### **Notes to Condensed Consolidated Interim Financial Statements**

(Expressed in Canadian dollars - unaudited)

For the six months ended June 30, 2017 and 2016

# 1. Nature of operations and going concern

Lions Gate Metals Inc. (the "Company") was incorporated under the Canada Business Corporations Act on March 28, 1980, and is in the business of acquiring, exploring and developing mineral properties. The Company is in the exploration stage with mineral properties in Canada. The Company's shares trade on the Canadian Securities Exchange ("CSE") under the symbol "LGM". The Company's registered and records office is located at 918 – 1030 West Georgia Street, Vancouver, British Columbia, Canada, V6E 2Y3.

These condensed consolidated financial statements are prepared on a going concern basis, which contemplates that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business. For the six months ended June 30, 2017, the Company incurred a net loss of \$521,624 (June 30, 2016: \$47,682) and as of that date the Company's deficit was \$25,619,733 (December 31, 2016: \$25,098,109). As at June 30, 2017, the Company had working capital surplus of \$910,873 which should be sufficient to finance exploration and operating costs over the next twelve months. Additional financing may be required to acquire new projects and ongoing costs. These material uncertainties may cast significant doubt about the Company's ability to continue as a going concern. Should the Company be unable to continue as a going concern, the net realizable value of its assets may be materially less than the amounts on its consolidated statement of financial position.

### 2. Basis of presentation and significant accounting policies

# (a) Basis of presentation and statement of compliance

The condensed consolidated interim financial statements of the Company have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"). Therefore, these financial statements comply with International Accounting Standard ("IAS") 34 "Interim Financial Reporting".

The condensed consolidated interim financial statements do not include all of the information required of full annual financial statements and are intended to provide users with an update in relation to events and transactions that are significant to an understanding of the changes in financial position and performance of the Company since the end of the last annual reporting period. It is therefore recommended that this financial report be read in conjunction with the annual financial statements of the Company for the year ended December 31, 2016. However, these condensed consolidated interim financial statements provide selected significant disclosures that are required in the annual financial statements under IFRS.

The condensed consolidated interim financial statements have been prepared on an accrual basis, based on historical costs. The condensed consolidated interim financial statements are presented in Canadian dollars, which is the Company's functional currency.

# (b) Basis of consolidation

These condensed consolidated interim financial statements incorporate the financial statements of the Company and the entities controlled by the Company. These condensed consolidated interim financial statements include the accounts of the Company and its wholly-owned subsidiary Canadian Copper & Gold Corp. Control exists when the Company has the power, directly or indirectly, to govern the financial and operating policies of an entity so as to obtain benefits from its activities. The financial statements of subsidiaries are included in the condensed consolidated interim financial statements from the date that control commences until the date that control ceases. All intercompany transactions and balances have been eliminated on consolidation.

For the six months ended June 30, 2017 and 2016

# 2. Basis of presentation and significant accounting policies - continued

(c) Significant accounting estimates and judgments

The preparation of financial statements requires management to make estimates and judgments that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates and judgments. Those areas requiring the use of management estimates and judgments include:

#### Estimates

(i) Option or sale agreements, under which the Company may receive shares as payment, require the Company to determine the fair value of the shares received. Many factors can enter into this determination, including, if public shares, the number of shares received, the trading value of the shares, and volume of shares, and if non-public shares, the underlying asset value of the shares, or value of the claims under option or sale. This determination is subjective and does not necessarily provide a reliable single measure of the fair value of the shares received.

# Judgments

- (i) Recorded costs of mineral property interests and deferred exploration and evaluation costs are not intended to reflect present or future values of these properties. The recorded costs are subject to measurement uncertainty and it is reasonably possible, based on existing knowledge, that change in future conditions could require a material change in the recognized amount. Management is required, at each reporting period, to review its mineral property interests for signs of impairment. This is a highly subjective process taking into consideration exploration results, metal prices, economics, financing prospects and sale or option prospects. Management makes these judgments based on information available, but there is no certainty that a property is or is not impaired. Although the Company has taken steps to verify title to mineral properties in which it has an interest, these procedures do not guarantee the Company's title. Such properties may be subject to prior agreements or transfers and title may be affected by undetected defects.
- (ii) The determination of deferred income tax assets or liabilities requires subjective assumptions regarding future income tax rates and the likelihood of utilizing tax carry-forwards. Changes in these assumptions could materially affect the recorded amounts, and therefore do not necessarily provide certainty as to their recorded values.
- (iii) These financial statements have been prepared on the basis of the accounting principles applicable to a going concern, which assumes the Company's ability to continue in operation for the foreseeable future and to realize its assets and discharge its liabilities in the normal course of operations. There are several adverse conditions that may cast substantial doubt upon the soundness of this assumption (Note 1).

### 3. Future and Recently Adopted Accounting Standards

### Recently adopted accounting standards

There are no new accounting standards adopted during the current year that have a material impact on the consolidated financial statements.

# 3. Future and Recently Adopted Accounting Standards - continued

# Future accounting standards

Certain pronouncements were issued by the IASB or the International Financial Reporting Interpretations Committee ("IFRIC") that are mandatory for accounting periods after December 31, 2016. Pronouncements that are not applicable or do not have a significant impact to the Company have been excluded from the discussion below.

- IFRS 9 Financial Instruments; and
- IAS 15 Revenue from contract with Customers.

The Company does not expect the implementation of these standards to have a significant impact on the Company's results of operations, financial position and disclosures.

Other accounting standards or amendments to existing accounting standards that have been issued but have future effective dates are either not applicable or are not expected to have a significant impact on the Company's consolidated financial statements.

#### 4. Available-for-sale investments

Available-for-sale investments consist of investments in equity shares. The fair value of the publicly traded shares has been determined by reference to published price quotations in an active market. During the year ended December 31, 2016 most of the available-for sale investments were disposed of. As of June 30, 2017, the remaining available-for-sale investment has no value (December 31, 2016: \$nil).

During the year end December 31, 2016, the Company received 2,500,000 Aldever Resources Inc. ("Aldever") shares as an option payment on the Poplar property and transferred 2,000,000 of the Aldever shares as option payments on the Howard Lake property (Note 7).

# Poplar mineral property

In prior years, the Company entered into various option agreements to acquire a 100% interest in certain mineral claims, known as the Poplar mineral property, located in the Omineca Mining District of B.C. The Company has met all required cash payments and share issuances related to these option agreements.

During the year ended December 31, 2014 the Company entered into an agreement with Aldever to option a 100% interest, subject to existing royalties, in the Poplar property. During the year ended December 31, 2015, The Company received 1,500,000 Aldever shares with a fair value of \$195,000 as option payments and recorded an impairment of \$45,038.

On January 8, 2016, the Company amended its agreement with Aldever and received 2,500,000 of Aldever shares with a fair value of \$500,000 (Note 4). The agreement was defaulted by Aldever during 2016.

# 7. Mineral property interests - continued

#### Poplar mineral property - continued

On November 1, 2016, the Company entered into a sale agreement to sell the Poplar mineral property for a consideration of 10,000 Class L Redeemable, participating preferred shares of Doctors Investment Group Ltd. As the fair value of the preferred shares are not readily measurable, no value was attributed to the preferred shares. An impairment of \$2,231,663 on the Poplar property was recorded as a result of the sale of this property.

### Whitford Lake mineral property

Pursuant to the terms of an Option Agreement dated February 18, 2013, and amended on August 26, 2013, with St. Jacques Mineral Corp., the Company had agreed to acquire an undivided 100% interest in the Whitford Lake Property located in the Athabasca Basin in Saskatchewan. In September 2013, the Company entered into a Whitford Lake Option Assignment Agreement with Canadian Uranium Corp. ("CanU"), which was later amended on December 1, 2013 and August 18, 2014, whereby the Company would transfer all of its interest in the Whitford Lake Option Agreement to CanU. This property is subject to a 1% NSR one half of which can be purchased by the Company for \$750,000 less any NSR amounts previously paid.

During the year ended December 31, 2015, the Option Agreement for Whitford Property went into default. The company did not extend the option agreement during the year ended December 31, 2016. Accordingly, the accumulated costs of \$304,799 were written off as at December 31, 2016.

### Howard Lake mineral property

Pursuant to the terms of an Option Agreement dated September 18, 2014 with St. Jacques Mineral Corp. and Urania Resource Corp. (the "Vendors"), the Company can earn a 100% interest in the Howard Lake Project located on the northeast shore of Howard Lake in Saskatchewan. The property is subject to a 1% Gross Overriding Royalty ("GORR") that has been granted to the vendors relating to the claims held by each of them. The Company may purchase half of the GORR (0.5%) from each vendor for \$1,000,000.

On August 20, 2016, the Company amended its option agreement with the vendors for the Howard Lake Option Agreement.

During the year ended December 31, 2015, the Company recorded a write-down of \$38,667 due to the lapse of two claims with respect of the Howard Lake mineral property.

In July 2017, the Company provided the optionors of the Howard Lake property with a notice of termination of the option agreement. Accordingly, accumulated expenses of \$224,448 were written off as of June 30, 2017.

#### 8. Share capital

On November 18, 2016 the common shares of the Company were consolidated on the basis of four preconsolidation common shares for one post-consolidation common share. The Company's options and warrants were also consolidated on the same basis. All shares, options and warrant information are reflected on a postconsolidation basis.

# a) Authorized

- i) Authorized unlimited number of common shares without par value

# d) Stock options

The Company has a Rolling Incentive Stock Option Plan ("the Plan") under which non-transferable options to purchase common shares of the Company may be granted to directors, officers, employees or consultants of the Company. A maximum of 10% of the issued and outstanding common shares of the Company may be reserved for issuance pursuant to the exercise of stock options. Terms of the Plan, considered to be the most significant, provide that the Directors have the right to grant options to acquire common shares of the Company at a price not less than the closing market price of the shares on the date the Company grants the option, less any discount permitted by the CSE, at terms of up to ten years. The majority of stock options vest immediately on the date of grant unless otherwise required by the CSE or the Board of Directors.

On December 8, 2016, the Company granted 2,375,000 stock options to directors and consultants of the Company at an exercise price of \$0.165 per common share for a period of five years ending December 8, 2021. The stock options vest as at 25% every three months after the grant date. The fair value of the options granted was determined to be \$329,703 using the following assumptions: Risk-free rate of 1.07%; Expected life of 5 years, Expected volatility of 125% and dividend yield of nil. During the six months ended June 30, 2017, the Company recognized share-based payment of \$228,694 (2016: \$nil) in net loss.

The balance of stock options outstanding and exercisable for as at June 30, 2017 is as follows:

### 10. Financial instruments and risk management - continued

#### Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The company's primary exposure to credit risk is on its cash held in bank accounts. The majority of cash is deposited in bank accounts held with a major bank in Canada. This risk is managed by using major banks that are high credit quality financial institutions as determined by rating agencies. Credit risk is assessed low.

# Liquidity risk

Liquidity risk is the risk that the Company cannot meet its financial obligations as they become due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to settle liabilities and obligations when they become due. As at June 30, 2017, the Company had cash and receivables of \$934,487 to settle current liabilities of \$23,614. Liquidity risk was assessed as low.

#### Market risk

Market risk consists of currency risk, interest rate risk and other price risk. The objective of market risk management is to manage and control market risk exposures within acceptable limits, while maximizing returns.

#### Foreign currency risk

Foreign currency risk is the risk that the fair values of future cash flows of a financial instrument will fluctuate because they are denominated in currencies that differ from the respective functional currency. The Company has no foreign exchange rate risk.

### Interest rate and commodity price risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Commodity price risk is the risk of financial loss resulting from movements in the price of the Company's commodity inputs and outputs. The Company is not significantly exposed to interest rate or commodity price risk.

# 11. Segmented reporting

The Company operates in one reportable operating and geographic segment, being the exploration and evaluation of mineral properties in Canada.

#### 12. Capital management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern and to maintain a flexible capital structure which will allow it to pursue the exploration and development of mineral properties.

In order to maintain or adjust its capital structure the Company may issue new equity if it is available on favorable terms, finance through debt, option its mineral properties for cash and/or expenditure commitments from optionees, enter into joint venture agreements, or dispose of mineral properties.

The Company is dependent on capital markets as its sole source of operating capital and the Company's capital resources are largely determined by the strength of the junior resource markets, by the status of the Company's projects in relation to these markets and by its ability to compete for investor support of its projects. The Company is not subject to externally imposed capital requirements and there were no changes in the Company's management of capital during the period ended June 30, 2017. The Company's capital structure consists of shareholders' equity, which is comprised of share capital net of accumulated deficit. In order for the Company to carry out planned exploration and development and pay for administrative costs, the Company will spend its working capital and intends to raise additional amounts externally as needed.
