

Glenbriar secures exclusive Canadian licence from top European cyber security firm

CALGARY, AB, **June 17, 2014** — **Glenbriar Technologies Inc.** (CSE: GTI) is pleased to announce that it has entered into an exclusive Canadian licence with Deep-Secure Ltd., a world-class cyber security firm headquartered in the United Kingdom. The licence will allow Glenbriar to market and distribute Deep Secure products across Canada, either on a stand-alone basis, or incorporated within Glenbriar’s existing products and services.

The acquisition of this licence fits into Glenbriar’s broader strategic vision of repositioning its product and service offerings to better meet growing client demand for enhanced cyber security.

The principal focus of Deep-Secure is the securing of information sharing activities among computer networks, applications and the people who operate them. From the secure handling of supply chain documentation to the protection of process controls managing critical infrastructure, Deep-Secure provides high assurance solutions that are now being used across a wide range of industries, as well as by criminal justice, defence and intelligence agencies.

Robin King, CEO of Deep-Secure, indicated that, “We are delighted to enter into an agreement with an organisation that has a clear vision to address the acute cyber security challenges facing customers and to be able to work with them to expand the reach of our products into the Canadian market.”

Robert Matheson, CEO of Glenbriar Technologies, noted that, “The establishment of this relationship will allow us to create a presence at the forefront of the Canadian cyber security sector. This is both complementary to our historic product offerings, and timely too, as the security and protection of corporate information and intellectual property has become a major focus of business in recent years.”

The proprietary cyber security products developed by Deep-Secure will be marketed from Glenbriar’s offices in British Columbia, Alberta and Ontario.

About Deep Secure

Deep-Secure Ltd. specializes in the development and marketing of sophisticated software to enable information-sensitive corporate and public institutions to securely share information across networks of differing security levels. Deep-Secure’s products operate across a wide selection of information sharing protocols and data formats, and are employed by industries with extensive IP assets and by government agencies with responsibilities for intelligence gathering and national defence. Deep Secure also supplies cyber security solutions to NATO military installations and naval forces. See www.deep-secure.com for more details.
