## **Relay Medical and Fio Corporation Announces High-Volume Manufacturing Partner for its COVID-19 Mobile Testing Device, Fionet, to Support Scaled-Up Production**

- Relay & Fio announces engagement with contract manufacturer KeyTronic for high-volume production of its COVID-19 mobile testing device, which enables rapid COVID-19 testing & tracking in community-based settings
- KeyTronic is a world class, US-based and FDA-approved medical device contract manufacturer, recently selected as a Top 10 Contract Manufacturing Service Provider for 2020<sup>1</sup>
- Recently announced delivery of COVID-19 software in Kenya has been deployed to first 10 clinics in Meru County
- Signed new agreement for a research pilot with a large, European multinational medtech network
- Fionet has been submitted to Health Canada for expedited access to address community-based testing and tracking. FRR is simultaneously working towards Fionet regulatory approval in the US and EU.

October 2, 2020 – Relay Medical Corp. (“**Relay**” or the “**Company**”) (CSE: RELA, OTC: RYMDF, Frankfurt: EIY2), and Fio Corporation (“**Fio**”), together Fionet Rapid Response Group (“FRR”), announce that its Fionet pandemic response devices will be produced by US-based, FDA-approved, high-volume contract manufacturer, KeyTronic, which is now creating a Fionet device assembly line. KeyTronic (NASDAQ: KTCC) offers turnkey services and global reach and is already producing other COVID-related medical devices.

FRR has approximately 1000 devices being prepared for manufacture, with initial runs of the assembly line expected in October. The company has paid for the manufacturing line set ups and 50% of the cost of the first batch of 165 units and will pay the balance upon completion within 6 to 8 weeks.

“In August, we focused on implementing our vision for adapting Fionet to COVID. In September, we focused on bringing this vision to the market, which resulted in agreements for initial deployment we are signing. We now moved to engage a high-quality, high-volume manufacturer to fulfill orders,” said Dr Michael Greenberg, CEO of FRR and of Fio Corporation.

In early September, FRR announced the first delivery of the COVID-19 workflow software and the Company has since signed additional agreements for trial deployments with other organizations including a subsidiary of a large European diagnostics company which, upon successful completion a feasibility pilot, could result in volume deployments in multiple countries in Africa.

<sup>1</sup> <https://www.globenewswire.com/news-release/2020/07/14/2062245/0/en/Keytronic-Selected-as-a-Top-10-Contract-Manufacturing-Service-Provider-for-2020.html>

Trial or pilot deployments are designed to enable FRR and clients to customize Fionet for region-based workflows, including safe-return-to-work protocols, community-based COVID-19 testing protocols, and for field stress-testing.

In mid-August Relay Medical and Fio Corp. formed Fionet Rapid Response Group to rapidly adapt the Fionet platform for testing and tracking of COVID-19 to provide a solution that allows for management of mass community-based testing, triage, and contact tracing of the disease. The platform has been successfully deployed in over a dozen countries, where it has performed with excellent results for 1 million tests of high-consequence infectious diseases, including HIV, Ebola, malaria, dengue fever, and others.

**Fionet Mobile Devices**

Relay Medical and Fio Corporation executed this agreement for COVID based on the anticipation that: (1) for the first wave, all attention would go to personal protective equipment, tests, treatments, and vaccines - which a multitude of other companies would vie to provide; (2) the second wave will be a major threat; (3) by that time, sweeping measures would be needed to protect national and personal economies worn down by the first wave; and, (4) this would drive attention to implementing controlled, mass, community-based testing and triage coupled to real-time data circulation between frontline action and remote decision-making - which FRR can uniquely provide.

“The FRR team is working in unison with client teams to serve a great need and to intercept the opportunity anticipated in the second wave of COVID. Governments and the private sector are moving strongly towards taking the fight against COVID to mass, community-based settings, where people work, live, study, and travel so that they can continue to work, live, study, and travel.” said Yoav Raiter, CEO of Relay Medical Corp.

Fionet has been submitted to Health Canada for expedited access to address community-based testing and tracking. FRR is simultaneously working towards Fionet regulatory approval in the US and EU.

**\*\*The Companies are not making any express or implied claims that its product has the ability to eliminate, cure or contain the COVID-19 (or SARS-2 Coronavirus) at this time.**

### **About Fio Corporation**

Fio Corporation, privately held and headquartered in Toronto, developed and markets the world’s first integrated guidance & tracking IT platform for decentralized healthcare settings, a new category of solution that raises healthcare quality and lowers healthcare costs. The platform enables average

healthcare workers in clinics to deliver a new level of quality-controlled diagnostic testing and case management. Simultaneously, as an automated by-product of its clinical use, the platform captures and provides unprecedented frontline data to remote supervisors and stakeholders, enabling real-time remote tracking, insight distribution, and intervention. Fio operates globally in partnership with local distribution, service, and support organizations and also partners with other companies that license its technologies.
