Everton announces 2,500 metres of Diamond Drilling on the Opinaca B Gold Property, Eleonore Mining Camp, James Bay Region, Quebec

Ottawa, Ontario – (June 19, 2017) **Everton Resources Inc.** (“Everton” or the “Corporation”) (TSX-V:EVR) is pleased to announce that **Hecla Mining Company** (“Hecla”) (NYSE:HL) has commenced a 2,500-metre diamond drilling program on the Opinaca B Gold Property held by Everton and its partner **Azimut Exploration Inc.** (TSXV: AZM).

The aim of the 7-hole drilling program is to test two targets with strong gold discovery potential: the Dominic area and the Fishhook structure. Hecla greatly improved the definition of these targets during the 2016 program, which included a detailed interpretation of previous magnetic data and comprehensive field work (see press release dated January 23, 2017).

The **Opinaca B Property**, comprising 248 claims covering 129.7 km², is situated in a highly prospective part of the Eleonore mining camp where significant drilling results have been recently released for the **Eleonore South Property** (Azimut-Goldcorp-Eastmain JV) and the **Cheechoo Property** (Sirios Resources) ([see attached figure](#)).

Hecla has the option to acquire a 50% interest in the Opinaca B Property by incurring \$6 million in exploration work. This expenditure should be complete by November 2017. Following this first option, Hecla was granted a second option according to the terms disclosed in Azimut's press releases of September 16, 2010 and April 21, 2016.

This press release was prepared by geologist Jean-Marc Lulin, acting as Azimut's Qualified Person under NI 43-101.
