RESULTS OF OPERATIONS FOR THE THREE MONTHS ENDED MARCH 31, 2022

Operating expenses

Expenses for the three months ended March 31, 2022 were \$85,819, compared to \$322,755 incurred the same period in the prior year. The significant differences in expenditures were as follows:

- Office and administrative fees: \$62,526 compared to \$266,525 during the same period in 2021; the Company incurred more management fees as it paid its CFO severance pay in 2021.
- Professional fees: \$1,101 compared to \$26,530 during the same period in the prior year; the Company paid more in legal and accounting fees in 2021.
- Bad debts: \$nil compared to \$16,784 during the same period in 2021; the Company wrote off its GST receivable in 2021 as the Company transitions to an investment company and may not be eligible to claim GST input tax credits.
- Transfer agent and regulatory fees: \$17,692 for the three months ended March 31, 2022 compared to \$6,212 during the same period in 2021 as the Company changed its name from Netcoins Holdings Inc. to Axcap Ventures Inc.

CAPITAL STRUCTURE

As of the date of this MD&A, the Company has 21,811,241 common shares issued and outstanding. In addition, there are outstanding stock options for a further 54,371 common shares, respectively.

The details of stock options outstanding are as follows:

| Grant Date | Expiry Date | Number of Shares Issuable on Exercise | Weighted Average Exercise Price |
|----------------|----------------|---------------------------------------|---------------------------------|
| March 13, 2018 | March 13, 2023 | 54,371 | \$8.75 |

CAPITAL RESOURCES

The Company defines capital as consisting of shareholder's equity and due to a related party. The Company manages its capital structure to maximize its financial flexibility making adjustments to it in response to changes in economic conditions and the risk characteristics of the underlying assets and business opportunities. The Company does not presently utilize any quantitative measures to monitor its capital, but rather relies on the expertise of the Company's management to sustain the future development of the business. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

As at March 31, 2022 and December 31, 2021, the Company is not subject to any externally imposed capital requirements or debt covenants. There was no change to the Company's approach to capital management during the three months ended March 31, 2022 and the year ended December 31, 2021.

LIQUIDITY

The Company's objective in managing liquidity risk is to maintain sufficient liquidity in order to meet operational and investing requirements. The Company has historically financed its operations primarily through the sale of share capital by way of private placements.

At March 31, 2022, the Company had cash of \$1,625,292 (December 31, 2021 - \$829,312) and working capital of \$1,474,632 (December 31, 2021 - \$382,234). The change in working capital at March 31, 2022 and December 31, 2021 was significant as the fair value of the Company's equity instruments increased during the three months ended March 31, 2022 while the fair value of the Company's equity instruments decreased during the three months ended March 31, 2021.

Cash used in operating activities was \$385,537 during the three months ended March 31, 2022, compared to \$448,558 used in operating activities during same period in the prior year. The change in operating cash flows in 2022 is attributed primarily due to the gain in fair values of the Company's investments in 2022.

Cash used by investing activities was \$498,302 during the three months ended March 31, 2022, compared to cash provided by investing activities of \$1,202,383 during the same period in the prior year. The change in investing cash flows is attributed primarily to the purchase of marketable securities in the three months ended March 31, 2022 which used up cash.

Cash provided by financing activities was \$1,679,819 during the three months ended March 31, 2022, compared to \$nil during the same period in the prior year. The Company completed 2 tranches of private placement in 2022.

The continued operation of the Company in the future may depend on the Company's ability to obtain additional financings. In the past years, the Company has relied on shareholder loans and cash generated from operations to meet its cash requirements. Future developments, in excess of funds on hand, will depend on the Company's ability to obtain financing through equity financing, debt financing or other means. There can be no assurances that the Company will be successful in obtaining any such financing; failure to obtain such additional financing could have a material adverse effect on the Company's operations.

RELATED PARTY TRANSACTIONS

The Company's related parties include key management personnel and companies related by way of directors or shareholders in common.

OFF BALANCE SHEET ARRANGEMENTS

The Company currently has no off-balance sheet arrangements.

FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Financial assets and liabilities are classified in the fair value hierarchy according to the lowest level of input that is significant to the fair value measurement. Assessment of the significance of a particular input to the fair value measurement requires judgement and may affect placement within the fair value hierarchy levels.

The hierarchy is as follows:

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3 fair value measurements are those derived from inputs that are unobservable inputs for the asset or liability.

The Company's cash and marketable securities are measured at fair value. The Company considers that the carrying amount of its trade and other payables recognized at amortized cost in the financial statements approximates their fair value due to the demand nature of these instruments.

Fair value estimates of financial instruments are made at a specific point in time, based on relevant information about financial markets and specific financial instruments. As these estimates are subjective in nature, involving uncertainties and matters of significant judgment, they cannot be determined with precision. Changes in assumptions can significantly affect estimated fair values.

Financial Risk Factors

The Company's risk exposure and the impact on the Company's financial instruments are summarized below:

Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. Credit risk arises from cash held with banks, cash on deposit with fiat to cryptocurrency exchanges and from outstanding trade receivables. The Company minimizes credit risk associated with its cash balance substantially by dealing with financial institutions deemed to be reliable due to their history of operations. The Company assessed its credit risk to be low.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company currently settles its financial obligations with cash. The ability to do this relies on the Company raising equity financing in a timely manner and by maintaining sufficient cash in excess of anticipated needs. The Company is exposed to liquidity risk, but has assessed liquidity risk to be low.

Foreign Currency Risk

Currency risk is the risk that the value of financial assets and liabilities denominated in currencies, other than the functional currency of the Company, will fluctuate due to changes in foreign currency exchange rates. The Company does not use derivative instruments to reduce its exposure to foreign currency risk. The Company previously was exposed to foreign currency risk through cash in banks and cash on deposit with fiat to cryptocurrency exchanges which are denominated in United States dollars (USD). As at March 31, 2022, the Company was not exposed to currency risk.

Price Risk

The Company's net income or loss, and financial condition were subject to price risk due to fluctuations of the following:

Equity Price Risk

The Company is exposed to equity price risk through its equity investments and unfavourable market conditions could result in dispositions of marketable securities at less than favourable prices, especially during periods of overall market instability. The Company manages its equity price risk by having a portfolio of equity investments not singularly exposed to any one issuer.

BUSINESS RISKS AND UNCERTAINTIES

Additional information on risks and uncertainties relating to the Company's business is provided in GAR's Listing Statement dated February 28, 2018, under the heading "Risk Factors".

CONTRACTUAL OBLIGATIONS

The Company presently has no contractual obligations pursuant to which the Company has any payments owing in the next five years.

CRITICAL ACCOUNTING ESTIMATES

The preparation of the Company's financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities and contingent liabilities at the date of the financial statements and reported amounts of income and expenses during the reporting period. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual outcomes may differ significantly from these estimates.

The following discusses the most significant accounting judgements, estimates and assumptions that the Company has made in the preparation of its financial statements.

Areas of judgment:

- Going concern

Determining if the Company has the ability to continue as a going concern is dependent on its ability to achieve profitable operations. Certain judgments are made when determining if the Company will be able to continue as a going concern.

- **Deferred tax assets**

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. Management applies judgment in determining the likelihood of future taxable profits.

- **Determination of fair values**

Certain of the Company's assets and liabilities are measured at fair value. In estimating fair value, the Company uses market-observable data to the extent it is available. In certain cases where Level 1 inputs are not available the Company will engage third party qualified specialist to perform the valuation.

- **Tax assets and liabilities**

Provisions for income taxes are made using the best estimate of the amount expected to be paid or recovered based on a qualitative assessment of all relevant factors. The Company reviews the adequacy of these provisions at the end of each reporting period. However, it is possible that at some future date an additional liability could result from audits by tax authorities. Where the final outcome of these tax-related matters is different from the amounts that were initially recorded, such differences will affect the tax provisions in the period in which such determination is made. Deferred tax assets and liabilities contain estimates about the nature and timing of future permanent and temporary differences as well as the future tax rates that will apply to those differences. Changes in tax laws and rate as well as changes to the expected timing of reversals may have a significant impact on the amounts recorded for deferred tax assets and liabilities. Management closely monitors current and potential changes to tax law and bases its estimates on the best available information at each reporting date.

- **Share-based payments**

The Company utilizes the Black-Scholes Option Pricing Model ("Black-Scholes") to estimate the fair value of stock options granted to directors, officers and consultants. The use of Black-Scholes requires management to make various estimates and assumptions that impact the value assigned to the stock options including the forecast future volatility of the stock price, the risk-free interest rate, dividend yield and the expected life of the stock options. Any changes in these assumptions could have a material impact on the share-based compensation calculation value, however, the most significant estimate is the volatility.

SIGNIFICANT ACCOUNTING POLICIES

The Company's significant accounting policies are summarized in Note 4 to the audited financial statements for the years ended December 31, 2021 and 2020.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This MD&A contains certain statements that may be deemed “forward-looking statements”, including statements regarding developments in the Company’s operations in future periods, adequacy of financial resources and future plans and objectives of the Company. All statements in this document, other than statements of historical fact, which address events or developments that the Company expects to occur, are forward looking statements. Forward-looking statements are statements that are not historical facts and are generally, but not always, identified by the words “expects”, “plans”, “anticipates”, “believes”, “intends”, “estimates”, “projects”, “potential”, “interprets” and similar expressions, or events or conditions that “will”, “would”, “may”, “could” or “should” occur. Forward-looking statements in this document include statements regarding future expenditures on research and development and operating expenses, liquidity and effects of accounting policy changes.

Although the Company believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results may differ materially from those in forward-looking statements. Factors that could cause the actual results to differ materially from those in forward-looking statements include market prices, exploration success, continued availability of capital and financing, inability to obtain required regulatory or governmental approvals and general economic, market or business conditions. Investors are cautioned that any such statements are not guarantees of future performance and actual results or developments may differ materially from those projected in the forward-looking statements. Readers are cautioned not to place undue reliance on this forward-looking information.

Forward-looking statements are based on the beliefs, estimates and opinions of the Company’s management on the date the statements are made. The Company undertakes no obligation to update these forward-looking statements in the event that Management’s beliefs, estimates, opinions or other factors should change except as required by law.

These statements are based on a number of assumptions including, among others, assumptions regarding general business and economic conditions, the timing of the receipt of regulatory and governmental approvals for the transactions described herein, the ability of the Company and other relevant parties to satisfy stock exchange and other regulatory requirements in a timely manner, the availability of financing for the Company’s proposed transactions and on reasonable terms and the ability of third-party service providers to deliver services in a timely manner. The foregoing list of assumptions is not exhaustive. Events or circumstances could cause results to differ materially.

There can be no assurance that such information will prove to be accurate, and readers are cautioned not to place undue reliance on this forward-looking information.
