

**REPORT FOR THE QUARTER ENDED  
December 31, 2014  
AMENDED MANAGEMENT DISCUSSION AND  
ANALYSIS**

This Management Discussion and Analysis (“MD&A”) of MicroCoal Technologies Inc. (formerly Carbon Friendly Solutions Inc.), (the “Company”) has been prepared by management as of March 1, 2015 and should be read in conjunction with the audited consolidated financial statements and related notes thereto of the Company for the year ended June 30, 2014.

The financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”). Except as otherwise disclosed, all dollar figures included therein and in the following management discussion and analysis (“MD&A”) are quoted in Canadian dollars.

### **FORWARD LOOKING INFORMATION**

The following discussion contains, in addition to historical information, forward-looking statements that involve risks and uncertainties. These forward-looking statements may include, among other things, statements concerning plans, objectives and future economic prospect, expectations, beliefs, future plans and strategies, anticipated events or trends and similar expressions concerning matters that are not historical facts. These forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause actual results, performance or achievements and industry result, to be materially different from what is said or implied with such forward-looking statements.

Some of the factors that could cause results or events to differ from current expectations include, but are not limited to, the factors described under “Risk Factors”.

### **COMPANY OVERVIEW**

The Company was incorporated on April 6, 1990 as a provincial company under the laws of British Columbia, and on June 19, 1997 the Company continued as a federal corporation under the Canada Business Corporation Act. On September 2, 2008, the Company completed a share exchange with Global CO<sub>2</sub> Reduction Inc. (Global CO<sub>2</sub>) and changed its name to Carbon Friendly Solutions Inc. On June 25, 2013 the Company changed its name to MicroCoal Technologies Inc. (“MicroCoal”). The Company is listed on the Canadian Securities Exchange (“CSE”) under the symbol “MTI” and the Frankfurt Stock Exchange under the symbol “0FS-FRA” (“zero FS-FRA”).

The Company is in the business of researching and developing a coal technology using patented technologies to dewater, decontaminate and upgrade low-rank coals for use by power utilities and coal companies.

During the year ended June 30, 2011, the Company acquired a 58.21% interest in MicroCoal, Inc. through issuance of the Company’s common shares in exchange for the equivalent shares of MicroCoal, Inc. MicroCoal, Inc. holds the patents to the MicroCoal technology. The Company is focused on commercializing the use of microwave energy and related process technologies to transform coal and other minerals into higher quality and higher value industrial materials. The principal assets of MicroCoal, Inc. are the coal technology patents and plant prototype components.

When the Company entered into the Share Exchange agreement, MicroCoal, Inc. had a principal amount of US\$2,250,000 owing to Orica US Services Inc. (“Orica”), a creditor and a shareholder of MicroCoal, Inc. Pursuant to the conditions stipulated on the Share Exchange agreement and other amending agreements entered into between 2011 and 2013, if the Company agreed to acquire the remaining interest 41.79% interest in MicroCoal Inc., Orica would reduce the principal amount to US\$1,000,000 and waive the interest

**REPORT FOR THE QUARTER ENDED

AMENDED MANAGEMENT DISCUSSION AND  
ANALYSIS**

---

accruals up to the acquisition date. On January 7, 2013, the Company concluded an arrangement for the acquisition of the 41.79% interest where Orica reduced the debt to US\$1,000,000.

On August 14, 2014, the Company entered into a full and final settlement and release with Orica of all claims. As part of the settlement the company agreed to pay US\$150,000 to Orica in satisfaction of all amounts owing from the Company to Orica.

### **Company Developments during Quarter 2**

The Company is focused on commercializing the use of its technologies to upgrade low-rank coals to replace a portion of high-rank coals consumed in energy generation by power utilities. The deployment of the technology offers utilities significant economic, as well as operational performance benefits.

The proprietary dry coal technology has significant growth potential into multiple geographies and various industrial markets.

The quarter included activities involving corporate restructuring and re-focused efforts and investment in the research and development of its technologies, fundraising for research and development, construction of a pilot plant in Virginia and for general corporate purposes.

On December 8, 2014 the company announced the appointment of a new acting CFO, Tom Stefan CPA, CMA. The company also reported the resignation of Ping Shen from the company in her position of CFO. Ms. Shen was awarded 313,333 common share stock options, exercisable at \$0.15 per share.

On December 5, 2014 the company announced it will amend certain terms of certain of its outstanding warrants as follows: the expiry date for 7,887,500 warrants issued December 28, 2012 with an exercise price of \$0.26 will be extended from December 28, 2014 to December 28, 2015.

On November 26, 2014 the Company announced that it had closed a further tranche of a previously announced private placement in the total aggregate value of US\$202,348 resulting in the issuance of 1,011,741 common shares of the Company at US\$0.20 and 1,011,741 one common share purchase warrants at an exercise price of US\$0.30 for up to 24 months following the date of issuance. The company paid a cash commission of \$11,300 and granted 50,000 finders warrants to purchase Units. (Please refer to the November 26, 2014 press release for further details)

On November 26, 2014 the company announced the opening of a new Vancouver, B.C. corporate office.

On November 19, 2014 the Company announced that it has settled with two former consultants. The settlement called for the payment of \$260,000 and issuance of 200,000 common shares, as full consideration for a settlement.

On November 18, 2014 the company announced it had withdrawn from voluntary bankruptcy, its US based subsidiary Microcoal Inc.

On October 22, 2014 the company announced the signing of a joint venture agreement with an affiliate of Jiu Feng Investments Ltd., a Hong Kong based private company. Under the terms of the agreement, Microcoal and its partner will form a Hong Kong based joint venture company (JVCO) in which Microcoal will own 51% equity interest and a majority position on its Board of Directors. JVCO is expected to carry on

**REPORT FOR THE QUARTER ENDED  
December 31, 2014  
AMENDED MANAGEMENT DISCUSSION AND  
ANALYSIS**

---

its activities throughout China, Hong Kong, Taiwan, Macau and South Korea. Key functions are planned to include:

- Operating an approximate, 11,000 square meter Microcoal complex in Songjiang Industrial Park in Shanghai. This will include a testing, research and development facility and a promotional showroom.
- The facility will source and test various coal samples from Asian markets
- Hire business development personnel
- And promote the company's technology in China
- Generate access to Asian capital markets and investors.

As consideration for assets and financial contribution to these expenses, MicroCoal agreed to issue a total of 10 million common shares to its partner. The agreement would have a 5 year term and automatically renew for a further 5 years. (See the October 22, 2014 press release for further details)

On October 20, 2014 the company agreed to a loan facility from its chairman in the principal amount of US\$1,000,000. The loan accrues interest at a rate of 4% per annum, payable quarterly, and has a term of one year. The company can repay the loan at any time prior to its maturity for principal plus accrued interest to the day repayment without prepayment penalty. The loan is convertible into common shares of the Company at a conversion price of US\$0.15 per share at the option of the Company's chairman

### **The Benefits of MicroCoal's Process**

According to the World Coal Institute, up to 5% of the carbon footprint of utilities can be eliminated by drying the coal prior to combustion. A further 22% of CO<sub>2</sub> emission can be reduced, improving generation efficiency. The direct result of this is a worldwide interest in clean coal and coal drying technologies, which is the focus of the MicroCoal's business initiative.

The deployment of the MicroCoal technology will give the utility three main benefits:

- ✓ **Economic benefits**, due to fuel switch from expensive high-rank coal to cheaper low-rank coal and with increased heat value of the latter, as well as additional revenue from generating carbon offsets;
- ✓ **Operational benefits**, due to marked change of slagging and ash build-up.

The combined benefits of the MicroCoal technology suite has been discussed with utilities, experts in the field, industry consultants and coal analysts, all of whom have indicated support for the approach. Indications are that, once funding has been secured, various utilities will be prepared to sign collaboration agreements with a view to applying the technology once its development is complete.

### **MicroCoal Market Opportunity**

Coal is, and will continue to be, an indispensable part of the global energy mix. However, coal requires innovation to enhance its long term appeal by improving its emissions profile and improving the efficiency of coal as a source of fuel. Over 4030 Mt<sup>1</sup> of coal is currently produced globally and is expected to reach 7

<sup>1</sup> World Coal Institute

**REPORT FOR THE QUARTER ENDED  
December 31, 2014  
AMENDED MANAGEMENT DISCUSSION AND  
ANALYSIS**

---

billion tonnes in 2030 – with China accounting for around half the increase over this period. The top five producers are China, the USA, India, Australia and South Africa. Coal currently fuels 39% of the world's electricity and this proportion is expected to remain at similar levels over the next 30 years. The biggest market for coal is Asia, which currently accounts for 54% of global coal consumption – although China is responsible for a significant proportion of this.

### **The U.S. Market**

Approximately 1,100 million tons of coal is consumed in the U.S. every year to generate 50% of the electricity in the country. The introduction of the Clean Air Act of 1990, and the Clean Air Act Amendment (“CAAA”) in 2000 forced utilities to control their emissions to meet with US Environmental Protection Agency (“EPA”) standards. Utilities are faced with two options for controlling emissions:

- Change fuel to low sulfur coal such as PRB coal, which is the cheaper option;
- Deploy high capacity post combustion control systems such as flue-gas desulfurization (“FGD”), mostly scrubbers, which is a very expensive option.

A combination of the above two options could also be applied. Approximately 40% of generation units have deployed FGD, while many have switched to PRB coal, as is evident in its spectacular growth. The other alternative for a plant is to deploy the MicroCoal technology, which will upgrade PRB coal to the heat value equivalent to high-ranking coal, thereby allowing utilities to benefit from the significant lower input costs. In 2007 the fleet of U.S. coal-fired power generation consisted of over 1,400 units in various sizes. Of these units, 950 are designed to burn bituminous coal. These are the potential candidates for the MicroCoal technology. The immediate market segment for MicroCoal has been identified as those generation units with the capacity of 200MW and less, which totals over 600 units. The reasons for selecting this initial target market are:

- Smaller units are under pressure to come in-line with more stringent environmental standards, and are more threatened with closure than larger units.
- These units are typically older, and generally do not have space available to deploy traditional environmental control facilities such as FGD, which require large areas.

The second market segment, to be addressed by the Company are those units with a capacity of 500MW and higher, and emerging markets such as China and India will be the third market.

### **International Market**

The worldwide installed base of coal-fired power generation is expected to grow by 67% by 2020. 80% of the growth will come from China and India. China alone accounts for over two-thirds of this growth. The price spread and quality difference between low-rank and high-rank coals in the rest of the world is similar to that of the U.S. The Company has tested Indonesian coal in its facilities, and showed that its technology is as applicable to international coals as it is to U.S. coals.

### **Carbon Reduction Using Biomass**

Previously the Company had various biomass energy and renewable energy technology projects in Poland through the operations of subsidiary companies in Poland, namely, Carbiopel S.A. (“Carbiopel”) and CO2 Reduction Poland Sp. z o.o. (“CO2 Reduction Poland”). The Company is focused on its coal technology and is no longer pursuing biomass projects in Poland. The Company has written down associated costs in previous years' operations, and is not making any provision for nominal costs in the future. Any recoveries from the disposition of plant and equipment or other sources are unknown.

**REPORT FOR THE QUARTER ENDED  
December 31, 2014  
AMENDED MANAGEMENT DISCUSSION AND  
ANALYSIS**

**SELECTED ANNUAL INFORMATION**

Selected annual information from the consolidated audited financial statements for the three years ended is summarized as follows:

June 30,	2014	2013	2012
Revenues	Nil	Nil	96,037
Gross profit (loss)	Nil	Nil	31,628
Operating expense	4,500,773	4,961,789	4,535,526
Other income (expense)	(2,969,923)	1,326,936	(234,402)
Current income tax expense	-	(46,000)	-
Net loss for the year	(7,470,696)	(3,680,853)	(4,738,390)
Net loss per share	(0.10)	(0.06)	(0.07)
Total assets	203,249	3,783,418	5,889,512
Total long-term liabilities	Nil	Nil	Nil
Cash dividends declared	Nil	Nil	Nil

**SUMMARY OF QUARTERLY RESULTS**

Quarter ended	Total Assets	Revenues	Net profit (loss)	Profit (loss) per share
December 30, 2014	\$ 1,045,491	\$ -	\$ (524,446)	\$ (0.01)
September 30, 2014	412,324	-	938,144	0.01
June 30, 2014	203,249	-	( 3,364,413)	(0.04)
March 31, 2014	2,949,416	-	(1,052,355)	(0.01)
December 31, 2013	3,690,966	-	(1,419,124)	(0.02)
September 30, 2013	4,216,850	-	(1,634,804)	(0.02)
June 30, 2013	3,783,418	-	(2,883,005)	(0.04)
March 31, 2013	4,741,336	-	1,499,085	0.02

**RESULTS OF OPERATIONS**

During the three months ended December 31, 2014, the Company had an operating loss of \$793,425 showing a decrease of \$655,861 to the previous year comparative period.

Further the company's Chairman provided at US\$1 million loan facility in October 2014 to fund ongoing professional, consulting and overhead costs as the company reorganized its research and development operations and progress on the new King William, Virginia pilot plant ramped up. The company also opened a new corporate office in Vancouver, British Columbia in December 2014.

**REPORT FOR THE QUARTER ENDED  
December 31, 2014  
AMENDED MANAGEMENT DISCUSSION AND  
ANALYSIS**

During the six months ended December 31, 2014 the Company concluded assessment of the plant prototype with the findings that new improvements and concepts would be too difficult to implement in the existing unit and followed through with dismantling of the unit. Previously the unit which included coal technology was being amortized at the rate of 20% per year. With the decision to dismantle the unit, amortization was taken as usual (\$1,411,864) and an impairment charge of \$2,234,758 was taken.

**LIQUIDITY AND CAPITAL RESOURCES**

The Company had cash on hand of \$32,883 at December 31, 2014 (June 30, 2014 - \$86,652) and a working capital deficiency of \$2,359,117 (June 30, 2014 - \$2,942,247).

The Company may continue to have capital requirements in excess of its currently available resources. In the event the Company's plans change, its assumptions change or prove inaccurate, or its capital resources in addition to projected cash flow, if any, prove to be insufficient to fund operations, the Company may be required to seek additional financing. Although the Company has been successful in raising the funds, there can be no assurance that the Company will have sufficient financing to meet its future capital requirements or that additional financing will be available on terms acceptable to the Company in the future.

**LOANS PAYABLE**

	September 30, 2014	June 30, 2014
Pursuant to a loan agreement a director of the Company advanced the sum of \$100,000 USD to the Company. The interest rate is at 4% per annum. The loan was paid on August 15, 2014. On September 29, 2014 a new loan was advanced for USD \$125,000. During the 2 <sup>nd</sup> quarter the company also entered into and drew down a loan for USD \$1,000,000, in January 2015 the loans were repaid.	\$ 838,861	\$ 106,710
On January 7, 2013 the Company concluded an agreement with Orica and acquired the remaining 41.79% ownership of MicroCoal Inc. (Note 6). Orica transferred all remaining shares to the Company. Pursuant to various agreements in prior years, the Company agreed to pay the sum of US\$1 million to Orica of which \$225,000 had been paid, leaving a balance of US\$775,000 bearing interest at a rate of 5% per annum at June 30, 2013. The loan was renegotiated in August 2014 and both parties agreed to settle the outstanding loan as well as the accrued interest in Note 6 for \$160,065 (\$USD 150,000). This amount was paid in the period ended September 30, 2014.	-	827,390
	\$838,861	\$934,100

**REPORT FOR THE QUARTER ENDED  
December 31, 2014  
AMENDED MANAGEMENT DISCUSSION AND  
ANALYSIS**

---

Three months ended December 31, 2014

On November 26, 2014 the Company closed the seventh tranche of a non-brokered private placement in the amount of \$USD 202,348 (\$CAD 228,943). The Company issued 1,011,741 units at a subscription price of \$USD 0.20 per Unit. Each unit is comprised of one common share and one common share purchase warrant. Each warrant entitles the holder to acquire one common share at an exercise price of \$USD 0.30 for a period of 24 months. The Company paid a cash commission of \$ 11,300 and granted finder's warrants to purchase 50,000 Units. Since the share purchase warrants were issued in a currency other than the functional currency of the Company, they were accounted for as a derivative liability and remeasured at December 31, 2014 with any change going to the profit or loss. See 11(g) for more details.

On November 19, 2014 the Company has agreed to a settlement with two former consultants of the Company to pay a total and final sum of USD \$260,000 and issue an aggregate of 200,000 common shares to the consultants as full consideration. As part of the settlement, the parties provided mutual releases, including a release of all claims by the consultants against the Company.

On October 22, 2014 the company announced the signing of a joint venture agreement with an affiliate ("partner") of Jiu Feng Investments Ltd., a Hong Kong based private company. Under the terms of the agreement, Microcoal and its partner will form a Hong Kong based joint venture company (JVCO) in which Microcoal will own 51% equity interest and a majority position on its Board of Directors. JVCO is expected to carry on its activities throughout China, Hong Kong, Taiwan, Macau and South Korea. Key functions are planned to include:

- Operating an approximate, 11,000 square meter Microcoal complex in Songjiang Industrial Park in Shanghai. This will include a testing, research and development facility and a promotional showroom.
- The facility will source and test various coal samples from Asian markets
- Hire business development personnel
- And promote the company's technology in China
- Generate access to Asian capital markets and investors.

As consideration for assets and financial contribution to these expenses, MicroCoal agreed to issue a total of 10 million common shares to its partner. The agreement would have a 5 year term and automatically renew for a further 5 years. (See the October 22, 2014 press release for further details)

On October 20, 2014, the Company signed a \$1,000,000 USD multi-draw working capital loan. Outstanding draws accrue interest at a rate of 4% per annum, payable quarterly and has a term of 1 year. Principal and interest repayments are without penalty. The loan is convertible into common shares at the option of the holder at a conversion price of \$0.15USD per share. The holder is the Chairman of the Company.

#### **OFF-BALANCE SHEET ARRANGEMENTS**

The Company does not utilize off-balance sheet arrangements.

#### **TRANSACTIONS WITH RELATED PARTIES**

Key management personnel include those persons having authority and responsibility for planning, directing and controlling the activities of the Company as a whole. The Company has determined that key

**REPORT FOR THE QUARTER ENDED  
December 31, 2014  
AMENDED MANAGEMENT DISCUSSION AND  
ANALYSIS**

management personnel consist of executive and non-executive members of the Company's Board of Directors and corporate officers.

	Three months ended December 31, 2014	Three months ended December 31, 2013
Key management personnel remuneration		
Management, director' and professional fees	\$ 231,418	\$ 142,414
Fair value of shares and warrants issued to key management personnel to settle debt	26,284	201,815
Total key management personnel remuneration	\$ 257,702	\$ 344,229

As at Dec 31, 2014 the Company owed US\$1,125,000 to a director pursuant to loans payable.

#### **EVENTS OCCURING AFTER REPORTING DATE**

On January 26, 2015 the Company announced it repaid loans from its Chairman in full, in the principal amount of \$1,125,000 plus accrued interest.

On January 22, 2014 the Company announced it closed a Joint Venture Agreement in China, with Jiu Feng Investments Inc. Pursuant to the terms of the JV agreement, Microcoal and Jiu Feng Investments have formed a corporation domiciled in Hong Kong in which Microcoal holds a 51% equity interest and majority position on its Board of Directors. As consideration for the substantial asset and expense contributions Microcoal issued 6 million common shares to Jiu Feng Investments and has agreed to issue a further 4 million common shares to the Jiu Feng Investments no later than 120 days following closing.

On January 21, 2015 the Company announced it closed an Investment Agreement with Satellite Overseas (Holdings) Limited, an affiliate of Cadila Pharmaceuticals Limited. In connection with the agreement, Microcoal issued 79,046,666 common shares to the investor at \$0.15 per share for aggregate gross proceeds of \$11.857 million (US\$10 million). The investor and Microcoal are working to establish a joint venture in India to bring Microcoal technologies to the marketplace.

Subsequent to the period end, the Company is undertaking a Plan of Arrangement to facilitate the re-organization of the Company. Please refer to the press release and Information Circular for more details of the Plan of Arrangement.

#### **FINANCIAL INSTRUMENTS**

As at December 31, 2014, the Company's financial instruments consist of cash, receivables, accounts payable and accrued liabilities and loans payable. The carrying values of these financial instruments approximate their fair values because of their current nature.

All financial assets and financial liabilities are recorded at fair value on initial recognition. Transaction costs are expensed when they are incurred, unless they are directly attributable to the acquisition of qualifying assets, in which case they are added to the costs of those assets until such time as the assets are substantially ready for their intended use or sale.

**REPORT FOR THE QUARTER ENDED  
December 31, 2014  
AMENDED MANAGEMENT DISCUSSION AND  
ANALYSIS**

---

Level 1	Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;
Level 2	Quoted prices in markets that are not active, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability;
Level 3	Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity);

Under fair value accounting, assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. As of September 30, 2014, the Company had derivative warrant liabilities that were required to be recorded at fair value using level 2 inputs.

#### Market Risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, investment fluctuations, and commodity and equity prices. Market conditions will cause fluctuations in the fair values of financial assets classified as held-for-trading and available-for-sale and cause fluctuations in the fair value of future cash flows for assets or liabilities classified as held-to-maturity, loans or receivables and other financial liabilities. The Company is not exposed to significant market risk. The Company is not exposed to significant interest rate risk as the Company has no variable interest debt. The Company's ability to raise capital to fund activities is subject to risks associated with fluctuations in the market. Management closely monitors individual equity movements and the stock market to determine the appropriate course of action to be taken by the Company.

#### Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its obligations as they become due. The Company's ability to continue as a going concern is dependent on management's ability to raise the funds required through future equity financings, asset sales or sales from contracts, or a combination thereof. The Company has no regular cash flow from its operating activities. The Company manages its liquidity risk by forecasting cash flow requirements for its planned exploration and corporate activities and anticipating investing and financing activities. Management and the Board of Directors are actively involved in the review, planning and approval of annual budgets and significant expenditures and commitments. Failure to realize additional funding, as required, could result in the delay or indefinite postponement of further development of the Company's projects.

#### Interest rate Risk

The Company is not exposed to significant interest rate risk due to the short-term maturity of its monetary assets and liabilities and amounts owing being non-interest bearing or bearing fixed rates of interest.

#### Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Company is mainly exposed to credit risk from credit sales and cash with major financial institutions. It is the Company's policy, implemented locally, to assess the credit risk of new customers before entering contracts. Such credit ratings are taken into account by local business practices.

**REPORT FOR THE QUARTER ENDED  
December 31, 2014  
AMENDED MANAGEMENT DISCUSSION AND  
ANALYSIS**

**Currency Risk**

The Company is exposed to foreign currency risk on fluctuations related to cash, receivables and accounts payable and accrued liabilities that are denominated in the United States dollar (USD). Management does not hedge its exposure to foreign exchange risk and does not believe the Company's net exposure to foreign currency risk is significant.

The following table provides an indication of the Company's significant foreign exchange currency exposure:

	United States	
	December 31, 2014	June 30, 2014
Cash	\$ 29,764	\$ 70,541
Accounts payable and accrued liabilities	(223,673)	(208,307)
Related parties	-	(8,376)
Loans payable	(838,861)	(934,100)
	\$ (1,032,770)	\$ (1,080,242)

The following exchange rates were applied:

	Three months ended December 31, 2014		Year ended June 30, 2014	
	Average rate	Spot rate	Average rate	Spot rate
Canadian dollars to US dollars	0.8990	0.8600	0.9411	0.9039

**Standards, Amendments and Interpretations Not Yet Adopted**

Certain pronouncements were issued by the IASB or the IFRS Interpretations Committee that are mandatory for accounting years beginning on or after January 1, 2013 or later years. The following standards and interpretations have been issued but are not yet effective:

- IFRS 9 Financial Instruments**

IFRS 9 Financial Instruments is part of the IASB's wider project to replace IAS 39 Financial Instruments: Recognition and Measurement. IFRS 9 retains but simplifies the mixed measurement model and establishes two primary measurement categories for financial assets: amortized cost and fair value. The basis of classification depends on the entity's business model and the contractual cash flow characteristics of the financial asset. The standard is effective for annual periods beginning on or after January 1, 2015.

- IAS 32 Amendments**

On May 29, 2013, the IASB made amendments to the disclosure requirements of IAS 36, requiring disclosure, in certain instances, of the recoverable amount of an asset or cash generating unit, and the basis for the determination of fair value less costs of disposal, when an impairment loss is recognized or when an impairment loss is subsequently reversed. These amendments are effective for annual periods beginning on or after January 1, 2014.

**REPORT FOR THE QUARTER ENDED  
December 31, 2014  
AMENDED MANAGEMENT DISCUSSION AND  
ANALYSIS**

• **IAS 36 Impairment of Assets**

Amendments to IAS 36, 'Impairment of Assets' addresses the disclosure of information about the recoverable amount of impaired assets if that amount is based on fair value less costs of disposal. The amendments are effective for annual periods beginning on or after January 1, 2014 and should be applied retrospectively.

• **IFRIC 21 Levies Imposed by Governments**

IFRIC 21 - Levies ("IFRIC 21"), an interpretation of IAS 37 - Provisions, Contingent Liabilities and Contingent Assets ("IAS 37"), on the accounting for levies imposed by governments. IAS 37 sets out criteria for the recognition of a liability, one of which is the requirement for the entity to have a present obligation as a result of a past activity or event ("obligating event") described in the relevant legislation that triggers the payment of the levy. IFRIC 21 is effective for annual periods commencing on or after January 1, 2014. The Company is currently evaluating the impact of the adoption of this interpretation on its consolidated financial statements.

The Company will adopt the amendments of IAS 9, IAS 32 and IAS 36 for its reporting period beginning July 1, 2014 and does not expect the adoption of these standards to have a significant impact on its consolidated financial statements.
