#### **CAUTION REGARDING FORWARD LOOKING STATEMENTS**

This MD&A contains certain statements that constitute forward-looking statements (within the meaning of the Canadian securities legislation and the U.S. Private Securities Litigation Reform Act of 1995) that involve risks and uncertainties. Forward-looking statements are frequently, but not always, identified by words such as “expects”, “anticipates”, “believes”, “intends”, “estimates”, “potential”, “possible” and similar expressions, or statements that events, conditions or results “will”, “may”, “could” or “should” occur or be achieved. The forward-looking statements may include statements regarding exploration results and budgets, mineral resource estimates, work programs, capital expenditures, timelines, strategic plans, market price of commodities or other statements that are not statement of fact. Forward-looking statements are statements about the future and are inherently uncertain, and actual achievements of the Company may differ materially from those reflected in forward-looking statements due to a variety of risks, uncertainties and other factors. For the reasons set forth above, investors should not place undue reliance on forward-looking statements. Important factors that could cause actual results to differ materially from the Company’s expectations include uncertainties involved in disputes and litigation, fluctuations in commodity prices and currency exchange rates; uncertainties relating to interpretation of drill results and the geology, continuity and grade of deposits; uncertainty of estimates of capital and operating costs, recovery rates, production estimates and economic return; the need for cooperation of government agencies and native groups in the exploration and development of properties and the issuance of required permits; the need to obtain additional financing to develop properties and uncertainty as to the availability and terms of future financing; the possibility of delay in exploration or development programs or in construction projects and uncertainty in meeting anticipated program milestones; uncertainty as to timely availability of permits and other government approvals and other risks and uncertainties disclosed in other information released by the Company from time to time and filed with the appropriate regulatory agencies.

It is the Company’s policy that all forward-looking statements are based on the Company’s beliefs and assumptions, which are based on information available at the time these assumptions are made. The forward looking statements contained herein are as of May 27, 2013 and are subject to change after the date of this MD&A, and the Company assumes no obligation to publicly update or revise the statements to reflect new events or circumstances, except as may be required pursuant to applicable laws. Although management believes that the expectations represented by such forward-looking information or statements are reasonable, there is significant risk that the forward-looking information or statements may not be achieved, and the underlying assumptions thereto will not prove to be accurate. Forward-looking information or statements in this MD&A include, but are not limited to, information or statements concerning our expectations for satisfactory closing of the Jellico Property.

Actual results or events could differ materially from the plans, intentions and expectations expressed or implied in any forward-looking information or statements, including the underlying assumptions thereto, as a result of numerous risks, uncertainties and other factors such as those described above and in “Risks and Uncertainties” below. The Company has no policy for updating forward looking information beyond the procedures required under applicable securities laws.

**For the Six Months Ended March 31, 2013**

---

#### **INTRODUCTION**

This Management Discussion and Analysis (“MD&A”) of the operating results and financial condition of Thelon Capital Ltd. (the “Company” or “Thelon”) for the six months ended March 31, 2013 should be read in conjunction with the unaudited condensed interim financial statements for the six months ended March 31, 2013 and the audited financial statements for the year ended September 30, 2012 which are prepared in accordance with International Financial Reporting Standards (“IFRS”).

The Company is an exploration stage resource company in the province of British Columbia. The diverse backgrounds and experience of the Company’s management will facilitate the ongoing corporate and exploration growth. The Management team will continue to evolve as the Company grows as a mining exploration company.

The Company currently has one exploration project with significant potential to acquire 100% of the Jellico Property which consists of approximately 6,000 acres of coal mineral and surface rights located in the Campbell and Clairborne counties in the State of Tennessee, whenever the Company has to the ability to close the transaction.

This MD&A is prepared as at May 27, 2013. All dollar figures stated herein are expressed in Canadian dollars unless otherwise noted.

Readers should use the information contained in this report in conjunction with all other disclosure documents including those filed on SEDAR at [www.sedar.com](http://www.sedar.com).

#### **DESCRIPTION OF THE BUSINESS**

Pursuant to a resolution passed by the shareholders, the common shares of Thelon Capital Ltd. commenced trading on the TSX Venture Exchange on February 4, 2010 and the common shares of Thelon Ventures Ltd. were delisted. The Company also consolidated its share capital on a ten old for one new basis. The Company is incorporated under the Company Act of British Columbia.

Thelon is an exploration stage resource company. The Company holds interests in certain mineral properties and on the basis of information available to date may not have economically viable reserves. The underlying value of the mineral interests and related deferred exploration expenditures is dependent upon the existence and economic recovery of such reserves in the future, confirmation of the Company’s interest in the underlying mineral claims, and the ability to raise long-term financing.

Operations at this time are focused on the review of existing mineral interests, potential acquisitions of additional mineral properties, and sourcing of potential financing for the Company.

The Company’s corporate office and principal place of business is at Suite 609 – 475 Howe Street, Vancouver, British Columbia, V6C 2B3.

The Company is a reporting issuer under applicable securities legislation in British Columbia and Alberta, and trades on the TSX Venture Exchange under the symbol THC.

#### MINERAL INTERESTS

##### Jellico Project

On May 27, 2010, the Company entered into a Letter of Agreement to acquire 100% of the Jellico Coal Property which consists of approximately 6,000 acres of coal mineral and surface rights in Campbell and Clairborne counties in the State of Tennessee.

The Company entered into a Share Purchase Agreement on December 14, 2010, amended on March 16, 2011 and August 8, 2011, to purchase 100% of the issued and outstanding shares of Clear Fork Mining Company who owns 100% of the Jellico Coal property. The purchase price is:

- 7,000,000 common shares (issued);
- US\$1,000,000 (paid) on signing;
- US\$3,000,000 (US\$2,736,374 paid) due December 15, 2011;
- take over debt obligations of the vendor of approximately US\$4,800,000 effective December 15, 2011; and
- issue a promissory note to the vendor for US\$8,485,000 due in 10 years bearing interest at a rate of 6% per annum, interest paid monthly, with an annual payment starting on or before December 31, 2013 of 10% of the principal upon closing.

A bonus of \$50,000 was paid to a company controlled by a director on this transaction. This transaction is subject to finder's fees in accordance with TSX Venture Exchange policy and subject to TSX Venture Exchange approval.

Portions of the property have had extensive sampling and drilling by previous operators as recently as 2009, and it is thought to contain multiple coal seams of high quality metallurgical, as well as, compliant steam coals. DRC Coal LLC has a surface mining operation on the southern boundary of the property producing from the Blue Gem, Jellico, and Rex coal seams.

Historical reserve and coal analysis data provided in a July 2009 report by A.R Leamon CPG TN estimate inferred coal reserves of approximately 12,000,000 tons in place. Coal quality analysis conducted from core holes and test pits on the property between 1992 and 2007 have shown favorable sulfur, ash, and BTU values consistent with high quality metallurgical coals being produced in the area. This historical information is not NI 43-101 compliant.

The property and surrounding area has well-established power, logistics, and transportation infrastructure including mine access roads, several secondary county roads, and a railroad parallel to Tennessee State Highway 90, which extends through the property.

The Company's immediate objectives are to close the transaction, begin the necessary drilling to define additional coal reserves, and complete a National Instrument 43-101 report of measured and indicated mineable coal reserves on the property. Closing is to occur upon the final payment of US\$303,626.

At September 30, 2012, the Company was unable to make the required payments to close the transaction. Although the vendor has not demanded payment, a written extension has not been received; therefore, at September 30, 2012, the Company recorded an impairment of \$5,819,820 against the accumulated costs to reflect the uncertainty around completion of the acquisition.

This transaction is subject to finder's fees in accordance with TSX Venture Exchange policy and subject to TSX Venture Exchange approval.

**RESULTS OF OPERATIONS****Six Months Ended March 31, 2013**

The Company's net loss for the six months ended March 31, 2013 was \$194,154 as compared to a net loss of \$343,168 for the six months ended March 31, 2012.

Overall, expenses decreased reflecting decreased business activity during the first six months of this year compared to the same period last. The expenses that increased were: bank charges and interest which increased to \$9,347 from \$797 for the same period last year due to the promissory notes which were outstanding this year which provided the Company with working capital; telephone which increased to \$8,294 from \$7,936 for the same period last year; and transfer agent and filing fees which increased to \$10,805 from \$9,927 for the same period last year.

**Three Months Ended March 31, 2013**

The Company's net loss for the three months ended March 31, 2013 was \$86,397 as compared to a net loss of \$167,657 for the three months ended March 31, 2012.

Overall, expenses decreased reflecting decreased business activity during the second quarter of this year compared to the same period last. The expenses that increased were: bank charges and interest which increased to \$5,686 from \$335 for the same period last year due to the promissory notes which were outstanding this quarter which provided the Company with working capital; and transfer agent and filing fees which increased to \$9,522 from \$8,938 for the same quarter last year.

## **THELON CAPITAL LTD.**

### **Management Discussion and Analysis (Expressed in Canadian Dollars)**

---

**For the Six Months Ended March 31, 2013**

---

#### **LIQUIDITY**

The Company does not have any cash flow from operations or any production of mineral resources; accordingly, it must rely on debt or equity financing to fund operations. The Company's access to exploration financing when the financing is not transaction specific is always uncertain. There can be no assurance of continued access to any funding.

The Company's cash on hand increased to \$418 as at March 31, 2013 from having cheques written in excess of the bank balance of \$9,099 as at September 30, 2012. The Company had a working capital deficiency of \$595,953 as at March 31, 2013 compared to a working capital deficiency of \$407,276 as at September 30, 2012.

The Company's current asset balance of \$35,696 (September 30, 2012 - \$41,862) is comprised of cash of \$418 (September 30, 2012 - Nil), amounts receivable of \$199 (September 30, 2012 - \$444), HST receivable from the Canada Revenue Agency of \$12,031 (September 30, 2012 - \$11,304), advances to related parties of Nil (September 30, 2012 - \$4,514), and prepaid expenses of \$23,048 (September 30, 2012 - \$25,600).

The Company's current liabilities total \$631,649 (September 30, 2012 - \$449,138) is made up of cheques written in excess of the bank balance of Nil (September 30, 2012 - \$9,099), outstanding accounts payable and accrued liabilities relating to administrative and exploration expenses of \$392,422 (September 30, 2012 - \$338,779), promissory notes payable of \$54,300 (September 30, 2012 - \$10,000), and amounts due related parties of \$184,927 (September 30, 2012 - \$91,260).

As of the date of this MD&A, the Company has insufficient working capital to meet its ongoing financial obligations for the coming year. There can be no assurance that future debt or equity financings will be available to the Company or, if it is, that it will be available on terms acceptable to the Company and will be sufficient to fund cash needs. If the Company is unable to obtain the financing necessary to support its operations, it may be unable to continue as a going concern. The Company currently has no commitments for any credit facilities such as revolving credit agreements or lines of credit that could provide additional working capital, and substantial doubt exists regarding the Company's ability to continue as a going concern. The Company has no long term debt, capital lease obligations, operating leases, or any other long term obligations.

#### **PROPOSED TRANSACTIONS**

There are no proposed assets or business acquisitions or disposition, other than those in the ordinary course of business, before the board of directors for consideration.

#### **OFF-BALANCE SHEET ARRANGEMENTS**

None

#### **RELATED PARTY TRANSACTIONS**

The Company has identified certain directors and senior officers as key management personnel. The following table lists the compensation costs paid to key management personnel and companies owned by key management personnel for the periods ended March 31, 2013 and 2012:

BUA Capital Management Ltd. provides consulting services to the Company and BUA Group Holdings Ltd. provides administration services to the Company; both are private companies controlled by the President of the Company, Jason Walsh. At March 31, 2013, the Company owed \$54,658 (September 30, 2012 - \$8,348) to BUA Capital Management Ltd. and \$8,854 (September 30, 2012 - \$(4,514)) from BUA Group Holdings Ltd. which are included in amounts due to related parties.

GRW Inc. (formerly Complete Communications Inc.) provides consulting services to the Company is a private company controlled by the Chief Financial Officer, Geoff Watson. At March 31, 2013, the Company owed GRW Inc. \$10,080 (September 30, 2012 - Nil) which is included in accounts payable and accrued liabilities.

At March 31, 2013, the Company owed Jason Walsh \$28,867 (September 30, 2012 - \$26,504) which is included in the amounts due to related parties. Mr. Walsh is also owed \$6,000 (September 30, 2012 - Nil) for unpaid director fees which is included in accounts payable and accrued liabilities.

At March 31, 2013, the Company owed Geoff Watson \$8,000 (September 30, 2012 - \$2,000) for unpaid director fees which is included in accounts payable and accrued liabilities.

At March 31, 2013, the Company owed William Cousins, a director, \$3,712 (September 30, 2012 - Nil) which is included in amounts due to related parties.

At March 31, 2013, the Company owed \$74,360 (September 30, 2012 - \$61,000) to Thelon Diamond Company Limited, a private company with common directors controlled by Jason Walsh; \$5,102 (September 30, 2012 - Nil) to Zadar Ventures Ltd., a public company with common directors; \$5,000 (September 30, 2012 - Nil) to International Ranger Corp., a public company with common directors; and \$4,373 (September 30, 2012 - Nil) to Scout Exploration Inc., a public company with common directors.

---

## **THELON CAPITAL LTD.**

### **Management Discussion and Analysis (Expressed in Canadian Dollars)**

---

#### **For the Six Months Ended March 31, 2013**

---

Amounts due to or from related parties are unsecured, do not bear interest and are classified as a current asset or liability due to their nature and expected time of repayment; accordingly the fair value cannot be practicably determined.

#### **CONFLICTS OF INTEREST**

The Company's directors and officers may serve as directors or officers, or may be associated with other reporting companies, or have significant shareholdings in other public companies. To the extent that such other companies may participate in business or asset acquisitions, dispositions, or ventures in which the Company may participate, the directors and officers of the Company may have a conflict of interest in negotiating and concluding on terms with respect to the transaction. If a conflict of interest arises, the Company will follow the provisions of the Business Corporations Act (BC) ("Corporations Act") dealing with conflict of interest. These provisions state that where a director has such a conflict, that director must, at a meeting of the Company's directors, disclose his or her interest and refrain from voting on the matter unless otherwise permitted by the Corporations Act. In accordance with the laws of the Province of British Columbia, the directors and officers of the Company are required to act honestly, in good faith, and in the best interest of the Company.

#### **SIGNIFICANT ACCOUNTING POLICIES**

##### **Financial instruments**

Financial assets and financial liabilities are recognized on the statement of financial position when the Company becomes a party to the contractual provisions of the financial instrument. The Company does not have any derivative financial instruments.

##### **Financial assets**

The Company classifies its financial assets into categories, at initial recognition, depending on the purpose for which the asset was acquired. The Company's accounting policy for each category is as follows:

##### **Fair value through profit or loss**

This category comprises derivatives, or financial assets acquired or incurred principally for the purpose of selling or repurchasing in the near term. They are carried in the statements of financial position at fair value, with changes in fair value recognized in profit or loss in the statement of comprehensive loss. Cash is classified as a fair value through profit and loss financial asset.

##### **Loans and receivables**

These assets are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are carried at amortized cost less any provision for impairment. Individually significant receivables are considered for impairment when they are past due or when other objective evidence is received that a specific counterparty will default. The Company has classified amounts receivable and advance to related parties as loans and receivables.

---

## **THELON CAPITAL LTD.**

### **Management Discussion and Analysis (Expressed in Canadian Dollars)**

---

**For the Six Months Ended March 31, 2013**

---

#### **Held-to-maturity investments**

These assets are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Company's management has the positive intention and ability to hold to maturity. These assets are measured at amortized cost using the effective interest rate method. If there is objective evidence that the investment is impaired, determined by reference to external credit ratings and other relevant indicators, the financial asset is measured at the present value of estimated future cash flows. Any changes to the carrying amount of the investment, including impairment losses, are recognized in the statement of comprehensive loss. The Company has not classified any financial assets as held-to-maturity investments.

#### **Available-for-sale**

Non-derivative financial assets not included in the above categories are classified as available-for-sale. They are carried at fair value with changes in fair value recognized directly in other comprehensive income or loss ("OCI"). Where a decline in the fair value of an available-for-sale financial asset constitutes objective evidence of impairment, the amount of the loss is removed from OCI and recognized in the statement of comprehensive loss. The Company has not classified any financial assets as available-for-sale.

Transaction costs associated with fair value through profit or loss financial assets are expensed as incurred, while transaction costs associated with all other financial assets are included in the initial carrying amount of the asset.

All financial assets except for those at fair value through profit or loss are subject to review for impairment at least at each reporting date. Financial assets are impaired when there is any objective evidence that a financial asset or a group of financial assets is impaired. Different criteria to determine impairment are applied for each category of financial assets, which are described above.

#### **Financial liabilities**

The Company classifies its financial liabilities into one of two categories depending on the purpose for which the asset was acquired. The Company's accounting policy for each category is as follows:

##### **Fair value through profit or loss**

This category comprises derivatives, or liabilities acquired or incurred principally for the purpose of selling or repurchasing in the near term. They are carried in the statement of financial position at fair value, with changes in fair value recognized in the statement of comprehensive loss. The Company has not classified any financial liabilities as fair value through profit and loss.

##### **Other financial liabilities**

This category includes accounts payable and accrued liabilities which are recognized at amortized cost. The Company has classified cheques issued in excess of bank balance, accounts payable and accrued liabilities, promissory note payable, and due to related parties as other financial liabilities.

##### **Cash and cash equivalents**

Cash and cash equivalents in the statement of financial position is comprised of cash at banks and on hand, and short term deposits with an original maturity of three months or less, which are readily convertible into a known amount of cash.

---

## THELON CAPITAL LTD.

### Management Discussion and Analysis (Expressed in Canadian Dollars)

---

For the Six Months Ended March 31, 2013

---

#### Mineral interests

The Company is in the exploration stage with respect to its investment in mineral interests. Acquisition costs for mineral interests, net of recoveries, are capitalized on a property-by-property basis. Acquisition costs include cash consideration and the value of common shares, based on recent issue prices, issued for mineral interests pursuant to the terms of the agreement. Exploration expenditures, net of recoveries, are capitalized. After a property is determined by management to be commercially feasible, acquisition costs and deferred expenditures on the property will be transferred to property, plant, and equipment as mine and mill costs. Prior to transfer the assets will be tested for impairment. The costs related to a property from which there is production, will be depleted and amortized using the unit-of-production method.

A mineral interest acquired under an option agreement where payments are made at the sole discretion of the Company is capitalized at the time of payment. Option payments received are treated as a reduction of the carrying value of the related acquisition cost for the mineral interest until the payments are in excess of acquisition costs, at which time they are then credited to operations. Option payments are at the discretion of the optionee; accordingly, they are accounted for when receipt is reasonably assured.

Capitalized costs are assessed for impairment if facts and circumstances suggest that the carrying amount exceeds the recoverable amount. When there is little prospect of further work on a property being carried out by the Company or its partners, when a property is abandoned, or when the capitalized costs are no longer considered recoverable, the related property costs are written down to management's estimate of their net recoverable amount.

The recoverability of the carrying amount of mineral interests is dependent on successful development and commercial exploitation, or alternatively, the sale of the respective areas of interest.

#### Property, plant, and equipment

Property, plant, and equipment ("PPE") is carried at cost less accumulated depreciation and accumulated impairment losses.

The cost of an item of PPE consists of the purchase price, any costs directly attributable to bringing the asset to the location and condition necessary for its intended use, and an initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located.

Property, plant, and equipment are depreciated annually at the following rates using the declining-balance method when the asset becomes available for use, and in the year of acquisition, only one-half of normal rates are used:

Furniture and fixtures	20%
Computer equipment	30%

An item of PPE is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on disposal of the asset, determined as the difference between the net disposal proceeds and the carrying amount of the asset, is recognized in the statement of comprehensive loss.

Where an item of plant and equipment comprises major components with different useful lives, the components are accounted for as separate items of plant and equipment. Expenditures incurred to replace a component of an item of plant and equipment that is accounted for separately, including major inspection and overhaul expenditures, are capitalized.

---

## **THELON CAPITAL LTD.**

### **Management Discussion and Analysis (Expressed in Canadian Dollars)**

---

**For the Six Months Ended March 31, 2013**

---

#### **Impairment**

At each financial position reporting date, the carrying amounts of the Company's assets are reviewed to determine whether there is any indication that those assets are impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any. Where the asset does not generate cash flows that are independent from other assets, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

An asset's recoverable amount is the higher of fair value less costs to sell, and value in use. Fair value is determined as the amount that would be obtained from the sale of the asset in an arm's length transaction between knowledgeable and willing parties. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessment of the time value of money and the risks specific to the asset. If the recoverable amount of an asset or cash generating unit is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount and the impairment loss is recognized in the statement of comprehensive loss.

Where an impairment loss subsequently reverses, the carrying amount of the asset or cash-generating unit is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset or cash-generating unit in prior years. A reversal of an impairment loss is recognized immediately in the statement of comprehensive loss.

#### **Common shares**

Common shares are classified as equity. Transaction costs directly attributable to the issue of common shares and share options are recognized as a deduction from equity, net of any tax effects.

#### **Equity units**

Proceeds received on the issuance of units comprised of common shares and warrants are allocated on the residual value method where proceeds are allocated to the common shares up to their fair value as determined by the current quoted trading price of the announcement date, and the balance, if any, to the reserve for the warrants.

#### **Non-monetary consideration**

Where share capital is issued, or received, as non-monetary consideration and the fair value of the asset received or given up is not readily determinable, the fair market value of the shares is used to record the transaction. The fair market value of the shares is based on the trading price of those shares on the appropriate stock exchange on the date of the agreement to issue or receive shares as determined by the board of directors.

#### **Share-based compensation**

The share option plan allows Company employees and consultants to acquire shares of the Company. The fair value of share options granted to employees is recognized as an expense over the vesting period with a corresponding increase in equity. An individual is classified as an employee when the individual is an employee for legal or tax purposes (a direct employee) or provides services similar to those performed by a direct employee (a consultant). The fair value is measured at grant date and recognized over the period during which the options vest.

---

## **THELON CAPITAL LTD.**

### **Management Discussion and Analysis (Expressed in Canadian Dollars)**

---

#### **For the Six Months Ended March 31, 2013**

---

The fair value of the options granted to employees is measured using the Black-Scholes option pricing model taking into account the terms and conditions upon which the options were granted. At each financial position reporting date, the amount recognized as an expense is adjusted to reflect the actual number of share options that are expected to vest.

The fair value of share options granted to non-employees is recognized as an expense in the statement of comprehensive loss and is recorded at the fair value of the services received, unless they are related to the issuance of shares. The amount related to the issuance of shares is recorded as a reduction of share capital.

When the value of services received in exchange for the share-based compensation cannot be reliably estimated, the fair value is measured by use of a valuation model. The expected life used in the model is adjusted, based on management's best estimate, for the effects of non-transferability, exercise restrictions, and behavioral considerations.

All share-based compensation is reflected in reserves until exercised. Upon exercise, shares are issued from treasury and the amount reflected in reserves is credited to share capital, adjusted for any consideration paid.

#### **Equity reserves**

Where share options or warrants expire or are cancelled, the fair value previously recognized is transferred from the equity reserve to accumulated deficit.

#### **Loss per share**

The Company presents basic and diluted loss per share data for its common shares, calculated by dividing the loss attributable to common shareholders of the Company by the weighted average number of common shares outstanding during the period. Diluted loss per share is determined by adjusting the loss attributable to common shareholders and the weighted average number of common shares outstanding for the effects of all dilutive potential common shares.

#### **Provisions**

Provisions are recognized where a legal or constructive obligation has been incurred as a result of past events; it is probable that an outflow of resources embodying economic benefit will be required to settle the obligation; and a reliable estimate of the amount of the obligation can be made. If material, provisions are measured at the present value of the expenditures expected to be required to settle the obligation.

An obligation to incur restoration, rehabilitation, and environmental costs arises when environmental disturbance is caused by the exploration, development, or ongoing production of a mineral interest. Such costs arising from the decommissioning of plant and other site preparation work, discounted to their net present value, are provided for and capitalized at the start of each project to the carrying amount of the asset, as soon as the legal or constructive obligation to incur such costs arises. Discount rates using a pre-tax rate that reflects the time value of money are used to calculate the net present value. These costs are charged against profit or loss over the economic life of the related asset, through amortization using either the unit-of-production or the straight-line method. The related liability is adjusted for each period for the unwinding of the discount rate and for changes to the current market-based discount rate, amount, or timing of the underlying cash flows needed to settle the obligation.

The Company has no material restoration, rehabilitation, and environmental costs as the disturbance to date is minimal.

---

**THELON CAPITAL LTD.****Management Discussion and Analysis  
(Expressed in Canadian Dollars)**

---

**For the Six Months Ended March 31, 2013**

---

**Income taxes**

Income tax on the profit or loss for the years presented comprises current and deferred tax. Income tax is recognized in profit or loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized as equity.

Current tax expense is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the year end, adjusted for amendments to the tax payable with regards to previous years.

Deferred tax is provided using the statement of financial position liability method providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The following temporary differences are not provided for: goodwill not deductible for tax purposes; the initial recognition of assets or liabilities in a transaction that is not a business combination and that affect neither accounting nor taxable profit; and differences relating to investments in subsidiaries to the extent that they will probably not reverse in the foreseeable future. The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the statement of financial position date.

A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized.

Additional income taxes that arise from the distribution of dividends are recognized at the same time as the liability to pay the related dividend.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

**Segment reporting**

The Company operates in a single reportable segment being the acquisition, exploration, and development of mineral interests.

The Company's mineral interest in the Jellico Project which has been impaired by the Company's inability to raise the money to close the transaction is located in the United States. All other significant assets are located in Canada.

### CRITICAL ACCOUNTING ESTIMATES

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized prospectively from the period in which the estimates are revised. The following are the key estimate and assumption uncertainties that have a significant risk of resulting in a material adjustment within the next financial year:

#### Impairment of assets

When there are indications that an asset may be impaired, the Company is required to estimate the asset's recoverable amount. Recoverable amount is the greater of value in use and fair value less costs to sell. Determining the value in use requires the Company to estimate expected future cash flows associated with the asset and a suitable discount rate in order to calculate present value. No impairments of non-financial assets have been recorded for the six months ended March 31, 2013 (March 31, 2012 – Nil).

#### Useful life of property, plant, and equipment

Property, plant, and equipment are depreciated over the estimated useful life of the assets. Changes in the estimated useful lives could significantly increase or decrease the amount of depreciation recorded during the year and the carrying value of equipment. Total carrying value of property, plant, and equipment at March 31, 2013 was \$1,295 (September 30, 2012 - \$1,499).

#### Share-based compensation

Management is required to make certain estimates when determining the fair value of stock options awards, and the number of awards that are expected to vest. These estimates affect the amount recognized as share-based compensation in the Company's statement of comprehensive loss. For the six months ended March 31, 2013, the Company recognized no share-based compensation expense (March 31, 2012 - \$6,699).

---

## **THELON CAPITAL LTD.**

### **Management Discussion and Analysis (Expressed in Canadian Dollars)**

---

**For the Six Months Ended March 31, 2013**

---

#### **CRITICAL JUDGMENTS USED IN APPLYING ACCOUNTING POLICIES**

In the preparation of these condensed interim financial statements, management has made judgments, aside from those that involve estimates, in the process of applying the accounting policies. These judgments can have an effect on the amounts recognized in the financial statements:

##### **Mineral interests**

Management is required to apply judgment in determining whether technical feasibility and commercial viability can be demonstrated for its mineral interests. Once technical feasibility and commercial viability of a property can be demonstrated, it is reclassified from mineral interests under exploration and subject to different accounting treatment. As at March 31, 2013 and September 30, 2012, management had determined that no reclassification of mineral interests was required.

##### **Income taxes**

The measurement of deferred income tax assets requires management to make judgments in the interpretation and application of the relevant tax laws. The actual amount of income taxes only becomes final upon filing and acceptance of the tax return by the relevant authorities, which occurs subsequent to the issuance of the audited annual financial statements.

#### **NEW ACCOUNTING STANDARDS AND INTERPRETATIONS NOT YET ADOPTED**

The following accounting pronouncements have been released but have not yet been adopted by the Company:

##### **IFRS 9 Financial Instruments**

In November 2009, the IASB issued, and subsequently revised in October 2010, IFRS 9 Financial Instruments (IFRS 9) as a first phase in its ongoing project to replace IAS 39. IFRS 9, which is to be applied retrospectively, is effective for annual periods beginning on or after January 1, 2015, with earlier application permitted.

IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. The standard also adds guidance on the classification and measurement of financial liabilities. Management has not yet determined the potential impact the adoption of IFRS 9 will have on the Company's financial statements.

##### **IFRS 10 Consolidated Financial Statements**

In May 2011, the IASB issued IFRS 10 Consolidated Financial Statements (IFRS 10). IFRS 10, which is to be applied retrospectively, is effective for annual periods beginning on or after January 1, 2013, with earlier application permitted.

---

## **THELON CAPITAL LTD.**

### **Management Discussion and Analysis (Expressed in Canadian Dollars)**

---

#### **For the Six Months Ended March 31, 2013**

---

IFRS 10 replaces Standing Interpretations Committee 12 Consolidation – Special Purpose Entities (SIC 12) and IAS 27 Consolidated and Separate Financial Statements (IAS 27). IFRS 10 eliminates the current risk and rewards approach and establishes control as the single basis for determining the consolidation of an entity. The standard provides guidance on how to apply the control principles in a number of situations, including agency relationships and holding potential voting rights. Management has not yet determined the potential impact that the adoption of IFRS 10 will have on the Company's financial statements.

#### **IFRS 12 Disclosure of Interests in Other Entities**

In May 2011, the IASB issued IFRS 12 Disclosure of Interests in Other Entities (IFRS 12). IFRS 12, which is to be applied retrospectively, is effective for annual periods beginning on or after January 1, 2013, with earlier application permitted.

IFRS 12 outlines the required disclosures for interests in subsidiaries and joint arrangements. The new disclosures require information that will assist financial statement users to evaluate the nature, risks and financial effects associated with an entity's interests in subsidiaries and joint arrangements. Management has not yet determined the potential impact that the adoption of IFRS 12 will have on the Company's financial statements.

#### **IFRS 13 Fair Value Measurement**

In May 2011, the IASB issued IFRS 13 Fair Value Measurement (IFRS 13). IFRS 13, which is to be applied prospectively, is effective for annual periods beginning on or after January 1, 2013, with earlier application permitted.

IFRS 13 defines fair value, provides a framework for measuring fair value, and includes disclosure requirements for fair value measurements. IFRS 13 will be applied in most cases when another IFRS requires (or permits) fair value measurement. Management has not yet determined the potential impact that the adoption of IFRS 13 will have on the Company's financial statements.

#### **Other**

In June 2011, the IASB issued amendments to IAS 1 Presentation of Financial Statements, to revise the way in which other comprehensive income is presented. The Company does not believe the changes resulting from the amended standard will have an impact on its financial statements. The amended standard is effective for annual periods beginning on or after July 1, 2012.

In June 2011, the IASB issued amendments to IAS 19 Employee Benefits, with revised requirements for pensions and other postretirement benefits, termination benefits, and other changes. The Company does not believe the changes resulting from these amendments are relevant to its financial statements. The amended standard is effective for annual periods beginning on or after January 1, 2013.

In May 2011, the IASB issued IFRS 11 Joint Arrangements, in addition to IFRS 10 and IFRS 12 as discussed above. The Company does not believe the changes resulting from this new standard are relevant to its financial statements. IFRS 11 is effective for annual periods beginning on or after January 1, 2013.

In October 2011, the IASB issued IFRIC 20 Stripping Costs in the production phase of a surface mine. The Company does not believe the changes resulting from this new standard are relevant to its financial statements. IFRIC 20 is effective for annual periods beginning on or after January 1, 2013.

---

## THELON CAPITAL LTD.

### Management Discussion and Analysis (Expressed in Canadian Dollars)

---

For the Six Months Ended March 31, 2013

---

#### FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

##### Fair value of financial instruments

The carrying values of cash, amounts receivable, amounts due to/from related parties, cheques issued in excess of bank balance, accounts payable and accrued liabilities, and promissory notes payable approximate their carrying values due to the immediate or short-term nature of these instruments.

##### Fair value hierarchy

IFRS 7, Financial Instruments: Disclosures, establishes a fair value hierarchy that prioritizes the input to valuation techniques used to measure fair value as follows:

- Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

##### Financial risk management

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

##### Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. Financial instruments that potentially subject the Company to credit risk consist primarily of cash. The Company limits its exposure to credit risk by placing its cash with a high credit quality financial institution in Canada. The Company's financial assets are not subject to material financial risks.

##### Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in raising funds to meet commitments associated with financial instruments and with property exploration and development. The Company manages liquidity risk by maintaining adequate cash balances.

The Company's expected source of cash flow in the upcoming year will be through debt or equity financing. Cash on hand at March 31, 2013 and expected cash flows for the next 12 months are not sufficient to fund the Company's ongoing operational needs and close its major transaction. The Company will need funding through equity or debt financing, entering into joint venture agreements, or a combination thereof.

All of the Company's financial liabilities are classified as current and are anticipated to mature within the next fiscal period.

##### Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices.

---

## THELON CAPITAL LTD.

### Management Discussion and Analysis (Expressed in Canadian Dollars)

---

For the Six Months Ended March 31, 2013

---

#### Interest rate risk

Interest rate risk consists of two components: to the extent that payments made or received on the Company's monetary assets and liabilities are affected by changes in the prevailing market interest rates, the Company is exposed to interest rate cash flow risk; and to the extent that changes in prevailing market rates differ from the interest rate in the Company's monetary assets and liabilities, the Company is exposed to interest rate price risk.

Current financial assets and financial liabilities are generally not exposed to interest rate risk because of their short-term nature and maturity. The Company is not exposed to interest rate price risk as it does not have any cash and cash equivalents at March 31, 2013 which bear interest.

#### Foreign currency risk

Foreign currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate due to changes in foreign exchange rates. The Company is exposed to foreign currency risk to the extent that monetary assets and liabilities are denominated in foreign currency.

The Company is exposed to foreign currency risk with respect to cash, and accounts payable and accrued liabilities that are denominated in US dollars. The balance to close its major transaction is also denominated in US dollars.

---

	<b>March 31, 2013 USD</b>	<b>September 30, 2012 USD</b>
Accounts payable and accrued liabilities	\$ 96,054	\$ 96,054

---

At March 31, 2013, financial instruments were converted at a rate of \$1.00 Canadian to US\$0.9846.

The Company has not entered into any foreign currency contracts to mitigate foreign currency risk. The Company's sensitivity analysis suggests that a 5% change in the absolute rate of exchange for US dollars would not significantly affect its cash position at this time. If and when the Company closes its major transaction of the Jellico Project, a 5% change in the absolute rate of exchange for US dollars would significantly affect its cash position.

#### Capital risk management

The Company manages its capital to ensure that it will be able to continue as a going concern while maximizing the return to stakeholders through a suitable debt and equity balance appropriate for an entity of the Company's size and status. The Company's overall strategy remains unchanged from last year.

The capital structure of the Company consists of equity attributable to common shareholders, comprised of issued capital, warrants, reserves, and deficit. The availability of new capital will depend on many factors including a positive mineral exploration environment, positive stock market conditions, the Company's track record, and the experience of management. The Company is not subject to any external covenants on its capital.

---

## **THELON CAPITAL LTD.**

### **Management Discussion and Analysis (Expressed in Canadian Dollars)**

---

**For the Six Months Ended March 31, 2013**

---

#### **OTHER RISKS AND UNCERTAINTIES**

The Company is an exploration stage company with respect to its mineral interests. Based on the information available to date, the Company has not yet determined whether its mineral interests contain economically recoverable reserves. The recoverability of the amounts shown for mineral interests is dependent upon the confirmation of economically recoverable reserves, the ability of the Company to obtain necessary financing to successfully complete their development, and upon future profitable production.

In conducting its business, the Company is subject to a number of other risks and uncertainties that could have a material adverse effect on the Company's business prospects or financial condition that could result in a delay or indefinite postponement in the development of the Company's mineral interests.

#### **Risks associated with exploration stage companies**

Exploring for mineral resources involves a variety of operational, financial, and regulatory risks that are typical in the natural resource industry. The Company has not commenced commercial operations and has not proven history of performance, earnings, or success. There is no guarantee that the Company will ever be able to achieve profitable results or successfully execute its business plan. The Company's Common Shares must be considered speculative primarily due to the nature of the Company's business and early stage of development. The Company has no revenue or income from operations. The Company has limited capital resources and has to rely upon the sale of equity and/or debt securities for cash required for exploration and development purposes, for acquisitions, and to fund the administration of the Company. Since the Company does not expect to generate any revenues from operations in the near future, it must continue to rely upon the sales of its equity or debt securities or joint venture agreements to raise capital. There can be no assurance that financing, whether equity or debt, will be available to the Company in the amount required by the Company at any particular time or for any period, and that such financing can be obtained on terms satisfactory to the Company.

#### **Exploration and development**

At this time, the Company's primary mineral property is in the exploration stage and the Company does not have an operating history with respect to its exploration activities. Exploration and development of mineral resources involves a high degree of risk and few properties which are explored are ultimately developed into producing properties. The amounts attributed to the Company's interest in its properties as reflected in its financial statements represent acquisition and exploration expenses and should not be taken to represent realizable value. There is no assurance that the Company's exploration and development activities will result in any discoveries of commercial bodies of ore. The long term profitability of the Company's operations will be in part directly related to the cost and success of its exploration programs which may be affected by a number of factors such as unusual or unexpected geological formations, and other conditions.

#### **Property title**

Although the Company believes it has exercised commercially reasonable due diligence with respect to determining title to properties it owns, controls, or has the right to acquire by option, there is no guarantee that title to such properties will not be challenged or impugned. The Company's mineral interests may be subject to prior unrecorded agreements or transfers or native land claims, and title may be affected by undetected defects. There may be valid challenges to the title of the Company's mineral interests which, if successful, could impair development and operations. This situation may be exacerbated due to the large number of title transfers historically involved with some properties.

---

## **THELON CAPITAL LTD.**

### **Management Discussion and Analysis (Expressed in Canadian Dollars)**

---

**For the Six Months Ended March 31, 2013**

---

#### **Licenses and permits**

The Company will require licenses and permits from various governmental authorities regarding the Company's mineral interests. There can be no assurance that the Company will be able to obtain all necessary licenses and permits that may be required to carry out exploration, development, and mining operations for its mineral interests. Failure to obtain and maintain such licenses and permits may adversely affect the Company's business as the Company would be unable to legally conduct its intended exploration and development work which may result in its losing its interest in the subject property.

#### **Operating hazards and risks**

Fires, power outages, labour disputes, flooding explosions, cave-ins, landslides, and the inability to obtain suitable or adequate machinery, equipment, or labour are some of the risks involved in exploration programs. Unknowns with respect to geological structures and other conditions are involved. Existing and future environmental laws may cause additional expense and delays in the activities of the Company, and may render the Company's properties uneconomic. The Company has no liability insurance and the Company may become subject to liability for pollution, cave-ins, or hazards against which it cannot insure, or against which it may elect not to insure. The payment of such liabilities may have a material, adverse effect of the Company's financial position.

#### **Competition**

The mining industry is intensely competitive and the Company must compete in all aspects of its operations with a substantial number of other corporations which have greater technical and financial resources. The Company may be unable to acquire additional attractive mining properties on terms it considers acceptable.

#### **Profitability of operations**

The Company does not have profitable operations at this time and it should be anticipated that it will operate at a loss until such time as production is achieved from its properties, if production is in fact ever achieved. Investors also cannot expect to receive any dividends on their investment in the foreseeable future.

#### **Foreign currency risk**

At this time, the Company's primary mineral interest is located in the United States. Future changes in exchange rates could materially affect the viability of exploring and development this property.

#### **Market risks**

Even if the Company's exploration programs are successful, factors beyond the control of the Company may affect the marketability of any mineral products discovered. Mineral prices have fluctuated widely in recent years. The marketability and price of minerals which may be produced or acquired by the Company will be affected by numerous factors beyond the control of the Company. These factors include delivery uncertainties related to the proximity of its reserves to processing facilities, and extensive government regulation relating to price, taxes, royalties, allowable production land tenure, the import and export of minerals, and many other aspects of the mining business. Declines in mineral prices may have a negative effect of the Company.

---

**THELON CAPITAL LTD.****Management Discussion and Analysis  
(Expressed in Canadian Dollars)**

---

**For the Six Months Ended March 31, 2013**

---

**Future financings**

If the Company's exploration programs are successful, additional funds will be required for further exploration and development to place a property into commercial production. The Company's available sources of funds are: existing cash; the further sale of equity capital; and the offering by the Company of an interest in its properties to be earned by another party or parties carrying out further exploration or development thereof. There is no assurance such sources will continue to be available on favourable terms or at all. If available, future equity financings may result in dilution to current shareholders.

**Going concern**

The Company's financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The continuing operations of the Company are dependent upon its ability to obtain the necessary financing to meet its on-going commitments and further its mineral exploration programs.
