**FORM 51-102F1**  
**MANAGEMENT'S DISCUSSION AND ANALYSIS ("MD&A")**  
**For the Year Ended February 29, 2024**

The following management's discussion and analysis, prepared as of June 26, 2024, should be read together with the audited consolidated financial statements for the years ended February 29, 2024 and February 28, 2023 and related notes attached thereto (the "financial statements"), which are prepared in accordance with IFRS Accounting Standards ("IFRS"). All amounts are stated in Canadian dollars unless otherwise indicated.

Statements in this report that are not historical facts are forward-looking statements involving known and unknown risks and uncertainties, which could cause actual results to vary considerably from these statements. Readers are cautioned not to put undue reliance on forward-looking statements (see "Note Regarding Forward-Looking Statements").

- ii) acquired 17 claims for \$7,000 cash on closing plus 311,111 common shares of the Company; and
- iii) acquired 280 claims for \$100,000 cash on closing plus 1,000,000 common shares of the Company.

Work program for this property is currently being determined.

**Athabasca Property, Saskatchewan**

On February 23, 2024, the Company entered into an option agreement to acquire a 100% interest in the Athabasca Property, Saskatchewan. The Company will earn interest in the Property as follows:

- i) An initial 40% interest for \$50,000 (unpaid) and issuance of 3,000,000 shares (issued subsequently);
- ii) An additional 10% interest for a total of 50% on completion of exploration expenditures during the first year of \$100,000;
- iii) An additional 25% interest for a total of 75% on completion of \$150,000 in exploration expenditures during the second anniversary of \$150,000 and issuance of 2,000,000 shares; and
- iv) An additional 25% interest for a total of 100% completion of \$300,000 in exploration expenditures during the third anniversary and issuance of 2,000,000 shares.

The vendor retains a 2% NSR. The Company has the right to purchase on half (1%) of the 2% NSR at any time for \$1,000,000.

**Tahlo Lake Property, BC Canada**

On November 15, 2022, the Company staked the Tahlo Lake property in British Columbia's prolific Babine Copper-Gold Porphyry District. The Tahlo Lake Property currently consists of 735 hectares 11 km NW of the NAK Property and 19 km NW of the Morrison Deposit. As at February 29, 2024, the Company spent an aggregate of \$79,452 in exploration expenditures. Subsequent to the year ended February 29, 2024, the Company sold the Tahlo Lake Property for \$90,000.

**LIQUIDITY AND CAPITAL RESOURCES**

**Continuance of Operations and Going Concern**

The consolidated financial statements are prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. As at February 29, 2024, the Company has a deficit of \$38,613,778 (February 28, 2023 - \$36,611,278). The Company is in the process of exploring and developing its mineral properties and has not yet determined whether those properties contain ore reserves that are economically recoverable. The recoverability of the amounts shown for exploration and evaluation assets is dependent upon the discovery of economically recoverable reserves, the ability of the Company to obtain necessary financing to fund property commitments and to complete the exploration and development of the properties and upon achieving future profitable production or proceeds from the disposition thereof. There is a material uncertainty related to these events and conditions may cast significant doubt about the Company's ability to continue as a going concern.

The Company has financed its operations primarily through the issuance of common shares, proceeds from loans and advances from related parties. The Company continues to seek capital through various means including the issuance of equity and/or debt. While the Company has been successful in securing financing in the past, there is no assurance that it will be able to do so in the future or on terms that are favorable to the Company. Accordingly, the consolidated financial statements do not give effect to adjustments, if any, that would be necessary should the Company be unable to continue as a going concern. If the going concern assumption was not used then the adjustments required to report the Company's assets and liabilities on a liquidation basis could be material to the consolidated financial statements.

- x) issued 700,000 shares upon the exercise of stock options, at prices of \$0.15 per share, for total proceeds \$105,000.

**Capital Resources**

As our exploration-stage properties are not revenue generating, the Company's sole source of long-term funding has traditionally been the issuance of common shares for cash, primarily through private placements.

**VICTORY BATTERY METALS CORP. (FORMERLY VICTORY RESOURCES CORPORATION)  
MANAGEMENT DISCUSSION AND ANALYSIS  
FOR THE YEAR ENDED FEBRUARY 29, 2024 AND FEBRUARY 28, 2023**

The Company has traditionally supplemented equity financing from time to time by obtaining loans from related parties. These are used to provide interim, short-term financing to meet day-to-day cash flow needs, on occasion, and are not intended to be a long-term source of capital.

**Off-Balance Sheet Arrangements**

The Company has no off-balance sheet arrangements.

**Proposed Transactions**

There are no proposed transactions that have not been disclosed herein.

**Results of Operations**

*For the year ended February 29, 2024*

Below are the significant changes in expenses when comparing the year ended February 29, 2024 to the year ended February 28, 2023:

- Advertising and promotion expenses of \$475,509 (2023 – \$277,282) increased as a result of the Company’s interest in increasing market awareness of its mineral properties.
- Consulting increased to \$609,832 (2023 – \$307,815) as a result of an increase in the number of consultants.
- Impairment of exploration and evaluation assets of \$283,404 (2023 – \$Nil) increased due to the write-off of the Georgia and Black Diablo properties in the current period.
- Office and administration of \$24,521 (2023 – \$94,738) decreased due to the Company focusing on cost savings, which included sharing office resources with other companies.
- Share-based compensation of \$410,100 (2023 – \$Nil) due to options granted during the current period.
- Transfer agent and filing fees of \$49,543 (2023 – \$40,434) increased due to increased filings related to share capital activities during the current period.
- Unrealized loss on long-term investments decreased to \$22,904 (2023 – \$193,541) due to a decrease in market value.
- Other variations in expenses in the period presented reflect the variation inherent in normal course operations. We expect other items to remain at relatively constant levels, as these primarily reflect recurring operational expenses that do not vary significantly within a certain range of corporate and exploration activity.

result of prospective business developments initiatives. As well the Company incurred an unrealized loss on long-term investments of \$223,611 relating to the change in the fair value and wrote off the Loner property.

**FINANCIAL AND OTHER INSTRUMENTS**

The Company’s financial instruments consist of cash, reclamation deposits, long-term investments, accounts payable and accrued liabilities and due to related parties. Cash and long-term investments are carried at fair value. The fair values of accounts payable and accrued liabilities and due to related parties approximate their carrying amounts due to their current nature. Reclamation deposits are non-interest-bearing, have no maturity date and carrying amounts approximate fair value.

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy based on the degree to which the inputs used to determine the fair value are observable. The three levels of the fair value hierarchy are:

- Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly; and
- Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The classification and measurement bases of the Company’s financial instruments are as follows:

<b>Financial Instrument</b>	<b>Classification</b>
Cash	FVTPL
Long-term investments	FVTPL
Reclamation deposits	Amortized cost
Accounts payable and accrued liabilities	Amortized cost
Due to related parties	Amortized cost

*Credit risk*

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. Credit risks associated with cash are minimal as the Company deposits the majority of its cash with a large Canadian financial institution. The Company’s credit risks associated with its loan receivable and reclamation deposits are monitored by management. The Company’s exposure to potential loss is equal to the carrying value of cash and reclamation deposits.

*Liquidity risk*

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. The Company manages liquidity risk through the management of its capital structure, as outlined below. As at February 29, 2024, the Company had a cash balance of \$8,853 (February 28, 2023 - \$1,156,773) to settle current liabilities of \$595,435 (February 28, 2023 - \$258,721). All of the Company’s trade accounts payable and amounts due to related parties have contractual maturities of 30 days or are due on demand and accounts payable are subject to normal trade terms. The Company will require financing from lenders, shareholders and other investors, or liquidation of long-term investments to generate sufficient capital to meet its short-term business requirements.

**VICTORY BATTERY METALS CORP. (FORMERLY VICTORY RESOURCES CORPORATION)  
MANAGEMENT DISCUSSION AND ANALYSIS  
FOR THE YEAR ENDED FEBRUARY 29, 2024 AND FEBRUARY 28, 2023**

*Market risk*

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk.

a) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. As of February 29, 2024, the Company did not hold any material interest bearing investments or liabilities and has no significant interest rate risk.

b) Currency risk

Currency risk is the risk that the fair value of future cash flows will fluctuate as a result of changes in foreign exchange rates. The Company currently has no significant foreign currency exposure.

c) Other price risk

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or foreign currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer or by factors affecting all similar financial instruments traded in the market.

The recoverability of the Company's exploration and evaluation assets is indirectly related to the market price of commodities. The Company's ability to continue with its exploration of the properties is also indirectly subject to commodity prices. The Company is not currently directly exposed to fluctuations in commodity prices as the Company is currently in the exploration phase and has no production.

The recoverability of the Company's investments in Jolt Health and Love Hemp are directly tied to the market price of those companies' common shares. A 5% change in the value of the Jolt and Love Hemp common shares would impact profit or loss by approximately \$75.

*Capital management*

The Company's objectives when managing capital are to safeguard its ability to continue as a going concern, to pursue the development of its investments and to maintain a flexible capital structure which optimizes the cost of capital within a framework of acceptable risk. In the management of capital, the Company includes the components of shareholders' equity.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust its capital structure, the Company may issue new shares, issue new debt, acquire or dispose of assets.

The Company can expect to encounter competition from other entities having similar investment objectives, including institutional investors and strategic investors. These groups may compete for the same investments as the Company, will have a longer operating history and may be better capitalized, have more personnel and have different return targets. As a result, the Company may not be able to compete successfully for investments. In addition, competition for investments may lead to the price of such investments increasing, which may further limit the Company's ability to generate desired returns. There can be no assurance that there will be a sufficient number of suitable investment opportunities available to invest in or that such investments can be made within a reasonable period of time. There can also be no assurance that the Company will be able to identify suitable investment opportunities, acquire them at a reasonable cost or achieve an appropriate rate of return. Identifying attractive opportunities is difficult, highly competitive and involves a high degree of uncertainty. Potential returns from investments will be diminished to the extent that the Company is unable to find and make a sufficient number of investments.

In order to facilitate the management of its capital requirements, the Company prepares annual expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions.

**DISCLOSURE CONTROLS AND PROCEDURES AND INTERNAL CONTROLS**

In connection with National Instrument 52-109 (Certificate of Disclosure in Issuer’s Annual and Interim Filings) (“NI 52-109”), the Chief Executive Officer and Chief Financial Officer of the Company have filed a Venture Issuer Basic Certificate with respect to the financial information contained in the annual audited consolidated financial statements and this accompanying annual MD&A (together the “Annual Filings”).

In contrast to the full certificate under NI 52-109, the Venture Issuer Basic Certificate does not include representations relating to the establishment and maintenance of disclosure controls and procedures and internal control over financial reporting, as defined in NI 52-109. For further information the reader should refer to the Venture Issuer Basic Certificates filed by the Company with the Annual Filings on SEDAR+ at [www.sedarplus.ca](http://www.sedarplus.ca).

MANAGEMENT DISCUSSION AND ANALYSIS  
FOR THE YEAR ENDED FEBRUARY 29, 2024 AND FEBRUARY 28, 2023**

**NOTE REGARDING FORWARD-LOOKING STATEMENTS**

Statements herein that are not historical facts are forward-looking statements that are subject to risks and uncertainties. Words such as “expects”, “intends”, “may”, “could”, “should”, “anticipates”, “likely”, “believes” and words of similar import also identify forward-looking statements.

Forward-looking statements are based on current facts and analyses and other information that are based on forecasts of future results, estimates of amounts not yet determined and assumptions of management, including, but not limited to, assumptions regarding the Company’s ability to raise additional debt and/or equity financing to fund operations and working capital requirements and assumptions regarding the Company’s mineral properties.

Actual results may differ materially from those currently anticipated due to a number of factors including, but not limited to, general economic conditions, the geology of mineral properties, exploration results, commodity market conditions, the Company’s ability to generate sufficient cash flows from operations and financing to support general operating activities and capital expansion plans, and laws and regulations and changes thereto that may affect operations, and other factors beyond the reasonable control of the Company.

*Additional information on factors that may affect the business and financial results of the Company can be found in filings of the Company on [www.sedarplus.ca](http://www.sedarplus.ca)*
