(An Exploration Stage Company)
Notes to the Condensed Consolidated Interim Financial Statements
(Expressed in Canadian Dollars)
For the Nine months ended April 30, 2016 and 2015

1. Nature of Operations and Going Concern

The Company was incorporated under the laws of the Province of British Columbia on November 3, 1993. The Company's shares were listed for trading on the TSX Venture Exchange andon February 3, 2014, the Company changed its name to Avarone Metals Inc. and commenced trading on the Exchange under the symbol "AVM". On January 20, 2016, the Company listed on the Canadian Securities Exchange ("Exchange" or "CSE") while simultaneously delisting from the TSX Venture Exchange. The Company retained its name and symbol and trades on the CSE as Avarone Metals Inc. (CSE-AVM).

The head office and principal address of the Company are located at Suite 610, 700 West Pender Street, Vancouver, BC, Canada, V6C 1G8. The Company's records office and registered office address is located at Suite 700, 1199 West Hastings Street, Vancouver, British Columbia, Canada, V6E 3T5.

The Company is in the process of exploring its resource properties and has not yet determined whether these properties contain mineral reserves that are economically recoverable. The Company's ability to continue as a going concern and the recoverability of the amounts shown for resource properties are dependent upon the ability of the Company to raise additional financing in order to complete the acquisition, exploration and development of its resource properties, the discovery of economically recoverable reserves and upon future profitable production or proceeds from disposition of the Company's resource properties. As a resource company in the exploration stage, the ability of the Company to complete its acquisition, exploration and development will be affected principally by its ability to raise adequate amounts of capital through equity financings, debt financings, joint venturing of projects and other means.

These condensed consolidated interim financial statements have been prepared using accounting policies applicable to a going concern which contemplate the realization of assets and settlement of liabilities in the normal course of business. At April 30, 2016, the Company had not yet achieved profitable operations, had accumulated losses of \$14,790,993 (2015 - \$14,138,803), working capital surplus of \$25,104 (2015 - \$207,561 surplus) and expects to incur further losses in the development of its business. The Company will be required to raise additional capital in order to maintain its option obligations and fund working capital requirements. While the Company has been successful in the past, there is no assurance that it will be able to obtain adequate financing or that such financing will be available on acceptable terms. If the Company is unable to obtain adequate additional financing, the Company will be required to curtail operations, exploration and development activities. These material uncertainties may cast significant doubt on the entity's ability to continue as a going concern.

These condensed consolidated interim financial statements do not give effect to adjustments that would be necessary should the Company be unable to continue as a going concern and, therefore, be required to realize its assets and liquidate its liabilities and commitments other than the normal course of operations, and at amounts different from those in the accompanying condensed interim consolidated financial statements.

2. Significant Accounting Policies

The condensed consolidated interim financial statements were authorized for issue on June 29, 2016, by the Directors of the Company. The accounting policies set out below have been applied consistently to all periods presented in these condensed interim consolidated financial statements.

(a) Basis of Presentation and Consolidation

These condensed consolidated interim financial statements, including comparatives, have been prepared in accordance with International Accounting Standard 34 "Interim Financial Reporting" ("IAS 34") using accounting policies consistent with IFRS issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC").

The condensed consolidated interim financial statements include the accounts of the Company and its wholly-owned inactive Mexican subsidiary, Promotora Minera Dialex S.A. de C.V. ("Dialex"). All intercompany balances and transactions have been eliminated on consolidation.

3. Recent Accounting Pronouncements

The following IFRS standards have been recently issued by the IASB or the IFRIC. Pronouncements that are not applicable or do not have a significant impact to the Company have been excluded herein. The Company is assessing the impact of these new standards, but does not expect them to have a significant effect on the financial statements.

IFRS 9. Financial Instruments

The IASB has issued a new standard, IFRS 9, "Financial Instruments" ("IFRS 9"), which will replace IAS 39, "Financial Instruments: Recognition and Measurement" ("IAS 39"). IFRS 9 will replace the multiple classification and measurement models in IAS 39 with a single model that has only two classification categories: amortized cost and fair value. The new standard also requires a single impairment method to be used, provides additional guidance on the classification and measurement of financial liabilities, and provides a new general hedge accounting standard.

The mandatory effective date has tentatively been set for January 1, 2018, however early adoption of the new standard is permitted. The Company currently does not intend to early adopt IFRS 9. The adoption of IFRS 9 is currently not expected to have a material impact on the financial statements as the classification and measurement of the Company's financial instruments is not expected to change given the nature of the Company's operations and the types of financial instruments that it currently holds.

IFRS 15, Revenue from Contracts with Customers

In May 2014, the IASB issued IFRS 15 which replaces the detailed guidance on revenue recognition requirements that currently exists under IFRS. IFRS 15 specifies the accounting treatment for all revenue arising from contracts with customers, unless the contracts are within the scope of other IFRSs. The standard also provides a model for the measurement and recognition of gains and losses on the sale of certain non-financial assets that are not an output of the Company's ordinary activities. Additional disclosure is required under the standard, including disaggregation of total revenue, information about performance obligations, changes in contract asset and liability account balances between periods, and key judgments and estimates. Early application is permitted either following a full retrospective approach or a modified retrospective approach. The modified retrospective approach allows the standard to be applied to existing contracts beginning the initial period of adoption and restatements to the comparative periods are not required. The Company is required to disclose the impact by financial line item as a result of the adoption of the new standard.

4. <u>Exploration and Evaluation Expenditures</u>

^{**}As at April 30, 2016, the Company had not made the \$100,000 payment due on July 8, 2015 and the option agreement is in default

The Claims are subject to a 1% net smelter royalty, which can be purchased at any time by the Company for \$1,000,000.

(c) McWilliams Lake Gold Project

The Company entered into an option agreement dated March 25, 2014 whereby the Company has been granted an option to acquire a 100% interest in the McWilliams Lake Gold Project (the "Property") located in central Saskatchewan.

Under the terms of the agreement, the Company may earn a 100% interest in the Property by issuing an aggregate of 4,000,000 common shares (issued) and incurring exploration expenditures of \$1,000,000 within four years of the signing of the agreement. In order to keep the claims in good standing an annual minimum exploration requirement on the claims must be met. As at April 30, 2016, the work commitment was not met. The Company has applied for relief from the work commitment due to fire hazards in the area.

(d) Borys Lake Project

On November 16, 2015, the Company entered into an agreement with an arms'-length vendor by which the Company can earn a 100% interest in the Borys Lake Lead-Zinc Project, which covers an area of ~2882 hectares in the southwestern edge of the LaRonge Gold Belt, SK. The Company can earn a 100% interest in the property by completing the following; the issuance of 6,000,000 common shares (issued for a fair value of \$120,000) upon TSX Venture Exchange approval, the payment of further cash considerations totaling \$200,000 over the next 3 years and the completion of \$1,000,000 in qualified exploration expenditures within 4 years from the date of approval. The Company received TSX Venture Exchange Approval on November 24, 2015.

As at April 30, 2016, the Company's financial instruments consist of cash and cash equivalents, amounts receivable, accounts payable and accrued liabilities, and loan payable. The carrying values of these financial instruments approximate their fair values because of their short term nature and/or the existence of market related interest rates on the instruments.

IFRS requires disclosures about the inputs to fair value measurements for financial assets and liabilities recorded at fair value, including their classification within a hierarchy that prioritizes the inputs to fair value measurement. The three levels of hierarchy are:

- Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities;
- Level 2 Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly; and
- Level 3 Inputs for the asset or liability that are not based on observable market data.

12. Financial Instruments and Risk Management – (continued)

(a) Fair Value of Financial Instruments – (continued)

The Company has no financial instrument assets or liabilities recorded in the statements of financial position at April 30, 2016 and 2015 at fair value and accordingly fair value hierarchy disclosure is not required.

(b) Financial Instruments Risk

The Company is exposed in varying degrees to a variety of financial instrument related to risks. The Board approves and monitors the risk management processes:

(i) Credit Risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations. The Company is subject to credit risk on the cash balances at the bank and amounts receivable. The investments are with Schedule 1 banks or equivalent, with the majority of its cash held in Canadian based banking institutions, authorized under the Bank Act to accept deposits, which may be eligible for deposit insurance provided by the Canadian Deposit Insurance Corporation. Management considers that risks related to credit are minimal.

(ii) Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet the obligations associated with its financial liabilities. The Company's approach to managing liquidity is to ensure that it will have sufficient liquidity to settle obligations and liabilities when due. As at April 30, 2016, the Company had cash and cash equivalents of \$15,980 to settle current liabilities of \$78,303.

The Company is dependent on the availability of credit from its suppliers and its ability to generate sufficient funds from equity and debt financing to meet current and future obligations. There can be no assurance that such financing will be available on terms acceptable to the Company (note 1).

(iii) Market Risk

a. Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's accounts payable and accrued liabilities are non-interest bearing. As at April 30, 2016, the Company's interest bearing assets are cash and cash equivalents. The Company maintains a minimum cash balance in its chequing account and transfers funds from its investment account when the need arises. The Company's investments are placed in GICs which interest rates vary depending on the rates offered by the banks when the instruments mature and are automatically renewed. A change of 100 basis points in the interest rates would not be material to the financial statements.

b. Commodity Price Risk

Commodity price risk is the risk of financial loss resulting from movements in the price of the Company's commodity inputs and outputs. The Company's risk relates primarily to the expected output to be produced at its resource properties described in note 5 of these financial statements of which production is not expected in the near future

During the nine month period ended April 30, 2016 and 2015, there were no changes to the Company's risk exposure or to the Company's policies for risk management.

13. Capital Management

The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern such that it can provide returns for shareholders and benefits for other stakeholders. The Company considers the items included in shareholders' equity (deficiency) as capital. The management of the capital structure is based on the funds available to the Company in order to support the acquisition, exploration and development of resource properties and to maintain the Company in good standing with the various regulatory authorities. In order to maintain or adjust its capital structure, the Company may issue new shares, sell assets to settle liabilities or return capital to its shareholders.

The Company is not subject to externally imposed capital requirements.

The properties in which the Company currently has an interest in are in the exploration stage, as such, the Company does not recognize revenue from its exploration properties. The Company's historical sources of capital have consisted of the sale of equity securities and interest income. In order for the Company to carry out planned exploration and development and pay for administrative costs, the Company will spend its working capital and expects to raise additional amounts externally as needed.

There were no changes in the Company's management of capital during the nine month period ended April 30, 2016.
