1. NATURE OF OPERATIONS AND GOING CONCERN

Everton Resources Inc. ("Everton" or the "Company") was incorporated under the Business Corporations Act (Alberta) on November 7, 1996 and commenced operations on December 19, 1996. In November 2002, the Company commenced its current nature of operations which involves the acquisition, exploration, and evaluation of mineral resource properties. Everton and its subsidiaries (the "Company") are in the exploration stage and do not derive any revenue from the exploration and evaluation of their properties. The address of the Company's corporate office is 38 Scott Road, Chelsea, Quebec, J9B 1R5. Everton's common shares are listed for trading on the TSX Venture Exchange ("TSX-V"') under the symbol "EVR".

Arrangement Agreement with Molecule Inc.

On November 27, 2019, the Company entered into a definitive arrangement agreement with Molecule Inc. ("Molecule") pursuant to which Everton will acquire (the "Proposed Transaction") all of the issued and outstanding securities of Molecule, by way of plan of arrangement (the "Plan of Arrangement"), which will result in the shareholders of Molecule holding the majority of outstanding shares of Everton upon closing of the Proposed Transaction (the "Resulting Issuer").

Molecule, a private Ontario corporation, is a beverage formulation, manufacturing and distribution company that holds a Standard Processing Licence under the Cannabis Act and Regulations. Molecule will provide the capacity, knowledge and licensing required to produce and co-package craft cannabis-infused beverages.

Prior to the closing of the Proposed Transaction, it is anticipated that the Company will apply to list its common shares on the Canadian Securities Exchange ("CSE") and voluntarily delist its common shares from the TSX Venture Exchange (the "TSXV"). It is expected that the Company will delist from the TSXV concurrently with the listing on the CSE immediately following the completion of the Proposed Transaction.

The Proposed Transaction is considered a "related party transaction" as such term is defined by Multilateral Instrument 61-101 – Protection of Minority Security Holders in Special Transactions and Policy 5.9 of the TSXV, since the CEO and director of Everton is also the CEO, director and shareholder of Molecule, and the CFO of Everton, is also the CFO of Molecule. As a result, Everton will need to obtain the approval of the majority of the minority of shareholders in respect of the Proposed Transaction. The Proposed Transaction is exempt from the formal valuation requirements set out in the foregoing regulatory instruments due to the fact that the shares of Everton are listed on the TSXV.

As a condition of the Proposed Transaction, Everton will effect a consolidation (the "Consolidation") of its issued and outstanding common shares on the basis of one new common share (each a "Everton Share") for every ten (10) common shares of Everton issued and outstanding on the effective date of the Consolidation. In addition, prior to the closing, it is expected that Everton will change its corporate name to "Molecule Holdings Inc" or such other name as may be determined by the board of directors (the "Name Change").

As a condition to the closing of the Proposed Transaction, Molecule intends to complete a private placement offering ("Private Placement") of units (the "Molecule Units"), for a minimum of $2 million, each Molecule Unit consisting of one common share of Molecule and a minimum of one-half of one share purchase warrant, with final terms to be determined by the parties in the context of the market.

Concurrently with, and as a condition of, the closing of the Proposed Transaction, creditors of Everton will convert $243,100 of indebtedness into an aggregate of 810,333 Everton Shares at a deemed issue price of $0.30 per share. All the foregoing indebtedness is due to the CEO of Everton, for advances and loans that he has made to Everton in order to satisfy Everton's minimum working capital needs in the absence of any reasonable third-party alternatives.

<u>Going concern</u>

These condensed consolidated interim financial statements have been prepared on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of operations for the foreseeable future. The Company is in the exploration stage and has not earned revenue from operations. As at January 31, 2020, the Company has working capital of $172,337 and a deficit of $52,836,517. The Company has no income or cash inflow from operations. Continued operation of the Company is dependent on financial support through completion of equity financings, or the achievement of profitable operations in the future. Such material uncertainties cast significant doubt as to the ability of the Company to meet its obligations as they come due and, accordingly, the appropriateness of the use of accounting principles applicable to a going concern. Management is evaluating alternatives to secure additional financing so that the Company can continue to operate as a going concern. Nevertheless, there is no assurance that these initiatives will be successful or sufficient. These condensed consolidated interim financial statements do not include any adjustments to the carrying value of assets and liabilities and the reported expenses and statement of financial position classifications that would be necessary should the Company be unable to continue as a going concern and these adjustments could be material.

The Company made the cash payments and incurred the required exploration expenditures to earn its initial 50% interest in the property.

On November 15, 2011 (amended on November 1, 2013), the Company and Azimut executed an option agreement with Hecla Mining Company, formerly Aurizon Mines Ltd., ("Hecla") whereby Hecla could acquire a 50% ownership interest in the Opinaca property (leaving each of the Company and Azimut with 25%), by making total cash payments of $580,000, $290,000 of which was payable to Everton, and incurring exploration expenditures of $6,000,000, including a minimum of 3,800 metres of drilling prior to November 15, 2013 and 1,200 metres of drilling prior to November 15, 2014. Hecla made the cash payments and incurred the required exploration expenditures to earn its interest in the property

(Expressed in Canadian dollars)

	$	$

Total financial liabilities	**(532,168)**	(473,467)

Risk management

The Company thoroughly examines the various financial risks to which it is exposed and assesses the impact and likelihood of those risks. These risks include credit risk, liquidity risk and market risk. Where material, these risks are reviewed and monitored by the Board of Directors.

(i) Credit risk

Credit risk is the risk of an unexpected loss if a party to its financial instruments fails to meet its contractual obligations. The Company's financial assets exposed to credit risk are primarily composed of cash. The Company's cash is held at reputable financial institutions with high external credit ratings. It is Management's opinion that the Company is not exposed to significant credit risk.

None of the Company's financial assets are secured by collateral or other credit enhancements.

Management considers that all the above financial assets that are not impaired or past due for each of the reporting dates are of good credit quality. There are no financial assets that are past due but not impaired for the periods presented.

(Expressed in Canadian dollars)

(ii) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they come due. The Company's liquidity and operating results may be adversely affected if its access to the capital markets is hindered, whether as a result of a downturn in stock market conditions generally or matters specific to the Company. The Company regularly evaluates its cash position to ensure preservation and security of capital as well as liquidity.

(iii) Market risk

The Company holds shares in a publicly listed company in the mineral exploration industry. The Company is exposed to market risk regarding these shares as unfavorable market conditions could result in the disposal at less than their value at January 31, 2020. As at January 31, 2020, the value of these listed shares was $460,260. At January 31, 2020, had the price for these publicly listed shares been 10% lower, the comprehensive loss for the period would have been $46,026 greater. Conversely, had the price been 10% higher, the comprehensive loss would have been $46,026 less.

Capital management

The Company manages its capital to ensure its ability to continue as a going concern in order to maintain its properties in good standing, support normal operating requirements, continue the exploration and evaluation of its mineral properties and support any expansionary plans, and to provide an adequate return to its shareholders. In the management of capital, the Company includes the components of shareholders' equity.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares or acquire or dispose of assets. In order to facilitate the management of its capital requirements, management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. The Company prepares annual budgets that are updated as necessary depending on various factors including successful capital deployment and general industry conditions.

There were no significant changes to capital management policies of the Company during the three month period ended January 31, 2020.

7. SHARE CAPITAL
