

Lions Gate Metals continues to expand Poplar Deposit Main and East Zone mineralization at depth and laterally with 0.46% CuEq over 147 metres.

Vancouver, BC Canada, February 13, 2012 – Lions Gate Metals Inc. (TSX-V: LGM) (“Lions Gate” or the “Company”) is very pleased to confirm continued copper and silver mineralization at depth and laterally to the Main and East Zones of the [Poplar Copper-Gold-Silver Porphyry Property](#) (the “Property”), based on results from an additional (4) four of the twenty-nine (29) hole, 10,913.93 metre, phase-two diamond drill program (the “Program”). Significant CuEq and Ag values returned from drilling along and outside of the south-central margin of the NI 43-101 compliant inferred resource area (1.4 billion lbs copper; 245,000,000 tonnes averaging 0.27% Cu - 0.15% cut-off), indicate that the system remains open at depth and to the south. See Poplar Deposit map for resource area and [drilling locations](#).

“The phase-two program comprised a series of step-out drilling in strategic locations throughout the inferred resource area. As results from each cluster of holes are analyzed and mapped, a pattern of consistent and extended mineralization is emerging,” says Lions Gate President and CEO Paul Sarjeant. Holes 11-PC-115 and 11-PC-120 stepped out beyond the current limits of the Main and East Zones. Hole 11-PC-119 was collared approximately 150 m south of the previous limit of the resource envelope and results indicate that the mineralizing system still exists. The southern limits of the Main and East Zones have not been defined, and further drilling is required. “These results are very promising and we are confident in our ability to expand tonnage and increase grade at the Property.”

Significant Results: Poplar Copper-Gold-Silver Deposit – South-Central Main and East Zones

Hole No.	From (m)	To (m)	Length (m)	Cu (%)	Au (g/t)	Mo (%)	Ag (g/t)	CuEq (%)	Comments
11-PC-120	27.21	252.00	224.79	0.25	0.07	0.016	1.83	0.40	Mineralization continues at depth.
inc.	52.19	199.25	147.06	0.28	0.08	0.019	2.30	0.46	Significant values
11-PC-106	25.45	450.00	424.55	0.15	0.03	0.008	3.89	0.26	Mineralization continues at depth.
inc.	287.80	450.00	162.20	0.21	0.05	0.012	5.61	0.36	Significant Ag.
11-PC-119	39.00	504.00	465.00	0.05	0.02	0.003	2.18	0.10	Mineralization continues at depth and to the south.
inc.	386.42	504.00	117.58	0.12	0.04	0.008	3.76	0.23	Significant Ag.
11-PC-115	15.09	201.00	185.91	0.15	0.06	0.001	1.62	0.21	Mineralization continues at depth.
inc.	125.58	201.00	75.42	0.31	0.11	0.001	2.38	0.40	Significant Ag.

The Program, completed in November, 2011, was designed to test and extend the limits of mineralization of the Poplar deposit, expand tonnage, increase grade of copper, and qualify to standard significant gold and silver content not included in the current NI 43-101 inferred resource of 1.4 billion lbs copper; 245,000,000 tonnes averaging 0.27% Cu (0.15% cut-off), but indicated by previous drilling.

Drill Hole Details

Hole No.	UTM E	UTM N	Elevation	Azimuth	Inclination	TD (m)
11-PC-120	631999	5986800	898	265	-55	252.00
11-PC-106	632041	5986825	911	270	-80	450.00
11-PC-119	632113	5986637	881	354	-68	504.00
11-PC-115	632200	5986792	890	0	-50	201.00

Drill intersections are true widths through the mineralized zones. All samples were submitted to AcmeLabs, Vancouver, an ISO 17025 accredited analytical laboratory, for preparation and analyses. Sample preparation used procedure R200-250, with digestion and analyses using method IEX and gold determination by method G601. Lions Gate QA/QC included the insertion of one standard, one blank and one duplicate in each batch of 20 samples.

Copper Equivalent (Cu Eq)

Calculations were based on equivalency factors of $CuEq\% = Cu\% \times 1$, $Au (CuEq\%) = Au \text{ g/t} \times 0.57291667$, $Ag (CuEq\%) = Ag \text{ g/t} \times 0.01041667$, and metal prices of Cu \$2.80/lb, Mo \$16.00/lb, Au \$1100/troy oz., Ag \$20/troy oz. The equivalency factor for molybdenum is $Mo (CuEq\%) = Mo\% \times 5.71428571$. Metal recoveries are not used, as metallurgical studies are incomplete.

About the Property

Lions Gate Minerals has 100% interest in the 77,705 hectare, 196 claim [Poplar Copper-Gold-Silver Porphyry Property](#) located in western-central British Columbia, Canada, approximately 35 kilometres northeast of the Huckleberry copper-molybdenum mine operated by Imperial Metals, between Huckleberry and the mining resource town of Houston. The Poplar Deposit on the Property has a NI 43-101 compliant inferred resource of 245 million tonnes grading 0.27% copper, containing 1.4 billion pounds of copper, at a 0.15% copper cut-off. Additional diamond drilling is planned to further define and to upgrade this resource. Near-surface mineralization and significant gold and silver presence are Poplar Deposit highlights. Eight other regional copper-gold porphyry targets have been identified on the Property.

The inferred resource estimate was prepared by Giroux Consultants Limited ([news release](#) dated August 23, 2011), and was based on 105 historical drill holes and 13 diamond drill holes, totaling 5,569m, completed by Lions Gate in the spring of 2011. The phase-two drill program, completed in late November 2011, will provide enough data for an estimate of gold and silver grades, in addition to copper and molybdenum grades. An updated resource estimate is anticipated in the spring of 2012, when data from the phase-two drilling program is compiled and interpreted.

About Lions Gate Metals

Lions Gate Metals is a Canadian based, junior resource company focused on the exploration, development, and acquisition of copper and copper-focused multi-mineral projects. The Company boasts one of the largest consolidated property portfolios of any Canadian junior resource company, including the 77,705 hectare Poplar copper-gold-silver porphyry property located 35km northeast of the Imperial Metals Huckleberry mine (proven/probable 39.7 million tonnes grading 0.343% copper: aggregate production to Dec 31, 2010 approximately 870.0 million pounds copper, 8.0 million pounds molybdenum, 105,000 ounces gold and 3.4 million ounces silver) in west-central British Columbia, and the 6,900 hectare ROK-Coyote copper-gold porphyry property contiguous with Imperial Metal's Red Chris copper-gold project in northwestern British Columbia. Poplar and ROK-Coyote are the primary focus of the 2012 Exploration Program.

Andrew Gourlay P. Geol., Vice President Exploration is a Qualified Person under NI 43-101 and has reviewed and approved the contents of this news release.

Forward-Looking Statements

Statements in this release that are forward-looking statements, including statements subject to various risks and uncertainties concerning the specific factors identified in the Company's periodic filings with Canadian Securities Regulators. These factors include the inherent risks involved in the exploration and development of mineral properties, the uncertainties involved in interpreting drill results and other exploration data, the potential for delays in exploration or development activities, the geology, grade and continuity of mineral deposits, the possibility that future exploration, development or mining results will not be consistent with the Company's

expectations, accidents, equipment breakdowns, title matters, labor disputes or other unanticipated difficulties with or interruptions in production and operations, fluctuating metal prices, the possibility of project cost overruns or unanticipated costs and expenses, uncertainties relating to the availability and costs of financing needed in the future, the inherent uncertainty of production and cost estimates and the potential for unexpected costs and expenses, commodity price fluctuations, currency fluctuations, regulatory restrictions, including environmental regulatory restrictions and liability, competition, loss of key employees, and other related risks and uncertainties. The Company undertakes no obligation to update forward-looking information except as required by applicable law. Such forward-looking information represents management's best judgment based on information currently available. No forward-looking statement can be guaranteed and actual future results may vary materially. Accordingly, readers are advised not to place undue reliance on forward-looking statements or information.
