NEWS RELEASE

VALDOR EXPANDS PRODUCT-LINE

Hayward, California – September 6, 2012: Valdor Technology International Inc. (“Valdor”) (TSX-V: VTI) is pleased to report that it has expanded its business scope to include a full spectrum of innovative fiber optic products and solutions in addition to the Impact Mount™ product lines. The cost to end-users, of components that do not meet specifications in performance, quality and harsh environmental conditions, is very significant. The fiber optics industry requires solutions designed to meet the specific demands of unique environments and networks. With this objective, Valdor is committed to supporting customers and their customers with the highest quality solutions available. Relative to this new business strategy, Valdor has completed the design and procurement of a new splitter model directed at the growing telecom fiber-to-the-premises (FTTP) market.

A comprehensive global report on the fiber optic components market, projects that it will reach US\$42 billion by the year 2017. Growth will be driven by the need for fiber-based broadband networks and the increasing demand for bandwidth. This will be supported by stronger FTTx related deployment and robust growth in mobile internet.

Mr. Robert Nickel, President/CEO, states: “We are leveraging the 25 years of industry experience of our team, and the professional, reliable global relationships our team has developed; to expand our capability for providing innovative value added products and solutions.” Mr. Ron Boyce, VP Sales and Marketing, states: “The expanding demand for products and services, especially in the telecom sector, is giving Valdor the business opportunity to meet this growth with quality solutions. Our focused approach of identifying specific challenges, and then designing robust and cost effective solutions, is receiving an enthusiastic response.”

About the Fiber Optics Industry: Fiber optics is the future of communications and fiber optic connectors are one of the major profit centres within this market. The signal transmission business is in the early stages of a fiber optics bull market. All signal transmission, in their many and various forms, are being converted from electrical to fiber optics. A comprehensive global report on the fiber optic components market projects that it will reach US\$42 billion by the year 2017.

About Valdor Technology International Inc. (www.valdortech.com): Valdor is a high technology fiber optic components company specializing in the design and manufacture of fiber optic connectors, laser pigtails, and other optical and optoelectronic components some that use the Valdor proprietary and patented Impact Mount™ and HeptoPort technologies. Valdor’s Impact Mount™ technology is all-mechanical with no epoxy or matching gel. Valdor’s patented IMT field installable termination kits and connectors are ideal for harsh environment applications and quick repair in the field.
