# CANADIAN IMPERIAL VENTURE CORP. NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS (Expressed in Canadian Dollars) FEBRUARY 29, 2020

#### 1. NATURE OF OPERATIONS AND GOING CONCERN

Canadian Imperial Venture Corp. (the "Company") is incorporated under the Business Corporations Act of British Columbia. The Company is listed on the NEX branch of the TSX Venture Exchange, under the symbol CQV.H. The Company's head office is located at 2900 – 595 Burrard Street, Vancouver, BC.

The principal business of the Company is the identification and evaluation of assets or a business with a view to completing a transaction subject to receipt of shareholder approval and acceptance by regulatory authorities. The success of the Company will be dependent on obtaining the necessary financing to evaluate and pursue these opportunities.

These unaudited consolidated financial statements have been prepared on a going concern basis, which contemplates that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business. During the three month period ended February 29, 2020, the Company incurred a net loss of \$13,757 and had an accumulated deficit at February 29, 2020 of \$18,538,378. These conditions cast significant doubt on the Company's ability to continue as a going concern.

The current market conditions and volatility increases the uncertainty of the Company's ability to continue as a going concern given the need to both curtail expenditures and to raise additional funds. The Company is experiencing, and has experienced, negative operating cash flows. The Company will continue to search for new or alternate sources of financing but anticipates that the current market conditions may impact the ability to source such funds.

There can be no assurance that the Company will be able to continue to raise funds in which case the Company may be unable to meet its obligations. Should the Company be unable to realize on its assets and discharge its liabilities in the normal course of business, the net realizable value of its assets may be materially less than the amounts recorded on the Company's statement of financial position.

## Ikänik Farms, Inc.

On April 2, 2019, the Company entered into a business combination agreement (the "Agreement") with Ikänik Farms, Inc. ("Ikänik") (formerly Ikänik Partners, Inc.) and a wholly owned subsidiary of the Company, 11326937 Canada Inc. ("Newco"), formed for the purpose of completing the amalgamation. Ikänik is an arm's length company incorporated under the Canada Business Corporations Act and is a vertically integrated cannabis cultivator, producer, distributor and dispensary operator that is building out its "seed to sale" business.

Pursuant to the Agreement, the Company has agreed to acquire all of the issued and outstanding securities of Ikänik and the business of Ikänik by way of a three-cornered amalgamation (the "Transaction") between the Company, Ikänik and Newco pursuant to the provisions of the Canada Business Corporations Act. The Transaction will result in a reverse takeover of the Company by the security holders of Ikänik. Prior to the completion of the Transaction, the Company will designate its common shares as subordinate voting shares (the "Resulting Issuer SV Shares") and create a new class of Series A compressed multiple voting shares (the "Resulting Issuer Series A Shares", together with the Resulting Issuer SV Shares, the "Resulting Issuer Shares"). Each Resulting Issuer Series A Share will have the economic and voting rights equivalent to 100 times the Resulting Issuer SV Shares, and shall be convertible into or exchangeable to the Resulting Issuer SV Shares on the terms and conditions to be determined by Ikänik. The Company will consolidate its existing shares on a ratio to be mutually agreed upon by the Company and Ikänik such that immediately prior to the closing of the Transaction, there will be an aggregate of 9,500,000 common shares of the Company issued and outstanding on a post-consolidation basis, which will be redesignated into Resulting Issuer Shares such that shareholders of the Company will own 9,500,000 Resulting Issuer Shares.

#### 5. FINANCIAL RISK MANAGEMENT

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

### Fair value of financial assets and liabilities

IFRS 13 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The three levels of the fair value hierarchy are as follows:

# 5. FINANCIAL RISK MANAGEMENT (continued):

## Fair value of financial assets and liabilities (continued):

Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices that are observable for the asset or liability

either directly (i.e.: as prices) or indirectly (i.e.: derived from prices); and

Level 3: Inputs that are not based on observable market data.

The fair value of cash is measured using Level 1 inputs. The carrying values of trade receivable, accounts payable and accrued liabilities, and due to related parties approximate their respective fair values due to the short-term nature of these instruments.

#### Financial instrument risk management

The Company's exposures and the impact on its financial instruments are summarized below:

#### Credit risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company believes it has no significant credit risk. Amounts receivable consists of input tax credits receivable from the Government of Canada and are not subject to significant credit risk.

### Liquidity risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at February 29, 2020, the Company had a cash balance of \$190,094 to settle current liabilities of \$137,065. The Company expects to fund these liabilities through the issuance of capital stock. See Note 1 for discussion of going concern risk.

#### Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates and, commodity and equity prices.

#### a) Interest rate risk

The Company has cash balances which are not at a significant risk to fluctuating interest rates. The Company's current policy is to invest excess cash in investment-grade short-term deposit certificates issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks. As of February 29, 2020, the Company did not have any investments in investment-grade short-term deposit certificates.

## b) Price risk

The Company is exposed to price risk with respect to equity prices. Equity price risk is defined as the potential adverse impact on the Company's earnings due to movements in individual equity prices or general movements in the level of the stock market.

## c) Foreign currency risk

The Company operates in Canada and is not exposed to any significant foreign currency risk.

#### 6. CAPITAL MANAGEMENT

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition, and development of its exploration and evaluation interests. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

The Company is largely dependent upon external financings to fund activities. In order to search for new business opportunities and pay for administrative costs, the Company will spend its existing working capital and raise additional funds as needed. The Company will continue to assess new business opportunities and seek to acquire new business assets if it feels there are sufficient business opportunities or economic potential and if it has adequate financial resources to do so.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

There were no changes in the Company's approach to capital management during the three month period ended February 29, 2020. The Company is not subject to externally imposed capital requirements.
