The Company's audit committee reviews the Company's financial statements and the MD&A and recommends approval to the Company's board of directors.

This MD&A is dated August 29, 2024.

FORWARD-LOOKING STATEMENTS

Forward looking statements are statements that are not historical facts and are generally, but not always identified by the words "expects", "plans", "anticipates", "believes", "intends", "estimates", "projects", "potential", "interprets" and similar expressions, or that events or conditions "will", "may", "could" or "should" occur. The information contained herein may contain forward-looking statements including expectations of future production, cash flows or earnings. These statements are based on current expectations that involve a number of risks and uncertainties which could cause actual results to differ from those anticipated. Factors that could cause the actual results to differ materially from those in forward-looking statements, but are not limited to: the risk associated with the oil and gas industry (e.g., operational risks in development, exploration and production; delays or changes in plans with respect to exploration or development projects or capital expenditures; the uncertainty of reserves estimates; the uncertainty of estimates and projections relating to production, costs and expenses, and health, safety and environmental risks), commodity price, price and exchange rate fluctuation and uncertainties resulting from potential delays or changes in plans with respect to exploration or development projects or capital expenditures. The foregoing list of assumptions is not exhaustive. Additional information on these and other factors that could affect the Company's operations or financial results are included in the Company's reports on file with Canadian securities regulatory authorities. Events or circumstances could cause results to differ materially.

Weighted average number of shares (basis and diluted)	108,557,940	108,557,940	108,557,940	108,557,940

The Company's operations are not subject to seasonality. The main component of the Company's net income (loss) is comprised of realized and unrealized gain (loss) of the Company's investments in marketable securities which fluctuates from time to time based on the performance of these investments and is difficult to predict. The Company has been working on normalizing operations to reduce cash burn which has led to a decrease in operating expenditures during the period ended June 30, 2024.

FINANCIAL INSTRUMENT AND FINANCIAL RISK MANAGEMENT

Financial instruments

Fair value

The fair value of the Company's financial assets and liabilities approximate the carrying amount whether due to their short-term nature or because the interest rates applied to measure their carrying amount approximate current market rates.

Financial instruments measured at fair value are classified into one of three levels in the fair value hierarchy according to the relative reliability of the inputs used to estimate the fair values. The three levels of the fair value hierarchy are:

- Level 1 - Unadjusted quote prices in active markets for identical assets or liabilities;
- Level 2 - Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly; and
- Level 3 - Inputs that are not based on observable market data.

Investments in common shares of public companies are measured using level 1 fair value measurements.

Investments in options and warrants are measured using level 2 fair value measurements as the fair value estimate incorporates the use of option pricing models.

Investments in private companies are measured using level 3 fair value measurements as the fair value estimate incorporates non-observable market inputs.

Risk management

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board of Directors approves and monitors the risk management processes, inclusive of documented investment policies, counterparty limits, and controlling and reporting structures. The type of risk exposure and the way in which such exposure is managed are follows:

Market Risk

Marketable Securities

Market risk is the risk that the fair value of, or future cash flows from the Company's investment in marketable securities will significantly fluctuate because of changes in market prices. The Company is exposed to market risk or equity risk or equity price risk in trading its investment and unfavourable market conditions could result in dispositions of investments at less than favourable prices. Additionally, the Company marks its investments to market in accordance with accounting policies at each reporting period. This process could result in significant write-downs of the Company's investment over one or more reporting periods, particularly during periods of declining resource markets.

Market risk includes price risk, interest rate risk and currency risk as well as factors specific to an individual investment or its issuer or risk specific to a certain market. Market risk is managed principally through diversification of investments. Management monitors the overall market risk position on a quarterly basis.

Investment Properties

The Company is exposed to market risk for its investment properties in relation to the changes in market price for fair value of the investment properties.

Price Risk

The Company is exposed to price risk in relation to listed marketable securities and warrants held as FVTPL investment. For the period ended June 30, 2024, a 10% change in the closing price of its marketable securities would result in a change in earnings of \$174,000.

MANAGEMENT'S DISCUSSION AND ANALYSIS
Nine months ended June 30, 2024

Interest Rate Risk

Interest risk is the risk that the fair values or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to interest rate risk is minimal as the Company does not have variable interest-bearing asset or debt.

Currency Risk

Currency risk is the risk that the fair values of future cash flows of a financial instrument will fluctuate because they are denominated in currencies that differ from the respective functional currency. The Company is exposed to currency risk on cash, marketable securities and loans receivables denominated in United States dollars. At June 30, 2024, a hypothetical change of 10% in foreign exchange rates would have an effect of \$1,000 (September 30, 2023-\$9,300) on net loss and comprehensive loss.

Credit Risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company's primary exposure to credit risk is on its loans receivable and accounts receivables. The Company's secondary risk is its cash. The Company evaluates the creditworthiness of the counterparty and the value of any collateral. The Company mitigates its credit risk by only providing loans to counterparties whereby the Company has detailed knowledge about their business operations and strategy. Cash is deposited in bank accounts held with a major bank in Canada. A significant amount of the Company's cash is held by one bank, there is a concentration of credit risk. This risk is managed by using major banks that are high credit financial institutions as determined by rating agencies.

Concentration risk

Concentration risk is the risk that any investment or group of investments will have the potential to materially affect the operating results of the Company. As at June 30, 2024, the Company's top five equity investments, all in the mining sector, had a fair value of \$1,460,792. This represents 89% of the fair value of the Company's total investments in marketable securities.

Liquidity Risk

Liquidity risk is the risk that the Company may be unable to meet its financial obligations as they fall due. The Company reviews its working capital position regularly to ensure there is sufficient capital in order to meet short-term business requirements, taking into account its anticipated cash flows from operations and its holding of cash.
