FOR IMMEDIATE RELEASE
4:00 p.m. February 20, 2014

SenterNet Phi Gamma Inc. completes Phase 1 testing of its four- layered algorithmic authentication for smartphone users.

TORONTO, ONTARIO, CANADA – February 20, 2014 – SenterNet Phi Gamma Inc. (“the Company”) a Toronto based public company, completes Phase 1 testing for its unique multifunctional device with a four-layered authentication process for smart devices (smartphones, tablets and phablets).

With security breaches on the rise and the stolen smartphone problem an international growing crisis, the Company uses a four-step authentication solution to secure and protect personal and private data on your smart device. In addition, the Company’s solution can also identify, track and locate your smart device.

As a first step in its international plans, the Company is focusing on establishing its presence in the Israeli high-tech industry/silicon valley and has registered senternetphigamma.co.il. It believes that it has a natural affinity in the Israeli high-tech industry with its revolutionary technologies for smart devices i.e. its four-layered authentication key fob.

Further to shareholder approval, the company has completed a return of capital by the issue of four common shares for each common share held increasing the number of common shares to 33,471,650.

About SenterNet Phi Gamma Inc.
