1. NATURE OF OPERATIONS AND GOING CONCERN

Everton Resources Inc. ("Everton" or the "Company") was incorporated under the Business Corporations Act (Alberta) on November 7, 1996 and commenced operations on December 19, 1996. In November 2002, the Company commenced its current nature of operations which involves the acquisition, exploration, and evaluation of mineral resource properties. Everton and its subsidiaries (the "Company") are in the exploration stage and do not derive any revenue from the exploration and evaluation of their properties. The address of the Company's corporate office is 38 Scott Road, Chelsea, Quebec, J9B 1R5. Everton's common shares are listed for trading on the TSX Venture Exchange ("TSX-V"') under the symbol "EVR".

These condensed consolidated interim financial statements have been prepared on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of operations for the foreseeable future. The Company is in the exploration stage and has not earned revenue from operations. As at April 30, 2019, the Company has a working capital deficiency of $362,189 and a deficit of $49,610,407. The Company has no income or cash inflow from operations. Continued operation of the Company is dependent on financial support through completion of equity financings, or the achievement of profitable operations in the future. Such material uncertainties cast significant doubt as to the ability of the Company to meet its obligations as they come due and, accordingly, the appropriateness of the use of accounting principles applicable to a going concern. Management is evaluating alternatives to secure additional financing so that the Company can continue to operate as a going concern. Nevertheless, there is no assurance that these initiatives will be successful or sufficient. These condensed consolidated interim financial statements do not include any adjustments to the carrying value of assets and liabilities and the reported expenses and statement of financial position classifications that would be necessary should the Company be unable to continue as a going concern and these adjustments could be material.

2. SIGNIFICANT ACCOUNTING POLICIES

(b) Basis of presentation

6. FINANCIAL INSTRUMENTS, RISK MANAGEMENT AND CAPITAL MANAGEMENT

Financial instruments

The Company's financial instruments consist of cash, marketable securities, long-term investment, accounts payable and accrued liabilities and loan payable. The fair value of the Company's other financial instruments approximates their carrying value due to their short-term nature.

The classification of financial instruments is as follows:

	April 30, 2019	October 31, 2018
	$	$
Financial assets		
Loans and receivables		
Cash	**20,876**	11,414

Loan payable	**(174,700)**	(98,000)
Total financial liabilities	**(383,065)**	(333,532)

Risk management

The Company thoroughly examines the various financial risks to which it is exposed and assesses the impact and likelihood of those risks. These risks include credit risk, liquidity risk and market risk. Where material, these risks are reviewed and monitored by the Board of Directors.

(i) Credit risk

Credit risk is the risk of an unexpected loss if a party to its financial instruments fails to meet its contractual obligations. The Company's financial assets exposed to credit risk are primarily composed of cash. The Company's cash is held at reputable financial institutions with high external credit ratings. It is Management's opinion that the Company is not exposed to significant credit risk.

None of the Company's financial assets are secured by collateral or other credit enhancements.

Management considers that all the above financial assets that are not impaired or past due for each of the reporting dates are of good credit quality. There are no financial assets that are past due but not impaired for the periods presented.

(ii) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they come due. The Company's liquidity and operating results may be adversely affected if its access to the capital markets is hindered, whether as a result of a downturn in stock market conditions generally or matters specific to the Company. The Company regularly evaluates its cash position to ensure preservation and security of capital as well as liquidity.

(iii) Market risk

The Company holds shares in publicly listed companies in the mineral exploration industry. The Company is exposed to other price risk regarding these shares as unfavorable market conditions could result in the disposal at less than their value at April 30, 2019. As at April 30, 2019, the value of these listed shares was $665,000. At April 30, 2019, had the price for these publicly listed shares been 10% lower, the comprehensive loss for the period would have been $66,500 higher. Conversely, had the price been 10% higher, the comprehensive loss would have been $66,500 lower.

Capital management

The Company manages its capital to ensure its ability to continue as a going concern in order to maintain its properties in good standing, support normal operating requirements, continue the exploration and evaluation of its mineral properties and support any expansionary plans, and to provide an adequate return to its shareholders. In the management of capital, the Company includes the components of shareholders' equity.

As long as the Company is exploring and evaluating its mining properties, it is not the intention of the Company to contract additional debt obligations to finance its work programs. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares or acquire or dispose of assets. In order to facilitate the management of its capital requirements, management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. The Company prepares annual budgets that are updated as necessary depending on various factors including successful capital deployment and general industry conditions.

As at April 30, 2019, the Company's optioned properties are in the exploration and evaluation stage, as such, the Company is dependent on external financing to fund its activities. In order to carry out planned exploration and evaluation and pay for administrative costs, the Company will be required to raise additional financing. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so.

There were no significant changes to capital management policies of the Company during the six month period ended April 30, 2019.

The Company and its subsidiaries are not subject to any capital requirements imposed by a lending institution or regulatory body, other than of the TSX Venture Exchange ("TSXV") which requires adequate working capital or financial resources of the greater of (i) $50,000 and (ii) an amount required in order to maintain operations and cover general and administrative expenses for a period of six months.

As at April 30, 2019, the Company was in violation of the above TSXV requirement. The impact of this violation is not known and is ultimately dependent on the discretion of the TSXV.
