
ACME RESOURCES INC.

Management Discussion and Analysis

For the Six Months Ended December 31, 2016

INTRODUCTION

The following management discussion and analysis (MD&A) of the financial position of Acme Resources Inc. (“Company”) and its investment in Golden Harp Resources Inc. (GHR) and results of operations should be read in conjunction with the unaudited condensed interim financial statements and accompanying notes for the six months ended December 31, 2016. The unaudited condensed interim financial statements together with the following management discussion and analysis are intended to provide readers with a reasonable basis for assessing the financial performance of the Company as well as forward-looking statements relating to potential future performance. All statements, other than those of historical fact, included in this MD&A, including without limitation, statements regarding potential mineralization and reserves, exploration results and future plans and objectives of the Company, are forward-looking statements that involve various risks and uncertainties. There can be no assurance such statements will prove accurate and actual results and future events could differ materially from those anticipated in such statements.

DATE

This MD&A includes material occurring up to and including February 27, 2017.

FORWARD LOOKING STATEMENTS

This MD&A contains certain statements that may constitute “forward looking statements”. Forward looking statements include, but are not limited to, statements regarding future anticipated property acquisitions, the content, cost, timing and results of future anticipated exploration programs, the anticipated discovery and delineation of mineral resources/reserves, proposed business and financing plans (including private placements of equity securities), anticipated business trends and potential future operating revenues. Although the Company believes that such statements are reasonable, it can give no assurance that such expectations will prove to be correct. Forward-looking statements are typically identified by words such as: believe, expect, anticipate, intend, estimate, postulate and similar expressions or are those which, by their nature, refer to future events. The Company cautions investors that any forward-looking statements by the Company are not guarantees of future performance, and that actual results may differ materially from those in forward-looking statements as a result of various factors, including, but not limited to, the Company’s inability to negotiate successfully for the acquisition of interests in mineral properties, the Company’s inability to identify one or more economic deposits on its properties, variations in the nature, quality and quantity of any mineral deposits that may be located, the Company’s inability to obtain any necessary permits, consents or authorizations required for its activities, to produce minerals from its properties successfully or profitably, to continue its projected growth, to raise the necessary capital or to be fully able to implement its business strategies.

Historical results of operations and trends that may be inferred from this MD&A may not necessarily indicate future results from operations. In particular, the current state of the global securities markets may cause significant reductions in the price of the Company’s securities and render it difficult or impossible for the Company to raise the funds necessary to continue operations.

All of the Company’s public disclosure filings, including its most recent management information circular, material change reports, press releases and other information, may be accessed via www.sedar.com under Acme Resources Inc. and readers are urged to review these materials, including the technical reports filed with respect to the Company’s mineral properties.

DESCRIPTION OF BUSINESS

Acme Resources Inc. was incorporated in the Province of British Columbia. The Company is a reporting issuer in British Columbia and its shares traded on the TSX Venture Exchange under the symbol ARI. The Company is engaged in the acquisition, exploration and developing of mineral properties in British Columbia, Saskatchewan and the Yukon Territory. The Company is currently focusing on identifying exploration new opportunities and joint ventures for its properties.

OVERALL PERFORMANCE

At this time, the Company does not own any operating mines and has no operating income/sales from mineral production. Funding for operations is raised primarily through public and private share offerings. Future operations and the Company’s ability to meet mineral property option commitments are dependent on the Company’s ability to raise sufficient funding through share offerings or operations to support current and future expenditures. At December 31, 2016, the Company had working capital deficit of \$41,499.

Realization of the carrying value of mineral interests is dependent upon funding, the ability of the Company and third parties to bring mineral interests into profitable production, or recovery from sale.

The unaudited condensed interim financial statements have been prepared on a going concern assumption which contemplates the Company will continue in operation and realize its assets and discharge its liabilities in the normal course of operations. Should the going concern assumption not continue to be appropriate, further adjustments to carrying values may be required.

RESULTS OF OPERATIONS – MINERAL PROPERTIES

There were no expenditures on mineral interests during the six months ended December 31, 2016, however the Bear River property was disposed of during the quarter for 800,000 common shares of the purchasing company with fair value of \$52,000.

Net income in the six month period ended December 31, 2016 was \$104,202 compared to a net loss of \$47,515 for the same period in the prior year, reflecting a net overall increase in income of \$151,717. Most line items remained relatively consistent year over year although the Company did record a decrease in interest expenses as a result of all promissory notes being settled for shares in the fourth quarter of 2016. Also there was a decrease in office and miscellaneous as a result of lower office rent expenditures and an increase in professional fees as a result of legal fees from the issuance of an in specie dividend as noted below. Transfer agent and filing fees increased due to the costs associated with an annual general meeting held during the second quarter 2017. Other income items contributed to the largest variation in income through a gain on the disposal of marketable securities, a gain on the sale of the Bear River exploration property, and the recovery of investment realized as a dividend in specie of Golden Harp Resources shares was declared to existing shareholders.

EXPLORATION EXPENDITURES

Nor Property, Yukon

The Nor IOCG (iron oxide-copper-gold) property is located on the east flank of the Richardson Mountains, about 65 km east of the Dempster Highway and 395 km north of Dawson City. During fiscal 2009 the Company earned a 100% interest in the property. The Company paid \$207,500 cash and issued 66,667 shares.

Certain claims are subject to a 2% NSR royalty. The Company has the right to purchase 50% of the NSR royalty retained by the Optionor for a purchase price of \$2,000,000 and the right of first refusal on the remaining 50%.

During the year ended June 30, 2014, fuel left on the Nor Property was removed in order to satisfy permit requirements. The fuel was then sold and resulted in a recovery of \$10,559. Subsequent to the removal of the fuel and other items left on site, the Yukon Ministry of Energy, Mines and Resources issued a Certificate of Completion for the Company's exploration permit.

The Company completed no exploration on the Nor property during the current quarter.

Bear River Property, BC

The Company's Bear River property is located in the Skeena Mining Division, BC, in the historic Stewart Gold Camp. After expiry of the Old John claim during the fiscal year ended May 31, 2010, the Company owns 100% interest in only one (and a fraction) mineral claims, covering an approximate area of 475 hectares (1,175 acres), with the one claim being subject to a 3.5% NSR.

The Company incurred no exploration expenditures on the Bear River property during the fiscal year.

On November 9, 2016 the Company announced that it had sold the Bear River property for a total price of 800,000 shares of the purchaser for a price of \$0.065 per share.

Middle Lake Property, Saskatchewan

The Middle Lake uranium property is located in the uranium-rich Athabasca Basin. During October, 2004, the Company staked 1 claim, consisting of 5,990 acres in the Athabasca Basin area of Saskatchewan. The Company's claim, in the Cluff Lake Structure, also known as the Carswell Dome, is located on the west side by the mining licenses of the past producing Cluff Lake Mine. The claim covers 2,416 hectares (5,970 acres). Acme Resources Inc. granted an option to Alpha Minerals Inc. ("Alpha") (previously ESO Uranium Corp.) to acquire a 50% interest in the property in return for \$25,000 cash consideration, 200,000 shares and a \$100,000 work commitment. During the fiscal 2009, Alpha met the terms of the option agreement and has a 50% interest in the property.

Pursuant to a Joint Venture Agreement dated July 24, 2008, the Company granted Alpha a further 30% interest in the claim, resulting in the third party having a 80% undivided interest in the property, subject to the delivery of a bankable feasibility study. The Company will retain a carried interest until the feasibility study is delivered, at which time the Company will have the choice to take on a 20% participating interest in a new company to operate the production facility or take on a 2% gross overriding royalty for all uranium mineral products and a 2% net smelter returns royalty for all other metals.

Alpha completed and released the results of a 3,287 meter drill program in 31 holes in the Donna zone at the Middle Lake property during the 2014 fiscal year. It was also announced that ten holes showed elevated radioactivity and strong alteration. The Alpha team considers the first phase of drilling to have been an encouraging first step towards locating shallow mineralization that may be associated with a source area of the historical Donna boulder field located down-ice to the southwest. Further information regarding the results of the winter drill program can be found in Acme's press release dated April 1, 2014.

Alpha announced a winter program at Middle Lake during the current quarter. Alpha commenced the 17 hole program in February 2015. A total of 1,850 meters were drilled in total. No significant radioactivity was intersected during the drill program.

Alpha will return all the Company's interest in any of the claims upon a decision by Alpha to terminate work thereon. The 2008 Joint Venture Agreement remains in good standing.

FINANCIAL SUMMARY

During the six month period ended December 31, 2016, the Company raised \$Nil from private placements. The Company has entered into three loan agreements with a relative of a director of the Company for a total of \$39,604, along with \$523 of accrued interest. The notes are evidenced by term promissory notes in the amounts of \$6,064 due September 16, 2017, \$17,000 due October 31, 2017 and \$16,000 due December 20, 2017 or earlier upon default by the Company. The term promissory notes bear interest at the rate of 10% per annum payable at the end of each respective term.

The Company spent \$Nil on its mineral interests or exploration expenditures during the six month period ended December 31, 2016. Other components of the Company's expenses for the six month period ended December 31, 2016 included office and miscellaneous expenses of \$16,319, consulting fees of \$7,500, transfer agent and filing fees of \$10,812 and interest expense of \$523. The Company received \$39,604 from the proceeds of three loan agreements (due September 16, 2017, October 31, 2017, and December 20, 2017) and also received proceeds from the sale of marketable securities in the amount of \$7,308 during the six month period ended December 31, 2016. There was a net increase in cash and cash equivalents of \$5,993 for the six month period ended December 31, 2016.

RESULTS OF OPERATIONS

Net income in the six month period ended December 31, 2016 was \$104,202 compared to a net loss of \$47,515 for the same period in the prior year. The primary contributor to the difference between periods was other items including a gain on the sale of marketable securities, a gain on the sale of an exploration property and the recovery on investment realized upon the payment of an in specie dividend. These increases to income were partially offset by increases in professional fees and transfer agent and filing fees. Given the Company has made limited exploration expenditures, expenses are primarily comprised of general administrative costs which remain relatively constant between periods combined with other items that has resulted in a net income for the period.

SUMMARY OF QUARTERLY RESULTS

The following table sets forth a comparison of revenues and earnings for the previous eight quarters ending with December 31, 2016. Financial information is presented in Canadian dollars and is prepared in accordance with IFRS.

	Dec 31, 2016	Sept 30, 2016	Dec 31, 2015	Mar 31, 2016	Dec 31, 2015	Sept 30, 2015	June 30, 2015	Mar 31, 2015
Net income (loss)	104,202	(21,561)	(34,645)	(32,511)	(24,410)	(23,105)	(21,331)	(26,535)
Net income (loss) per share (Basic and diluted)	0.007	(0.001)	(0.003)	(0.003)	(0.002)	(0.002)	(0.002)	(0.002)

Discussion

The Company is an exploration company without revenues

The operating results of junior exploration companies are capable of demonstrating wide variations from period to period due to variances in exploration expenditures and write-downs of mineral properties. Other than the descriptions regarding administrative costs already discussed, management of Acme Resources does not believe that meaningful information about the Company's operations can be derived from an analysis of quarterly fluctuations in any more detail than presented herein.

The Company's significant accounting policies are set out in Note 2 of the unaudited condensed interim financial statements for the six month period ending December 31, 2016. Only new or changes to significant accounting policies are included. A complete list of significant accounting policies can be found in the annual audited financial statements for the year ended June 30, 2016. All financial amounts are in Canadian dollars.

The condensed interim unaudited financial statements for the six month period ending December 31, 2016 have been prepared on a going concern assumption which contemplates the Company will continue in operation and realize its assets and discharge its liabilities in the normal course of operations as disclosed in Note 1 of the unaudited interim financial statements.

LIQUIDITY AND CAPITAL RESOURCES

At December 31, 2016, the Company held cash \$12,320 of compared to \$21,369 at June 30, 2016. Accounts payable and accrued liabilities of \$60,224 are comprised of normal trade payables for ongoing operations and accrued liabilities.

The Company has insufficient cash to continue funding its current property maintenance and administrative costs for the remainder of the current fiscal year. The Company will need to raise further funds should it decide to undertake future exploration programs and/or acquire additional exploration assets.

The Company periodically seeks additional financing through the issuance of equity. While the Company has been successful in raising capital in the past, there can be no assurance it will be able to do so in the future.

The Company has no material debt obligations, other than short-term liabilities incurred in normal activities. The Company has no long-term debt.

OFF BALANCE SHEET ARRANGEMENTS

The Company has no off-balance sheet arrangements that would potentially affect current or future operations, or the financial condition of the Company.

TRANSACTIONS WITH RELATED PARTIES

The Company incurred the following related party transactions with companies that are controlled by a relative of a director of the Company.

	Six Months Ended	
	December 31, 2016	December 31, 2015
Interest expense – relative of a director of the Company	\$ 523	\$ 9,155

Key management personnel compensation

	Six Months Ended	
	December 31, 2016	December 31, 2015
Consulting fees - payments made to officers	\$ 7,500	\$ 7,500

Related party balances

Three promissory notes totaling \$39,604 (June 30, 2016 – \$NIL) and accrued interest of \$523 (June 30, 2016 – \$NIL) are payable to a relative of a director of the Company.

Included in trade payables and accrued liabilities at December 31, 2016 is \$39,392 (June 30, 2016 – \$31,500) owed to an officer of the Company for accrued consulting fees.

SUBSEQUENT EVENTS

On January 4, 2017, the Company announced that a new Board of Directors was voted in at the Company's Annual General Meeting.

PROPOSED TRANSACTIONS

The Company does not currently have any proposed transactions approved by the Board of Directors. All current transactions are fully disclosed in the unaudited interim financial statements for the six month period ended December 31, 2016.

ACCOUNTING POLICIES

Basis of preparation

Significant accounting policies can be found in Note 2 of the financial statements for the six month period ended December 31, 2016. A complete list of significant accounting policies can be found in Note 2 of the audited annual financial statements for the year ended June 30, 2016. The condensed interim financial statements of the Company have been prepared on an accrual basis and are based on historical costs, modified where applicable. The condensed interim financial statements are presented in Canadian dollars unless otherwise noted.

RISKS AND UNCERTAINTIES

Resource exploration is a speculative business and involves a high degree of risk. There is no certainty that the expenditures made by the Company in the exploration of properties will result in discoveries of commercial quantities of minerals. Exploration for mineral deposits involves risks which even a combination of professional evaluation and management experience cannot eliminate. Significant expenditures are required to locate and estimate ore reserves, and further the development of a property. Capital expenditures to bring a property to a commercial production stage are also significant. There is no assurance the Company has, or will have, commercially viable ore bodies. There is no assurance that the Company will be able to arrange sufficient financing to bring ore bodies into production. The following are some of the risks to the Company, recognizing that it may be exposed to other additional risks from time to time

- Limited business history of the Company, including lack of revenues and no assurance of profitability
- Dependence on key management personnel
- Reliance on availability and performance of independent contractors
- Challenges by other unknown parties to property title
- Environmental issues
- Federal and provincial political risk
- Commodity price risk
- Financial markets

The Company is diligent in minimizing exposure to business risk, but by the nature of its activities and size, will always have some risk. These risks are not always quantifiable due to their uncertain nature. Should one or more of these risks and uncertainties materialize, or should underlying assumptions prove incorrect, then actual results may vary materially from those described on forward-looking statements.

OUTSTANDING SHARE CAPITAL

At February 27, 2017, the Company had the following number of securities outstanding:

Securities	Number	Exercise Price	Expiry Date
Common shares issued and outstanding	16,776,435	N/A	N/A
Share purchase options	-	N/A	N/A
Fully diluted share Capital	16,776,435	N/A	N/A

ADDITIONAL INFORMATION

Additional information relating to the Company's news releases and filings can be found on the SEDAR website: www.sedar.com.

DISCLOSURE BY VENTURE ISSUER WITHOUT SIGNIFICANT REVENUE

An analysis of the material components of the Company's general and administrative expenses is disclosed in the unaudited interim condensed financial statements for the six month period ended December 31, 2016 to which this MD&A relates. An analysis of the material components of the acquisition and deferred exploration costs of the Company's mineral property is disclosed in Note 8 to the unaudited interim condensed financial statements for the six month period ended December 31, 2016 to which this MD&A relates.
