

Scryb Announces Partnership with S&P 500 Multinational Cybersecurity Corporation

Toronto, Ontario--(Newsfile Corp. - May 11, 2022) - **Scryb Inc. (CSE: SCYB) (OTCQB: SCYRF) (FSE: EIY) ("Scryb" or the "Company")**, is pleased to report on an agreement with an S&P 500 multinational cybersecurity leader, for Cybeats technologies to become a Technology Partner of the entity. The companies have commenced the partnership alliance with the aim of commercializing security solutions in the future.

The S&P listed multinational secures the largest enterprise, SMB, service providers, and government organizations around the world and has positioned itself as the driving force behind cybersecurity innovation, setting new industry standards for converged networking and security. The entity ranks number one in the most security appliances shipped worldwide. Cybeats' enterprise cybersecurity products provide multiple workflow and supply chain security solutions utilizing SBOM (Software Bill of Materials), and together with the partner will explore joint product commercialization, seeking commercial customers of the products globally.

"We are very excited to expand our growing partnership network with such a force in the Cybersecurity industry and to deploy our SBOM studio and intuitive software supply chain security solutions in concert with a world-renowned industry-leading cybersecurity operator. As organizations accelerate their digital innovation initiatives, they need to make sure their security can keep up with today's complex and fast-evolving threats and we look forward to reporting on future advancements, developments and commercial engagements as they occur," **said Yoav Raiter, CEO, Scryb Inc.**

About SBOM

An SBOM is a record of all software components that make up a product. It is a complete, formally structured list of components, libraries, and modules that are included in the software. An analogy for SBOM is the nutritional ingredients list found on everyday food products, such as a can of coke. A Coca Cola ingredient list includes information that can be used to gauge allergy risk, expiry dates, and other food safety information. Just as food products are mandated to provide this list to consumers, SBOM is quickly becoming a similar standard in the software industry.

The Whitehouse signed an executive order in May 2021 stipulating that all vendors responsible for supplying software to federal agencies must provide an SBOM. Organizations and governments are growing more aware of the importance of software supply chain security. Many regulations take effect in and around August 2022, and others are to follow thereafter. It is anticipated that SBOM will become a global standard across industries.

Cybeats SBOM Studio gives access to one-of-a-kind tools to manage SBOM needs and software vulnerabilities, and provides proactive mitigation of risks to their software supply chain. Key product features include:

- SBOM document management and repository
- Vulnerability, threat insights, risk management
- Software license infringement alerts
- SBOM exchange with regulatory authorities, at reduced cost

The Company is not making any expressed or explicit claims that the agreement discussed herein has, or will necessarily lead to, commercial engagements that involve financial or commercial revenues for any Cybeats product lines or for Scryb Inc.

Forward-Looking Information Cautionary Statement

Except for statements of historic fact, this news release contains certain "forward-looking information" within the meaning of applicable securities law. Forward-looking information is frequently characterized by words such as "plan", "expect", "project", "intend", "believe", "anticipate", "estimate" and other similar words, or statements that certain events or conditions "may" or "will" occur. Forward-looking statements are based on the opinions and estimates at the date the statements are made, and are subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those anticipated in the forward-looking statements including, but not limited to delays or uncertainties with regulatory approvals, including that of the CSE. There are uncertainties inherent in forward-looking information, including factors beyond the Company's control. There are no assurances that the commercialization plans for the technology described in this news release will come into effect on the terms or time frame described herein. The Company undertakes no obligation to update forward-looking information if circumstances or management's estimates or opinions should change except as required by law. The reader is cautioned not to place undue reliance on forward-looking statements. Additional information identifying risks and uncertainties that could affect financial results is contained in the Company's filings with Canadian securities regulators, which filings are available at www.sedar.com.
