

Legible and Remo Camerota Join Forces to Publish AI-enhanced *Frankenstein* Classic

March 25, 2024 - Vancouver, British Columbia – [Legible](#) Inc. (CSE: READ) (OTCQB: LEBGF) (FSE: DOT) ("Legible" / "Company"), a global online eBook and audiobook platform pioneering technological innovation and creative storytelling, is thrilled to announce a collaboration with esteemed career fine artist, author and film director Remo Camerota to create an AI-powered version of Mary Shelley's masterpiece *Frankenstein*.

In a first-of-its-kind fusion of classic literature and cutting-edge technology, Legible's "**FrAnkenstein**" will utilize artificial intelligence (AI) to create interactive story elements, allowing users to engage directly with the narrative and characters in ways never before possible. This interactive experience promises to challenge perceptions of storytelling, blurring the lines between creator and creation, much like the novel itself.

Remo Camerota is an award-winning director, artist, and photographer, with a background in illustration, painting, animation, and interactive multimedia design, whose art is included in a unique collection recently sent to the moon. Known for his ability to meld science, tech, and sound with art to create immersive experiences, Camerota's visionary perspective and digital artistry will ensure that **FrAnkenstein** is not only a narrative feat, but also a visual spectacle, offering audiences around the world a uniquely engaging way to experience a zeitgeist that will bridge this 1900 novel to today.

The collaboration aims to preserve the soul of Shelley's original work while infusing it with interactive elements that explore themes of creation, ethics, and human frailty and innocence - questions that are even more relevant today with our 21st-century technology and scientific advances than they were in the 19th century.

Remo Camerota stated, "I am excited to collaborate with Legible on this groundbreaking project. Blending the haunting beauty of *Frankenstein* with AI allows us to reflect on the implications of creation and technology, themes that Mary Shelley could never have imagined but are now part of our daily lives."

"Working with Remo Camerota on this project is an absolute honor," said Kaleeg Hainsworth, CEO of Legible. "His visionary approach to art and storytelling perfectly complements our mission to innovate within the literary world. Together, we are not just retelling *Frankenstein*; we are reimagining it for a new era."

FrAnkenstein is not just a revival of a gothic masterpiece; it is a leap into the future of digital narrative. This ambitious project aims to explore the themes of creation, ethics, and humanity that Shelley's novel famously wrestled with, using the very technology that epitomizes modern-day innovation: artificial intelligence.

This innovative project marks the third publication in Legible's celebrated AI-powered classics series, following the successful releases of [A Christmas Carol AI](#) and [Animal Farm AI](#). By teaming up with Camerota, whose eclectic portfolio spans film, photography, and digital art, Legible ensures that this version of *Frankenstein* will captivate readers with its unique blend of classic narrative, modern aesthetics, and unique innovations created by the artist.

FrAnkenstein is set to launch in Q3 this year, with previews and exclusive content being made available in the lead-up to the release. The Living Book will be available exclusively

on [Legible.com](https://legible.com) both as an a-la-carte purchase and to members of Legible Unbound, which provides unlimited access to a vast curated catalogue of eBooks and audiobooks in multiple languages for the low monthly fee of \$10 USD.

About Legible

Legible is a groundbreaking, mobile-centric global company specializing in eBooks and audiobook entertainment. Its extensive partnerships encompass four of the Big 5 Publishers, the world's largest eBook distributor, and a wide range of outstanding and innovative publishers of all sizes, enabling Legible to seamlessly deliver millions of multilingual eBooks and audiobooks, transforming any smart device into a dynamic source of cutting-edge infotainment.

Legible's publishing division has created the world's first **LibrarianAI** to offer personalized book recommendations and is revolutionizing the industry by crafting proprietary AI and multimedia-enriched books. Legible recently released [*My Model Kitchen - Vol. 1: Pasta*](#), the first in a series of 15 video-enriched Living Cookbooks by former supermodel, bestselling author, TV host and celebrity chef, Cristina Ferrare, with an AI Sous Chef for each recipe. Legible also holds the exclusive global publishing and distribution rights to never-before-seen Stan Lee properties, which are being developed for release to fans everywhere as the new **Stan Lee Universe**. Legible is collaborating on this project with Kartoon Studios and world renowned Michael Uslan, Executive Producer of the Batman Movies and David Uslan, entertainment industry innovator.

As first mover in the rapidly expanding automotive infotainment market, Legible has partnered with Faurecia Aptode, Harman Ignite, Live One, and Visteon and is also delivering its content into the dashboards of leading automakers that offer cars with Google built-in. Legible has the only Android Automotive app with the capacity to deliver both audiobooks and eBooks to drivers and passengers in tens of millions of vehicles around the globe, positioning Legible at the forefront of the new world of in-car infotainment experiences.

Legible is reshaping the digital publishing landscape, committed to gaining a significant market share by providing innovative 21st-century publishing solutions and enriching global reading experiences.
