Relevant work experience includes drilling and other exploration activities on structurally-hosted base metal deposits in Greenland and Canada.
4. I have read the definition of “qualified person” set out in National Instrument 43-101 (“NI 43-101”) and certify that by reason of my education, affiliation with a professional association as defined in NI 43-101, and past relevant work experience, I fulfill the requirements to be a “qualified person”.
5. I am responsible for the information presented in the technical report titled “Technical Report on the Borys Lake Property, La Ronge Mining District, Saskatchewan, Canada” and dated 30 November 2015 (the “Technical Report”). This report is based on geological assessment reports, fieldwork, and published and unpublished literature researched by me and/or in the Reliance Geological Services library and records, and I have visited the subject property personally.
8. I consent to the use of this Technical Report only in its entirety for filing with any stock exchange or other regulatory authority and any publication, including electronic publication, in the public company files or their websites accessible by the public.
