Mineral Properties

1. Poplar Property

In prior years, the Company entered into various option agreements to acquire a 100% interest in certain mineral claims, known as the Poplar mineral property interest (“Poplar 1, 2 and 3”), located in the Omineca Mining District of B.C. The Company has met all required cash payments and share issuances related to these option agreements, and have staked additional adjacent hectares (“Poplar 4”) (collectively, “Poplar”).

During the year ended December 31, 2014 the Company entered into an agreement with Aldever Resources Inc. (“Aldever”) to option a 100% interest, subject to existing royalties, in the Poplar property. During the year ended December 31, 2015, the Company received 1,500,000 Aldever shares with a fair value of \$195,000 as option payments and recorded an impairment of \$45,038.

On January 8, 2016, the Company amended its agreement with Aldever and received 2,500,000 of Aldever shares with a fair value of \$500,000. The agreement was defaulted by Aldever during 2016.

On November 1, 2016, the Company entered into a sale agreement to sell the Poplar mineral property for a consideration of 10,000 Class L Redeemable, participating preferred shares of Doctors Investment Group Ltd.. As the fair value of the preferred shares are not readily measurable, no value was attributed to the preferred shares. An impairment of \$2,231,663 on the Poplar property was recorded as a result of the sale of this property.

2. Whitford Lake

Pursuant to the terms of an Option Agreement dated February 18, 2013, and amended on August 26, 2013, with St. Jacques Mineral Corp., the Company has agreed to acquire an undivided 100% interest in the Whitford Lake property located in the Athabasca Basin in Saskatchewan. In September 2013, the Company entered into a Whitford Lake Option Assignment Agreement with Canadian Uranium Corp. (“CanU”), which was later amended on December 1, 2013 and August 18, 2014, whereby the Company would transfer all of its interest in the Whitford Lake Option Agreement to CanU. This property is subject to a 1% NSR one half of which can be purchased by the Company for \$750,000 less any NSR amounts previously paid.

During the year ended December 31, 2015, the Option Agreement for Whitford property went into default. The company did not extend the option agreement during the year ended December 31, 2016. Accordingly, the accumulated costs of \$304,799 were written off as at December 31, 2016.

3. Howard Lake

Pursuant to the terms of an Option Agreement dated September 18, 2014 with St. Jacques Mineral Corp. and Urania Resource Corp. When acquiring interests in resource properties through purchase or option, the Company issues common shares or a combination of cash and shares to the vendors of the property as consideration for the property in order to conserve its cash. Risk Factors

The Company is in the business of acquiring, exploring and, if warranted, developing and exploiting natural resource properties. Mineral property exploration is a speculative business and involves a high degree of risk. There is a probability that the expenditures made by the Company in exploring its properties will not result in discoveries of commercial quantities of minerals. A high level of ongoing expenditures is required to locate and estimate ore reserves, which are the basis to further the development of a property. Capital expenditures to support the commercial production state are also very substantial.

Matters related to the principal risks faced by the Company have been disclosed in previous MD&A's filed on SEDAR and continue to apply to the activity and business of the Company.

Related Party Transactions

During the periods ended June 30, 2017 and 2016, the Company entered into the following transactions with related parties:

Capital Management

The Company's objectives when managing capital are to ensure that there are adequate capital resources to safeguard the Company's ability to continue as a going concern and maintain adequate levels of funds to support the acquisition, exploration and development of exploration and evaluation assets such that it can continue to provide returns to shareholders and benefits for other stakeholders.

The Company considers the items included in shareholders' equity as capital. In order to maintain or adjust its capital structure, the Company may issue new shares or sell assets to settle liabilities. In order for the Company to carry out planned exploration and development and pay for administrative costs, the Company will spend its working capital and expects to raise additional amounts externally as needed.

Critical Accounting Estimates

In the application of the Company's accounting policies, which are described in note 2 to the audited consolidated financial statements for the year ended December 31, 2016, management is required to make judgments, apart from those requiring estimates, in applying accounting policies. The most significant judgments applying to the Company's financial statements include:

- the determination of the element of costs recorded as exploration and evaluation assets and determination of reclamation obligations;
- the classification of financial instruments; and
- the determination of the functional currency of the parent company and its subsidiaries.

The preparation of financial statements in accordance with IFRS requires the Company to make estimates and assumptions concerning the future. The Company's management reviews these estimates and underlying assumptions on an ongoing basis, based on experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Revisions to estimates are adjusted for prospectively in the period in which the estimates are revised.

Estimates and assumptions where there is significant risk of material adjustments to assets and liabilities in future accounting periods include the recoverability of the carrying value of exploration and evaluation assets, fair value measurements for financial instruments, the recoverability and measurement of deferred tax assets, provisions for restoration and environmental obligations and contingent liabilities.

Pronouncements that are not applicable or do not have a significant impact to the Company have been excluded from the discussion below.

- IFRS 9 - Financial Instruments; and
- IAS 15 – Revenue from contract with Customers.

The Company does not expect the implementation of these standards to have a significant impact on the Company's results of operations, financial position and disclosures.

Other accounting standards or amendments to existing accounting standards that have been issued but have future effective dates are either not applicable or are not expected to have a significant impact on the Company's consolidated financial statements.

Proposed Transactions

The Company is continuously evaluating new opportunities that could include a joint venture, a disposal of the project or a sale of the Company. While various negotiations may be ongoing at any given time, these may or may not be successful. The Company considers opportunities where there is expected to be significant value to the shareholders. At this date, the Board of Directors have not approved any transaction, nor presented any potential transaction to the shareholders.
