As a result, accounting policies, presentation, financial statement captions and terminology used in this discussion and analysis differ from those used in previous financial reporting.

The MD&A contains the term cash flow from operations, which should not be considered an alternative to, or more meaningful than, cash flows from operating activities as determined in accordance with IFRS as an indicator of the Company's performance. The Company's determination of cash flow from operations may not be comparable to that reported by other companies. The reconciliation between profit or loss and cash flows from operating activities can be found in the statement of cash flows.

Certain statements contained in this management discussion and analysis may contain words such as "could", "should", "expect", "believe", "will" and similar expressions and statements relating to matters that are not historical facts but are forward-looking statements. Such forward-looking statements are subject to both known and unknown risks and uncertainties which may cause the actual results, performances or achievements of the Company to be materially different from any future results, performances or achievements expressed or implied by such forward-looking statements. Description of Business (continued)

The Company's registered office is located at 1000 Cathedral Place, 925 West Georgia Street, Vancouver, BC, V6C 3L2.

The Company's Board of Directors is comprised of John Cook (President and CEO), Thomas R. Tough, Glen Macdonald and Ken Ralfs.

These consolidated interim financial statements have been prepared on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. As at July 31, 2014, the Company has not generated any revenues from operations, has an accumulated deficit of \$23,411,661, and has a working capital deficit of \$761,146. The continued operations of the Company are dependent on its ability to generate future cash flows or obtain additional financing. Management is of the opinion that it has sufficient working capital to meet the Company's liabilities and commitments as they become due, although there is a risk that additional financing may be required but will not be available on a timely basis or on terms acceptable to the Company. These factors indicate the existence of a material uncertainty that may cast significant doubt upon the Company's ability to continue as a going concern. These financial statements do not reflect any adjustments that may be necessary if the Company is unable to continue as a going concern.

Financial Instruments

(a) Fair Values

Assets and liabilities measured at fair value on a recurring basis were presented on the Company's statement of financial position as at July 31, 2014 as follows:

	Fair Value Measurements Using			Balance, October 31, 2013 \$
	Quoted prices in active markets for identical instruments (Level 1) \$	Significant other observable inputs (Level 2) \$	Significant unobservable inputs (Level 3) \$	
Cash	5,605	—	—	5,605

The fair values of other financial instruments, which include amounts receivable, loan receivable, accounts payable and accrued liabilities, amounts due to related party, and convertible debenture, approximate their carrying values due to the relatively short-term maturity of these instruments.

(b) Credit Risk

Financial instruments that potentially subject the Company to a concentration of credit risk consist primarily of cash. The Company limits its exposure to credit loss by placing its cash with high credit quality financial institutions. Amounts receivable consist of accrued interest from loan receivable and GST refunds due from the Government of Canada. The carrying amount of financial assets represents the maximum credit exposure.

(c) Foreign Exchange Rate and Interest Rate Risk

The Company is not exposed to any significant foreign exchange rate or interest rate risk. The Company has transactions in US dollars, and a 10% change in foreign exchange rates would have an effect of \$235 on foreign exchange gains or losses.

Financial Instruments (continued)

(d) Liquidity Risk

The ability to do this relies on the Company raising equity financing in a timely manner and by maintaining sufficient cash in excess of anticipated needs.

(e) Price Risk

The Company is exposed to price risk with respect to commodity prices. The Company's ability to raise capital to fund exploration and development activities is subject to risks associated with fluctuations in the market price of commodities.

Capital Management

The Company manages its capital to maintain its ability to continue as a going concern and to provide returns to shareholders and benefits to other stakeholders. The capital structure of the Company consists of cash and equity comprised of issued share capital, share-based payment reserve, and equity portion of convertible debenture.

The Company manages its capital structure and makes adjustments to it in light of economic conditions. The Company, upon approval from its Board of Directors, will balance its overall capital structure through new share issues or by undertaking other activities as deemed appropriate under the specific circumstances.

The Company is not subject to externally imposed capital requirements and the Company's overall strategy with respect to capital risk management remains unchanged from the year ended April 30, 2014.
