NEWS RELEASE

VALDOR EXHIBITS AT PHOTONICS WEST TRADE SHOW

Hayward, California – January 18, 2011: Valdor Technology International Inc. ("Valdor") (TSX-V: VTI) is pleased to report that Valdor will be an exhibitor at the 2011 SPIE Photonics West Trade Show ("Photonics West") (spie.org/photonics-west-exhibition.xml) being held in the San Francisco Moscone Center from January 25 to 27 inclusive. Valdor has presentation booth #2621 located in the South Hall. Trade shows are an effective platform for Valdor to showcase the Valdor technology and products to international exhibitors, launch new products and increase customer awareness.

This is one of the world's premier optical shows. More than 1,100 entrants with several high profile high technology companies will be represented and 18,000 attendees are expected. The latest innovations are showcased across a wide range of technologies. Profile for exhibit includes: lasers and other light sources; fiber optic components, equipment and systems; optical components; illumination engineering; optical detectors; high speed imaging and sensing; and optical materials and substrates.

About the Fiber Optics Industry: Fiber optics is the future of communications and fiber optic connectors are one of the major profit centres within this market. The signal transmission business is in the early stages of a fiber optics bull market. All signal transmission, in their many and various forms, are being converted from electrical, using copper wire and coaxial cable, to fiber optics. In the USA the Obama administration has recently pledged an initial US\$7.2-billion to a plan that calls for 100 million Americans to have access to super high speed internet. This high speed internet will require significant fiber optic infrastructure. The annual global market for fiber optic connectors is projected to grow to US\$3.45 billion in 2011 (ElectroniCast Consultants: www.electroniccastconsultants.com).

About Valdor Technology International Inc. (www.valdortech.com): Valdor is a high technology fiber optic components company specializing in the design and manufacture of new generation fiber optic connectors, enclosures, laser pigtails and other optical and optoelectronic components using its proprietary and patented Impact Mount™ and HeptoPort™ technologies. The Impact Mount™ technology incorporated in the Valdor line of connectors is user friendly and environmentally friendly. This technology is all-mechanical with no epoxy or index matching gel required. The Impact Mount™ technology field installable termination kits and connectors are ideal for harsh environment applications and quick repair in the field. Valdor holds several patents on its connector technology in strategic global regions.

Please visit www.valdor.com for complete information on Valdor's product line and other standard passive components including multiplexers, couplers, attenuators, patch cords and cable assemblies.
