Notes to the Condensed Interim Consolidated Financial Statements (Unaudited) (Expressed in Canadian Dollars)

For the Six Months Ended January 31, 2020 and 2019

1. DESCRIPTION OF THE BUSINESS AND GOING CONCERN

THC BioMed Intl Ltd. ("THC" or the "Company") is a publicly traded company with its head office at 1340 St. Paul Street, Kelowna, British Columbia, Canada, V1Y 2E1. The Company's shares trade on the Canadian Securities Exchange ("CSE") under the symbol THC, on the Over the Counter Best Market ("OTCQX") under the symbol THCBF, and on the Frankfurt Stock Exchange under the symbol TFHC.

These condensed interim consolidated financial statements include the accounts of THC BioMed Intl Ltd. and its five wholly owned subsidiaries: THC BioMed Ltd., THC BioMedical Ltd., Clone Shipper Ltd., THC2GO Dispensaries Ltd. ("THC2GO"), and THC BioMed Lesotho Ltd. ("THC Lesotho").

The Company's principal business is the production and sale of cannabis through THC BioMed Ltd. which is a small batch Licensed Producer as regulated by the *Cannabis Act* which regulates the production, distribution, and possession of cannabis for both medical and adult recreational access in Canada. THC BioMedical Ltd. was recently incorporated to acquire a separate license from Health Canada. Clone Shipper Ltd. owns all rights to the Clone Shipper product used to transport live plants. THC2GO was initially incorporated for the retail business; however, Health Canada subsequently ruled that Licensed Producers were prevented from operating retail outlets. THC Lesotho was initially incorporated to seek a business opportunity in Lesotho; however, no business was transacted.

These condensed interim consolidated financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The continuing operations of the Company are dependent upon its ability to raise adequate financing to commence profitable operations in the future. To date the Company is considered to be in the development stage. These factors create material uncertainties that may cast significant doubt about the Company being able to continue as a going concern. These condensed interim consolidated financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue in existence. Further discussion of liquidity risk has been disclosed in note 20b.

2. BASIS OF PREPARATION

a) Statement of compliance

These condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards 34, "Interim Financial Reporting ("IAS34") as issued by the International Accounting Standards Board ("IASB") using accounting policies consistent with International Financial Reporting Standards ("IFRS"). Certain information and note disclosures normally included in annual financial statements prepared in accordance with IFRS have been omitted or condensed. The preparation of the condensed interim consolidated financial statements using accounting policies consistent with IFRS requires management to make certain critical accounting estimates which requires management to exercise judgment in applying the Company's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the unaudited condensed interim financial statements have been set out in Note 2 of the annual audited consolidated financial statements for the year ended July 31, 2019.

Notes to the Condensed Interim Consolidated Financial Statements (Unaudited) (Expressed in Canadian Dollars)

For the Six Months Ended January 31, 2020 and 2019

2. BASIS OF PREPARATION (continued)

a) Statement of compliance (continued)

These unaudited condensed interim consolidated financial statements were prepared using the same accounting policies and methods as those used in the annual audited consolidated financial statements for the year ended July 31, 2019, and should be read in conjunction with those statements.

These condensed interim consolidated financial statements were approved by the Board of Directors and authorized for issuance by the Board of Directors on April 7, 2020.

b) Basis of measurement

These condensed interim consolidated financial statements have been prepared on a historical cost basis except for financial instruments that are measured at fair value and biological assets that are measured at fair value less costs to sell, as explained in the accounting policies. In addition, these condensed interim consolidated financial statements have been prepared using the accrual basis of accounting except for cash flow information.

c) Presentation and functional currency

The presentation and functional currency of the Company and its subsidiaries is the Canadian Dollar.

d) Foreign currency transactions

Transactions in currencies other than the functional currency are recorded at the rates of exchange prevailing on the dates of the transactions. At each financial position date, monetary assets and liabilities that are denominated in foreign currencies are translated at the rates prevailing at the date of the statement of financial position. Foreign exchange differences are recognized in profit (loss). Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

e) Basis of consolidation

These condensed interim consolidated financial statements include the accounts of the Company and its four wholly-owned subsidiaries on a consolidated basis after elimination of intercompany transactions and balances. Subsidiaries are entities the Company controls where it is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the relevant activities of the entity.

For the Six Months Ended January 31, 2020 and 2019

3. ADOPTION OF NEW STANDARD - IFRS 16, LEASES

In January 2016, the IASB issued IFRS 16 *Leases* ("IFRS 16") and brings most leases onto the statement of financial position for lessees under a single model, eliminating the distinction between operating and finance leases. Under IFRS 16, a lessee recognizes a right-of-use asset and a lease liability. The right-of-use asset is treated similarly to other non-financial assets and depreciated accordingly, and the liability accrues interest. The lease liability is initially measured at the present value of the lease payments payable over the lease term, discounted at the rate implicit in the lease or an entity's incremental borrowing rate if the implicit rate cannot be readily determined. Lessees are permitted to make an election for leases with a term of 12 months or less, or where the underlying asset is of low value, and not recognize lease assets and lease liabilities. The expense associated with these leases can be recognized on a straight-line basis over the lease term or on another systematic basis.

IFRS 16 is effective for annual reporting periods beginning on or after January 1, 2019 and a lessee shall either apply IFRS 16 with full retrospective effect or alternatively not restate comparative information but recognize the cumulative effect of initially applying IFRS 16 as an adjustment to opening equity at the date of initial application.

On August 1, 2019, the Company adopted IFRS 16 using the modified retrospective approach; therefore, the comparative information has not been restated and continues to be reported under IAS 17, Leases. Furthermore, given the short term nature of the leases during the year ended July 31, 2019, under IFRS 16, lessees may elect not to recognize assets and liabilities with a lease term of twelve months or less; accordingly, there is no adjustment to opening equity at the date of initial application.

On transition to IFRS 16, at August 1, 2019, the Company recognized \$373,779 of right-of-use assets and \$346,727 of lease liabilities with a nil impact on the deficit. The transition to IFRS 16 did not have a material impact on the Company's statement of comprehensive income (loss) or liquidity.

When measuring the lease liabilities, the Company used the implicit interest rate stated in the leases. The weighted-average rate applied was 7.4%.

The right-of-use assets are recognized in property and equipment (see note 8) and lease liabilities are recognized in other current liabilities and other long-term liabilities (see note 6).

4. AMOUNTS RECEIVABLE

| | January 31 2020 | July 31 2019 |
|-------------------------|---------------------|------------------|
| Other Trade Receivables | \$ 3,000 795,604 | 3,000 362,148 |
| | \$ 798,604 | \$ 365,148 |

Notes to the Condensed Interim Consolidated Financial Statements (Unaudited) (Expressed in Canadian Dollars)

For the Six Months Ended January 31, 2020 and 2019

5. BIOLOGICAL ASSETS

The Company's biological assets consist of cannabis plants:

| | January 31 | July 31 |
|---|--------------|--------------|
| | 2020 | 2019 |
| Carrying amount, beginning of period | \$ 2,454,455 | \$ 855,954 |
| Capitalized costs | 1,507,685 | 1,844,832 |
| Sales of biological assets | (10,619) | (223,942) |
| Transferred to inventory upon harvest | (2,473,982) | (1,537,655) |
| Net unrealized gain on changes in fair value of biological assets | 1,869,087 | 1,515,266 |
| | | |
| Carrying amount, end of period | \$ 3,346,626 | \$ 2,454,455 |

Biological assets are presented at their fair value less costs to sell up to the point of harvest. Because there is no active commodity market for what is included in biological assets, the valuation of these biological assets is determined using valuation techniques where the inputs are based upon unobservable market data. The biological assets are classified as level 3 under the fair value hierarchy.

The valuation of biological assets is determined using a market approach where fair value at the point of harvest is estimated based on expected selling pries less the costs to sell at harvest. For biological assets that remain in process, the fair value at point of harvest is adjusted based on the stage of growth. Stage of growth is determined by reference to the remaining estimated time until the biological asset is transferred to the next stage of processing or expected destruction.

A sensitivity analysis of the impact of changes to the above significant unobservable inputs used to calculate the fair value of biological assets at January 31, 2020 is as follows:

| | 20% Decrease | 10% Decrease | FV | 10% Increase | 20% Increase |
|---------------------------------|-----------------|-----------------|-----------------|-----------------|-----------------|

14. SHARE-BASED COMPENSATION

The Company is authorized to grant options to directors, officers, employees, and consultants to acquire common shares under the 2015 Stock Option Incentive Plan (the "Plan"). The essential elements of the Plan provide that the aggregate number of shares of the Company's common shares issuable pursuant to options granted under the Plan may not exceed 10% of the issued common shares of the Company from time to time. Options granted under the Plan may have a maximum term of ten (10) years. The exercise price of options granted under the Plan will not be less than the fair market value price of the shares on the date of grant of the options (defined as the last closing market price of the Company's shares on the last day shares are traded prior to the grant date). Stock options granted under the Plan vest immediately subject to vesting terms which may be imposed at the discretion of the Directors. Stock options granted under the Plan are to be settled with the issuance of equity instruments.

The following summarizes the stock options outstanding:

19. RELATED PARTY TRANSACTIONS (continued)

On January 13, 2020, the Company issued 5,333,333 Units of a non-brokerage private placement to John Miller, the President and CEO, in exchange for debt owing by the Company in the amount of \$800,000. Each Unit consists of one common share and one common share purchase warrant. Each Warrant entitles the holder to purchase one Common Share of the Company for a period of 24 months from closing at a price of \$0.18 per share for the first three months, at \$0.25 during the following three months, at \$0.50 for the three months following that, and at \$0.80 during the final fifteen months. Warrants were valued at \$Nil using the residual value method. No finder's fees were paid.

Amounts due to or from related parties are unsecured, do not bear interest, and are classified as a current asset or liability due to their nature and expected time of repayment.

20. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

a) Fair value of financial assets and liabilities that are measured at fair value on a recurring basis

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether the price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.

Under IFRS 13, Fair Value Measurement, establishes a fair value hierarchy that prioritizes the input to valuation techniques used to measure fair value as follows:

- Level 1 quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3 inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The fair value hierarchy requires the use of observable market inputs whenever such inputs exists.

The biological assets are carried at fair value, calculated in accordance with Level 3. The significant unobservable inputs used to fair value biological assets include estimating the stage of growth of the marijuana up to the point of harvest, harvesting costs, selling costs, sales prices, wastage, and expected yields from the marijuana plants.

The carry values of cash, amounts receivable, accounts payable and accrued liabilities, commercial operating loan, line of credit, mortgages payable, convertible debentures payable, and advances from related parties all approximate their fair values due the short term nature of the financial instrument, or the market rates of interest attached thereto.

20. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued)

b) Market risk

Market risk is the risk of loss that the fair value of future cash flows of a financial instrument held by the Company will fluctuate because of changes in market prices. The Company faces market risk from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices.

(i) Interest rate risk

Interest rate risk consists of two components: to the extent that payments made or received on the Company's monetary assets and liabilities are affected by changes in the prevailing market interest rates, the Company is exposed to interest rate cash flow risk; and to the extent that changes in prevailing market rates differ from the interest rate in the Company's monetary assets and liabilities, the Company is exposed to fair value interest rate risk.

Current financial assets and financial liabilities are generally not exposed to significant cash flow interest rate risk because of their short-term nature, fixed interest rates, and maturity. The Company is exposed to cash flow interest rate risk on line of credit if a draw down amount is not repaid within three months. The Company is not exposed to cash flow interest rate risk on the advances from related parties which are without interest. The Company is not exposed to cash flow interest rate risk on the mortgages payable due to the fixed interest rates.

The Company may be exposed to fair value interest rate risk if the prevailing market rates increase or decrease compared to the interest rates associated with its financial assets and liabilities. Management does not believe this risk is significant.

(ii) Foreign currency risk

Foreign currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate due to changes in foreign exchange rates. The Company is exposed to foreign currency risk to the extent that monetary assets and liabilities are denominated in a foreign currency.

At January 31, 2020, the Company is exposed to foreign currency risk with respect to its US denominated bank accounts and accounts payable, and a Euro denominated account payable.

At January 31, 2020, financial instruments were converted at a rate of \$1 US dollar to \$1.3233 Canadian and \$1.4653 Euro to \$1 Canadian.

The Company has not entered into any foreign currency contracts to mitigate foreign currency risk.

20. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (continued)

b) Market risk (continued)

(iii) Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. Financial instruments that potentially subject the Company to credit risk consist primarily of cash, and amounts receivable. The Company limits its exposure to credit risk by placing its cash with a high credit quality financial institution in Canada. For amounts receivable, the Company limits its exposure to credit risk by dealing with what management believes to be financially sound counter parties. At January 31, 2020, all amounts receivable are current.

The Company's financial assets are not subject to material credit risk as it does not anticipate significant loss for non-performance.

(iv) Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in raising funds to meet commitments associated with financial instruments, or the proposed transaction. The Company manages liquidity risk by maintaining adequate cash balances when possible.

The Company's expected source of cash flow in the upcoming year will be through sales and debt or equity financing. Cash on hand at January 31, 2020 and expected cash flows for the next 12 months are not sufficient to fund the Company's ongoing operational and expansion needs. The Company will need funding through equity or debt financing, entering into joint venture agreements, or a combination thereof.

On February 1, 2019, the Company secured a \$500,000 commercial operating loan which has been increased to \$900,000 for operating funds using the property at St. Paul Street in Kelowna, British Columbia as collateral. The interest rate is Prime plus 1%. The loan is payable upon demand and subject to an annual review.

The Company also entered into a line of credit of up to \$500,000 with its President. The line of credit will not bear interest for the first three calendar months following its withdrawal. Interest will then incur after three months at prime plus 1.0% with the interest payable monthly on the last day of each month until the line of credit is repaid in full.

(v) Capital risk management

The Company manages its capital to ensure that it will be able to continue as a going concern while maximizing the return to stakeholders through a suitable debt and equity balance appropriate for an entity of the Company's size and status. The Company's overall strategy remains unchanged from last year.

b) Market risk (continued)

(v) Capital risk management (continued)

The capital structure of the Company consists of equity attributable to common shareholders, comprised of issued capital, warrants, reserves, and deficit. The availability of new capital will depend on many factors including positive stock market conditions, the Company's track record, and the experience of management. The Company is not subject to any external covenants on its capital.

(vi) Price risk

Price risk is the risk that the fair value of investments will decline below the cost of the underlying investments. The Company is not exposed to price risk as it has no investments held for sale.

21. SUBSEQUENT EVENTS

On February 6, 2020, the Company announced its intention to commence a normal course issuer bid to purchase up to an aggregate of 7,977,152 common shares representing 5% of the issued and outstanding common shares as at that date. The Company has purchased a total of 1,080,000 common shares to date pursuant to the normal course issuer bid for \$148,562 or an average price of \$0.14 per share.

On February 14, 2020 the Company's *Cannabis Act* license was renewed by Health Canada for a further three years or until February 14, 2023.

On March 1, 2020, the Company began a three-year lease for a property adjacent to its production facility in Kelowna, British Columbia. The Company intends to use the leased property for administration, storage, and other activities not related to cannabis production. The Company expects to free up space at the production facility by constructing four new grow rooms with the space once it is renovated and approval has been received from Health Canada.
