

MICROCOAL TO TEST COAL SAMPLES

VANCOUVER, May 25, 2011 /CNW/ - **Carbon Friendly Solutions Inc. (CNSX: CFQ) ("CFS")** is pleased to announce that further to its news release of May 2nd, 2011, its subsidiary MicroCoal Inc. ("MicroCoal" or "MCI") is to conduct testing on sample coals provided by a major utility companies operating several coal-fired plants and serving more than 3 mm electric customers in the U.S.

MicroCoal and the U.S. energy/utility providers are to carry out testing of the utility companies' most- burned coals in its various coal-fired facilities using MCI's patented technology process. The on-site process decontaminates and upgrades low-rank coals to match the energy levels of high-rank coals which results in the potential reduction of GHG emissions and improves the plant's fuel efficiency.

Stan Lis, President of Carbon Friendly Solutions Inc, states "We are very pleased with the recent development in the relationship with leading utility companies in the U.S. We are now conducting an actual coal testing phase as part of the feasibility and deployment studies of MCI's technology process into existing operations. This marks a significant milestone in nominating the most appropriate site for the deployment of our first commercial demonstration plant."

About MicroCoal Inc.

MicroCoal Inc. was incorporated in 2005 and currently has its headquarters in Denver, CO with pilot facilities in Golden, CO. **MicroCoal** is a clean energy company focusing on commercializing the use of its patented technologies to decontaminate and upgrade low-rank coals to match the energy levels of high-rank coals for use by power utilities. **MicroCoal's** proprietary on-site process not only dewater coal but also removes contaminants on site prior to combustion which results in the potential reduction of GHG emissions and improves fuel efficiency. The reduction in emissions allows for the generation of substantial carbon credits in an industry that is one of the world's largest producers of emissions.
