**NOTICE TO READER**

The unaudited interim financial statements and related management discussion and analysis were prepared by management and approved by the board of directors. They have not been reviewed by Glenbriar's external auditors.

MANAGEMENT DISCUSSION AND ANALYSIS

This information is given as of May 12, 2014 under NI Form 51-102F1. As of the date of this report, there are 48,421,510 Glenbriar voting common shares issued and outstanding. There is no other class or series of shares issued, and no warrants or options or other rights to acquire additional common shares outstanding, except contributions to the employee share purchase plan (see note 8(b) of Notes to Financial Statements).

Description of Business

Glenbriar Technologies Inc. (CSE: GTI) is a leading provider of business technology solutions for successful enterprises in manufacturing, distribution, retail, energy, health, education, dealership, professional services and real estate. From its offices in Calgary, Vancouver and Waterloo, Glenbriar's staff of IT professionals and software developers design, manage and support solutions that include IT Services, Cloud Services, Portals & Collaboration, Unified Communications and Software Services.

Glenbriar's 2014 Annual Meeting was held in Calgary on April 3, 2014. All resolutions were passed as recommended by management.

Brian Tijman stepped down as CFO during the quarter ended December 31, 2013. As one of the three original founders of Glenbriar, Mr. Tijman is the largest shareholder and will remain a director. Mr. Tijman has held the role of CFO continuously since 1995, and is planning to pursue his other private investments.

Sherri Saunders of Glenbriar's Waterloo office has taken on the role of Acting CFO until further notice. Ms. Saunders has extensive experience in accounting and financial management.

Glenbriar sold its Peartree Dealership product effective December 31, 2013 for total proceeds of \$107,000 to Blue Skies Business Solutions Inc. of Waterloo. Blue Skies is wholly owned by Roy Clarke of Waterloo, who was the principal architect of the software product. This product represented less than 4% of Glenbriar's total revenue, and was determined to no longer represent a strategic asset by the board of directors. The terms of the agreement provide for a seamless transition for users, and allow for more product development going forward than if Glenbriar had retained the product. Glenbriar retained its information technology consulting relationships with Peartree Dealership clients who used those services.

Glenbriar is still seeking additional funds for strategic acquisitions and reduction of long term obligations.

Products

Glenbriar provides full service technology solutions to commercial and nonprofit enterprises: IT Services, Cloud Services, Portals and Collaboration, Unified Communications and Software Services. Glenbriar has created, acquired, or licensed the appropriate human and intellectual property (IP) resources necessary to deliver the optimal integrated IT solution suite for its clients.

Portals & Collaboration

Glenbriar is currently implementing comprehensive SharePoint solutions for clients in energy regulation, energy and health care.

The Independent Electricity System Operator (IESO) oversees the safe, sustainable and reliable operation of Ontario's power system. IESO also manages Ontario's wholesale electricity market to balance the supply and demand for electricity and set the Hourly Ontario Energy Price. Glenbriar delivered a content management system (CMS) to manage IESO's website content and files using Microsoft's public cloud offering SharePoint Online Public Site Template as a web platform. IESO's CMS solution manages the online public web presence of IESO's corporate website, provides an easy to use online interface for editing page content and page layouts, and handles comprehensive audit controls and workflows for document postings through role based access controls.

Glenbriar worked through the challenges of moving IESO from an in house custom built CMS to a public cloud SharePoint Online custom solution, and overcame the constrained public site environment by using a good communications plan, being fully transparent on the vendor limitations of the platform, and working with IESO stakeholders to address those constraints and limitations. Glenbriar facilitated deep dives on technical requirements with all key stakeholders, allowing Glenbriar to leverage this exciting new platform to build custom solutions that successfully met their overall project deliverables and scope. The site accesses over 35,000 pages of data in real time, and is a leading edge solution which tested the limits of a cloud based SharePoint portal.

The site can be viewed at www.ieso.ca.

Microsoft's SharePoint is one of the world's leading web-based business collaboration platforms. SharePoint is changing the way that businesses operate, eliminating the reduced productivity and higher costs that result from organizations not having the technological capacity or staffing resources to efficiently and cost-effectively streamline their business processes.

This interactive, customizable and accessible information and networking source works to increase connectivity and make collaboration easier. When organizational teams, regardless of individual roles or location, can readily share calendars, templates, documents, databases, contacts, and sales and inventory reports, tactical successes are guaranteed without any loss of the big picture view.

Glenbriar's Portals and Collaboration solutions deliver high levels of functionality to organizations through ease of access, empowered site owners, extensive alerts on any changes that occur, and easy location of documents through the use of custom columns, metadata and views that can be configured to any device, including smart phones, tablets and PCs. This improves organizational efficiency, cuts training and maintenance costs, and facilitates group working, information sharing and electronic document organization.

Security

Cloud deployments, mobility functionality, managed services and print services bring with them the need for increased emphasis on security. Glenbriar is actively seeking upgraded technologies to meet these new requirements.

Unified Communications

Glenbriar completed the installation of an IP communications installation for a securities firm in May 2013. This reflects an increase in the number of enterprises that are seeking to replace their end of life and outdated Nortel equipment with what Gartner rates as the leading unified communications solution, ShoreTel. There is growing interest in Glenbriar's enhanced WiFi solutions, which extend the functionality, security and strength of signal in difficult to reach areas.

Managed Services

Glenbriar commenced a number of IT audits for new and potential clients in the third quarter. New projects are in the design phase for rolling out over the next 2 quarters. Cloud deployments, mobility functionality, managed services and print services will continue to grow in enterprise environments, and bring with them the need for increased emphasis on security. Glenbriar is actively seeking upgraded technologies to meet these new requirements.

Software Services

Glenbriar's MMS is currently being updated to incorporate industry mandated EDI changes, and the Plant Products module has been extended to incorporate additional functionality resulting from a client's corporate acquisition. A number of MMS clients are implementing server upgrades to provide enhanced performance and functionality.

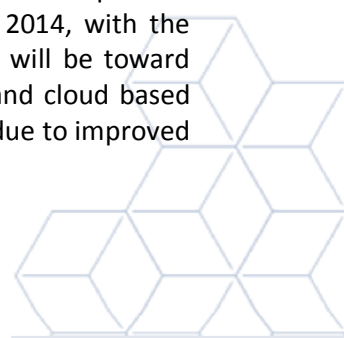

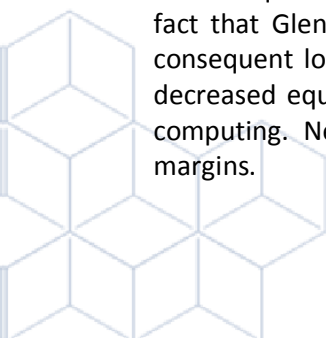

Glenbriar continues to develop its multivalue application database consulting and production line control products for manufacturers.

Financial Review

Selected Financial Information

Selected Quarterly Financial Information (\$)	Quarter ended							
	2014	2013				2012		
	Mar 31	Dec 31	Sep 30	Jun 30	Mar 31	Dec 31	Sep 30	Jun 30
Revenue	1,756,829	1,343,731	1,395,535	1,472,250	1,644,830	1,493,538	1,538,236	1,779,384
Income from continuing operations	125,160	238,493	(150,688)	(22,409)	11,105	59,984	(124,703)	84,828
-per share (basic and diluted)	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00
Net income	117,082	232,082	(173,196)	(29,553)	3,243	54,456	(146,096)	76,163
-per share (basic and diluted)	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00

Revenue increased 7% for the quarter ended March 31, 2014 from the prior year period, made up of a 1% increase in services and a 10% increase in equipment and software sales. These changes mark a shift from the last few quarters, which showed decreases in equipment and software sales. This increase comes despite the fact that Glenbriar sold its Dealership software product at the end of the first quarter of 2014, with the consequent loss of revenue from that product. Glenbriar still expects the long term trend will be toward decreased equipment and software sales as the market shifts from on-premises to hosted and cloud based computing. Net income increased 3,510% to \$117,082 from \$3,243 for the prior year period, due to improved margins.

Glenbriar has not paid dividends and has no current intention of doing so.

Liquidity and Capital Resources

As of March 31, 2014, Glenbriar had working capital of \$198,684, up substantially from the deficiency of \$(133,082) at September 30, 2013. Marketable securities were disposed of during the first quarter of fiscal 2014, resulting in proceeds of \$35,424. See note 6 of Notes to Financial Statements. Glenbriar also sold its interest in the Peartree Dealership product for net proceeds of \$107,000 in the first quarter of 2014. As this asset had a carrying cost of \$nil, the entire proceeds are shown as a gain on sale. See note 5 of Notes to Financial Statements. Inventory changes reflect normal business fluctuations. Inventory is considered relatively liquid. Deferred revenue was down 5% to \$91,732 due to normal business fluctuations.

Deferred rent reflects rent free allowances on the Calgary office lease. This amount is amortized over the term of the lease.

Glenbriar continues to implement measures to improve its capital resources. The only remaining loan payable as of March 31, 2014 was \$385,070 payable to Glenbriar's management and a shareholder. This is a \$9,930 reduction from December 31, 2014. See note 7 of Notes to Financial Statements. Glenbriar has no off-balance sheet arrangements.

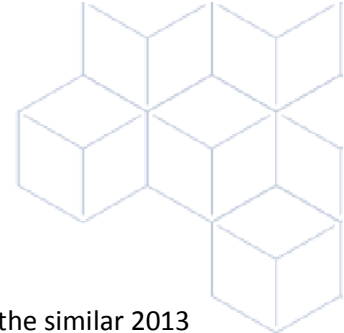

Glenbriar may be required to seek additional equity or debt financing, reduce its operations or to limit its growth in order to maintain liquidity. In addition, Glenbriar does not have adequate surplus capital on hand to pursue its research and development activities at an optimal rate, to establish and implement a robust marketing and sales program, and to make strategic acquisitions. Accordingly, Glenbriar may reasonably be expected to issue additional equity or take on more debt in order to obtain the additional resources which it believes are necessary to enable it to seek to achieve the growth rates which are sought by investors and shareholders. If additional equity is issued, existing shareholders may experience dilution of their shareholdings. If additional debt is taken on, the business could be put at greater risk of not being able to survive downturns in business cycles, the loss of major accounts, or other negative events. Glenbriar will continue to take steps to improve its working capital position, which may include injection of capital, loans or renegotiation of credit facilities, but there is no assurance that these efforts will be successful.

Research and development expenditures were reduced to \$5,060 in the second quarter of fiscal 2014, and will be \$nil thereafter, due to the sale of the Peartree Dealership product in the first quarter. Additional funds will still be required to rollout new products and services, revamp marketing and sales, and make strategic acquisitions.

Glenbriar's long term financial commitments for a delivery vehicle and office leases were as follows as of March 31, 2014:

	\$
2014	137,573
2015	260,070
2016	204,107
2017	189,240
2018	191,302
Subsequent years	637,673
Total	<u>1,619,965</u>

Results from Operations

Net income increased to \$349,164 from \$57,699 for the 6 months ended March 31, 2014 from the similar 2013 period, despite a 1% decrease in revenue. This reflects improved margins on both services and equipment revenue, and the \$107,000 gain on sale of the Peartree Dealership product in the first quarter of fiscal 2014. See note 5 of Notes to Financial Statements.

Managed services revenue includes all professional services and consulting revenue. Direct salaries and benefits include the salaries of those employees who directly earn managed services revenue. Margins on managed services are based on a comparison of managed services revenue to direct salaries and benefits. Salaries for administrative and support staff are included in general and administrative expenses, while salaries for sales and marketing staff are included in sales and marketing expense.

Equipment and software revenue includes all revenue from the sale of those items, and cost of goods sold is made up of the cost of equipment and software sales. Both accounts include shipping, but exclude any allocation of salaries or overhead. Margins on equipment and software sales are based on a comparison of equipment and software revenue to cost of goods sold.

Revenue. Revenue decreased 1% for the 6 months ended March 31, 2014 from the prior year period, made up of a 2% decrease in services and a 5% decrease in equipment and software sales. These changes reflect market transition to cloud technologies and hosted environments, which result in less desktop services and equipment purchases, but increased margin as services transform from desktop into network services and business process consulting and development.

Expense. Margins on managed services increased to 31.8% for the 6 months ended March 31, 2014 from 22.4% in the prior year period, reflecting the positive effects of reorganizing the service delivery model in that area to respond to market changes described above. Margins decreased to 21.8% from 30.4% on equipment and software sales over the same periods, reflecting a lower proportion of unified communications and proprietary software activity, which carry higher margins. General and administrative expense remained flat at 14.6% of sales in the first quarter of 2014 from 14.4% in the similar 2013 period, and sales and marketing expenses decreased to 5.4% from 6.9% of sales in the same periods of 2014 over 2013. These changes reflect the initial stages of reorganization of the sales and marketing function to respond to the market changes described above.

Accounts receivable. The balance for March 31, 2014 reflects 52 days of sales, which is up from 37 days of sales for the year end fiscal 2013, and from the prior year period of 46 days. Glenbriar management is focused on continuing to reduce this number in the last half of fiscal 2014.

Accounts payable and accrued liabilities. The increase in this account to \$846,170 at March 31, 2014 from \$718,851 at the end of fiscal 2013 reflects increase equipment sales.

Deferred revenue. The balance of \$75,824 as of March 31, 2014 mainly reflects periodic software maintenance and services, which are brought into revenue monthly as services are performed. This item was reduced by the sale of the Dealership product in the first quarter. See note 5 of Notes to Financial Statements. This is a noncash item.

Forward Looking Statements

This MD&A may contain forward-looking statements. These forward-looking statements do not guarantee future events or performance and should not be relied upon. Actual outcomes may differ materially due to any number of factors and uncertainties, many of which are beyond Glenbriar's control. Some of these risks and

uncertainties may be described in Glenbriar's corporate filings (posted at www.sedar.com). Glenbriar has no intention or obligation to update or revise any forward looking statements due to new information or events, except as required by securities legislation.

Risk Factors

Glenbriar is in the information technology business, which is a rapidly changing and competitive environment. Glenbriar must stay abreast of several new technologies and be ready to quickly and effectively deploy them for its customers. Glenbriar serves the automotive, energy and mining sectors, all of which were challenged by the global recession and the effects of globalization on their business cycles. See the 2013 Annual Report for a more detailed description of the many changes underway in the IT sector, all of which will have a major effect on the way many of Glenbriar's clients conduct their business over the coming years. The pace of change keeps quickening, and Glenbriar and its clients must adapt promptly, but carefully, to choose the right technologies and strategies to optimize their business technology processes and infrastructure. The consumerization of end user devices, increased mobility, and changing workplaces will continue to place a heavy burden on businesses to remain secure and to keep their data safe but accessible. Glenbriar will have to continue to reliably identify, evaluate, optimize and support these new technologies for its clients in order to remain successful in the coming periods.

Critical Accounting Estimates

IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expense during the reporting periods presented. Significant estimates include the assessment of recoverability of carrying values of Glenbriar's accounts receivable, software and other capital assets. Actual results will differ from the estimates.

Related Party Transactions

Shareholder loan advances were \$385,070 as of March 31, 2014, a reduction of \$9,930 from September 30, 2013. See note 7 of Notes to Financial Statements.

Glenbriar wound up its Employee Share Purchase Plan effective December 31, 2013. See note 8(b) of Notes to Financial Statements.
