The security symbol, MNLIF, is part of the OTC Grey Market, where Monarch does not provide any reports and has no obligation to do so. There are no market makers under this symbol of this security. It is not listed, traded or quoted on any U.S. stock exchange or the OTC Markets. Trades in grey market stocks are reported by broker-dealers to their Self Regulatory Organization (SRO) and the SRO distributes the trade data to market data vendors and financial websites so investors can track price and volume. Since grey market securities are not traded or quoted on an exchange or interdealer quotation system, investor's bids and offers are not collected in a central spot so market transparency is diminished and best execution of orders is difficult.
