

Independent Auditors' Report

To the Shareholders of **Glenbriar Technologies Inc.**

We have audited the accompanying financial statements of Glenbriar Technologies Inc., which comprise the statements of financial position as at September 30, 2015 and September 30, 2014, and the statements of income (loss) and comprehensive income (loss), statements of changes in shareholders' deficiency and statements of cash flows for the years ended September 30, 2015 and September 30, 2014, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

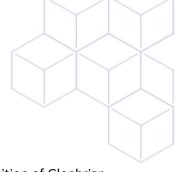

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audits to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of Glenbriar Technologies Inc. as at September 30, 2015 and September 30, 2014, and its financial performance and its cash flows for the years ended September 30, 2015 and September 30, 2014 in accordance with International Financial Reporting Standards.

Emphasis of Matter

We draw attention to note 2 of the financial statements which describes conditions that indicate the existence of a material uncertainty that may cast significant doubt upon the Corporation's ability to continue operating as a going concern. Our opinion is not qualified in respect of this matter.

Supplementary cash flow information (note 14)

1. REPORTING ENTITY

Glenbriar Technologies Inc. ("Glenbriar" or "Corporation") was incorporated under the Alberta Business Corporations Act on July 15, 1994. The Corporation operates primarily in the information technology sector and has only one operating segment. The Corporation's head office is located at 1100, 736 – 8 Ave SW, Calgary, Alberta, Canada, T2P 1H4.

2. BASIS OF PRESENTATION

Statement of compliance

These financial statements are prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"), and interpretations of the International Financial Reporting Interpretation Committee ("IFRIC").

A summary of the Corporation's significant accounting policies under IFRS is presented in note 3. These policies have been consistently applied.

The financial statements and notes were authorized for issue by the Corporation's board of directors on January 26, 2016.

Basis of measurement and going concern

The financial statements have been prepared on a going concern basis using the historical cost convention, except for cash and cash equivalents, which are measured at fair value.

These financial statements have been prepared on the basis that the Corporation will continue as a going concern, which assumes that the Corporation will be able to realize its assets and satisfy its liabilities in the normal course of business for the foreseeable future. Management is aware, in making its going concern assessment, of material uncertainties related to events and conditions that may cast significant doubt upon the Corporation's ability to continue as a going concern. As at September 30, 2015, the Corporation has negative working capital of \$584,841 (2014 - \$(58,627)) and has a deficit of \$4,719,855 (2014 - \$4,528,226). The Corporation incurred a net loss during the year ended September 30, 2015 of \$191,629 (2014 – net income of \$271,122). In addition, the Corporation was in default of a covenant on its credit facility (note 6). In order to continue as a going concern, the Corporation will need to generate positive cash flows from operations or obtain additional debt or equity financing. Whether and when the Corporation can generate sufficient operating cash flows to pay for its expenditures and settle its obligations as they fall due subsequent to September 30, 2015 is uncertain. These financial statements do not reflect the adjustments to the carrying values of assets and liabilities and the reported expenses and statement of financial position classifications that would be necessary were the going concern assumption inappropriate. These adjustments could be material.

Use of estimates and judgements

The preparation of the Corporation's financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods presented. Estimates and judgements are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. However, actual results could differ from the estimates.

The following discussion sets forth management's most critical estimates and assumptions in determining the value of assets, liabilities and equity:

Valuation of accounts receivable

The recoverability of accounts receivable is based upon its past history of recovery and specific doubtful accounts.

Capitalization of property and equipment

Property and equipment includes the capitalization of general and administrative expenses related to the cost to develop and complete office systems and data centre equipment. The amounts capitalized have been estimated based on estimates of employees' time on the specific projects.

Useful life and valuation of property and equipment

Property and equipment are depreciated over the estimated useful life of the assets. Changes in the estimated useful lives could increase or decrease the amount of depreciation recorded during the year. The carrying value of property and equipment is estimated by management to be recoverable at its depreciated cost.

Income taxes

The measurement of income taxes requires management to make judgements in the interpretation and application of relevant tax laws. The actual amount of income taxes only becomes final upon filing and acceptance of the tax return by the relevant authorities, which occurs subsequent to the issuance of the financial statements. The availability of tax pools is subject to audit and interpretation by taxation authorities. There are no current or deferred income taxes recognized in the financial statements as disclosed in note 15 and management estimates that these items have been fairly valued.

Functional and presentation currency

These financial statements are presented in Canadian dollars, which is the Corporation's functional currency.

3. SIGNIFICANT ACCOUNTING POLICIES

Revenue recognition

Managed information services revenue is recognized as services are rendered. In cases where collectability is not reasonably assured, revenue is recognized when the cash is collected. Payments received in advance of services rendered are deferred until such time as the services are performed.

Equipment and software sales relate to hardware and software products purchased and resold to customers. The revenue from these sales is recognized upon shipment. Software licences paid in advance for proprietary software, which include ongoing support and maintenance obligations, are deferred and recognized over the period of those obligations.

Other income relates to miscellaneous income amounts and is recognized in the period earned and when determined to be receivable.

Cash and cash equivalents

Cash and cash equivalents are comprised of cash on deposit with banks and short-term deposits with initial maturities of three months or less.

Inventory

Inventory is comprised mainly of equipment and spare parts, and is carried at the lower of cost and net realizable value. Cost is measured on a first-in, first-out basis. The total amount of inventory recognized during the year as an expense was \$939,494 (2014 - \$1,432,170).

Property and equipment

Upon initial recognition, computer hardware, office operating systems, data centre equipment and office equipment are recorded at cost, being the purchase price and directly attributable costs of acquisition, development or construction required to bring the asset to the location and condition necessary to be capable of operating in the manner intended by the Corporation. Subsequent measurement is at cost less accumulated depreciation less any accumulated impairment losses. When parts of property and equipment have different useful lives, they are accounted for as separate components of property and equipment.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probably that the future economic benefit associated with the item will flow to the Corporation and the cost of the item can be measure reliably. The carrying amount of a replaced asset is derecognized after replacement. Repairs and maintenance are charged to the statement of income during the period in which they occur.

Depreciation on computer hardware and office equipment is recorded using the declining-balance method at rates of 30% and 20%, respectively. Depreciation on office operating systems and data centre equipment is on a straight line basis over 5 years. If the carrying value of an asset exceeds the projected discounted future net cash flow from its use or disposal, a reduction of the carrying value to the fair value would be recorded.

Finance leases

Finance leases that transfer substantially all the benefits and risks of ownership to the Corporation are accounted for at the commencement of the lease term as finance leases and recorded as property and equipment at the fair value of the leased asset, or, if lower, at the present value of the minimum lease payments, together with an offsetting liability. Finance charges are allocated to each period in accordance with the applicable agreements and are charged directly to income as finance expenses. Capitalized leased assets are amortized in accordance with the Corporation's property and equipment policy. All other leases are accounted for as operating leases and the lease costs are expensed as incurred.

Government assistance

The Corporation may be entitled to investment tax credits or other incentives based on certain research and experimental development costs incurred. These amounts are netted against the related assets in expenses in the period in which they are earned and realization is considered to be probable. Investment tax credits or other incentives may be subject to assessment and approval by the applicable government authority. Adjustments, if any are required, are reflected in the year when such assessments are received. No government tax credits or incentives were earned or recorded during 2015 or 2014.

Impairment of non-financial assets

At each reporting date, the Corporation's non-financial assets are reviewed to determine whether there is an indication that those assets are impaired. If such an indication exists, the recoverable amount of the assets is estimated in order to determine the extent of the impairment, if any. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount and the impairment loss is recognized in the statement of income (loss).

For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows (cash-generating units). The recoverable amount is based on the higher of fair value less costs of disposal and its value in use. In assessing value in use, the estimated future cash flows to be derived from the asset in its current state are discounted at a rate that reflects current market assessments of the time value of money and the risks specific to the assets.

An impairment loss is reversed if there is a change in the estimates used to determine the recoverable amount, with the exception of impairment losses on goodwill which are not reversed. When an impairment loss is reversed, the carrying amount of the asset is increased to the revised estimate of its recoverable amount so that the increased carrying amount does not exceed what the carrying amount would have been had no impairment losses been recognized for the asset in prior periods. There was no impairment of the Corporation's property and equipment determined during the years ended September 30, 2015 or 2014.

Income taxes

Income taxes are comprised of current and deferred taxes. Income tax expense (recovery) is recognized in income (loss) except to the extent that it relates to items recognized directly in equity or other comprehensive income (loss). Current taxes are the expected taxes payable on the taxable income for the period plus any adjustment to taxes payable in respect of previous periods. Deferred taxes are recognized using the liability method, providing for temporary differences between the carrying amounts of assets and liabilities and the amounts used for taxation purposes. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences including carry-forward of unused tax losses and unused tax credits to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized.

Deferred taxes are not recognized on the initial recognition of assets or liabilities in a transaction that is not a business combination. In addition, deferred taxes are not recognized for taxable temporary differences arising on the initial recognition of goodwill. Deferred taxes are measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset, and they relate to income taxes levied by the same taxation authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

Stock-based compensation

Stock-based compensation expense represents the estimated fair value of the Corporation's quarterly contributions of treasury shares to the employee share purchase plan implemented in February 2008, as described in note 10(c). The estimated fair value of the shares issued is based on the market price at the date of issue. These contributions are expensed as incurred.

Net income (loss) per common share

The Corporation follows the treasury stock method to determine the dilutive effect of stock options or other potentially dilutive instruments. Under this method, basic net income (loss) per share is calculated using the weighted average number of common shares outstanding during the period. Diluted income per share is calculated on the basis of the weighted average number of common shares outstanding during the period plus the additional incremental common shares that would have been outstanding for any potentially dilutive stock options or other instruments were exercised for common shares using the treasury stock method.

Deferred rent

Incentives such as rent-free periods are initially recognized as a deferred rent liability and amortized as a reduction in rental payments over the lease term. Deferred rent reflects rent free allowances on the office lease in Calgary. The lease term is 124 months ending January 31, 2022, including the rent free period.

Provisions and contingencies

A provision is recognized on the statement of financial position when the Corporation has a present legal or constructive obligation as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation. If the effect is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. No such provisions were required as at September 30, 2015 and 2014.

Foreign currency translation

Foreign currency transactions are translated into the functional currency using the average rate of exchange in effect at the transaction dates. Monetary assets and liabilities relating to foreign currency transactions are recorded at rates of exchange in effect at the statement of financial position date and any resulting gains or losses recorded in income for the period.

Financial instruments

Financial instruments are measured at fair value on initial recognition of the instrument. Measurement in subsequent periods depends on whether the financial instrument has been classified as "fair value through profit or loss", "loans and receivables", "available-for-sale", "held-to-maturity", or "financial liabilities measured at amortized cost".

Financial assets are classified as loans and receivables, held-to-maturity, held-for-trading, designated at fair value through profit or loss and available-for-sale. Loans and receivables include all loans and receivables except debt securities, and are accounted for at amortized cost using the effective interest rate method and are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Held-to-maturity classification is restricted to fixed maturity non-derivative instruments that the Corporation intends and is able to hold to maturity, and is accounted for at amortized cost using the effective interest rate method. Held-for-trading and designated at fair value through profit or loss instruments are measured at fair value on the statement of financial position, with realized and unrealized gains and losses reported in net income and transactions costs are expensed when incurred. The remaining non-derivative financial assets are classified as available-for-sale. These are recorded at fair value, with gains or losses being recognized in other comprehensive income. Derecognition of a financial asset and other than temporary impairment losses are recognized in the statement of comprehensive income.

Financial liabilities are classified as held-for-trading, designated at fair value through profit and loss or financial liabilities measured at amortized cost. Held-for-trading and designated at fair value through profit and loss instruments are recorded at fair value with realized and unrealized gains and losses reported in income, and transaction costs being expensed when incurred. Financial liabilities measured at amortized cost and non-derivative instruments are accounted for at amortized cost using the effective interest rate and represent all financial liabilities not classified as held-for-trading or designated at fair value through profit and loss.

Common shares are classified as equity. Incremental costs directly attributable to the issue of common shares, stock options and warrants are recognized as a deduction from equity, net of any tax effects.

The Corporation has designated accounts receivable as loans and receivables; and accounts payable and accrued liabilities, loans payable, finance leases and finance loans as financial liabilities measured and carried at amortized cost. The Corporation's cash and cash equivalents are classified as held-for-trading. Fair value is determined by reference to published price quotations. The Corporation does not have any derivative financial instruments.

The Corporation assesses at each reporting date, whether there is objective evidence that financial assets, other than those designated as fair value through profit or loss are impaired. When impairment has occurred, the cumulative loss is recognized

in the statement of income (loss). For financial assets carried at amortized cost, the amount of the impairment loss recognized is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate. When an "available-for-sale" financial asset is considered to be impaired, cumulative gains or losses previously recognized in other comprehensive income are reclassified to the statement of income (loss) in the period. Impairment losses may be reversed in subsequent periods.

Finance income and expenses

Finance income is comprised of interest earned on cash and cash equivalents held at financial institutions and is recognized as it accrues in the statement of income (loss) using the effective interest method.

Finance expense is comprised of interest expense on borrowings, and impairment losses recognized on financial assets. For the years ended September 30, 2015 and 2014, finance expense consists of interest on the Corporation's bank indebtedness, loans payable, finance leases, and accounts payable and accrued liabilities.

Borrowing costs incurred for the acquisition or construction of qualifying assets are capitalized during the period of time that is required to complete and prepare the assets for their intended use or sale. A qualifying asset is one that takes a substantial period of time to get ready for use or sale. All other borrowing costs are recognized in the statement of income (loss) using the effective interest method. The capitalization rate used to determine the amount of borrowing costs to be capitalized is the weighted average interest rate applicable to the Corporation's outstanding borrowings during the year.

Recent accounting pronouncements

The Corporation has adopted the following new standards and amendments which were became effective on or after January 1, 2014:

- (i) IFRS Interpretations Committee (IFRIC) 21. "Levies" which provides guidance on accounting for levies in accordance with the requirements of IAS 37, "Provisions, Contingent Liabilities and Contingent Assets". The interpretation clarifies that an entity is to recognize a liability for a levy when the activity that triggers the payment occurs. The interpretation also clarifies that a levy liability is to be accrued progressively only if the activity that triggers payment occurs over a period of time, in accordance with the relevant legislation. The adoption of this interpretation did not have a significant impact on the Corporation's financial statements.
- (ii) IAS 36 (amended), "Impairment of Assets". These amendments reduce the circumstances in which the recoverable amount of cash generating units, "CGUs", is required to be disclosed and clarifies the disclosures required when an impairment loss has been recognized or reversed in the period. The adoption of these amendments will only impact the Corporation's disclosures in the notes to the financial statements in periods when an impairment loss or impairment reversal is recognized.
- (i) The Corporation adopted several narrow-scope amendments to a total of nine standards issued by IASB in December 2013. The adoption of these amendments had no impact on the financial statements.

In addition to the adoption of the standards as detailed above, the Corporation will be required to adopt each of the following new standards in future years:

(i) IFRS 9, "Financial Instruments" provides a comprehensive new standard for accounting for all aspects of financial instruments. It includes a logical model for classification and measurement, a single, forward-looking 'expected-loss' impairment model and a substantially reformed approach to hedge accounting. The new standard is effective for years beginning on or after January 1, 2018. The Corporation has not determined the impact of the new standard on its financial statements.

(ii) IFRS 15, "Revenue from Contracts with Customers" provides a comprehensive new standard for recognition, measurement and disclosure of revenue from contracts with customers, excluding contracts within the scope of the standards on leases, insurance contracts and financial instruments. It specifies how and when to recognize revenue as well as requiring entities to provide more informative and relevant disclosure. The new standard is effective for years beginning on or after January 1, 2018, with early adoption permitted. The Corporation has not determined the impact of the new standard on its financial statements.

4. SALE OF DEALERSHIP SOFTWARE

Effective December 31, 2013, the Corporation sold its interest in the Peartree Dealership product for net proceeds of \$107,000. As this asset had a carrying cost of \$nil, the entire proceeds have been shown as a gain on sale.

5. PROPERTY AND EQUIPMENT

	Computer Hardware \$	Office Operating Systems \$	Data Centre Equipment \$	Office Equipment \$	Total \$

September 30, 2015	49,898	274,556	324,346	8,830	657,630

During the year ended September 30, 2015, no depreciation was recorded on the data centre equipment as the property and equipment was not available for use. During the year ended September 30, 2015, the Corporation capitalized \$169,991 (\$2014 - \$nil) and \$190,338 (2014 - \$nil) in general and administrative costs consisting of salaries and benefits to office operating systems and data centre equipment.

6. BANK INDEBTEDNESS

Glenbriar entered into a revolving demand credit facility with the Royal Bank of Canada in March 2015. This facility allows for borrowing of up to 75% of accounts receivable under 91 days (less potential prior payables) to a maximum of \$500,000, calculated monthly, and bears interest at Royal Bank prime plus 2.25% per annum. A second facility allows for borrowing up to \$100,000 on a VISA business account. The total borrowings are secured by a general security agreement over Glenbriar's current and after acquired assets, and postponement of loans payable (see note 7). The outstanding balance on

September 30, 2015 under both facilities was \$192,362. The bank indebtedness requires the Corporation to maintain a ratio of liabilities to tangible net worth of not greater than 4:1. At September 30th, 2015 the Corporation was in default of the covenant. The lender has not called the loan as of January 26, 2016.

7. LOANS PAYABLE

Loans payable at September 30, 2015 in the amount of \$345,000 (September 30, 2014 - \$345,000) consist of net advances from officers of the Corporation secured by a general security agreement which bear interest at the rate of interest charged on the bank indebtedness (note 6). The advances are repayable 12 months after the officers provide written request for payment. As at September 30, 2015, the officers had not requested payment, and consequently, the advances have been classified as non-current liabilities, and related accrued interest of \$45,564 is included in accounts payable (2014 - \$34,036). Finance expense includes \$17,078 of interest on the advances in fiscal 2015 (2014 - \$16,786), which corresponds to an average interest rate of 5% for 2015 (2014 - 4%).

8. FINANCE LEASES

Glenbriar entered into new finance leases in fiscal year 2015 to facilitate its new cloud infrastructure. Finance leases consisted of four equipment leases. The equipment leases bear interest ranging between 12.33% and 16.52% annually and require blended monthly payments of interest and principal. The final payments are due between November 2017 and March 2018.

Minimum lease payments related to the finance leases are as follows:

	Principal	Imputed interest	Minimum lease payments
2016	\$46,714	\$14,815	\$61,529
2017	54,207	7,322	61,529
2018	17,552	687	18,239
	\$118,473	\$22,824	\$141,297

9. FINANCE LOANS

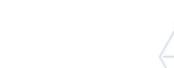

The financing loans relate to the purchase of two office operating systems. The financing loans are non-interest bearing and unsecured. The final payments are due on December 1, 2018 and February 1, 2019. The payments on the financing loans are as follows:

2016	\$25,470
2017	26,484
2018	26,484
2019	9,030
	\$87,468

10. SHARE CAPITAL

a) Authorized

Unlimited number of common shares
Unlimited number of preferred shares of one or more series

b)	Common shares issued and outstanding	Number of shares	Amount \$
	Balance, September 30, 2013	48,331,510	4,278,655
	Employee share purchase plan	90,000	900
	Balance, September 30, 2015 and 2014	48,421,510	4,279,555

c) Employee share purchase plan

In February 2008, the Corporation implemented a share purchase plan, under which participants made contributions to purchase common shares on the open market or from treasury (subject to the number of shares being calculated and issued based on a minimum of \$0.05 per share) through a designated trust facility. These contributions were matched

quarterly by the Corporation issuing shares from treasury at the market price at the date of issue (subject to the number of shares being calculated and issued based on a minimum of \$0.05 per share). During the year ended September 30, 2015, the Corporation recorded \$nil (2014 - \$900) of stock-based compensation expense. The plan was wound up effective December 31, 2013.

d) Earnings (loss) per share

There are no equity instruments that could potentially dilute basic earnings (loss) per share outstanding at September 30, 2015.

11. COMMITMENTS

As of September 30, 2015, the Corporation was committed to the following minimum annual payments and estimated operating costs payable to lessors for office leases, which expire at various dates through January 2022:

	\$
2016	235,714
2017	228,586
2018	199,711
2019	197,086
2020	197,086
Subsequent years	262,781
Total	1,320,964

12. RELATED PARTY TRANSACTIONS

General and administrative expense includes remuneration of the key management personnel, which includes senior management, directors and officers of the Corporation. For fiscal 2015, remuneration of \$499,641, including \$499,641 of salaries, benefits and cash-based compensation, and \$nil of stock-based compensation (2014 - \$539,496, \$538,896 and \$600, respectively) was incurred to key management personnel. Total salaries and benefits, including amounts included in cost of services, general and administrative, sales and marketing, and property and equipment, were \$2,651,296 in 2015 (2014 - \$3,305,466).

See note 7 regarding loan advances to the Corporation by key management.

13. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

The Corporation's activities expose it to a variety of financial risks including credit risk, liquidity risk and market risk. This note presents information about the Corporation's exposure to each of the above risks, the Corporation's objectives, policies and

processes for measuring and managing risk, and the Corporation's management of capital. Further quantitative disclosures are included throughout these financial statements. The Corporation employs risk management strategies and polices to ensure that any exposure to risk are in compliance with the Corporation's business objectives and risk tolerance levels. While the Board of Directors has the overall responsibility for the Corporation's risk management framework, the Corporation's management has the responsibility to administer and monitor these risks.

Fair value of financial instruments

The Corporation's financial instruments are comprised of cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities, bank indebtedness, loans payable, finance leases and finance loans. The carrying values of the Corporation's accounts receivable, accounts payable and accrued liabilities and finance loans approximate their respective fair values due to their short term maturity. As the Corporation's bank indebtedness, loans payable and finance leases bear interest at floating market rates, the respective carrying values approximate fair value. The Corporation's cash and cash equivalents are adjusted to market value on a quarterly basis.

Financial instruments recorded at fair value on the statement of financial position are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1 reflects valuation based on quoted prices observed in active markets for identical assets or liabilities.

Level 2 reflects valuation techniques based on inputs that are quoted prices of similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; inputs other than quoted prices used in a valuation model that are observable for that instrument; and inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 reflects valuation techniques with significant unobservable market inputs.

A financial instrument is classified to the lowest level of the hierarchy for which a significant input has been considered in measuring fair value. The financial instruments in the Corporation's financial statements, measured at Level 1 fair value, are cash and cash equivalents.

Credit risk

The Corporation is exposed to normal credit risk from customers. Accounts receivable are generally unsecured, subject to the Corporation's ability to file security interest under certain conditions. Accounts receivable are normally collected 30 days after invoicing. Default rates on unsecured credit have traditionally been below 1% of annual sales. The Corporation's customer accounts are aged as follows: current – \$253,000 (2014 - \$415,000); 30-60 days – \$47,000 (2014 - \$64,000); 61-90 days – \$27,000 (2014 - \$38,000); 91 days or older – \$14,000 (2014 - \$65,000). The Corporation has reviewed the past due accounts on a customer by customer basis and has provided an allowance for doubtful accounts of \$27,728 (2014 - \$28,247), all relating to past due accounts 91 days or older. Licences for proprietary software cease to function if payments are not kept current. The Corporation minimizes concentrations of credit risk by maintaining a wide customer base spread across differing industries. At September 30, 2015, the Corporation had \$55,949 (2014 - \$143,968) due from one customer, representing 16% (2014 – 25%) of trade receivables at September 30, 2015. Additional sales and services may be withheld if a customer falls to pay its obligations in a timely manner.

The Corporation is also subject to credit risk through its cash on deposit. As cash is held in a reputable financial institution, concentration of credit risk is considered minimal.

Liquidity risk

Liquidity risk is the risk that the Corporation will not be able to meet its financial obligations as they become due. For the year ended September 30, 2015, the Corporation had net loss of \$191,629, cash flow from operating activities before changes in non-cash working capital of \$(153,805), and working capital of \$(584,841) as at September 30, 2015. The Corporation's financial liabilities, comprised of bank indebtedness which are due on demand and accounts payable and accrued liabilities of \$626,507, are due and payable within less than one year. Loans payable of \$345,000 are due in more than a year (see note 7). Finance leases are due over the terms of the leases (see note 8). Finance loans are due over the terms of the loans (see note 9). Deferred revenue of \$107,152 is a non-cash item, which does not directly affect cash working capital used to maintain operations.

The Corporation will also continue to seek additional investment to improve its working capital position, but there is no certainty that it will be able to achieve that objective under current market conditions (see note 2).

Management believes that its ongoing cash flow from operating activities, based on current internal operating forecasts, will be sufficient to satisfy its current and future obligations as they become due and to fund ongoing operations.

The Corporation has additional commitments as outlined in note 11.

A contractual maturity analysis of the Corporation's financial liabilities is as follows:

Financial liabilities	2016	2017	2018	2019	Total
Bank indebtedness	192,362	-	-	-	192,362
Accounts payable	626,507	-	-	-	626,507
Loans payable	-	345,000	-	-	345,000
Finance leases	47,714	54,207	17,552	-	118,473
Finance loans	25,470	26,484	26,484	9,030	87,468
	891,053	425,691	44,036	9,030	1,369,830

Market risk

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate as a result of changes in market interest rates or availability of capital. The Corporation is exposed to interest rate risk on any outstanding drawings on its bank indebtedness and loans payable. An increase or decrease in the interest rate of 1% would result in approximately a \$5,374 (2014 - \$3,415) adjustment to the 2015 net income reported based upon the outstanding balances as of September 30, 2015.

Foreign exchange risk

Foreign exchange risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate due to changes in foreign exchange rates. During fiscal 2015, 1% (2014 – 1%) of total revenue was denominated in US dollars. At September 30, 2015, approximately \$17,393 (2014 - \$11,492), \$44,360 (2014 - \$39,333), \$53,569 (2014 - \$23,686) and \$65,544 (2014 - \$nil) of the Corporation's cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities, and finance loans were denominated in US dollars, respectively. An increase in value of the Canadian dollar relative to the US dollar will decrease the equivalent Canadian amounts, while an decrease in the value of the Canadian dollar will increase the amounts. Exchange rate fluctuations have increased in volatility under current economic conditions, and this risk cannot be accurately quantified. A 1% change in the Canadian-US exchange rate on the net assets held in US\$ would

increase or decrease the reported income by approximately \$574 (2014 - \$271). The Corporation has no contracts in place to mitigate this exposure.

Capital management

The Corporation's goal is to develop a strong capital base to meet its growth objectives, while maintaining the ability to fulfill its financial obligations, finance internal growth and fund potential acquisitions. The Corporation may be required to seek additional equity or debt financing, reduce its operations or to limit its growth in order to maintain liquidity. The Corporation does not have adequate surplus capital on hand to pursue its research and development activities at an optimal rate, to establish and implement a robust marketing and sales program, or to make strategic acquisitions. Accordingly, the Corporation may reasonably be expected to issue additional equity or take on more debt in order to obtain the additional resources which it believes are necessary to enable it to seek to achieve the growth rates which are sought by investors and shareholders. If additional equity is issued, existing shareholders may experience dilution of their share holdings. If additional debt is taken on, the business could be put at greater risk of not being able to survive downturns in business cycles, the loss of major accounts, or other negative future events.

The Corporation's capital structure includes working capital (deficiency). The Corporation's capital management objectives, evaluation measures and targets have remained unchanged over the periods presented. The Corporation's capital is not subject to any external restriction, except for the bank loan covenants (note 6).

The Corporation's defined capital at September 30, 2015 is as follows:

	\$
Current assets	419,335
Current liabilities	(1,004,176)
Working capital (deficiency)	(584,841)

14. SUPPLEMENTARY CASH FLOW INFORMATION

Cash and cash equivalents at September 30, 2015 and 2014 were entirely comprised of cash on deposit.

a)	Changes in non-cash working capital:	2015 \$	2014 \$
	Accounts receivable	241,376	(41,259)
	Inventory	8,197	550
	Prepaid expenses	(3,459)	(3,364)
	Accounts payable and accrued liabilities	(82,251)	(10,093)
	Deferred revenue	45,809	(35,543)
	Total	209,672	(89,709)
b)	Cash interest paid	38,389	31,561

- c) During the year ended September 30, 2014, \$14,000 was reclassified from loans payable to accounts payable and accrued liabilities.
- d) Non-cash transactions:

 During the year ended September 30, 2015, the Corporation acquired property and equipment valued at \$154,335 by way of finance leases and \$99,389 by way of finance loans.

15. INCOME TAXES

The components of the deferred income tax asset amounts as at September 30, 2015 and 2014 are as follows:

	2015	2014
	\$	\$
Excess of tax basis over carrying value on long-term assets	286,391	261,336
Deferred benefit of current and prior years' losses	982,463	907,120
Investment tax credits	24,000	24,000
	1,292,854	1,192,456
Valuation allowance	(1,292,854)	(1,192,456)
	-	-

Management has assessed the net deferred tax asset using the criteria of whether it is probable that the deferred tax assets can be realized. Based on the uncertainty of future taxable income, management has recorded an offsetting valuation allowance for the full amount of the deferred tax asset as at September 30, 2015 and 2014.

As at September 30, 2015, the Corporation had non-capital losses of approximately \$3.7 million available to be carried forward to reduce future taxable income. The benefit of these credits and losses has not been recognized in the financial statements. These credits and losses expire as follows:

	Non-capital losses	
	\$	
2016	279,000	
2026	359,000	
2027	267,000	
2028	751,000	
2029	698,000	
2030	1,119,000	
2033	134,000	
2035	144,000	

The Corporation also has approximately \$439,000, \$899,000 and \$197,000 of deductible research and development expenditures, undepreciated capital cost, and cumulative eligible capital property, respectively, with no expiry date.

Income tax expense (recovery) differs from the amounts which would be obtained by applying the combined federal and provincial statutory income tax rate to the respective years' loss before income taxes. The following schedule explains the differences between the expected and actual tax expense (recovery):

Income (loss) before income taxes
Expected income taxes – statutory rate of 25.7% (2014 - 25%)
Effect of tax rate changes
Expiry of investment tax credits
Adjustments to tax pools and other
Provision for deferred income taxes before valuation allowance
Change in valuation allowance

2015	2014
\$	\$
(191,629)	271,122
(49,249)	67,781
(56,567)	(9,778)
-	65,000
5,418	(1,936)
(100,398)	121,067
100,398	(121,067)
-	-

16. SUPPLEMENTARY ACCOUNTS RECEIVABLE AND PAYABLE INFORMATION

	2015	2014
	\$	\$
Accounts receivable components:	•	
Trade receivables	368,448	610,343
Allowance for doubtful accounts	(27,728)	(28,247)
Total	340,720	582,096
	2015	2014
	\$	\$
Accounts payable and accrued liabilities components:	•	
Trade payables	428,109	439,247
Accrued salaries and wages	136,129	150,861
Sales tax payable	18,599	44,854
Other payables	43,670	73,796
Total	626,507	708,758
