#). Myriad recently concluded a 34-hole maiden drill program in November 2024 which encountered significant high grade uranium mineralisation that exceeded expectations, provided verification of historical exploration work, and encountered mineralisation in deeper zones, which opens exciting new potential for the Copper Mountain Uranium Project. A comprehensive news release regarding the drilling can be viewed [here](#).
