

LIONS GATE METALS

LIONS GATE METALS INTERSECTS 0.68% COPPER EQUIVALENT OVER 147.87 METRES AT POPLAR PROJECT

Vancouver, BC Canada, December 6, 2011 – Lions Gate Metals Inc. (TSX-V: LGM) (“Lions Gate” or the “Company”) is pleased to announce assay results from Hole 11-PC-97, the second hole released from the recently completed 29 hole, 11,913.93 metre diamond drill program at the Poplar Project. Hole 11-PC-97 was located along the northern side of the main zone of mineralization. Results indicate the zone remains open to the north and at depth. The hole intercepted mineralization over its entire length.

Results are as follows:

From	To	Width (m)	Cu%	Mo%	Au g/t	Ag g/t	Cu Eq%
20.73	566.16	545.43	0.23	0.012	0.06	1.72	0.35
Including;							
174.95	506.4	331.45	0.32	0.016	0.08	2.15	0.48
358.53	506.4	147.87	0.45	0.022	0.13	3.42	0.68

The Lions Gate technical team continues to develop the Poplar geological model. These results extend the limit of the main zone to the north and have confirmed a higher grade mineralized zone within the target area. More drilling has been budgeted for 2012 to further define the extent of the main zone and delineate higher grade targets.

“One of the primary goals of this drilling program was to get a better understanding of the extent to which gold and silver will add to the economic value of Poplar. We are very pleased with these results as they suggest strong gold and silver values within the mineralized zone,” stated Arni Johannson, Chairman.

Copper Equivalent (Cu Eq) calculations were based on equivalency factors of $CuEq\% = Cu\% \times 1$, $Au (CuEq\%) = Au\ g/t \times 0.57291667$, $Ag (CuEq\%) = Ag\ g/t \times 0.01041667$, and metal prices of Cu \$2.80/lb, Mo \$16.00/lb, Au \$1100/troy oz., Ag \$20/troy oz. The equivalency factor for molybdenum is $Mo (CuEq\%) = Mo\% \times 5.71428571$. However, the molybdenum values intersected in 11-PC-104 may not be recoverable, and are not used in the calculation of copper equivalent grade. Metal recoveries are not used, as metallurgical studies are incomplete.

The 100% owned Poplar Project has a NI 43-101 compliant resource of 245 million tonnes grading 0.27% copper, containing 1.4 billion pounds of copper, at a 0.15% copper cut-off. This resource estimate was prepared by Giroux Consultants Limited (News Release dated August 23, 2011), and was based on 105 historical drill holes and 13 diamond drill holes, totaling 5,569m, completed by Lions Gate in the spring of 2011. The Phase 2 drill program will provide enough data for an estimate of gold and silver grades, in addition to copper and molybdenum grades. An updated resource estimate is anticipated in the spring of 2012 when all results from the Phase 2 drilling have been received and compiled.

2011 Milestones:

- Completed a National Instrument 43-101 compliant resource calculation for Poplar.
- Completed over 16,000 metres of drilling at costs below \$200 per metre at Poplar.
- Improved our corporate governance practices to include a fully independent audit committee.
- Filed an Annual Information Form ("AIF") which will enhance capital market access.
- Negotiated Option to earn 75% of ROK-Coyote.
- Completed preliminary exploration at ROK-Coyote, Poplar Regional and Hudson Bay Mountain.
- Staked additional claims to the south west of Poplar Project.

2012 Goals:

- Publish an updated National Instrument 43-101 Resource Estimate for Poplar.
- Continue drilling to expand and enhance the Poplar Project.
- Continue exploration of Poplar Regional to include geophysics and drill targets.
- Drill target identification and possible drilling at ROK-Coyote.
-

About Lions Gate Metals

Lions Gate is a Canadian based, junior resource company focused on the exploration, development, and acquisition of Copper projects. Lions Gate owns five substantial projects in British Columbia. The 100% owned flagship project is the Poplar porphyry copper - gold deposit near Houston, BC. The Huckleberry Mine, located approximately 35 kilometres southwest of the Poplar Deposit, produces copper and molybdenum from a deposit of similar age and setting. In 2011, LGM optioned the right to acquire 75% of the ROK-Coyote project near Iskut, BC which sits adjacent to Imperial Metals' Red Chris Project. These two projects are the main focus of the 2012 Exploration Program.

Andrew Gourlay P. Geol., Vice President Exploration is a Qualified Person under NI 43-101 and has reviewed and approved the contents of this news release.

Sincerely on behalf of the Board of Directors,

"Arni Johannson"

Forward-Looking Statements

Statements in this release that are forward-looking statements, including statements subject to various risks and uncertainties concerning the specific factors identified in the Company's periodic filings with Canadian Securities Regulators. These factors include the inherent risks involved in the exploration and development of mineral properties, the uncertainties involved in interpreting drill results and other exploration data, the potential for delays in exploration or development activities, the geology, grade and continuity of mineral deposits, the possibility that future exploration, development or mining results will not be consistent with the Company's expectations, accidents, equipment breakdowns, title matters, labor disputes or other unanticipated difficulties with or interruptions in production and operations, fluctuating metal prices, the possibility of project cost overruns or unanticipated costs and expenses, uncertainties relating to the availability and costs of financing needed in the future, the inherent uncertainty of production and cost estimates and the potential for unexpected costs and expenses, commodity price fluctuations, currency fluctuations, regulatory restrictions, including environmental regulatory restrictions and liability, competition, loss of key employees, and other related risks and uncertainties. The Company undertakes no obligation to update forward-looking information except as required by applicable law. Such forward-looking information represents management's best judgment based on information currently available. No forward-looking statement can be guaranteed and actual future results may vary materially. Accordingly, readers are advised not to place undue reliance on forward-looking statements or information.
